STATE OF DELAWARE
OFFICE OF THE GOVERNOR
TUDGAL BUILDING, SECOND FLOOR
WILLIAM PENN STREET, DOVER, DE 19901

JACK A. MARKELL
GOVERNOR

PHONE: 302-744-4101
FAX: 302-739-2775

To the People of Delaware
and the Honorable Members of the
146th General Assembly:

I am pleased to present the Comprehensive Annual Financial Report (CAFR) for the State of Delaware for the fiscal year ended June 30, 2010. In addition to providing sound information for investors, policymakers and legislators, this all-inclusive financial report is designed to encourage taxpayers to understand their state government's financial activities. The CAFR includes the State's basic financial statements, prepared in conformity with U.S. generally accepted accounting principles and audited by the independent firm of KPMG LLP.

In spite of our recent economic challenges, I am pleased that each of the three major rating agencies, Moody's Investor Service, Fitch Ratings and Standard & Poor's, has recently reaffirmed the State's triple-A bond rating. Delaware is one of only eight states that hold the highest ratings and it places us among the most creditworthy states in the nation.

Please review the financial statements and disclosures presented here.

Sincerely,

A handwritten signature in blue ink that reads "Jack Markell".

Jack A. Markell
Governor

State of Delaware

Comprehensive Annual Financial Report

For the Fiscal Year Ended June 30, 2010

Jack A. Markell
Governor

Thomas J. Cook
Secretary, Department of Finance

Valerie M. Watson
Acting Director, Division of Accounting

Prepared by the Department of Finance, Division of Accounting

This document and related information is available at <http://accounting.delaware.gov/>

Acknowledgments

The State of Delaware's Comprehensive Annual Financial Report was prepared by the Department of Finance, Division of Accounting, Financial Accounting & Reporting Section:

Dawn Haw-Young, CPA, CGFM, CICA
Manager of Financial Reporting & Internal Control

Elijah Wilson, CICA
State Accountant V

Brennon Fountain, CICA
State Accountant IV

Jennifer Spence, CICA
State Accountant IV

Christine Talley, CICA
State Accountant IV

Special appreciation to:

All fiscal and accounting personnel throughout the State whose efforts and cooperation to submit accurate, timely financial data for their agencies made this report possible.

INTRODUCTORY SECTION

**STATE OF DELAWARE
DEPARTMENT OF FINANCE
OFFICE OF THE SECRETARY**

**THOMAS J. COOK
SECRETARY OF FINANCE**

December 29, 2010

To the Citizens, Governor, and
Members of the Legislature of the
State of Delaware:

It is my pleasure to present the Comprehensive Annual Financial Report (CAFR) for the State of Delaware (the State) for the fiscal year ended June 30, 2010. This report has been prepared in accordance with U.S. generally accepted accounting principles (GAAP) applicable to state and local governments, as prescribed by the Governmental Accounting Standards Board (GASB). The State continues to follow the recommendations of the Government Finance Officers Association of the United States and Canada (GFOA) for the form and content of government financial reports and participates in the GFOA's program for the Certificate of Achievement for Excellence in Financial Reporting.

Responsibility for both the accuracy of the data, as well as the completeness and fairness of the CAFR's presentation, rests with the Department of Finance. To the best of our knowledge and belief, the information presented is accurate in all material respects and fairly sets forth the State's financial position and results of operations in accordance with GAAP and based upon the internal control structure established by management. All disclosures necessary to enable the reader to gain an understanding of the State's financial activities are included.

GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*, requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of a MD&A. This letter of transmittal is designed to complement the MD&A and should be read in conjunction with it. The State's MD&A can be found immediately following the report of the independent auditors.

PROFILE OF THE GOVERNMENT

The State is located on the eastern seaboard of the United States and is bordered by the Atlantic Ocean, the Delaware Bay and the states of New Jersey, Pennsylvania and Maryland. The State is 96 miles long and has a land area of 1,955 square miles. Over 873,000 people reside here. As the first state to ratify the United States Constitution on December 7, 1787, Delaware is known as "The First State." The structure of Delaware's government, which is similar to other states, consists of three branches that operate through a system of checks and balances. The executive branch is comprised of the Governor, Lt. Governor, State Treasurer, State Auditor, Attorney General and Insurance Commissioner. The legislative branch is bicameral and consists of a 21-member Senate and a 41-member House of Representatives. The judicial branch includes the Supreme Court, Superior Court, Court of Chancery, and other courts.

**Carvel State Office Building, 820 N. French St., 8th Floor, Wilmington, Delaware 19801
Telephone: (302)577-8979 • Fax: (302)577-8982**

The State's reporting entity reflected in the CAFR, which is described more fully in Note 1 to the basic financial statements, conforms to the requirements of GASB Statement No. 14, *The Financial Reporting Entity*, as amended by GASB Statement No. 39, *Determining Whether Certain Organizations are Component Units*. Further, GASB Statement No. 14 provides that the financial statements should emphasize the primary government and permit financial statement users to distinguish between the primary government and its component units. Consequently, the transmittal letter, MD&A, and the financial statements focus on the primary government and its activities. Although information pertaining to the discretely presented component units is provided, their separately issued financial statements should be read to obtain a complete overview of their financial position.

The State budgets and controls its financial activities on the cash basis of accounting during its fiscal year. In compliance with State law, the State records its financial transactions in either of two major categories - the budgetary general fund or budgetary special funds. References to these funds include the terms "budgetary" or "budgetary basis" to differentiate them from the GAAP funds of the same name which encompass different funding categories. GAAP fund definitions for accounting purposes differ from those of the budgetary basis general and special funds and are fully explained in Note 1 to the basic financial statements.

The budgetary general fund provides for the cost of the State's general operations and is credited with all tax and other revenue of the State not dedicated to budgetary special funds. All disbursements from the budgetary general fund must be authorized by appropriations of the General Assembly.

Budgetary special funds are designated for specific purposes. The appropriate budgetary special fund is credited with tax or other revenue allocated and is charged with the related disbursements. Examples of specific uses of budgetary special funds include the Transportation Trust Fund, which collects some of its revenue through motor fuel taxes and tolls. Federal payments, unemployment compensation and local school funds are examples of nonappropriated special funds. Some special funds, such as the Delaware State Housing Authority and the State Pension Office, contain both appropriated funds for operations and non-appropriated funds for specific programs, such as public housing and pension benefits.

Federal funds, which are credited to budgetary special funds, are not appropriated, but are subject to the review and approval of the State Office of Management and Budget and the Delaware State Clearinghouse Committee for Federal Aid Coordination. The Committee is comprised of 10 members, including the Secretary of Finance, Director of the Office of Management and Budget, Director of the Delaware Economic Development Office, the Controller General, and six legislators.

Budgetary Control and Financial Management Systems

Disbursements are controlled by an encumbrance accounting system designed to provide information on the actual extent of the State's obligations and guard against over-committing available funds. Appropriations are reduced immediately when purchase orders are issued for goods and services. The total amount of budgetary general fund cash disbursements, plus unliquidated encumbrances, cannot exceed the amount appropriated by the General Assembly for any specific budgetary line items by department. Internal controls prevent State organizations from spending beyond budgetary limits (see Notes to Required Supplementary Information for more details).

Although the majority of the State's financial transactions are processed through the State's primary accounting system, certain special funds have financial activity external to that system, such as the

Transportation Trust Fund, the Delaware State Housing Authority and Delaware State University. This activity is governed in strict adherence to legislative regulations and guidelines established by their boards. In addition, these entities are audited annually and produce published financial reports.

Budget Process

Each fall, State organizations submit requests for operating and capital funds for the next fiscal year to the Office of Management and Budget and public hearings are held to review the requests. The Governor's proposed operating and capital budgets for the general fund and special funds, including the Transportation Trust Fund, are then drafted and presented by the Governor to the General Assembly in January. The General Assembly's Joint Finance and Bond Bill Committees hold hearings and mark up the Governor's proposed operating and capital budgets. As amended, the budgets are expected to be enacted on July 1.

Appropriation Limit

The State Constitution limits annual appropriations by majority vote of both houses of the General Assembly to 98% of estimated budgetary general fund revenue plus the unencumbered budgetary general fund balance from the previous fiscal year. An exception to this limit may be made in the event of a declared emergency, with the approval of a three-fifths vote of the members of each house of the General Assembly. No appropriation may be made which exceeds 100% of estimated budgetary general fund revenue plus the unencumbered general fund balance from the previous fiscal year.

Tax Limitations

The State Constitution was amended in May 1980 to limit tax and license fee increases or the imposition of any new taxes or fees to a three-fifths vote of each house of the General Assembly, rather than by a simple majority vote. An exception exists for tax increases to meet debt service on outstanding obligations of the State for which insufficient revenue is available when such debt service is due.

Revenue and Expenditure Forecasting

The Delaware Economic and Financial Advisory Council (DEFAC), an entity created by executive order in 1977, is required to submit revenue forecasts for the budgetary general fund and Transportation Trust Fund to the Governor and the General Assembly. The committee is comprised of 34 members, appointed by the Governor, from the executive and legislative branches of State government and the private sector.

DEFAC prepares revenue estimates six times each fiscal year in September, December, March, April, May and June for the current fiscal year and the succeeding two fiscal years. A revenue forecast for the current fiscal year and the succeeding four fiscal years is generated once each year, generally in September. Budgetary general fund and Transportation Trust Fund expenditure forecasts are generated for the current fiscal year in December, March, April, May and June.

The revenue and expenditure forecasts are used in the State budget process to ensure State compliance with constitutional limits on spending and statutory debt limitations. In addition, DEFAC

advises the Governor and General Assembly on economic conditions in the State and advises the Governor and the Secretary of Finance on tax policy. DEFAC meetings are open to the public and provide a general forum for members of the public and private sectors to exchange views on matters of economic and fiscal concern for the State.

ECONOMIC CONDITION AND OUTLOOK

Since fiscal 2004, the State's economic performance has been mixed relative to national trends. While Delaware's income growth has largely matched that of the United States, the State's employment growth has failed to keep pace with national trends. While the State's ties to the national economy are unmistakable, throughout the recent business cycle, the State consistently posted lower unemployment rates than the United States.

The State's mixed recent performance is due, in part, to the changing composition of its economic base. With a heavy concentration in financial services, the State's economy could not avoid the effects of recent industry turmoil. Despite this uncertainty, the State's major employers, Bank of America and JP Morgan Chase, for example, continue to maintain a major presence in the State. At the same time, relative new comers, like ING and Barclays, demonstrate that Delaware should maintain its position as a financial center.

Delaware's long-established manufacturing sectors, automobiles and fibers have also suffered as a result of the worst economic downturn since World War II. With both of the State's automobile assembly plants and its sole oil refinery no longer in operation, the State's blue collar employment has suffered. In response to these setbacks, however, the State has made important strides to reinvigorate and modernize its manufacturing base. A buyer for the Delaware City refinery has been identified and initial signs point to a spring 2011 reopening of the facility. Fisker Automotive's purchase of the State's former General Motors assembly plant has given the facility new life. Fisker is expected to invest \$175 million in the facility in order to produce the Nina, a family sedan that will feature a plug-in hybrid power vehicle.

Since the adoption of the Financial Center Development Act in 1981, diversifying the State's economy has consistently ranked among State policymakers' highest priorities. The State's economic development efforts have followed a two-pronged approach. Broadly speaking, the State has continually improved its business climate using a combination of prudent fiscal management, judicious tax policy, and strategic investments in public education and infrastructure. When faced with specific challenges, alert and supportive policymakers have teamed with the business community to develop effective policy responses to a changing economic landscape.

In March 2010, the U.S. Department of Education announced that the State was one of only two recipients to be awarded "Race to the Top" federal funding. Race to the Top is a federal education funding program that is funded under the American Recovery and Reinvestment Act to reward states for aggressively reforming their education systems. The State will receive over \$100 million in Race to the Top funding which will be paid out over the next four years.

In May 2009, Governor Jack Markell signed a sports betting bill into law that reactivated a sports lottery in Delaware, one of only four states exempt from the federal ban on sports betting under the Professional and Amateur Sports Protection Act enacted in 1992. Delaware's bill allows a sports lottery in the State's three existing racinos, using single game wagers on professional and certain collegiate athletic events. Delaware's position was challenged by the National Football League ("NFL") and other pro sports leagues, along with the NCAA, and in August 2009, a three-judge panel of the 3rd U.S. Circuit

Court of Appeals declared that the State's single-game bets and wagering on a variety of professional and collegiate sports violated the federal law. The State appealed the 3rd Circuit's decision to the United States Supreme Court which on May 3, 2010 declined to hear the case. As such, the State's three racinos will continue to offer three-game parlay bets on NFL games. In January 2010, Delaware passed legislation permitting its racinos to operate table games such as blackjack, craps and roulette. Table games, which are expected to enhance the State's position in an increasingly competitive gaming market, increase employment, and add revenue to the State's coffers are expected to be operational early in fiscal 2011.

The State continues to pursue high technology industries, including life sciences research and development, pharmaceuticals, agricultural biotechnology, human biotechnology, information technology and, more recently, alternative energy and other green industries. The State has made a significant investment to establish the Delaware Biotechnology Institute, a partnership involving State government, Delaware's higher education institutions and the private sector. The Institute is designed to expand the State's scientific base and create opportunities for the development of new technologies in the emerging life sciences field.

The State's business friendly legal system continues to attract new incorporations. In recent years, more than 70% of new U.S. initial public offerings ("IPO") have chosen the State of Delaware as their legal domicile. Even though IPO activity has suffered from economic and other factors, the State has continued to register a record number of business formations in the form of LLCs and LPs.

INDEPENDENT AUDIT

The accounting firm of KPMG LLP has audited the State's basic financial statements for the fiscal year ended June 30, 2010. Based upon that audit, the independent auditor has issued an unqualified opinion that the State of Delaware's basic financial statements are fairly presented in conformity with GAAP. Their report on the basic financial statements has been included in the financial section of this CAFR.

The State Auditor of Accounts performs periodic financial and compliance audits of the various State departments, agencies and institutions of higher education and has primary responsibility for conducting audits under the federal Single Audit Act of 1984 which was amended by Single Audit Act of 1996. Results of these audits may be found in separately issued audit reports and may be obtained by contacting the Office of Auditor of Accounts, Townsend Building, Suite 1, 401 Federal Street, Dover, Delaware 19901.

CERTIFICATE OF ACHIEVEMENT

The Government Finance Officers Association of the United States and Canada (GFOA) awarded the Certificate of Achievement for Excellence in Financial Reporting to the State of Delaware for its CAFR for the fiscal year ended June 30, 2009. The Certificate of Achievement is a prestigious national award that recognizes conformance with the highest standards for preparation of state and local government financial reports. In order to be awarded a Certificate of Achievement, a government unit must publish a timely, easily readable, and efficiently organized comprehensive annual financial report that conforms to program standards. The report must comply with both generally accepted accounting principles and all applicable legal requirements.

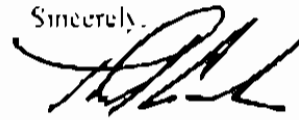

A Certificate of Achievement is valid for a period of one year. The State has received a Certificate of Achievement for the last 15 consecutive years (fiscal years 1995 – 2009). We believe that this year's

report continues to conform to the Certificate of Achievement program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate

ACKNOWLEDGEMENTS

The Department of Finance takes great pride in the preparation of this Comprehensive Annual Financial Report. I wish to express my sincere appreciation to the many individuals whose dedicated efforts have made this report possible. This report could not have been accomplished without the professionalism and dedication demonstrated by the Division of Accounting and the financial and management personnel of each State agency, component unit, and all other organizations within the reporting entity. This report is also available on the Internet at <http://accounting.delaware.gov/cafr/default.shtml>.

Sincerely,

Thomas J. Cook
Secretary of Finance

Certificate of Achievement for Excellence in Financial Reporting

Independent Auditor's Report

The Honorable Governor and
Honorable Members of the State Legislature
State of Delaware

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Delaware (the State), as of and for the year ended June 30, 2010, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of the discretely presented component units. The financial statements of these entities were audited by other auditors whose reports thereon have been furnished to us, and our opinion on the basic financial statements, insofar as it relates to the amounts included for these entities, is based solely on the reports of the other auditors.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of the other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of the other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Delaware as of June 30, 2010, and the respective changes in financial position, and where applicable, cash flows thereof for the year then ended in conformity with U.S. generally accepted accounting principles.

As discussed in note 1 (b) to the financial statements, the State adopted Governmental Accounting Standards Board Statement (GASB) No. 51, *Accounting and Financial Reporting for Intangible Assets* during fiscal year 2010.

The management's discussion and analysis and required supplementary information listed in the accompanying table of contents are not a required part of the basic financial statements but are supplementary information required by U.S. generally accepted accounting principles. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, supplementary information – combining statements section, and the statistical section as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary information – combining statements section has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, in conjunction with other auditors, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and the statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

KPMG LLP

December 29, 2010

Management's Discussion and Analysis

The following is a discussion and analysis of the State of Delaware's (the State's) financial activities as of and for the fiscal year ended June 30, 2010. Readers are encouraged to consider the information presented here in conjunction with additional information that is furnished in the letter of transmittal, which can be found on pages i-vi of this report, and the State's financial statements, which follow this section.

These financial statements have been prepared using the financial accounting model adopted by the Governmental Accounting Standards Board (GASB).

Financial Highlights

- The assets of the State exceeded its liabilities at the close of the most recent fiscal year by \$5,202.5 million (net assets). Component units reported net assets of \$775.1 million, an increase of \$6.2 million from the previous year.
- As a result of its operations, the primary government's total net assets decreased by \$2.2 million (less than 0.1%) in fiscal year 2010 when compared to the previous year's ending net assets. Net assets of governmental activities increased by \$37.8 million (1.7%) from the previous year, while net assets of the business-type activities decreased \$39.9 million (1.3%) from the previous year.
- The State's governmental funds reported combined ending fund balances of \$1,422.7 million, an increase of \$111.6 million (8.5%) in comparison with the prior year.
- At the end of the current fiscal year, the unreserved fund balance for the general fund was \$843.6 million, which was 22.5% of total general fund expenditures. Some of the unreserved fund balance is not available for new spending as such funds have been committed based on State statutes that can be amended by legislation.
- The State's total general obligation debt increased \$28.1 million (1.9%) during fiscal year 2010 to \$1,497.4 million. Of the State's outstanding debt, \$516.0 million (34.5%) has been issued on behalf of local school districts, which is supported by the property tax revenues of those districts.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the State's basic financial statements. The State's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains additional required supplementary information and other supplementary information, in addition to the basic financial statements.

Government-wide financial statements The government-wide financial statements are designed to provide readers with a broad overview of the State's operations, in a manner similar to a private sector business.

The statement of net assets presents information on all of the State's assets and liabilities, with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the State is improving or deteriorating.

The statement of activities presents information showing how the State's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event that created the change occurs, regardless of the timing of related cash flows. As a result, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the State that are principally supported by taxes and intergovernmental revenues (governmental activities) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (business-type activities). The governmental activities of the State include general government, health and children's services, judicial and public safety, natural resources and environmental control, labor and education. The business-type activities of the State include transportation, lottery and unemployment services.

The government-wide financial statements include not only the State (known as the primary government), but also legally separate entities for which the State is financially accountable. These entities include the Delaware State Housing Authority, the Diamond State Port Corporation, the Riverfront Development Corporation, the Delaware State University, the Delaware Technical and Community College Educational Foundation and 21 charter schools. Financial information for these component units is reported separately from the financial information presented for the primary government. The government-wide financial statements can be found on pages 21-23 of this report.

Fund financial statements A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The State, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State's funds can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, the governmental fund financial statements focus on near-term inflows and outflows of available resources, as well as on balances of available resources on hand at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for government funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financial decisions. Both the governmental funds balance sheet and the governmental funds statement of revenues, expenditures, and changes in fund balance provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The State's governmental funds include the general, federal, local school district, and capital projects funds. Information is presented separately in the governmental funds balance sheet and in the governmental funds statement of revenues, expenditures, and changes in fund balance (deficit) for these funds.

The basic governmental funds financial statements can be found on pages 24 - 27 of this report.

The State budgets and controls its financial activities on the cash basis of accounting. In compliance with State law, the State records its financial transactions in either of two major categories – the General Fund or the Special Fund. References to these funds in this report include the terms “budgetary” or “budgetary basis” to differentiate them from the GAAP funds of the same name which encompass different funding categories. The State adopts an annual appropriated budget for its budgetary general fund. A budgetary comparison statement has been provided for the budgetary general fund to demonstrate compliance with the budget. The schedule can be found on page 124 of this report.

Proprietary funds Proprietary funds charge customers for the services they provide – whether they are provided to outside customers (enterprise funds) or other State agencies and other governments (internal service funds). Proprietary funds provide the same type of information as the government-wide financial statements, but in more detail. The proprietary fund financial statements provide separate information for the Lottery, Unemployment Insurance Trust Fund and the Delaware Department of Transportation (DelDOT), all of which are considered to be major funds of the State.

The State uses proprietary funds to account for operations of the Unemployment Insurance Trust Fund, Delaware State Lottery (Lottery), and DelDOT as business-type activities in the government-wide financial statements. The State does not maintain any internal service funds.

The basic proprietary fund financial statements can be found on pages 28 - 30 of this report.

Fiduciary funds Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the State's own programs. The pension, other post-employment benefit, and investment trust funds are the primary fiduciary funds for the State. The accounting used for fiduciary funds is much like that used for proprietary funds.

The basic fiduciary fund financial statements can be found on pages 31 - 32 of this report. Combining fiduciary fund statements can be found on pages 136 - 142.

Notes to the financial statements The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 36 - 119 of this report.

Required supplementary information In addition to the basic financial statements and accompanying notes, this report presents certain Required Supplementary Information (RSI) concerning the status of the State's legally adopted budget, the maintenance of the State's infrastructure and additional schedules related to funding status and progress, annual pension costs and actuarial methods and assumptions for the State's pension trusts. The RSI can be found on pages 122 - 134 of this report.

Other supplementary information Other supplementary information includes the introductory section, the combining financial statements for fiduciary and local school funds, and the statistical section.

Statewide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. The State's assets exceeded its liabilities by \$5,202.5 million at the close of the most recent fiscal year.

The largest portion of the State's net assets (88.5%) reflects its investment in capital assets (e.g., land, buildings, vehicles, and equipment) less any related outstanding debt used to acquire those assets. The State uses these capital assets to provide services to citizens; consequently, these assets are not available for future spending. Although the State's investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. Restricted net assets, comprising 6.2% of total net assets, represents resources that are subject to external restrictions, constitutional provisions, or enabling legislation on how they can be used. The remaining portion, unrestricted net assets (5.3%), may be used at the State's discretion; however, some of these funds have been appropriated based on State statutes.

Condensed Financial Information - Primary Government

As of June 30, 2010

(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Total	
	2010	2009	2010	2009	2010	2009

Other liabilities	743,208	964,110	246,516	247,356	989,724	1,211,466
Total liabilities	3,566,649	3,340,316	1,485,716	1,418,091	5,052,365	4,758,407
Net assets:						
Invested in capital assets, net of related debt	1,799,599	1,665,199	2,803,634	2,727,661	4,603,233	4,392,860
Restricted	186,430	186,430	137,831	202,220	324,261	388,650
Unrestricted	269,978	366,597	5,069	56,596	275,047	423,193
Total net assets	\$ 2,256,007	\$ 2,218,226	\$ 2,946,534	\$ 2,986,477	\$ 5,202,541	\$ 5,204,703

The capital assets of the governmental activities increased \$258.8 million (8.2%) since June 30, 2009. Primary increases are a result of significant renovations to, and expansions of, existing school buildings across all counties to accommodate the rise in student population

The State's securities lending activities were discontinued on December 4, 2009. Therefore at June 30, 2010, investments held for securities lending transactions and the corresponding collateral held for securities lending transactions were \$0.0 million. As a result, both current assets and other liabilities decreased by \$211.2 million from fiscal year 2009.

The increase in governmental activities long-term liabilities outstanding of \$447.2 million (18.8%) is primarily due to GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions* (OPEB). At June 30, 2010, the long-term obligation for OPEB was \$986.9 million, an increase of \$324.4 million (49.0%) from fiscal year 2009. The OPEB obligation will increase each year as the State continues to defer full funding of its annual required contribution. Additional information for the OPEB obligation can be found in Note 14 of the financial statements. In addition, the general obligation long term debt increased by \$95.5 million (6.9%). The State's debt as a percentage of the State's personal income was 7.4% in fiscal year 2009 and 7.5% in fiscal year 2010. The State's relatively high debt burden reflects its centralized role in financing facilities, such as schools and prisons, which in other states receive capital through local entities. Bond sales during fiscal year 2010 included two refundings, including advance refundings, which resulted in an increase in prepaid assets of \$34.6 million.

The decrease in business-type current assets was primarily from the decrease of \$60.8 million in current assets in the Unemployment Trust Fund. The decrease was caused by an increase of benefits paid. The decrease was offset by an increase in DeIDOT's current assets due to unspent bond proceeds from the issuance of Grant Anticipation Revenue Vehicle Bonds (GARVEE) during the fiscal year, which resulted in larger investment balances in DeIDOT. Long-term liabilities outstanding were also increased as a result of increased revenue bonds payable and post-employment benefits payable. This information can be found on page 2 of the DeIDOT's financial statements as of and for the year ended June 30, 2010.

The following condensed financial information was derived from the government-wide Statement of Activities and reflects the changes in net assets during the fiscal year.

Changes in Net Assets - Primary Government
For Year End June 30, 2010

Net assets - beginning of year	2,218,226	2,585,762	2,986,477	3,105,216	5,204,703	5,690,978
Net assets - end of year	<u>\$ 2,256,007</u>	<u>\$ 2,218,226</u>	<u>\$ 2,946,534</u>	<u>\$ 2,986,477</u>	<u>\$ 5,202,541</u>	<u>\$ 5,204,703</u>

Governmental activities Since fiscal year 2009, the net assets for governmental activities increased by \$37.8 million, while the net assets for business-type activities decreased by \$39.9 million. A comparison of the cost of services by function for the State's governmental activities is shown in the following chart, along with the revenues used to cover the net expenses of the governmental activities. Key elements of the decrease in the State's governmental activities net assets are as follows:

Total general revenues decreased overall by \$6.7 million (0.2%) relating to decreases in net personal income taxes of \$153.8 million and investment earnings of \$21.0 million. The decrease in personal income taxes is primarily due to reduction in taxes receivable resulting from a modification of the write-off period from ten years to six. Real estate taxes increased by \$5.8 million and business and other taxes increased by \$175.9 million. During the fiscal year 2010, the State enacted a taxpayer amnesty program to allow taxpayers (both business and personal) to file taxes for prior years with no penalties. This resulted in an increase in business taxes collected.

Program revenues increased by \$390.9 million (25.2%) from the prior year partially due to an increase in operating grants of \$260.9 million. Of this amount, \$124.5 million relates to increased federal revenues at Health and Children’s Services as a result of increased spending for Medicaid (the State’s largest public assistance program) and \$89.9 million relates to increased federal revenue at Education. Also, charges for services increased by \$109.0 million. Of this increase, \$45.0 million was in general government and \$7.3 million was in judicial and public safety due to increases in charges relating to licenses, fines, fees and permits.

Revenues by Source – Governmental Activities

Expenses for governmental activities decreased during fiscal year 2010 by \$20.7 million (0.4%). This decrease is primarily due to the decrease in general government of \$115.4 million due to decrease in spending from mandated spending reductions. Offsetting this decrease is due to Health and Children’s Services increased spending of \$79.1 million due to increase in the population served and health care costs. Educational expenses increased by \$44.0 million due to the continued increase in student population resulting in additional education personnel costs and operation costs.

Expenses and Program Revenues- Governmental Activities

Business-type activities The net assets for business-type activities decreased by \$39.9 million since fiscal year 2009. This decrease is comprised of a \$20.2 million increase in net assets for DeIDOT, a \$60.7 million decrease in the Unemployment Insurance Trust Fund, and a less than \$0.6 million increase of Lottery's net assets.

There was a decrease in net assets of the Delaware Unemployment Insurance Trust Fund of \$60.7 million. There was an increase in operation revenues and operating expenses of \$239.8 million and \$175.2 million, respectively. This was due to the federal government funding the benefits for the Trust Fund.

DeIDOT's net assets at June 30, 2010 were \$20.2 million higher than at June 30, 2009. DeIDOT's total operating revenues increased by \$0.9 million (0.2%) while operating expenses increased by \$20.4 million (3.6%). The October 1, 2009 toll and fee increases were the main contributors of the operating revenue increase. The largest contributing factor for the increase in operating expenses was the increase in vehicle operations expenses, primarily from higher fuel costs.

The Lottery's net assets changed by less than \$0.6 million. By law, the Lottery's net assets cannot exceed \$1.0 million. Revenue for the Lottery decreased by \$14.6 million (2.1%) over last year due to a \$0.3 million decrease in traditional games revenue and a \$14.3 million decrease in video lottery revenues. The Lottery transferred \$334.6 million in gaming revenues to the State, an increase from fiscal year 2009 of \$19.8 million. The total costs of games and prizes decreased by \$37.5 million (9.8%) over the previous year.

Revenues by Source – Business-type Activities

Expenses and Program Revenues – Business-type Activities

Financial Analysis of the State's Funds

As noted earlier, the State uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds The focus of the State's governmental funds is to provide information on near-term inflows, outflows, and balances of available resources. Such information is useful in assessing the State's financing requirements. Unreserved fund balances may serve as a useful measure of a government's net resources at the end of the fiscal year.

As of the end of the current fiscal year, the State's governmental funds reported combined ending fund balances of \$1,422.7 million, an increase of \$111.6 million over the prior year. Of the aggregate fund balances, \$1,057.8 million, approximately 74.3% constitute unreserved fund balances.

Approximately \$364.9 million of the fund balance is reserved and is not available for new spending for the following reasons: 1) to liquidate contracts and purchase orders of the prior period (\$131.1 million), 2) set aside for long-term portion of loans and notes receivable (\$39.4 million) 3) set aside for the budgetary reserve account (\$186.4 million), and 4) for inventories and other assets (\$8.0 million).

General fund The general fund accounts for the operation and administration of the State. Total general fund balance increased by \$140.2 million for the fiscal year.

Total general fund revenues increased by \$76.4 million (2.3%) due to several factors. The business taxes increased by \$164.1 million partly due to the effects of a full year of tax increases that took effect in January 2009 and partly due to collections from the tax amnesty program that was implemented during fiscal year 2010. This increase was offset by a reduction in personal income tax revenue of \$170.7 million primarily due to a reduction in the write-off period for receivables from 10 years to six, as well as a continuing level of higher unemployment. Due to the effect of adverse market conditions on investments and lower interest rates, interest and other investment income decreased by \$17.7 million.

Total general fund expenditures decreased by \$191.7 million (4.9%). This was primarily due to decreases in Health and Children's Services of \$55.8 million, General Government of \$101.0 million, Education of \$57.8 million and Natural Resources and Environmental Control of \$13.8 million. The decrease in expenditures for General Government, Education and Natural Resources and Environmental Control were attributable to the increase on the federal funding as a result of the stimulus package.

At the end of the current fiscal year, unreserved fund balance of the general fund was \$843.6 million, while total fund balance reached \$1,196.4 million. As a measure of the general fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures. Unreserved fund balance represents 22.5% of total general fund expenditures, while total fund balance represents 32.0% of total fund expenditures or 117 days of operations.

Federal funds Federal funds represent pass through grants used for designated purposes. These funds report federal grant revenues and the related expenditures to support the State's grant programs. Total federal fund revenues and expenditures increased by \$231.8 million and \$269.8 million, respectively. The primary increase in federal revenues was due to the American Recovery and Reinvestment Act (ARRA). The largest portion of this increase in expenditures is in Health and Children's services, which accounted for \$118.3 million (12.9%), resulting from increased costs in the Medical Assistance and the Temporary Assistance for Needy Families programs. Also, spending on energy programs by the Department of Natural Resources and Environmental Control increased expenditures by \$12.4 million. Education has increased by \$117.4 million due to the operating needs of the schools for personnel and supply costs.

Local School funds These funds are used to account for activities relating to the State's local school districts, which are funded by locally raised real estate taxes and other revenues. The fund balance increased by \$81.0 million to \$308.4 million. Spending decreased because of operating costs being covered by federal funds.

Capital Project funds Capital Project funds are used to account for the construction and acquisition of capital assets of the primary government. Capital outlay expenditures totaled \$241.1 million in fiscal year 2010, a decrease of \$29.8 million. State legislation authorizes certain capital project expenditures prior to the issuance of bonds in an aggregate amount not to exceed 3% of general fund revenue.

Proprietary funds The State's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail. The proprietary fund financial statements provide separate information for the Lottery, Unemployment Insurance Trust Fund and the DeIDOT fund, all of which are considered to be major funds of the State.

Total proprietary funds net assets decreased in fiscal year 2010 by \$39.9 million as a result of operations. Page 12 discusses the changes in net assets of the business-type activities.

General Fund Budgetary Highlights

The budgetary general fund is the chief operating fund of the State. At the end of the fiscal year, total fund balance increased by \$158.6 million (41.4%). Revenues were \$85.2 million (2.5%) higher than the previous fiscal year. This was primarily due to increases in abandoned property collections of \$101.1 million (25.8%), corporate franchise tax of \$58.9 million (10.3%), gross receipts tax of \$30.5 million (18.6%), and lottery earnings of \$27.5 million (11.1%). Offsetting these revenue increases were decreases in the personal income tax of \$43.7 million (4.0%), bank franchise tax of \$27.8 million (34.0%) and insurance premiums tax of \$25.5 million (32.9%). While the State's revenue performance reflected continued weakness in the U.S. economy, collections were bolstered by rate increases in the personal income, corporate franchise and gross receipts taxes; a tax amnesty program; and the expansion of the State's lottery offerings.

Expenditures were \$219.1 million (6.6%) less than the previous fiscal year. Salaries and wages decreased by \$70.8 million (5.8%) due to an employee pay cut of 2.5% and reduction of staff due

to attrition. Grants-in-Aid decreased by \$70.4 million (26.5%) while Medicaid increased by \$9.3 million (2.2%). In addition, contractual services decreased by \$31.3 million (10.9%), personal services and travel decreased by \$24.0 million (11.8%) and capital outlays decreased by \$21.4 million (51.6%) reflecting various cost cutting measures. Debt service payments increased by \$17.8 million (11.4%).

The original budget authorizes current fiscal year operating and administrative expenditures. Included in the final budget are the original budget, prior year encumbrances, multi-year project budgetary carry-forwards from the prior fiscal years, and all modifications to the original budget. The most significant components are the original budget and carry-forwards of prior fiscal year. The unused appropriations from a prior year will carry forward to the final budget for authorized capital projects and grants until the funds are spent.

Actual expenditures were within the final budget in all departments, with significant favorable budget variances in the following departments:

- \$76.6 million in the Executive Department for funds budgeted, but not spent on an ongoing significant capital improvement project to upgrade the State's emergency response system and other minor capital projects;
- \$58.3 million in the Department of Education for funds budgeted, but not spent on educational projects such as the statewide testing program to assist the State with compliance of the No Child Left Behind Act;
- \$10.3 million in Natural Resources and Environmental Control for expenditures authorized in the final budget but not spent on energy incentives and incentives for improving the environment such as storm water retention ponds, environmental clean up, and water conservation; and,
- \$31.6 million in the Department of Health and Social Services, as well as \$11.3 million in the Department of Children, Youth and Their Families for programs that have been rendered but not yet billed such as Delaware Healthy Children Program costs.

Funded projects, which are not completed by year-end, may carry over unspent funds into fiscal year 2011. Unspent funds are reflected in the final budget which may cause variances from original budget.

Capital Assets and Debt Administration

Capital assets The State's investment in capital assets for its governmental and business-type activities, as of June 30, 2010, amounted to \$7,316.1 million (net of accumulated depreciation). This investment in capital assets includes land, land improvements, buildings, vehicles and equipment, easements, roads, highways, and bridges. The total increase in capital assets for governmental activities was \$258.8 million (8.2%) and the increase for business-type activities was \$75.0 million (2.0%).

Major capital asset acquisitions during the current fiscal year included the following:

- Completion of new schools and renovations of existing schools of \$225.5 million. In addition, construction-in-progress for governmental activities was \$399.8 million as of June 30, 2010. Approximately 84.2% of this total is related to the building of new schools and improvements to existing schools across all counties, with the majority of spending occurring in New Castle County.
- The increase in business-type activities is due to increased spending at DelDOT for the US 301 toll road project.

As allowed by GASB Statement No. 34, *Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments*, the State has adopted an alternative process for recording expense related to selected infrastructure assets. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. Assets accounted for under the modified approach include 4,447 center line miles of roads and 1,566 bridges that the State is responsible to maintain.

DelDOT performs condition assessments of eligible infrastructure assets at least every three years. Currently, road condition assessments are conducted every two years. Historically, road condition assessments were conducted every year. Recent changes to the road condition vendor contract have resulted in the inability to provide infrastructure ratings for fiscal year 2010. The Department's assessment plan will ensure that all infrastructure assets are assessed and evaluated within the three-year period.

Of the State's 1,556 bridges that were rated in fiscal year 2009, 73.5% received a good or better BCR rating, 19.0% were rated fair, and 7.5% received a substandard rating. Of the 7,330,395 square feet of bridge deck that was rated, 92.8% or 6,800,531 square feet received an OPC condition rating of good or better, 6.9% received a fair rating, and 0.3% received a substandard deck rating. In 2008, 4,447 center line miles were rated; 90.1% received a fair or better OPC rating and 9.9% received a poor rating.

The fiscal year 2010 estimate to maintain and preserve DelDOT's infrastructure was \$102.2 million, but the actual expenditures were \$336.2 million, which is \$234.0 million over the estimate. The estimated expenditures represent annual bond bill authorizations and the actual expenditures represent the current year spending, which includes cumulative authorizations.

Additional information on the State's capital assets can be found in Note 1 on pages 36 - 48, Note 12 on pages 94 - 96 and on pages 128 - 129 in the Required Supplementary Information.

A summary of the State's primary government's capital assets, net of depreciation is provided below:

State of Delaware Capital Assets as of June 30, 2010

Long-term debt The State uses general obligation debt to finance capital projects. At the end of the current fiscal year, the State had total general obligation bond debt outstanding of \$1,497.4 million backed by the full faith and credit of the State. Its relatively large debt burden reflects its centralized role in financing school construction projects that are typically funded by local governments or school districts in other states. As of June 30, 2010, \$516.0 million, or 34.5%, of the State's outstanding debt was issued on behalf of local school districts. Local school districts transferred \$58.1 million of property tax revenue to the State to cover related debt service during fiscal year 2010.

The State has no constitutional debt limits. However, in 1991, the State enacted legislation that limits debt issuance with a three-part test as follows:

- A 5% test restricts new debt authorization to 5% of budgetary general fund revenue as projected by DEFAC in June for the next fiscal year. Should actual revenue collections increase during the year, no additional authorizations are made. For fiscal year 2010, debt issuance was limited to \$159.5 million.
- A 15% test restricts debt issuance if the annual payments on all outstanding debt exceed 15% of estimated budgetary general fund and Transportation Trust Fund Revenue for the next fiscal year. Currently, these annual payments represent between approximately 8% and 9% of estimated general fund and Transportation Trust Fund revenues.
- Finally, a cash balance test restricts debt issuance if the debt service payment in any year exceeds the estimated cumulative cash balance for the following fiscal year. For fiscal year 2010, the projected cash balance exceeded debt service.

Due to the State's statutory debt limits and its fiscal management, three principal rating agencies, Moody's Investor's Service, Fitch Ratings and Standard & Poor's, reaffirmed their triple-A ratings on the State's general obligation bonds during fiscal year 2010. In October 2009, the State issued \$493.0 million fixed rate general obligation bonds including tax-exempt and taxable

Build America Bonds. In May 2010, the State issued \$152.2 million of tax-exempt, fixed rate general obligation bonds. Both transactions included issuance to refund higher cost debt.

Debt issued by the Delaware Transportation Authority (the Authority) does not constitute a debt of the State or a pledge of its general taxing power or of its full faith and credit. Rather, the outstanding revenue bonds are obligations of the Authority payable solely from and secured by a pledge and assignment of certain tolls and revenues such as motor fuel tax revenues, motor vehicle document fees and motor vehicle registrations. The Authority has revenue bonds outstanding of \$1,069.9 million to support its ongoing capital transportation program and \$113.5 million in Grant Anticipation Vehicle Bonds (GARVEEs), to finance a portion of the costs of completing the final design and right-of-way acquisition for a new U.S. 301.

Additional information on the State of Delaware's long-term debt can be found in Notes 5, 6 and 7 on pages 72 - 90 of this report.

Other Post-Employment Benefits

The State provides post-employment health care to its employees and accounts for these benefits according to GASB Statement No. 45, *Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions*. The State's actuarially accrued liability, based on a study conducted by Cheiron of McLean, Virginia, used actual data as of July 1, 2010 and has been determined to be about \$5.9 billion using a discount rate of 5.0%. The State began pre-funding the obligation in 2002 with lump sum payments and contributions based on a percentage of payroll. For fiscal year 2010, the State has contributed \$10 million in abandoned property revenue in excess of \$374.0 million transferring those funds in late April. The State has established an irrevocable trust and has accumulated \$104.4 million in net assets at June 30, 2010, which represents a funding ratio of less than 2%. The State's fiscal year 2010 annual required contribution (ARC) was \$480.0 million, of which 36% was met through cash contributions and paid benefits. Its fiscal year 2011 ARC is expected to be \$488.1 million of which 37.6% is expected to be met with cash contributions and paid benefits. The State expects to manage this obligation over time with continued contributions, savings initiatives and a review of benefits.

Economic Factors and Next Year's Budgets and Rates

DEFAC met on June 17, 2010, to prepare the final revenue and expenditure estimates upon which the fiscal year 2011 operating and capital budgets would be based. The Department of Finance estimated at that time that employment in the State had decreased by 3.3% during fiscal year 2010. In June 2010, the Department of Finance projected a modest rebound in fiscal year 2011 employment as the State, like the nation, gradually recovers from the worst recession since World War II.

The fiscal year 2011 operating and capital budgets meet budgetary spending limitations imposed by law. The fiscal year 2011 operating budget is \$3,305.3 million, 6.9% less than fiscal year 2010. The fiscal year 2011 budget included \$91.0 million in supplemental appropriations

(historically in the form of cash allocated to the capital budget). The fiscal year 2010 budget had no supplemental appropriations.

The primary objective of the State's Investment Policy is the safety of principal by minimizing credit risk and interest rate risk. While investment income has been less than expected the principal amount of the investment portfolio has not been compromised in the recent downturn.

Financial Management

The State's financial management continues to be recognized by a premier credit rating from all three principal rating agencies: Aaa from Moody's Investor's Service, AAA from Fitch Ratings and AAA from Standard & Poor's. The ratings reflect Delaware's financial management practices that have become institutionalized within the State:

- expenditure budgeting of 98% of available general fund revenue
- general fund revenue forecasts that are frequent, objective and often conservative
- three-part debt affordability test that limits debt authorization to 5% of general fund revenue and debt service to 15% of tax supported revenue
- consistent satisfaction of the State's budget reserve requirement – the State's rainy day fund has never fallen below its mandated 5% of general fund revenue
- full funding of its pension plan

These ratings were reaffirmed in October 2010.

Requests for Information

This financial report is designed to provide a general overview of the State's finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be directed to the Department of Finance, Division of Accounting, 820 Silver Lake Boulevard, Suite 200, Silver Lake Plaza, Dover, Delaware 19904 or visit our website at <http://accounting.delaware.gov>.

The State's component units publish their own separately issued audited financial statements. These statements may be obtained from their respective administrative offices or from the Office of Auditor of Accounts, Townsend Building, Suite 1, 401 Federal Street, Dover, Delaware 19901.

RECONCILIATION OF THE GOVERNMENTAL FUNDS BALANCE SHEET
TO THE STATEMENT OF NET ASSETS**

June 30, 2010

(Expressed in Thousands)

Total Fund Balances - Governmental Funds \$ 1,422,697

Amounts reported for governmental activities in the statement of net assets are different because:

Net capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. These assets consist of:

Land	\$	427,496	
Land improvements		79,332	
Buildings		2,215,317	
Easements		256,653	
Equipment and vehicles		37,963	
Construction in progress		399,844	
			3,416,605

Some of the State's revenues will be collected after year-end but are not available soon enough to pay for the current period's expenditures and therefore are deferred in the funds.

363,214

Some liabilities net of related assets are not due and payable in the current period and therefore are not reported in the funds. Those liabilities consist of:

Interest payable	\$	(21,610)	
Claims and judgments (current and long-term)		(129,907)	
Compensated absences (current and long-term)		(162,445)	
Other post employment benefits		(906,085)	
Pollution remediation obligations (current and long-term)		(23,407)	
Pension obligation		(115,569)	
General obligation long-term debt and related accounts		(1,584,474)	
Notes payable (current and long-term)		(212)	
Other long-term obligations		(2,800)	
			(2,946,509)

Net assets of governmental activities \$ 2,256,007

STATE OF DELAWARE
RECONCILIATION OF THE NET CHANGES IN FUND BALANCES -
TOTAL GOVERNMENT FUNDS TO CHANGE IN NET ASSETS
OF GOVERNMENTAL ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2010
(Expressed in Thousands)

Net Changes in Fund Balances \$ 111,630

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. In the current period, these amounts are:

Capital outlays	329,825	
Depreciation expense	(71,035)	
		258,790

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds. 42,813

Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the statement of net assets. Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. Components of the debt related adjustments consist of:

Debt service principal repayments	\$ 155,789	
Advanced refunding payments	35,189	
New debt issued (face value)	(184,550)	
Premium received	(66,054)	
Issuance costs	3,797	
Amortization of premium/issuance costs	5,631	
		(50,198)

Some expenses reported in the statement of activities do not require the use of current financial resources and therefore, the changes in these liabilities are not reported as expenditures in the governmental funds:

Accrued interest expense		4,207
Claims and judgments		(9,547)
Compensated absences		(15,850)
Other post employment benefits		(297,591)
Pollution remediation obligation		(6,905)
Pension obligation		(2,917)
Notes payable		2,794
Other liabilities		555
		555

Change in Net Assets of Governmental Activities **\$ 37,781**

See Accompanying Notes to Financial Statements

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Delaware (the State) have been prepared in conformity with Accounting Principles Generally Accepted in the United States (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

(a) Reporting Entity

The accompanying financial statements present the State's primary government and include all funds, elected officials, departments and organizations, bureaus, boards, commissions, and authorities that comprise the State's legal entity. The State's 19 local school districts are fiscally dependent and not legally separate from the State. As per the interpretation of Article X, Section 2 of the State's Constitution, the local school districts are included in the reporting entity of the primary government. The DelDOT enterprise fund, which includes the Transportation Trust Fund and the Delaware Transit Corporation, is also included in the reporting entity of the primary government. Fiduciary funds, although legally separate entities, are in substance part of the State's operations. The State's reporting entity is also comprised of its component units, entities for which the State is considered to be financially accountable. Discretely presented component units are reported in a separate column in the government-wide financial statements (see note below for description) to emphasize that such are legally separate from the State.

Financial accountability is defined in GASB Statement No. 14, *The Financial Reporting Entity*, as amended by GASB Statement No. 39, *Determining Whether Certain Organizations Are Component Units*. The State is financially accountable for legally separate organizations if it appoints a voting majority of the organization's board and (1) it is able to impose its will on that organization or (2) there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. The State may also be financially accountable if an organization is fiscally dependent on the State, regardless of whether the organization has a separately elected governing board, a governing board appointed by a higher level of government, or a jointly appointed board.

Blended Component Units

The Delaware Public Employees' Retirement System (DPERS) is a public employee retirement system, which covers substantially all State employees. The DPERS is a legally separate entity; however, as it provides services and benefits almost exclusively to the primary government, the DPERS is considered a blended component unit and is shown in the financial statements as part of the primary government as a pension trust fund. The financial report of DPERS for the year ended June 30, 2010 may be obtained in writing to the State Board of Pension Trustees and Office of Pensions, McArdle Building, Suite 1, 860 Silver Lake Boulevard, Dover, Delaware 19904-2402.

The Delaware OPEB Fund Trust (OPEB Trust) is a trust, which provides retirement medical coverage to pensioners and their eligible dependents in the State's Employees', Judiciary, New State Police, and Closed State Police Pension Plans. The OPEB Trust is a legally

separate entity; however, it provides services and benefits almost exclusively to the primary government. The OPEB Trust is considered a blended component unit and is shown in the financial statements as part of the primary government as an OPEB trust fund.

Discretely Presented Component Units

The following component units are entities that are legally separate from the State, but are financially accountable to the State for reporting purposes or whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. The component unit's column of the basic financial statements includes the financial data of these entities. Except for the Delaware Technical and Community College Educational Foundation, which has a fiscal year-end of December 31, 2009, each discretely presented component unit has a June 30, 2010 fiscal year-end.

Delaware State Housing Authority

The Delaware State Housing Authority (DSHA) is a public corporation whose Director is appointed by and reports directly to the Governor of the State. The DSHA administers the role of providing affordable housing as a key aspect of State policy. The DSHA's relationship with the State is such that exclusion of the DSHA from the State's basic financial statements would cause the statements to be misleading or incomplete. The DSHA is authorized, among other things, to (1) make mortgage, construction and other loans to not-for-profit and limited for-profit housing sponsors; (2) make loans to mortgage lenders, requiring the proceeds thereof to be used for making newly qualified residential mortgage loans; (3) purchase qualified mortgage loans from mortgage lenders; and (4) apply for and receive assistance and subsidies under programs from the federal government and others.

Diamond State Port Corporation

The Diamond State Port Corporation (DSPC) was organized as a body corporate and politic constituting a public instrumentality of the State. The DSPC is empowered to operate, improve and maintain the Port of Wilmington and related facilities. The Governor appoints 8 of the 15 members of the board of directors, with the advice and consent of the Senate. The DSPC's relationship with the State is such that exclusion of the DSPC from the State's basic financial statements would cause the statements to be misleading or incomplete.

Riverfront Development Corporation

The Riverfront Development Corporation (RDC) was formed to plan, develop and manage programs and projects intended to foster economic development along the Brandywine and Christina Rivers. The Governor appoints seven of the 18 board members; however, seven of the remaining 11 directors consist of the Governor and six State officials. Authorization by the State's Budget Director and Controller General is required before funds of the RDC may be expended.

Delaware State University

Delaware State University (DSU) is a public institution of higher education. Funding is primarily through State appropriations. State appropriations without restrictions as to use by the University are reported in general revenue. Additional funding is derived from tuition, federal grants, private donations and grants. The Board of Trustees is comprised of 15 members, eight appointed by the Governor of Delaware and seven elected by the Trustees. The President of the University and the Governor of the State of Delaware serve as ex-officio members of the Board. Delaware State University financial data includes its two component units, the Delaware State University Housing Foundation and the Delaware State University Foundation, Inc.

Delaware Technical and Community College Educational Foundation

The Delaware Technical and Community College Educational Foundation (the Foundation) is a fiduciary-type component unit of Delaware Technical and Community College (DTCC), which is part of the primary government. The Foundation was established on November 13, 1968 by a trust agreement. On April 20, 1999, the Foundation revised the trust document incorporating all previous amendments to the previous trust document. The trust agreement stipulates that the activities of the Foundation be limited to such educational purposes that come under Section 501(c) (3) of the Internal Revenue Code. Activities include, but are not limited to, making contributions, gifts or grants, or otherwise rendering financial aid and assistance by direct payments to DTCC and providing financial assistance to qualified students. The Foundation has a fiscal year-end of December 31, 2009.

Delaware Charter Schools

The State's 21 Charter Schools are public schools funded primarily through State appropriations. Additional funding is derived from federal grants passed through from the primary government, private donations and funds received from local school districts on a tax portion per child basis. Charter schools are each managed by a board of directors, which operate independently, under a charter granted by the State Department of Education with the approval of the State Board of Education. Charters are granted for an initial period of three years and renewable every five years thereafter. Financial information for Delaware Charter Schools is presented in the aggregate as they are individually immaterial.

Complete financial statements for each of the discretely presented component units may be obtained from their respective administrative offices.

Related Organizations

Officials of the State's primary government appoint a voting majority of the governing board of the Delaware Solid Waste Authority (DSWA). The primary government's accountability for DSWA does not extend beyond making the appointments. The financial activities of DSWA are not included in the State's financial statements.

The Governor appoints eight members of the governing board of the University of Delaware (the University). The remaining 20 members are elected separately. The primary government's accountability does not extend beyond State grants to the University. The financial activities of the University are not included in the State's financial statements.

Jointly Governed Organization

The Delaware River and Bay Authority (DRBA), a body politic, was created with the intention of advancing the economic growth and development of those areas in the State of Delaware and the State of New Jersey, which border the Delaware River and Delaware Bay. DRBA is governed by 12 commissioners: six appointed by the State of Delaware and six appointed by the State of New Jersey. DRBA is autonomous from a day-to-day operations perspective and neither State is obligated for the DRBA's debt. DRBA is not included in these financial statements as the State of Delaware has no ongoing financial interest.

Government-Wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component units. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support. Likewise, the primary government is separately presented from certain legally separate component units for which the State is financially accountable.

The statement of net assets measures not just current assets and liabilities, but also long-term assets and liabilities such as capital assets (including infrastructure assets) and general long-term debt. The difference between the State's assets and its liabilities is its net assets. Net assets are displayed in three components – invested in capital assets, net of related debt; restricted; and unrestricted. Net assets are restricted when constraints placed on them are either externally imposed or are imposed by constitutional provisions or enabling legislation. There are no net assets that are restricted by enabling legislation at June 30, 2010. When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted resources first, then unrestricted resources as they are needed.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items properly excluded among program revenues are reported as general revenues.

Separate fund financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual proprietary funds are reported in separate columns in the fund financial statements.

(b) Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements. Agency funds reported as part of the fiduciary fund financial statements are custodial in nature and do not present results of operations and, therefore, do not have a measurement of focus. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989 are generally followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the GASB. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The State has elected not to follow subsequent private-sector guidance.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are charges between the State's enterprise operations and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Amounts reported as program revenues include 1) charges to customers or applicants for goods, services, or privileges provided, 2) operating grants and contributions, and 3) capital grants and contributions, including special assessments. Internally dedicated resources are reported as general revenues rather than as program revenues. Likewise, general revenues include all taxes.

Intrafund transactions between the primary government and component units are reported as operating or capital grants as appropriate for restricted amounts. Unrestricted amounts are reported as general revenue.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers all revenues to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures generally

are recorded when a liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences and claims and judgments, are recorded only when payment is due.

Taxes, grants, fees, sales, rents, and interest income associated with the current fiscal period are all considered to be susceptible to accrual and have been recognized as revenues of the current fiscal period. All other revenue items are considered to be measurable and available only when cash is received by the State. Revenue related to expenditure driven grants is recognized when the qualifying expenditures have been incurred and all other grant requirements have been met.

Governmental Funds

The State reports the following major governmental funds:

General Fund – The general fund is the State’s primary operating fund. It accounts for all financial resources obtained and used for those services traditionally provided by a state government, which are not required to be accounted for in other funds. These services include, among others, education, and health and social services.

Federal Fund – The federal fund accounts for all activities relating to the State’s federal grant programs.

Local School District Fund – The local school district fund is used to account for aggregate financial activity of the State’s local school districts that is funded by locally-raised real estate taxes, interest, and minor miscellaneous revenue. The aggregate financial activity is funded from other sources, such as federal grant programs, major and minor capital project programs, and subsidized government programs are accounted for in the general fund, federal fund, and capital project fund.

Capital Projects Fund – Transactions related to resources obtained and used for the acquisition or construction of major capital facilities (other than those financed by proprietary and fiduciary funds), are accounted for in the capital projects fund. Such resources are derived principally from proceeds of general obligation bond issues, federal grants, and operating transfers from the general fund.

Proprietary Funds

Proprietary funds are used to account for those activities which are financed and operated in a manner similar to private business enterprises. The costs of providing services to the general public on a continuing basis are financed by or recovered primarily through user charges.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund’s principal ongoing operations. The

principal operating revenues of the unemployment fund are charges from employers for taxes against wages. The principal operating revenues of lottery fund and DelDOT fund are charges to customers for sales and services.

The Lottery fund recognizes revenue from online games the day of the drawing. Revenue from the sale of instant tickets is recognized when the book has been activated and 85% of the related prizes of an activated book are paid, 90 days from the date of activation, or when the next pack of the same game is activated. Revenue from video lottery sales is recognized, net of prizes paid, at the time the public plays the game.

Operating expenses for proprietary funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. For the unemployment fund, expenses are payments of benefits to recipients. All expenses not meeting this definition are reported as non-operating expenses.

The State reports the following major proprietary funds:

DelDOT Fund – The DelDOT fund accounts for the activities relating to the operation of the State’s Department of Transportation, including the Delaware Transportation Trust (Authority).

Unemployment Fund – The unemployment fund accounts for the activities relating to the State’s Unemployment Insurance Trust Fund.

Lottery Fund – The lottery fund accounts for the activities relating to the Lottery program.

Fiduciary Funds

The fiduciary funds account for assets held by the State in a trustee capacity or as an agency for other individuals or organizations. The fiduciary fund statements are reported using the economic resources measurement focus and the accrual basis of accounting.

The State reports the following fiduciary funds:

Agency Funds – Agency funds are custodial in nature and do not involve measurement of the results of operations. They account for the receipt of various taxes, deposits, deductions, and certain property collected by the State, acting in the capacity of an agent, and for the distribution to other governmental units or designated beneficiaries.

Pension Trust Funds – The Delaware Public Employees' Retirement System (DPERS) is a public employee retirement system, which covers substantially all State employees. The DPERS is a legally separate entity; however, as it provides services and benefits almost exclusively to the primary government, the DPERS is considered a fiduciary fund and is shown in the financial statements as part of the primary government as a pension trust fund. Pension trust funds account for transactions, assets, liabilities and net assets available for plan benefits (Note 15). For pension trust funds, employee contributions are recognized as

revenue in the period in which the employee services are performed. Employer contributions are recognized when due and the employer has made a formal commitment to provide the contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of each plan.

The financial report of DPERS for the year ended June 30, 2010, may be obtained by writing to the State Board of Pension Trustees and Office of Pensions, McArdle Building, Suite 1, 860 Silver Lake Boulevard, Dover, DE 19904-2402.

Investment Trust Funds – Investment trust funds are used to account for external investment pools where a government commingles the monies of more than one legally separate entity and invests, on the participants' behalf, in an investment portfolio; one or more of the participants is not part of the sponsor's reporting entity. The investment trust fund accounts for the transactions, assets, liabilities and fund equity for the DPERS's external investment pool and for the Delaware Other Post Employment Benefit Trust Fund (OPEB) Investment Trust fund.

OPEB Trust Fund – The OPEB Trust is a trust administered by DPERS. In addition to providing pension benefits, the State is statutorily required to provide health insurance coverage and survivor benefits for retired employees and their survivors. Substantially all of the State's employees may become eligible for these benefits if they reach normal retirement age while working for the State. Health care benefits are provided through plans whose premiums are based on the benefits paid during the year. The cost of providing post-retirement benefits is shared between the State and the retired employee. The State recognizes the cost of providing health insurance by recording its share of insurance premiums as an expenditure in the year paid.

New Accounting Pronouncements

In June 2007, the GASB issued Statement No. 51, *Accounting and Financial Reporting for Intangible Assets* - an amendment to GASB Statements No. 34 and 42. This Statement establishes a specific authoritative accounting and financial reporting requirements for intangible assets, thereby enhancing the comparability of the accounting and financial reporting of such assets among state and local governments. Requirements of this Statement were implemented by the State for the fiscal year ended June 30, 2010. As a result of statement implementation, easements increased by \$75.2 million and computer software in progress increased by \$22.6 million.

In June 2009, the GASB issued Statement No. 53, *Accounting and Financial Reporting for Derivative Instruments* - an amendment to GASB TB2003-1 and GASB Statements No. 7, 23, 25, 31, 40, and 43. This Statement establishes a framework for accounting and financial reporting related to derivative instruments, requiring the fair value of derivatives to be recognized in the financial statements. The primary government held no such investments on June 30, 2010. The DPERS derivative instruments have historically been, and continue to be, recognized in the financial statements at fair value. The fair value of the derivative

instruments held by DPERS is immaterial, and as such the disclosure provisions of the statement were not applied. There was no material impact of the implementation of GASB 53 on the financial statements as of and for the year ended June 30, 2010.

Impact of Future Accounting Pronouncements

In February 2009, the GASB issued Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*. This Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in the governmental funds. The Statement requires governments to disclose information in the notes about the processes through which constraints are imposed, as well as accounting policies that determine whether restricted, committed, assigned, and unassigned amounts are considered to be spent. This Statement also provides guidance for classifying stabilization amounts on the face of the balance sheet and requires disclosure of certain information about stabilization arrangements in the notes to the financial statements. Requirements of this Statement are effective for financial statements for periods beginning after June 15, 2010. The State is currently evaluating the future impact of this Statement.

(c) Assets, Liabilities, and Net Assets or Equity

Deposits and Investments

All highly liquid investments with maturities of three months or less when purchased are considered to be cash equivalents. For the purposes of the statement of cash flows, restricted cash is considered to be a cash equivalent. Investment securities with maturities of greater than one year are reported as long-term investments.

Investment securities are stated at quoted market prices, except that investment securities with a remaining maturity at time of purchase of one year or less are stated at cost or amortized cost. Investment securities with remaining maturities of greater than one year are identified as long-term investments.

The State presents its deposits and investments in accordance with GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, an amendment to GASB Statement No. 3, *Deposits with Financial Institutions, Investments (including repurchase agreements) and Reverse Repurchase Agreements*. This standard requires that state and local governments, including colleges and universities, disclose essential risk information about deposits and investments. The disclosure requirements cover four main areas; credit risk, interest rate and maturity, interest rate sensitivity and foreign exchange exposure.

Receivables and Payables

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as “due to/from other funds” (i.e., the

current portion of interfund loans). All trade and property tax receivables, including those for the component units, are shown net of an allowance for uncollectibles and refunds.

Inventories and Prepaid Items

All inventories are valued at cost using the first-in/first-out (FIFO) method. Inventories of governmental funds are recorded as expenditures when consumed rather than when purchased. Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

Restricted Assets

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, and then unrestricted resources as they are needed. In the government-wide financial statements, restricted net assets represent balances that are subject to external restrictions or were created by enabling legislation.

The State has the following restricted assets:

- The Delaware State Lottery has a mandatory deposit with the Multi-State Lottery and annuities for future installment prize payments.
- The Authority restricts revenue bond proceeds that are accounted for in the Transportation Fund.

The component units have the following restricted assets:

- Riverfront Development Corporation has restricted assets to cover revenue bond payments and capital projects.
- Diamond State Port Corporation has restricted investments for capital project outlays.
- Delaware State University has restricted assets for capital project outlays, grants, and college endowment funds.
- Charter schools have restricted assets to cover debt service payments.

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (which are normally immovable and of value only to the State, such as roads, bridges, sidewalks, and similar items), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements, the proprietary funds and component units.

Capital assets are defined by the State as assets with estimated useful lives in excess of one year at the date of acquisition. Such assets are recorded at historical cost if purchased or constructed, or estimated historical cost if the original cost is not determinable. Donated capital assets are recorded at estimated fair market value at the date of donation.

All land and buildings are capitalized, regardless of cost. Equipment and vehicles are capitalized when the cost of individual items exceeds \$25,000. Building and land improvements are capitalized when the cost of the project exceeds \$100,000. Infrastructure and software are capitalized when the costs of individual items or projects exceed \$1.0 million. The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend assets lives are not capitalized.

The State possesses certain capital assets that have not been capitalized and depreciated, because the assets cannot be reasonably valued and/or the assets have inexhaustible useful lives. These assets include works of art and historical treasures, such as statues, monuments, historical documents, paintings, forts, miscellaneous State capitol-related artifacts and furnishings. These assets are held for public exhibition, education or research in furtherance of public service rather than financial gain; they are protected, kept unencumbered, cared for and preserved; and they are subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

Major outlays for capital assets and improvements are capitalized as projects are constructed. Interest incurred during the construction phase of capital assets of business-type activities is included as part of the capitalized value of the assets constructed. Property, plant, and equipment of the primary government is depreciated using the straight line method over the following estimated useful lives:

Asset	Primary Government Years	Component Unit Years
Buildings and Building Improvements	10 - 40	15 - 75
Land Improvements	20	N/A
Furniture and Equipment	3 - 12	3 - 40
Vehicles	7	N/A
Software	5	N/A

The State has elected to use the modified approach to account for certain infrastructure assets. Under this process, the State does not record depreciation expense nor are amounts capitalized in connection with improvements to these assets, unless the improvements expand the capacity or efficiency of an asset. Utilization of this approach requires the State to: 1) commit to maintaining and preserving affected assets at or above a condition level established by the State, 2) maintain an inventory of the assets and perform periodic condition assessments to ensure that the condition level is being maintained, and 3) make annual estimates of the amounts that must be expended to maintain and preserve assets at the predetermined condition levels. Roads and bridges maintained by the Department of Transportation are accounted for using the modified approach.

Compensated Absences

It is the State's policy to permit employees to accumulate earned but unused vacation and sick pay benefits. In the governmental fund financial statements, liabilities for compensated

absences are accrued when they are considered “due and payable” and recorded in the fund only for separations or transfers that occur before year-end. In the government-wide and proprietary fund financial statements, the State has accrued a liability for compensated absences, recognizing the obligation to make future payments.

Long-Term Obligations

In the government-wide financial statements and proprietary fund financial statements, long-term debt and other long-term obligations are reported as liabilities in the applicable governmental activities, business-type activities, or proprietary fund statement of net assets. Bond premiums and discounts, as well as issuance costs, are deferred and amortized over the life of the bonds using the effective interest method. Bond issuance costs are reported as deferred charges and amortized over the term of the related debt.

In the fund financial statements, governmental funds recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as expenditures.

Fund Equity

In the fund financial statements, governmental funds report reservations of fund balance for amounts that are not available for appropriation or are legally restricted by outside parties for a specific purpose.

The State Constitution provides that certain excess unencumbered budgetary general funds at the end of a fiscal year must be placed in a reserve account (the Budgetary Reserve Account). This account, designed to provide a cushion against unanticipated deficits, may not exceed 5% of the estimated general fund revenue for the ensuing fiscal year. Total funding of the budgetary reserve account was \$186.4 million at June 30, 2010. In the government-wide financial statements, restricted net assets represent balances that are subject to external restrictions or were created by enabling legislation. Per the Delaware Constitution, the General Assembly, by three-fifths vote of the members elected to each House, may appropriate from the budgetary reserve account. Should the State attempt to use this reserve for other purposes, such could be challenged by citizens.

(d) Grants

Federal grants and assistance awards made on the basis of entitlement periods are recorded as intergovernmental receivables when entitlement occurs. All other federal reimbursement type grants are recorded as accounts receivable when the related expenditures or expenses are recognized. Related revenue is recorded subject to availability. Amounts not collected within 60 days of fiscal year-end are recorded as deferred revenue. In addition to monetary

transactions, federal grants also include non-monetary transactions related to the supplemental nutrition assistance program.

(e) Litigation Revenue

In 1997, several states began litigation against defendant tobacco product manufacturers to recover certain amounts the states expended to provide health care to the users of tobacco products. In 1998, a settlement was reached which provided that the states cease litigation against the manufacturers. As part of the Master Settlement Agreement, certain manufacturers agreed to remit periodic payments to the states until 2025. The State's share of the estimated \$200 billion settlement amounted to \$774.5 million. Amounts to be remitted are calculated based on a variety of specific settlement provisions. Future tobacco product sales are one key factor used in determining periodic payment amounts. A receivable of \$13.4 million has been recorded pursuant to the settlement. The Master Settlement agreement receipts of \$28.0 million are recorded in the general fund as part of other revenue and as miscellaneous general revenue on the government-wide statement of activities. Expenditures of monies received under the Master Settlement Agreement are authorized by legislation and are dedicated to health care and related programs.

NOTE 2 CASH, INVESTMENTS AND RESTRICTED ASSETS

Cash Management Policy and Investment Guidelines

The State Treasurer maintains the majority of the deposits and investments of the primary government and uses professional money managers to invest the State's deposits according to guidelines set in the *Statement of Objectives and Guidelines for the Investment of State of Delaware Funds* (the Policy) by the State's Cash Management Policy Board (the Board).

The Board, created by State law, establishes policies for, and the terms, conditions, and other matters relating to, the investment of all money belonging to the State except money in DPERS and the OPEB Trust and money held under the State deferred compensation program. By law, all deposits and investments belonging to the State are under the control of the State Treasurer except for those that, by specific authority, are under the control of other agencies or component units, as determined by the Board in various pooled investment funds (State Investment Pool). The deposit and investment policies of those entities may differ from those of the State Treasurer. Typically, these agencies follow the deposit and investment policies of the State Treasurer in an effort to minimize deposit and investment risks.

As mandated by State statutes, the State's funds shall be invested pursuant to the prudent person standard as defined in the Policy. The prudent person standard allows the Board to establish investment policies based on investment criteria that it defines, and it allows the Board to delegate investment authority to investment professionals. This standard of care not only permits but also encourages diversifying investments across various asset classes.

The objectives and guidelines, as outlined in the Policy, apply to all cash and special purpose funds for which the State is financially accountable. These funds are categorized as outlined below:

- **Cash Accounts.** Cash accounts divide the State's available cash into three parts:
 - **Collection and Disbursement Accounts:** The State maintains an amount of cash in its general collection and disbursement accounts sufficient to meet its outstanding obligations.
 - **Cash and Liquidity Accounts:** The majority of the State's cash balance available for investment is maintained in the cash and liquidity accounts. These accounts are managed and invested by investment managers, selected by the Board through competitive bid, in order to maximize the return to the State while, at the same time, providing for safety of principal and sufficient liquidity for the State to meet its cash needs. The State manages its short-term investments to ensure sufficient liquidity and prevent their premature sale for the purpose of covering expenditures. Short-term investments should mature at face value in sufficient amounts to meet any needs.
 - **Reserve Cash (Intermediate) Account:** To the extent cash is not expected to be needed on short notice, the Board directs the funding of a third part. This account is managed and invested by an investment manager or managers, selected by the Board after a competitive bid, in order to maximize the return on said money to the State while providing for the safety of principal. The State manages its intermediate investments to ensure they are made under circumstances and in amounts in which the State would not be forced to liquidate them at a loss.
- **Special Purpose Accounts.** There are two primary types of special purpose accounts:
 - **Endowment Accounts:** Endowment accounts consist of funds set-aside for specified purposes.
 - **Authority Accounts:** The State's Authorities (state agencies, local school districts and component units) maintain a variety of fund types, including various operating funds, bond funds and debt service reserve funds.

The Policy specifies the types of investments the investment managers can make; the maximum percentage of assets that may be invested in particular instruments; the minimum credit quality of these investments; and the maximum length of time the assets can be invested. The Policy provides, among other things, that no more than 10% of the entire portfolio may be invested in obligations of any one issuer other than the U.S. Government. The following investments are permissible for all funds under the review of the Board, subject to percentage limitations of the account.

- U.S. government securities
- Government agency securities
- Certificates of deposit, time deposits, and bankers acceptances

- Corporate debt instruments
- Repurchase agreements
- Reverse repurchase agreements
- Money market funds
- Canadian treasury bills
- Canadian agency securities
- Mortgage-backed and asset-backed securities
- Municipal obligations

Additional permissible investments for special purpose accounts only:

- Guaranteed investment contracts
- Asset-backed securities and trust certificates

The primary government's accounts are categorized as "authority accounts". At June 30, 2010, investments of the primary government are primarily in commercial paper, corporate obligations, government agency bonds and notes, and municipal obligations. All of these meet the objectives defined by the Policy.

The State's Cash Management Policy Board *Statement of Objectives and Guidelines for the Investment of State of Delaware Funds* is available on the Internet at http://treasurer.delaware.gov/information/cash_investment.shtml.

Risks

The following deposits and investments disclosure of the primary government excludes the OPEB Trust and DPERS, which are described on pages 59 - 64.

Custodial Credit Risk

Deposits

For deposits, custodial credit risk is the risk that, in the event of the failure of a depository financial institution, the deposits or collateral securities may not be recovered from an outside party.

All State deposits are required by law to be collateralized by direct obligations of, or obligations, which are guaranteed by, the United States of America, or other suitable obligations as determined by the Board, unless the Board shall find such collateralization not in the best interest of the State. The Board has determined that certificates of deposit and time deposits must be collateralized, unless the bank issuing the certificate has assets of not less than \$5 billion and is rated not lower than "B" by Fitch, Inc. Bank Watch. The Board has also determined that State demand deposits need not be collateralized, provided that any bank that holds these funds has had for the last two years a return on average assets of 0.5% or greater and an average equity-

capital ratio of at least 1:20. If the bank does not meet the above criteria, collateral must consist of one or more of the following:

- U.S. Government securities;
- U.S. Government agency securities;
- Federal Home Loan Board letters of credit;
- State of Delaware securities; or
- Securities of a political subdivision of the State with a Moody's Investors Service rating of "A" or better.

Additionally, the bank must ensure that those securities pledged as collateral have a market value equal to or greater than 102% of the previous month's average ledger balance(s) in the account(s) by the third business day of the following month and ensure that securities pledged are identified as held in the State's name and are segregated on the bank's records.

At June 30, 2010, the carrying amount of the primary government's deposits was \$393.2 million and the bank balance was \$526.3 million. Of the \$526.3 million bank balance, \$95.1 million was fully insured; \$10.2 million represents unemployment insurance taxes collected from Delaware employers that are held in escrow by the U.S. Treasury; and the remaining \$421.0 million was subject to custodial credit risk because they were uninsured and uncollateralized. Included in the primary government's deposits are agency funds. The carrying amount of the agency fund's deposits was \$23.5 million and the bank balance was \$28.2 million. Of the \$28.2 million bank balance, \$23.9 million was fully insured and the remaining \$4.0 million was subject to custodial credit risk because the deposits were not covered by depository insurance or the deposits were uncollateralized, collateralized with securities held by the pledging financial institutions, or collateralized with securities held by the pledging financial institution's trust department or agent but not in the government's name. State law permits the Treasurer to deposit in a financial institution in the State in which the Treasurer has custody if the deposit is interest bearing; the financial institution provides collateral that has a market value that exceeds the amount by which a deposit exceeds the deposit insurance, and a custodian holds the collateral.

Investments

Custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the value of the investment or collateral securities that are in the possession of an outside party may not be recovered. Investments are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by either the counterparty or the counterparty's trust department or agent but not in the government's name.

At June 30, 2010, the primary government's investments were \$1,921.1 million. Of the primary government's investments, \$395.4 million was fully insured and collateralized. Included in the primary government's investments of \$1,921.1 million are agency funds. The amount of the agency funds' investments was \$22.8 million.

The following table provides information on \$1,525.7 million of the primary government's investments that are exposed to custodial credit risk; \$0.8 million of this amount represents the agency funds' investments:

Investment Type	Fair Value	
	(Expressed in Thousands)	
Corporate obligations	\$	401,810
Municipal obligations		48,066
U.S. government obligations		827,492
Other obligations		112,036
Commercial paper		67,120
Certificates of deposit		69,201
Total	\$	<u>1,525,725</u>

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. Also, the terms of a debt investment may cause its fair value to be highly sensitive to interest rate changes. The State manages interest rates using the segmented time distribution and effective duration methods. The State approves and contracts with different investment managers of fixed income securities in order to manage the exposure to interest rate risk with each different manager focusing on different goals of yield periods or duration of maturities of their particular portion of the investment pool. The Policy provides either maturity or duration limitations for the various investment pools. The interest rate risk inherent in the portfolio is monitored by measuring the weighted average maturity and/or duration.

Effective duration measures the expected change in value of a fixed income security for a given change in interest rate. This method takes into account the likely timing and amounts of variable cash flows for bonds with call options and prepayment provisions.

The following table presents the fair value and effective duration of the primary government and agency fund investments by investment type at June 30, 2010:

Investment Type	Fair Value	Effective Duration
	(Expressed in Thousands)	(in years)
Corporate obligations	\$ 402,215	1.37
Municipal obligations	48,066	2.09
U.S. government obligations	1,030,087	1.03
Other obligations	123,216	2.48
Commercial paper	247,732	0.12
Certificates of deposit	69,816	0.47
	<u>\$ 1,921,132</u>	

Although the Policy does not limit total portfolio maturities, it provides maximum maturity restrictions for each of the investment account types as described below:

- Cash Account Investment. The maximum maturity for any investment at the time of purchase for the cash account is one year.
- Liquidity Accounts. The maximum maturity for any investment at the time of purchase for the liquidity accounts is two years.
- Reserve Cash (Intermediate) Account. The maximum maturity for any investment at the time of purchase is 10 years. The maximum average maturity of the portfolio is seven years.
- Endowment Accounts. The maximum maturity for any investment at the time of purchase is 10 years. The maximum average maturity of the portfolio is seven years. The Board shall consider tailoring maturity restrictions to meet specific purposes for endowment accounts to be established in the future.
- Authority Operating, Bond and Debt Service Reserve Fund Accounts. Maturity Restrictions: The maximum maturity for any investment at the time of purchase is 10 years, except when prudent to match a specific investment instrument with a known specific future liability, in which case the maturity limitation shall match the maturity of the corresponding liability.

As of June 30, 2010, the primary government and agency funds had the following debt investments and maturities:

	Investment Maturity (Expressed in Thousands)				
	Fair Value	Investment Maturities			
		Less Than 1	1 to 5	6 to 10	More than 10
<u>Long Term Investments</u>					
Corporate obligations					
Corporate bonds	\$ 359,719	\$ 177,183	\$ 180,825	\$ 1,427	\$ 284
Asset-backed securities	42,496	58	42,438	-	-
Municipal obligations	48,066	20,615	19,980	4,767	2,704
U.S. government obligations					
U.S. Treasury bonds, notes	252,186	144,928	99,401	7,857	-
U.S. Agency bonds, notes	476,496	152,762	306,126	-	17,608
Other obligations

<u>Short Term Investments</u>					
Commercial paper	247,732	247,732	-	-	-
Certificate of deposit	69,816	65,414	4,402	-	-
U.S. government obligations					
U.S. Treasury bonds, notes	88,828	88,828	-	-	-
U.S. Agency bonds, notes	212,577	212,577	-	-	-
Total Investments	\$ 1,921,132	\$ 1,138,813	\$ 747,672	\$ 14,051	\$ 20,596

Credit Risk

Credit risk of investments is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

The Policy requires that the State's investments in asset-backed securities be rated AAA by a major rating agency. Corporate debt instruments must be rated by Standard and Poor's Ratings Services (S & P) and/or Moody's Investor Service (Moody's) and/or Fitch Ratings (Fitch) as follows:

<u>Investment</u>	<u>S & P</u>	<u>Moody's</u>	<u>Fitch</u>
Commercial paper	A-1	P-1	F1
Senior long-term debt	A	A	A
Corporate bonds	AA	Aa	AA

Additionally, the State has multiple non-rated/pooled accounts which represent immaterial amounts when treated individually. The Board permits the types of investments which are held in these accounts.

The following table presents the State's investments which were rated by S & P as of June 30, 2010. The ratings are presented using S & P's rating scale:

Credit Risk - Quality Ratings (Expressed in Thousands)							
<u>Investment Type</u>	<u>TSY</u>	<u>AGY</u>	<u>AAA</u>	<u>AA</u>	<u>A</u>	<u>A-1</u>	<u>NR</u>
<u>Long Term Investments</u>							
Corporate obligations

U.S. government obligations							
U.S. Treasury bonds, notes	88,828	-	-	-	-	-	-
U.S. Agency bonds, notes	-	212,577	-	-	-	-	-
Total Investments	\$ 341,014	\$ 629,826	\$ 204,841	\$ 319,839	\$ 61,810	\$ 196,841	\$ 166,961

TSY = Treasury

AGY = Agency which represents securities issued by government-sponsored enterprises that are not rated, but have an implied but not explicit guarantee from the federal government.

NR = Non-Rated Pooled accounts

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of the State's investments in a single issuer (5% or more of total investments). When investments are concentrated in one issuer, this concentration represents heightened risk of potential loss. No specific percentage identifies when concentration risk is present. The investments in obligations explicitly guaranteed by the U.S. government, mutual funds, and other pooled investments are exempt from disclosure.

The Policy provides the following percentage of account limitations, valued at market. Investments due to mature in one business day may be excluded from the computation of said limitations.

- A. U.S. Government - no restrictions.
- B. Government agency - 50% total; 20% in any one agency.
- C. Certificates of deposits, time deposits and bankers acceptances - 50% total; 5% in any one issuer.
 - 1. Domestic - No additional restrictions.
 - 2. Non-domestic - 25%
 - 3. Delaware domiciled – Not more than the lesser of \$10 million or 25% of an issuer's total equity capital may be invested in any one issuer. (Investments due to mature in one business day may be excluded from the computation of this percentage.)
- D. Corporate debt - 50% total; 25% in any one industry; 5% in any one issuer, 5% of any issuer's total outstanding securities.
 - 1. Domestic - No additional restrictions.
 - 2. Non-Domestic - 25%; 5% in any one issuer.
- E. Repurchase agreements - 50% total.
- F. Reverse repurchase agreements - 25% total.
- G. Money market funds - 25% total; 10% in any one fund except for the Cash Account, which may invest 100% of the Account in the Delaware Local Government Investment Pool (DELGIP) Fund. The Investment Guidelines for the DELGIP Fund are defined in Appendix B of the Policy.
- H. Canadian treasuries - 25% total; 10% in any one agency.
- I. Canadian agency securities - 25% total; 10% in any one agency.

- J. Mortgage-backed and asset-backed securities – 10% total (when combined with asset-backed securities and trust certificates if applicable).
- K. Municipal obligations - 5% in any one issuer.
- L. Guaranteed investment contracts - Permitted where it is prudent to match a specific investment instrument with a known specific future liability, subject to credit quality guidelines for commercial paper and corporate bonds and debentures and with adequate exit provisions in the event of the future downgrade of the issuer.
- M. Asset-backed securities and trust certificates – 10% total (when combined with mortgage-backed and asset-backed securities if applicable).

At June 30, 2010, the State's investments have met the requirement of all the State's laws and policies, when applicable. There were no obligations that represented 5% or more of the primary government's investments, except for U.S. government securities, pooled and mutual funds.

Foreign Currency Risk

Foreign currency risk is the risk that changes in the foreign exchange rate will adversely impact the fair value of an investment or deposit.

The Policy only permit investments denominated in U.S. dollars; therefore, the State's investments are not exposed to foreign currency risk.

Commitments

At June 30, 2010, the State did not enter into any commitment agreements with any investment managers for future funding of various asset classes.

Securities Lending

The Office of the State Treasurer, with the approval of the Cash Management Policy Board (the Board) entered into a contract with its custodian during Fiscal Year 2006 to participate in its securities lending program. In February 2009, the Board voted to withdraw from the securities lending program, primarily because of concern for current market conditions and counterparty risk. On December 4, 2009, the last loaned security was returned to the custody accounts, and no program collateral was held. The Board has no intention to return to the program.

OPEB Fund Trust (OPEB Trust)

Investment Policy

The State Board of Pension Trustees is responsible for the management and investment of the funds in the OPEB Trust. The Board authorized its Investment Committee to select the investment managers of the OPEB trust following the established investment guidelines for the

DPERS until a separate investment policy is adopted for the OPEB Trust. DPERS follows the prudent person standard, which requires fiduciaries to discharge their duties solely in the interests of participants and their beneficiaries with such care, skill, prudence, and diligence as a person acting in like circumstances would exercise in the conduct of an enterprise with similar character and with similar aims. The OPEB Trust investment objectives and policies currently include indexed exposure to approximate the DPERS's policy benchmark. The Investment Committee regularly reviews the OPEB investment performance, and considers investment vehicles which strike a balance between risk and return while being mindful of the government's time horizon for the OPEB investments.

Delaware Public Employees' Retirement System (DPERS)

Investment Policy

There are no State statutes limiting allowable investments for the DPERS. The investment decisions are dictated by the prudent person rule and the internal investment guidelines established by the Board as outlined below:

- Allocate a minimum of 20% of assets to fixed income investments such as bonds, cash equivalents, and certain real estate investments;
- Maintain a widely diversified portfolio, to minimize the risk of overexposure in any one market segment or investment style;
- Monitor the performance of all investment managers using specific benchmarks;
- Control exposure in illiquid asset classes;
- Review, re-examine, and reconfirm the operation of results of the investment process regularly;
- Identify new long-term opportunities for risk reduction and improved investment returns; and
- Review actuarial assumptions to ensure consistency with capital market expectations.

For the fiscal year ended June 30, 2010, management of the DPERS has operated in accordance with these policies, in all material respects.

Securities Lending

DPERS entered into a contract with its custodian to allow participation in its securities lending program. The objective of securities lending is to earn income and through a conservatively-operated and well-controlled program. DPERS elected not to participate in the program during fiscal years 2010 and 2009, but may elect to participate at some time in the future.

Investments

The following is a listing of fixed income investments and cash equivalents and related maturity schedule which shows the System's exposure to interest rate risk as of June 30, 2010. It is the DPERS' policy to classify corporate convertible bonds as equity securities because those

securities generally convert to preferred equity interests upon maturity. Corporate convertible bonds in the amount of \$578.8 million have been included in the chart below because they have maturity dates and are exposed to interest rate risk.

Delaware Public Employees' Retirement System (DPERS or System)
Investment Maturities (in Years)
 (Expressed in Thousands)

Investment Type/Sector	Fair Value	Less than 1	1 - 6	6 - 10	10 +
Asset backed securities	\$ 1,281	\$ -	\$ -	\$ 55	\$ 1,226
Bank loans	-	-	-	-	-
Cash equivalents	190,892	190,892	-	-	-
Commercial mortgage-backed	1,712	-	-	-	1,712
Corporate bonds	571,058	8,698	220,996	180,516	160,848
Corporate convertible bonds	578,789	12,288	407,338	61,138	98,025
Government agencies	22,691	-	4,098	18,593	-
Government bonds	47,039	-	27,016	8,593	11,430
Municipal/provincial bonds	14,319	8,663	-	1,431	4,225
Non-government backed C.M.O.s	-	-	-	-	-
Pooled investments	978,158	-	-	972,976	5,182
Total	\$ 2,405,939	\$ 220,541	\$ 659,448	\$ 1,243,302	\$ 282,648

Interest Rate Risk

The State has delegated an investment policy for DPERS to the Board and its Committees. The Investment Committee sets its own guidelines in conjunction with the Board to manage and review the DPERS exposure to fluctuating interest rates. Interest rate risk is a consideration when establishing and reviewing investment manager guidelines and asset allocation. Both topics are included in the Statement of Investment Policies and Objectives which is published on the DPERS website.

Credit Risk

The DPERS general investment policy is to apply the prudent-person rule to all risks incurred by the fund: Investments are made as a prudent person would be expected to act, with discretion and intelligence, to seek reasonable income, preserve capital and, in general, avoid speculative investments. The DPERS has no investment policy that would further limit its investment choices related to credit risk. As of June 30, 2010, the DPERS fixed income investments and cash equivalents had the following credit risk characteristics as indicated in the following schedule (expressed in thousands):

Moody's Ratings or Comparable	Percent of Total Fund	Market Value
AAA to A	21.0%	\$ 1,336,605
BBB to B	9.4%	596,068
CCC to C	1.9%	121,384
Less than C	0.0%	2,993
Not Rated	5.5%	348,889
Total:	<u>37.8%</u>	<u>\$ 2,405,939</u>

*Assets held in pooled investments – specific investment

Custodial Credit Risk

Of the DPERS \$284.4 million bank balance, there are two accounts which are uninsured and uncollateralized. Pooled deposits of \$0.6 million are held by the State Treasurer's Office. The balance of \$280.5 million represents deposits in short-term investments held by The Northern Trust Co., the custodial bank, as of June 30, 2010.

Investment Concentration Risk

As of June 30, 2010, DPERS held no concentration of investments in an individual issuer in excess of 5% of the fair value of the System's net assets.

Management Fees

DPERS paid \$18.5 million in management fees to the venture capital limited partnerships and transition managers for the fiscal year ended June 30, 2010. These fees are netted against investment income. Management fees charged at the underlying fund level for the investments held by the First State Independence Fund I, LLC ranged from 1% to 2% of net assets, plus a performance fee of 20% on positive investment earnings, which were netted against earnings.

Investment Commitments

DPERS has commitments to invest up to an additional \$669.3 million in venture capital limited partnerships in varying amounts as of June 30, 2010, to be drawn down, as called upon at any time during the term of each partnership, which is usually a ten-year period. Generally, these commitments are self-funding, in that the capital calls are met using cash flows generated by the existing venture capital/limited partnerships as managers in this asset class realize the proceeds of their investments.

Foreign Investments

Foreign investments include equity securities, bonds, cash, and cash equivalents. The following is a listing of the DPERS foreign assets as of June 30, 2010. The listing includes \$6.5 million of

investments of domestic issuers which have been classified as domestic, but are denominated in a foreign currency.

Investment Types				
(Expressed in Thousands)				
Currency	Fair Value in U.S. Dollars	Equities	Fixed Income	Cash and Cash Equivalents

Derivatives

Derivatives are instruments (securities or contracts) whose value is dependent on such things as stock or bond prices, interest rate levels, or currency exchange rates. In June 1994, the Board adopted a formal written policy on the use of derivatives which is reviewed periodically. This policy, as amended, was incorporated in the formalized investment policy adopted by the Board during fiscal year 2007 and reviewed during fiscal year 2008. Some selected managers are permitted to use derivatives. In every case, the types of derivatives used and limits on their use are stated in the manager's contract and are monitored on an ongoing basis. Derivatives serve a variety of useful purposes for DPERS, including the reduction of foreign exchange risk, the minimization of transaction costs and as a means of implementing value added strategies to enhance returns. So-called "exotic" derivatives are not used. If the use of derivatives in a

portfolio strategy results in some leverage, that leverage is never permitted to expose the Fund to a loss greater than the amount committed to that strategy.

The following lists principal categories of derivatives and their uses during the year:

<u>Category</u>	<u>Purpose</u>
Foreign exchange forward contracts	Hedge currency risk of investments denominated in foreign currencies; enhance return
Exchange traded futures contracts	Reduce transaction costs; hedge equity market risk; control fixed income; counterbalance portfolio duration; enhance return
Exchange traded options contracts	Enhance return; reduce transaction costs
Total return equity swaps	Hedge equity market risk exposure

Generally, derivatives are subject both to market risk and counterparty risk. The derivatives utilized by DPERS typically have no greater risk than their physical counterparts, and in many cases are offset by exposures elsewhere in the portfolio (for example, a short S&P 500 futures contract partially hedging a long position in S&P 500 securities). Counterparty risk, the risk that the “other party” to a contract will default, is managed by utilization of exchange traded futures and options where practical (in which case the futures exchange is the counterparty and guarantees performance) and by careful screening of counterparties where use of exchange traded products is impractical or uneconomical.

Derivative securities are priced and accounted for at their fair value. For exchange traded securities such as futures and options, closing prices from the securities exchanges are used. For fixed income derivatives such as collateralized mortgage obligations (CMOs), commercial pricing services (where available) or bid-side prices from a broker/dealer are used. Foreign exchange contracts are valued at the price at which the transaction could be settled by offset in the forward markets.

The Investment Committee monitors the DPERS derivative holdings on a regular basis to ensure that the derivatives used by managers of the DPERS will not have a material adverse impact on its financial condition.

Risk and Uncertainty

DPERS invests in various investment securities. Investment securities are exposed to various risks such as interest rate, market, and credit risks. Due to the level of risk inherent in investment securities, it is possible that changes in the values of investment securities will occur in the near term and that such changes could affect the amounts reported.

The actuarial accrued plan liabilities are measured based on assumptions pertaining to the interest rates, inflation rates and employee demographic behavior in future years. While these assumptions have been chosen after review of past history of the covered participants, it is likely

that future experience will not exactly conform to these assumptions. To the extent that actual experience deviates from these assumptions, the emerging liabilities may be higher or lower than anticipated. The more the experience deviates, the larger the impact on future financial statements.

COMPONENT UNITS

Diamond State Port Corporation (DSPC)

At June 30, 2010, the carrying value and the bank balances of the DSPC's deposits were \$16.0 million and \$16.3 million, respectively. Of the bank balances, \$250,000 is insured by the Federal Deposit Insurance Corporation (FDIC) and \$16.0 million is subject to custodial credit risk because the deposits are uninsured and uncollateralized. However, the deposits are held at financial institutions that satisfied the State's collateralization requirements and do not require collateralization.

Riverfront Development Corporation (RDC)

At June 30, 2010, the carrying value and bank balances of the RDC's deposits were \$270,812 and \$247,328, respectively and of which \$4,642 were held in the State Investment Pool. Deposits include \$170,465 of restricted cash and cash equivalents that have been assigned to the bank as collateral for repayment in the event of a default under the bond or collateral agreements. Of the bank balances, \$105,856 is insured by the FDIC and \$9,008 is uninsured and uncollateralized. The deposits are held at financial institutions that satisfied the State's collateralization requirements and do not require collateralization.

Delaware State University (DSU)

At June 30, 2010, the carrying value and bank balance of DSU's deposits were \$15.3 million and \$22.2 million, respectively. Of the bank balances, \$1.0 million is insured by the FDIC and \$21.2 million is subject to custodial credit because it is uninsured and uncollateralized. The deposits are held at financial institutions that satisfied the State's collateralization requirements and do not require collateralization. An additional \$3.5 million of cash and cash equivalents related to unexpended State appropriations are held at the State Treasurer's office. The credit risk for these deposits depends on the investment decisions made by the State Treasurer's office.

Investments of DSU totaled \$27.3 million stated at quoted market value, which consist of pooled investments. The investments are owned by DSU and are subject to categorization.

Delaware Technical and Community College Educational Foundation (DTCC Foundation)

At December 31, 2009, the DTCC Foundation's carrying value and bank balance was \$329,287 and \$329,287, respectively. The Foundation maintains cash balances at one financial institution located in Delaware. Accounts at the institution are insured by the FDIC up to \$250,000. The deposits are held at financial institutions that satisfied the State's collateralization requirements and do not require collateralization.

Investments of the DTCC Foundation totaled \$9.9 million, stated at quoted market value. These investments consist of pooled investments where the DTCC Foundation does not own specific securities. An additional \$56,091 is invested in life insurance, recorded at the cash surrender value.

Delaware Charter Schools

At June 30, 2010, the Delaware Charter Schools deposits carrying value was \$27.3 million. Deposits include \$25.9 million held in the State Investment Pool. Carrying value of the remainder of deposits was \$1.5 million. Bank balances totaled \$1.5 million, consisting of \$730,009 insured by FDIC and \$739,769 uninsured and uncollateralized. The deposits are held at financial institutions that satisfied the State's collateralization requirements and do not require collateralization.

Delaware State Housing Authority (DSHA)

Investment Policies

DSHA has an investment policy that encompasses all moneys related to the issuance of bonds, as well as, all funds otherwise held by DSHA. DSHA seeks first and foremost to ensure safety of principal, and secondly, to attain the highest possible return available given the risk constraints.

DSHA is allowed to invest in certain qualified investments as defined by amended Subchapter II, Section 4013, Chapter 40, Title 31, of the Delaware Code and DSHA's formal investment policy. Subject to certain limitations, such as the credit ratings on bonds and the capitalization level of depositories, "qualified investments" include:

- a. Obligations of or explicitly guaranteed by the U.S. or Delaware state governments.
- b. Obligations of U.S. government-sponsored enterprises and U.S. government agencies and instrumentalities.
- c. Obligations of depositories and other financial institutions.
- d. Bankers' acceptances.
- e. Commercial paper.
- f. Money market mutual funds.
- g. Corporate debt obligations.
- h. The State of Delaware investment pool with the State Treasurer's Office.
- i. Other investment arrangements made pursuant to an investment agreement authorized by a resolution of DSHA.

Certain federal funds administered by DSHA are subject to additional limitations within the qualified investments listed above.

For the State of Delaware Investment Pool, fair value of the pool shares is the same as the carrying value of the pool shares. The State of Delaware Cash Management Policy Board provides oversight for this pool.

Investments

Investments are presented at fair value. Fair values are determined by quoted market prices based on national exchange prices for all investments, except for the State of Delaware Investment Pool. The State pool is valued based on the pool's share price. The table below lists investments and their maturities:

Investment Type	Investment Maturities (in Years) (Expressed in Thousands)						
	Fair Value	Less than 1	1 - 5	5 - 10	10 - 20	20 - 30	More than 30
U.S. treasury notes	\$ 6,519	\$ 2,243	\$ 4,034	\$ -	\$ 334	\$ -	\$ -
U.S. treasury bonds	25	-	-	-	19	-	-

Money market savings accounts	1,997	1,997	-	-	-	-	-
Bank money market accounts	39,135	39,135	-	-	-	-	-
State of Delaware investment pool	22,586	22,586	-	-	-	-	-
Total Investments:	\$ 305,398	\$ 227,011	\$ 23,057	\$ 8,398	\$ 1,695	\$ 14,095	\$ 31,002

Interest Rate Risk

As a means of limiting its exposure to fair value losses arising from rising interest rates, the DSHA's investment policy places limits on maturities for the various funds as follows:

- a. Single Family & Multi-Family Program Funds: Investment contracts for bond program funds should have a maturity that matches the final bond maturity to minimize reinvestment risk. Individual investments of bond program funds should match anticipated cash requirements or provide sufficient liquidity to allow funds to be accessed to meet bond resolution requirements without incurring material principal losses.
- b. Federal Program Funds: HUD funds held by DSHA should have a maximum maturity of one year. HUD-related funds held by DSHA (escrows, replacement reserves, residual receipts) shall have a maximum maturity of three years.
- c. General Fund: The Operating Reserve Account, which is managed externally, should have a maximum maturity at the time of purchase of ten years. However, specific investments may be transferred into the account from time to time that may have a longer maturity. DSHA may further reduce the maximum maturity of the operating reserve investments from time to time.

- d. Other DSHA funds should be invested with a maturity that matches, or is prior to, the anticipated time at which the funds will be needed.
- e. DSHA investments (other than deposit accounts, money market fund shares, or deposits with the State Treasurer's Office) should have a fixed maturity date by which principal and accrued interest will be fully repaid. DSHA is not permitted to enter into investments that have an expected maturity date that can be extended, depending upon market conditions.

Credit Risk

DSHA's general investment policy is to make investments with judgment and care, under circumstances then prevailing, which persons of prudence, discretion and intelligence exercise in the management of their own affairs, not for speculation, but for investment, considering the probable safety of their capital, as well as, the probable income to be derived. DSHA's investment policy limits its investment choices as mentioned above under Investments. For DSHA's Single and Multi-Family Programs, the investment rating must be equal or exceed the bond rating. DSHA's Operating Reserve Account has a specific credit quality requirement. Corporate debt obligations and shares of money market mutual funds shall have a long-term rating of AA and/or Aa, respectively by Standard & Poor's (S&P) and Moody's at the time of purchase. As of June 30, 2010, DSHA's investments were rated as follows:

Investment Type	Ratings (S & P)						
	(Expressed in Thousands)						
	AAA	AA+	AA-	A+	A	BBB+	NR
U.S. Agencies	\$ 17,807	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -
Corporate Notes	-	446	251	922	879	-	-
Commercial Paper	-	-	-	-	-	-	104
Total	\$ 17,807	\$ 446	\$ 251	\$ 922	\$ 879	\$ -	\$ 104

Custodial Credit Risk

For deposits, custodial credit risk is the risk that in the event of failure, the Authority's deposits may not be returned. All of the Authority's deposits are insured by the FDIC. As of June 30, 2010, the carrying value and bank balances of the Authority's deposits were \$0.2 million and \$1.5 million respectively.

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, DSHA will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. Of DSHA's \$305.4 million investment balance, \$211.2 million represents deposits held by various Guaranteed Investment Contract (GIC) providers under investment agreements. These accounts are uninsured and

uncollateralized. The funds are specifically identified for DSHA, but the custodial credit risk cannot be categorized for these funds. Credit risk for such investments depends on the financial stability of the GIC provider whose rating must equal or exceed that of the bond rating. The bank and savings money markets must be collateralized at 102% or greater by securities pledged and identified as held in DSHA's name. Although the State Investment Pool is not collateralized, the State's Cash Management Policy Board requires that investments meet certain ratings, investment types and maturity criteria. DSHA's investment policy does not limit the amount of securities that can be held by the counterparties.

NOTE 3 RECEIVABLES

All trade, loan and tax account receivables are recorded net of an allowance for doubtful accounts. In the governmental fund financial statements, receivables that will not be available within 60 days of year-end are recorded as deferred revenue. In the government-wide financial statements, receivables not expected to be collected during the subsequent year are recorded as noncurrent.

Taxes receivable represent the amount of personal, business, and other taxes determined to be measurable and available at June 30, 2010. Uncollectibility for taxes receivable primarily results from identified assessment problems, inability to locate taxpayers, and accounts of decedents.

The State levies taxes on real property through its school districts. Each of the three counties of the State establishes the assessed values of real estate and bills and collects its own property taxes. Local school property taxes are levied by local school districts based on the assessed value of real estate, as determined by county taxation formulas. Taxes are levied on July 1 and are payable on or before September 30. Taxes paid after the payable date are assessed a 6% penalty for nonpayment and 1% interest per month thereafter. Taxes are billed and collected by the counties with funds remitted to the local school district to be used for the local share of school operating costs and debt service on general obligation bonds issued for capital improvements. Receivables as of year-end for the State's individual funds, including the applicable allowances for uncollectible accounts, are as follows:

**Receivables - Primary Government

Deferred Revenues

Governmental funds report deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. Amounts considered unearned federal grant drawdown's are reported as deferred revenue.

The various components of deferred revenue and unearned revenue reported at year-end in the governmental funds are as follows:

Deferred Revenues
(Expressed in Thousands)

Unavailable

Taxes receivable:	\$	73,194
Non-tax receivables:		
Intergovernmental Receivables		33,979
Loans and notes receivables		192,520
Accounts receivables		63,521
Subtotal unavailable		363,214

Unearned

Advance park reservation fees		936
Federal grant advance drawdowns		16,921
Subtotal unearned		17,857
Total deferred revenue	\$	381,071

NOTE 4 INTERFUND RECEIVABLES, PAYABLES, AND TRANSFERS

(a) Due From/Due to Other Funds

Receivables reported as “due from other funds” and the related payables reported as “due to other funds” represent amounts owed to State organizations by other organizations within the State reporting entity. Amounts receivable from or payable to other levels of government are reported as intergovernmental receivables or payables. The composition of due from/due to balances at June 30, 2010, expressed in thousands, is as follows:

<u>Receivable Fund</u>	<u>Payable Fund</u>	<u>Amount</u>
General	Capital Projects	\$ 18,145
	Federal	\$ 30,546
	Local school district	2,665
	Subtotal	51,356
General	Enterprise Fund	
	Lottery	6,510
	Total	\$ 57,866

The amounts due from the federal fund are recorded for borrowings to eliminate negative balances in the State Investment Pool. The amount for the federal fund is created by

expenditures relating to reimbursement type federal grant revenues. These costs result in a negative balance in the State Investment Pool. Amounts due from local school districts represent balances due from the Christina School District which were borrowed for general operating expenses and capital projects.

The amount due from the Lottery fund (reported as an internal balance on the statement of net assets), represents profits required by law to be transferred to the general fund.

(b) Transfers In From/Out To Other Funds

Transfers in and transfers out from/to other funds in the statement of revenues, expenditures and changes in fund balance, the statement of revenues, expenses and changes in fund net assets, proprietary funds and payment from the primary government in the statement of activities-component units represent transfers between funds. Transfers are used to 1) move revenues from the fund that statute requires to collect them to the fund that statute requires to expend them, 2) use restricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations, and 3) move profits from the Lottery fund as required by State law.

A schedule of transfers in and transfers out for the year ended June 30, 2010 is presented below (expressed in thousands):

	<u>Transfers In</u>	<u>Transfers Out</u>
Governmental funds		
General	\$ 914,041	\$ 26,422
Federal	-	21,220
Local school district	56,174	90,924
Capital Projects Fund	-	495,769
Proprietary funds		
Lottery	-	334,609
DelDOT	3,112	4,383
Total of all funds	<u>\$ 973,327</u>	<u>\$ 973,327</u>

NOTE 5 GENERAL OBLIGATION BONDS

General obligation bonds have been authorized and issued primarily to provide funds for acquisition and construction of capital facilities for State administrative operations, public and higher education, public and mental health, correction and conservation purposes and for maintenance and construction of highway facilities.

The State Constitution provides that the State may issue general obligation bonds for specific purposes in amounts approved by the General Assembly. The enabling acts pursuant to which

the bonds are issued provide that all bonds issued shall be direct obligations of the State; that is, the bonds are secured by the pledge of the full faith and credit of the State. General obligation bonds are redeemed over a period not to exceed 20 years, generally from available resources in the general fund. Accordingly, the State has generally issued 10- and 20-year serial bonds with equal amounts of principal maturing each year. Bonds outstanding have call provisions providing for early redemption at the option of the State, generally beginning 8 or 10 years following the date of issue in the inverse order of maturity, in whole or in part, at redemption prices not to exceed 100% of par value.

On October 22, 2009, the State issued \$493.0 million of general obligation bonds consisting of \$313.7 million of Series 2009C and \$179.3 million of Series 2009D. Of the \$313.7 million bonds issued as Series 2009C, \$283.0 million in principal was issued to refund higher priced bonds resulting in a net present value savings of \$15.3 million, or 5% of the principal refunded. The Series 2009C bonds were sold to retail and institutional investors and bore coupons between 2% and 5%. The Series 2009D bonds were designated as taxable "Build American Bonds" for purposes of the American Recovery and Reinvestment Act of 2009. The State has elected to receive a cash subsidy from the U.S. Treasury of 35% of the interest payable on the Series 2009D bonds. Series 2009D coupons range from 3.7% to 5.3%. The investments and fixed earnings on the investments are sufficient to fully provide for all further debt service on the refunded bonds. The refunding for Series 2009 C resulted in an economic gain of \$16.1 million and a debt service cash savings over the next nineteen years of \$15.3 million.

The refunding for Series 2010 resulted in an economic gain of \$10.3 million and a debt service cash savings over the next eleven years of \$9.2 million.

On May 11, 2010, the State issued \$152.2 million in general obligation bonds, which were used to refund \$160.5 million of the State's existing tax-exempt debt for savings. The bonds mature between January 1, 2011 and July 1, 2020 and bear coupons between 1.5% and 5%. The transaction reduced debt service by \$10.3 million.

Bonds issued and outstanding totaled \$1,497.4 million at June 30, 2010. Of this amount, \$516.0 million is supported by property taxes collected by the local school districts. During fiscal year 2010, the local school district funds transferred \$58.1 million of property tax revenue to the State to meet the required debt service on their share of the debt.

The State is authorized to issue an additional \$225.6 million of general obligation bonds at June 30, 2010. Interest rates and maturities of the outstanding general obligation bonds are detailed as follows:

General Obligation Bonds

(Expressed in Thousands)

Sale #	Description	Interest Rates	Maturity Date (Fiscal Year)	Balance Outstanding at June 30, 2010

2026-2030	<u>125,780</u>	<u>13,179</u>	<u>138,959</u>
Total	<u>\$ 1,497,355</u>	<u>\$ 483,465</u>	<u>\$ 1,980,820</u>

Changes in general obligation bonded debt during the year ended June 30, 2010 are summarized in Note 10.

In prior years, the State has defeased certain general obligation bonds by creating separate irrevocable trust funds. New debt has been issued or cash appropriated and the proceeds have been used to purchase U.S. government securities that were placed in the trust funds. The investments and fixed earnings from the investments are sufficient to fully service the defeased debt. Accordingly, the debt has been considered defeased and has been removed as a liability from the government-wide financial statements. At June 30, 2010, a total of \$475.6 million of defeased bonds were outstanding.

NOTE 6 REVENUE BONDS

Revenue Bonds

The State Constitution empowers certain State agencies and authorities to issue bonds that are not supported by the full faith and credit of the State. These bonds pledge income derived from acquired or constructed assets or some other stream of revenues to retire the debt and pay related interest.

Primary Government**DelDOT Fund***Delaware Transportation Authority (Authority)*

The Authority is subject to oversight by the Department of Transportation and is included in the DelDOT fund. The Authority assists in the implementation of the State's plans and policies regarding the coordination and development of a comprehensive, balanced transportation system for the State. It has the power to develop a unified system of air, water, vehicular and specialized transportation in the State. The Authority includes the Transportation Trust Fund and the Delaware Transit Corporation. The Secretary of the Department of Transportation, with consent of the Governor, appoints the Authority's Director.

To assist the Authority in financing a unified transportation system, the State created a Transportation Trust Fund (the Trust Fund) within the Authority which receives all receipts of the Authority. The primary sources of funding of the Trust Fund are motor fuel taxes and motor vehicles fees imposed and collected by the State and deposited in the Trust Fund, and revenue from the Delaware Turnpike, which the Authority owns and operates. The Authority also has the power to issue bonds, with legislative authorization, to finance improvements to the State's transportation system. Debt issued by the Authority does not constitute a debt of the State or a pledge of its general taxing power or of its full faith and credit. Rather, the outstanding revenue bonds are obligations of the Authority payable solely from and secured by a pledge and assignment of certain tolls and revenues such as motor fuel tax revenue, motor vehicle document fees, and motor vehicle registrations. The Authority may apply Trust Fund revenue in excess of debt service requirements for transportation projects, subject to legislative authorization, and may pledge any or all of this revenue to secure financing for these projects.

The Authority has defeased various bond issues by creating separate irrevocable trust funds. New debt has been issued and the proceeds have been used to purchase U.S. government securities that were placed in the trust funds. The investments and fixed earnings from the investments are sufficient to fully service the defeased debt until the debt is called or matures. For financial reporting purposes, the debt has been considered defeased and is therefore not reported as a liability. At June 30, 2010, the amount of defeased debt outstanding amounted to \$151.6 million.

The Authority had a total of \$200.2 million in authorized but unissued revenue bonds at June 30, 2010. Bonds outstanding at June 30, 2010 amounted to \$1,182.0 million and are presented as follows:

Delaware Transportation Authority Revenue Bonds

Component Units

Debt issued by the following component units is not secured by the full faith, credit and taxing power of the State.

Delaware State Housing Authority (DSHA)

DSHA is authorized to issue bonds and notes, with the approval of the State, in order to exercise its powers. These bonds and notes are secured solely by the revenues, loans, and other pledged assets under the related Bond Indenture of DSHA.

DSHA has issued revenue bonds to provide financing for mortgage, construction, and other loans to not-for-profit and limited for profit housing sponsors; to make loans to mortgage lenders, requiring the proceeds thereof to be used for making new qualified residential mortgage loans; and to purchase qualified mortgage loans from mortgage lenders. The bonds are direct obligations of DSHA and are secured by the mortgage loans made or purchased under the applicable resolutions; the revenues, prepayments and foreclosure proceeds received are related to the mortgage loans, and certain funds and accounts established pursuant to the applicable bond resolutions. All bonds are callable subject to certain restrictions. Interest rates on bonds outstanding range from 1.35% to 7.75% with maturities of such bonds up through July 1, 2048.

On September 11, 2009, DSHA issued \$40.0 million of Single Family Mortgage Revenue Bonds, 2009 Series A. The proceeds of the sale were used to provide down payment assistance and low rate mortgages to first-time home buyers and to provide over \$2.0 million of Second Mortgage Assistance Loans for down payment and closing cost assistance to qualified home buyers.

On December 23, 2009, DSHA issued \$150.0 million of Single Family Mortgage Revenue Bonds, 2009 pursuant to the New Issue bond Program (NIBP) established jointly by Fannie Mae, Freddie Mac, the Federal Housing Finance Agency, and the U.S. Department of the Treasury (US Treasury) under which the US Treasury provides funding for bond issuance. The proceeds from the sale are currently held in escrow pending matching DSHA bond issuances of market bonds to make fund available to finance qualifying single family mortgage loans. The Authority has until December 31, 2010 to meet the requirement for matching bond issuances. If this deadline is not met the \$150.0 million NIBP bonds are subject to mandatory redemption plus the payment of accrued interest. As of June 30, 2010, all of the NIBP bonds have been classified as a current liability.

Revenue bonds payable decreased by \$1.6 million due to accretion on capital appreciation bonds, netted by deferred amounts on refunding and bond forgiveness.

Outstanding bonds at June 30, 2010 amounted to \$964.3 million. Future debt service requirements for DSHA's bonds are shown on the following table:

Delaware State Housing Authority Revenue Bonds

(Expressed in Thousands)

Year Ending June 30	Principal	Interest	Total
2011	\$ 168,457	\$ 40,798	\$ 209,255

Total	\$ 964,272	\$ 721,989	\$ 1,686,261

Riverfront Development Corporation (RDC)

Bonds payable represents amounts due under variable rate bonds, which were issued by RDC in November 1997. The bonds bear interest at a rate which is determined quarterly and is equal to the yield on 90-day U.S. Treasury bills plus 0.30% with a minimum rate of 5.125%. The rate as of June 30, 2010 was 5.125%. The bonds mature December 1, 2017.

Estimated future annual debt service requirements are as follows:

Riverfront Development Corporation Revenue Bonds

(Expressed in Thousands)

Year Ending June 30	Principal	Interest	Total
2011	\$ 360	\$ 177	\$ 537
2012	385	157	542
2013	420	137	557
2014	470	114	584
2015	505	89	594
2016-2017	1,485	103	1,588
Total	\$ 3,625	\$ 777	\$ 4,402

Delaware State University (DSU)

Revenue bonds payable at June 30, 2010 are as follows:

Delaware State University Revenue Bonds Payable (Expressed in Thousands)	
Revenue Refunding Bonds	\$ 7,459
Revenue Bonds	47,869
Student Housing Foundation Bonds	<u>50,703</u>
Total	<u><u>\$ 106,031</u></u>

On May 6, 1999, the DSU issued revenue refunding bonds of \$15.9 million (par value) through the Delaware Economic Development Authority. These bonds are due on October 1, 2017 and are secured by un-appropriated gross revenues of DSU.

The Bond Trust Indenture requires DSU to maintain a debt service reserve fund equal to the maximum annual debt service on all bonds outstanding under the Indenture. DSU meets this requirement by providing for the deposit through a surety bond in the debt service reserve fund. This bond was obtained from MBIA Insurance Corporation in the amount of \$1.6 million. DSU has pledged all operating and non-operating revenues, except State appropriations and restricted gifts, grants and bequests, for each academic year during which any of the bonds remain outstanding. It was noted that the 1999 bonds were backed by MBIA who had no letter of credit expiration date.

Interest rates and remaining maturities of the 1999 bonds are as follows:

Delaware State University Revenue Refunding Bonds (Expressed In Thousands)				
Year Ending June 30	Interest Rate	Principal	Interest	Total
2011	4.00	\$ 805	\$ 324	\$ 1,129

		7,495	<u>\$ 1,469</u>	<u>\$ 8,964</u>
Less Unamortized bond discount:		<u>(36)</u>		
Total bonds payable at June 30, 2010		<u>\$ 7,459</u>		

On December 20, 2007, DSU issued revenue bonds of \$47.6 million (par value) through the Delaware Economic Development Authority (Delaware EDA). The bonds are due on October 1, 2036 and are secured by un-appropriated gross revenues of DSU. The 2007 bonds are being issued as “Additional Bonds” under the Indenture, secured equally and ratable with all other Bonds issued and outstanding under the Indenture and any Alternative Indebtedness as provided in the Indenture and in the Loan Agreement. Pursuant to the Indenture, the Delaware EDA issued for the benefit of DSU, its \$15.9 million revenue refunding bonds (Delaware State University Project) Series 1999 to advance refund all other Bonds then outstanding under the Indenture. The 2007 bonds are insured by MBIA Insurance Corporation. The bonds were secured for the construction of a new student union, a swimming pool, and a student wellness/recreation center. The Union will include a student club area, book store, copy center, mail services, game room, study area, commuter lounge, meeting rooms and administrative offices. The primary function of the pool is to provide a recreational environment. The student wellness/recreation center will serve student athletes in restricted areas and the general student population will have recreational courts, fitness equipment, intramural sports, and an academic component for wellness and health programs. It was noted that the 2007 bonds were backed by MBIA who had no letter of credit expiration date.

The Delaware State University Student Housing Foundation (the Foundation), a component unit of DSU, is a non-profit corporation organized for the purpose of acquiring, developing, constructing, and operating student housing facilities primarily for students and faculty of DSU. The property is located in Dover, Delaware and the Foundation's development and construction project consists of three phases, collectively known as Phase I, II, and III. The Foundation has a fiscal year-end of June 30, 2010. The Foundation has issued student housing revenue bonds, secured by deed and payable solely from the revenues of the Foundation, for which bond proceeds were restricted to the development, construction, furnishing and equipping of the student housing facilities.

The Foundation refinanced the Series 2000A and 2002A Bonds (the Prior Bonds) with a loan payable in an aggregate amount of \$18.4 million funded with proceeds from the issuance of student housing revenue bonds, Series 2004A (for Phases I and II). Pursuant to the Trust indenture dated January 1, 2004, the proceeds from the sale of the Series 2004A Bonds are restricted to refunding prior outstanding bonds, to fund a debt service reserve fund for the Series 2004A Bonds, to fund an operating reserve fund for the Series 2004A Bonds, and to pay a portion of the costs of issuance of the Series 2004A Bonds. Effective February 21, 2004, the Foundation defeased the tax-exempt Series 2000A and the tax exempt Series 2002A term bonds at face value. It was further noted that the letter of credit for the 2004A bonds were backed by ACA with no letter of credit expiration, whereas the 2004B bonds were backed by Wachovia, who provided a letter of credit extension through January 2011.

The Foundation financed development and construction of Phase III with a loan payable in an aggregate amount of \$36.3 million funded with the proceeds from the issuance of variable rate demand student housing revenue bonds, Series 2004B and 2004C. Pursuant to the trust indenture dated January 1, 2004, the proceeds from the sale of the Series 2004 Bonds are restricted to financing the construction, furnishing, and equipping Phase III of the Project, to defease in advance of their maturities, the former Series 2000B and 2002B Bonds, to fund interest on the Series 2004 Bonds during construction, to fund a debt service reserve fund for the Series 2004B Bonds, and to pay a portion of the costs of issuance of the Series 2004 Bonds.

The liability of the Foundation under the loan agreements is limited to the value of the building and improvements, pledged revenues and amounts deposited with the trustee. The first monthly interest payment on the Series 2004 Bonds began on July 1, 2004. Total accrued interest on all bonds as of June 30, 2010 is \$0.4 million.

In February 2010, the University entered into an interest rate swap agreement in order to hedge interest rate exposure on the underlying bonds. The swap agreement had a fair value liability of \$11,024 at June 30, 2010 which is reflected in the consolidated statement of financial position.

Maturities of long-term debt at June 30, 2010 are as follows:

Delaware State University Student Housing Foundation Revenue Bonds	
(Expressed in Thousands)	
Year Ending June 30	Principal
2011	\$ 1,040
2012	1,090
2013	1,140
2014	1,185
2015	1,235
2016-2020	7,085
2021-2025	8,890
2026-2030	11,205
2031-2035	14,170
2036-2037	4,205
Subtotal	<u>\$ 51,245</u>
Less bond discount (net of accumulated amortization)	<u>(542)</u>
Total	<u><u>\$ 50,703</u></u>

In February 2009, management terminated an interest rate swap held with Wachovia, which was previously entered into for its variable rate, tax-exempt, Series 2004B bonds of \$35.9 million. The settlement of the swap resulted in a payment of \$212,670, with a June 30, 2009 obligation of \$212,629. While the termination of the swap did result in a violation of its debt covenant for its 2004B bonds, the Foundation did obtain a waiver for the respective covenant through January 2010. The Foundation entered into a new interest rate swap agreement with Wells Fargo (formerly Wachovia) in February 2010.

The swap agreement is as follows:

	<u>Notional Amount</u>	<u>Start Date</u>	<u>Maturity Date</u>	<u>Fixed Rate</u>	<u>Floating rate</u>
Municipal Swap Index	\$ 34,530,000	02/01/2010	06/30/2010	0.68%	USD/SIFMA
Municipal Swap Index	\$ 33,870,000	07/01/2010	01/22/2011	0.68%	USD/SIFMA

NOTE 7 LOANS AND NOTES PAYABLE**Component Units****Delaware State Housing Authority (DSHA)**

The State issued general obligation bonds on behalf of DSHA to provide funding for low-income housing loans. Proceeds from these bonds enabled DSHA to receive the savings from the financing adjustment factor issues in advance. Interest rates on these notes payable range from 4.60% to 6.10% with maturities through February 1, 2015. Debt service requirements for these notes are shown in the following table:

**Delaware State Housing Authority
Financing Adjustment Factor Notes**
(Expressed in Thousands)

<u>Year Ending June 30</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2011	\$ 123	\$ 117	\$ 240
2012	69	117	186

Total	<u>\$ 250</u>	<u>\$ 240</u>	<u>\$ 490</u>

Diamond State Port Corporation (DSPC)

Loan and notes payable of the DSPC at June 30, 2010 are shown below:

**Diamond State Port Corporation
Loans and Notes Payable**
(Expressed in Thousands)

Transportation Trust Fund Loan	\$ 21,043
City of Wilmington Port Debt Service Notes	7,454
Delaware River and Bay Authority	3,382
Wilmington Trust Company	263
Bank of America	250
Total	<u>\$ 32,392</u>

Transportation Trust Fund Loan

On November 30, 2001, DSPC entered into a loan agreement with DeIDOT. DSPC borrowed \$27.5 million. The funds were used to repay the balances in full of the original Delaware River and Bay Authority Note and the Wilmington Trust Company Note, and, at a discount, the City of Wilmington Deferred Payment Note.

In July 2006, the Transportation Trust Fund Loan was restructured to allow for the deferral of debt service principal and interest payments due July 1, 2006 and January 1, 2007, and to restructure the repayment of the outstanding principal balance effective July 1, 2007 over the next 22 years. Additionally, the State appropriated \$10.0 million to be applied as a repayment of principal and interest on July 1, 2007. Beginning March 31, 2007, principal and interest payments are March 31 and May 31 each year. In June 2009, the loan was restructured to allow for the deferral of debt service principal and interest payments due March 31, 2010 and May 31, 2010, and to restructure the principal balance effective July 1, 2009 over the next 21 years. The interest rate was 3.99% during 2010 and 4.6% during 2009. The loan matures March 2029.

Interest expense charged to operations in 2010 was \$0.8 million.

The future maturities of principal and interest payments on the Transportation Trust Fund Loan are as follows:

Transportation Trust Fund Loan
(Expressed in Thousands)

Year Ending June 30	Principal	Interest	Total
2011	\$ 789	\$ 839	\$ 1,628

2026-2030	5,231	466	5,697
Total	<u>\$ 21,043</u>	<u>\$ 9,071</u>	<u>\$ 30,114</u>

City of Wilmington Note

In 1995, in consideration of the acquisition of the Port of Wilmington assets from the City of Wilmington (the City), Delaware, DSPC issued to the City two separate notes consisting of a Port Deferred Payment Note in the amount of \$39.9 million and Port Debt Service Notes with an original face amount of \$51.1 million. These notes are secured by a first lien on substantially all of the DSPC's assets. These notes obligate DSPC to pay the City amounts that generally represent the outstanding principal balance of certain DSPC-related City general obligation bonds. The interest rates on the City bonds range from 3.2% to 6.4%.

On October 20, 2001, the City issued \$22.2 million of general obligation bonds with an average interest rate of 3.70% to advance refund \$21.3 million of outstanding 1992 A, B, and C Series general obligation bonds with an average interest rate of 6.16%. DSPC-related portions of the new bonds issued and old bonds redeemed were \$7.2 million and \$6.9 million, respectively, passed through to DSPC. Although the effect of the City's advance refunding on the Port Debt Service Note resulted in a deferred accounting loss of \$0.3 million for the year ended June 30, 2002, it reduced DSPC's debt service payments by \$0.3 million over eleven years resulting in an economic gain. The deferred loss on the refunding is accreted over the eleven year life of the debt.

On October 5, 2004, the City issued \$12.9 million of general obligation bonds with an average interest rate of 3.73% to advance refund \$11.7 million of outstanding 1993 B Series general obligation bonds with an average interest rate of 5.0%, and a portion of interest of \$0.2 million due January 1, 2005. DSPC-related portions of the new bonds issued and old bonds redeemed were \$4.0 million and \$3.6 million, respectively, passed through to DSPC. Although the effect of the City's advance refunding on the Port Debt Service Note resulted in a deferred accounting loss of \$0.4 million it reduces DSPC's debt service payments by \$0.3 million over the next seventeen and a half years resulting in an economic gain. The deferred loss on the refunding is accreted over the seventeen and a half year life of the debt. The deferred loss balance on the 2004 refunding as of June 30, 2010 was \$0.4 million.

On June 30, 2006, the State of Delaware paid the City, on behalf of DSPC, \$5.0 million in lieu of amounts due for the DSPC-related portions of the City's 1993B and 2004B bond payments due July 1, 2006 and July 1, 2007 totaling \$5.6 million, reducing the total amount owed to the City by \$5.6 million. The effect on the advance payment was a reduction of principal in the amount of \$5.0 million, a reduction of accrued interest due July 1, 2006 in the amount of \$0.3 million, and a resulting gain of \$0.4 million.

On June 26, 2008, the City of Wilmington refunded Series 1996B bonds, and those bonds were replaced by Series 2008A bonds, which DSPC has correlating notes with the City. Overall, DSPC will pay an additional \$60,000 in principal over the next nine years; however, DSPC will save \$0.3 million in interest during the same period. In summary, DSPC will pay \$0.3 million less on the City notes due to the refunding/financing. Maturity for these bonds occurs on July 1, 2022.

On April 19, 2010, the City of Wilmington refunded Series 1993B, 2004B, and 2008A bonds, and those bonds were replaced by Series 2010A bonds, which the Corporation has correlating notes with the City. The immediate impact is a reduction in debt service of \$1.06 million for 2011 and 2012. Overall, the Corporation will save \$0.1 million in principal, resulting in an economic gain; however, the Corporation will pay an additional \$0.9 million in interest over the next 13 years.

Total deferred loss balance as of June 30, 2010 was \$0.4 million.

Principal and interest payments made on the note during 2010 were \$2.5 million and \$0.4 million, respectively.

Interest expense on the note in 2010 was \$0.4 million.

The future maturities of principal and interest payments on the Port Debt Service Notes are as follows:

Port Debt Service Note (Expressed in Thousands)			
Year Ending June 30	Principal	Interest	Total
2011	\$ 422	\$ 364	\$ 786
2012	1,183	320	1,503

Deferred loss on refunding	(392)	-	(392)
Total	<u>\$ 7,454</u>	<u>\$ 2,313</u>	<u>\$ 9,767</u>

Delaware River and Bay Authority (DRBA) Obligation

On March 1, 2005, DSPC entered into an agreement with the DRBA whereby the DSPC agreed to lease to the DRBA land and a warehouse, located at the Port, for twenty years. The rent for the entire twenty-year term of the lease was \$4.0 million, to be paid in advance. Simultaneously, DSPC and the DRBA entered into an operating agreement in which DSPC agreed to make guaranteed payments to the DRBA, at the beginning of each month, starting with the date upon which substantial completion has occurred, for a period of twenty years, totaling \$4.0 million plus interest, which ranges from 1.5% to 5.32%.

This transaction is accounted for as a loan from DRBA secured by revenue from warehouse operations. DSPC began making guaranteed payments on July 1, 2007.

Interest expense incurred on this obligation was less than \$0.1 million.

The future maturities of principal and interest payments on the DRBA obligation are as follows:

Delaware River and Bay Authority Obligation
(Expressed in Thousands)

<u>Year Ending June 30</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2011	\$ 212	\$ 49	\$ 261
2012	215	46	261
2013	175	86	261
2014	181	81	262
2015	186	75	261
2016-2020	888	419	1,307
2021-2025	1,030	277	1,307
2026-2027	495	28	523
Total	<u>\$ 3,382</u>	<u>\$ 1,061</u>	<u>\$ 4,443</u>

Wilmington Trust Company (WTC) Loan

DSPC entered into a loan agreement with WTC on August 17, 2007 for \$0.4 million to purchase two 45,000 lbs. Hyster forklifts. Monthly payments to WTC of \$6,186 began on September 17, 2007. The loan is for seven years, and the interest rate is 7.40%.

Interest expense incurred on this obligation was less than a million during 2010.

The future maturities of principal and interest payments on the WTC obligation are as follows:

Wilmington Trust Company Loan
(Expressed in Thousands)

<u>Year Ending June 30</u>	<u>Principal</u>	<u>Interest</u>	<u>Total</u>
2011	\$ 56	\$ 18	\$ 74
2012	61	13	74
2013	65	9	74
2014	70	4	74
2015	11	-	11
Total	<u>\$ 263</u>	<u>\$ 44</u>	<u>\$ 307</u>

Bank of America Master (BOA) Lease

In 2008, DSPC utilized the State of Delaware's Master Lease program (as administered by BOA) to purchase the twelve forklifts for \$0.3 million using two loans. Both loans are for ten years at interest rates of 2.88% and 3.23%, respectively. Payments began one month after the purchase dates.

Interest expense incurred on this obligation was less than a million during 2010.

The future maturities of principal and interest payments on the BOA obligation are as follows:

Bank of America Master Lease
(Expressed in Thousands)

Year Ending June 30	Principal	Interest	Total
2011	\$ 29	\$ 7	\$ 36
2012	29	6	35

2014	31	4	35
2015	32	4	36
2016-2018	99	5	104
Total	<u>\$ 250</u>	<u>\$ 31</u>	<u>\$ 281</u>

Riverfront Development Corporation (RDC)

The RDC has entered into multiple mortgage agreements with various banks. These mortgages are secured by the real estate and vehicles financed. Principal balances of the mortgages total \$14.0 million at June 30, 2010. Interest rates for the mortgages vary between 5.455% and 8.15% and mature between June 2011 and November 2014.

Estimated future annual debt service requirements are shown as follows:

Riverfront Development Mortgage Debt
(Expressed in Thousands)

Year Ending June 30	Principal	Interest	Total
2011	\$ 4,945	\$ 499	\$ 5,444
2012	3,645	232	3,877
2013	345	125	470

Total	<u>\$ 14,035</u>	<u>\$ 1,028</u>	<u>\$ 15,063</u>

NOTE 8 LEASE COMMITMENTS**Primary Government**

The State has entered into various property and equipment operating leases (terms in excess of one year) with aggregate future rentals approximating \$176.9 million, of which \$151.2 million relates to property leases and \$25.7 million relates to equipment leases. Operating leases contain various renewal options. Any escalation clauses, sublease rentals and contingent rents are considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures of the related fund when paid. Lease payments for fiscal year 2010 were approximately \$36.8 million, of which \$25.6 million was for office space and \$11.2 million, was for equipment. The equipment leases held by the State consists mainly of computers, data processing equipment and fleet vehicles.

Significant annual equipment rentals include \$5.0 million for fleet vehicles and data processing equipment for the Office of Management and Budget and \$1.5 million for data processing equipment for the Department of Education. Significant annual real estate rentals include \$6.7 million for leases for Health and Social Services facilities, \$2.1 million for the Department of Services for Children, Youth and Their Families, \$2.1 million for office space for the Department of Correction, and \$3.2 million for the Department of Labor.

Future minimum lease commitments for operating leases as of June 30, 2010 are shown in the following table:

Lease Commitments	
(Expressed in Thousands)	
Year Ending June 30	Operating Leases
2011	\$ 32,644
2012	27,242
2013	23,407
2014	17,615
2015	16,824
2016-2020	38,351
2021-2025	17,089
2026-2030	2,880
2031-2039	846
Total	<u>\$ 176,898</u>

NOTE 9 OTHER LONG-TERM OBLIGATIONS

Compensated absences payable are reported in the government-wide financial statements and in the proprietary fund financial statements. They represent benefits accrued to State employees for vacation earned as of year-end and sick leave estimated to be paid out at retirement for services rendered as of June 30, 2010. Employees earn from 1.25 to 1.75 days of vacation leave per month depending on years of service. Employees or their estates are paid for unused vacation upon termination of employment. Employees earn 1.25 days of sick leave per month. The State's obligation for sick leave credit is a maximum of 45 workdays. \$162.4 million has been accrued for the Governmental Activities and \$14.2 million in the Business-type Activities for the total compensated absences liability. The current portion of the long-term obligation for compensated absences is \$13.2 million in the Governmental Activities and \$4.3 million in the Business-type Activities. Approximately \$135.1 million (83.2%) of the long-term obligation for compensated absences will be liquidated by the General Fund. Of the remainder, approximately \$10.5 million (6.5%) and \$16.8 million (10.3%) will be paid with Federal Funds and Local School District Funds, respectively.

The State has recorded \$75.0 million relating to the accrual of the obligation for escheated (abandoned) property of which \$15.0 million was recorded as the current portion.

The State has incurred obligations relating to scholarship and physician loan repayment programs, resulting in an additional long-term obligation of \$4.2 million, of which \$1.4 million was recorded as the current portion.

NOTE 10 CHANGES IN LONG-TERM OBLIGATIONS

The following table provides a summary of changes in long-term obligations of the primary government for the year ended June 30, 2010:

Changes in Long-Term Obligations					
Primary Government					
(Expressed in Millions)					
	Beginning Balance	Additions	Reductions	Ending Balance	Due Within One Year
Governmental Activities:					
Net pension obligation (note 15)	\$ 112.7	\$ 12.8	\$ (9.9)	\$ 115.6	\$ -
Other postemployment benefits	608.5	459.6	(162.0)	906.1	-

Total long-term obligations	\$ 65.0	\$	7.2	\$	(8.2)	\$	64.0	\$ 3.4

NOTE 11 NO COMMITMENT DEBT (NOT INCLUDED IN FINANCIAL STATEMENTS)

The State, by action of the General Assembly, created various authorities for the express purpose of providing private entities with an available low cost source of capital financing for construction of facilities deemed to be in the public interest. The bonds of the authorities represent limited obligations payable solely from payments made by the borrowing entities. The majority of the bonds are secured by the property financed. Upon repayment of a bond,

ownership of acquired property transfers to the entity served by the bond issuance. The State has no obligation for this debt. Accordingly, these bonds are not reflected in the accompanying financial statements. These bonds are issued through the Delaware Economic Development Authority and the Delaware Health Facilities Authority. The principal amount of bonds outstanding at June 30, 2010 for these entities amounted to \$1,113.2 million and \$540.4 million, respectively.

NOTE 12 CAPITAL ASSETS

(a) Primary Government

Capital asset activities for the fiscal year ended June 30, 2010 were as follows:

Governmental Activities	Capital Assets (Expressed in Thousands)			Ending Balance
	Beginning Balance	Increases	Decreases	
Capital Assets, not being depreciated				
Land	\$ 456,328	\$ 7,525	\$ (36,357)	\$ 427,496

NOTE 13 RISK MANAGEMENT

The State is exposed to various risks of losses related to workers' compensation, employee health-care and accident, automobile accident, police professional malpractice and property and casualty claims. It is the policy of the State not to purchase commercial insurance to cover these risks. Instead, State management believes it is more economical to manage its risk internally and thus, covers all claim settlements and judgments out of its general fund. The State continues to carry commercial insurance for all other risks of loss, including general liability and the remainder of the property and casualty liability. There have been no significant reductions in insurance coverage from prior years. In the past three years of insured coverage, settled claims have not exceeded commercial coverage.

Claim liabilities are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Liabilities include an amount for claims that have been incurred but not reported. Because actual claim liabilities depend on such complex factors as inflation, changes in legal doctrines and damage awards, the process does not result in an exact amount. Claim liabilities are reevaluated annually to take into consideration recently settled claims, the frequency of claims and other economic and social factors.

The management of the State estimates that the amount of actual or potential claims against the State at June 30, 2010, for workers' compensation, automobile accident and health-care claim liabilities is \$162.6 million. The claim liabilities relating to health-care totaling \$35.0 million have been recorded as accrued liabilities in governmental activities. The liability for workers' compensation and automobile accident liabilities totaling \$127.7 million has been recorded in governmental activities as claims and judgments. The current portion of these claims totals \$32.3 million. Other claim liabilities relating to police professional malpractice and property and casualty were not recorded at June 30, 2010 as the total of these liabilities were not material to the financial statements. Changes in the balances of claim liabilities during fiscal years 2010 and 2009 were as follows:

Changes in Claim Liabilities
(Expressed in Thousands)

Fiscal Year	Beginning Balance July 1	Current Year Claims and Changes in Estimates	Actual Claim Payments	Ending Balance June 30
2009	139,513	534,696	(521,705)	152,504
2010	152,504	559,788	(549,702)	162,590

DeIDOT

The Delaware Transit Corporation (DTC) maintains coverage on auto and worker's compensation insurance through both the retention of risk and the purchase of commercial insurance. The DTC has recorded \$6.4 million of claim liabilities as claims and judgments. Of this amount, \$3.2 million has been recorded as current.

NOTE 14 OTHER POST-EMPLOYMENT BENEFITS (OPEB)

Plan Description

On July 1, 2007, the Delaware OPEB Fund Trust (OPEB Trust) was established pursuant to Section 115 of the Internal Revenue Code and separate from the DPERS. The OPEB Trust is administered by the DPERS Board of Directors. Policy for and management of the OPEB benefits provided to retirees are the responsibility of the State. No stand-alone financial report is issued for the OPEB Trust.

The OPEB Trust is a single-employer defined benefit plan. The OPEB Trust provides retirement medical coverage to pensioners and their eligible dependents in the State Employees', Judiciary, New State Police, and Closed State Police pension plans. The State of Delaware has elected to assume the OPEB liability on behalf of employees who participate in the State's pension plan but are employed at outside agencies including Delaware State University, University of Delaware, Delaware State Housing Authority, Delaware Charter Schools and Delaware Solid Waste Authority. Due to this assumption, the State is a single employer defined benefit plan.

Membership of the plan consisted of the following at June 30, 2010:

Retirees and beneficiaries receiving benefits	19,103
Terminated plan members entitled to but not yet receiving the benefits	1,809
Active eligible plan members	<u>35,926</u>
Total	<u><u>56,838</u></u>

Substantially all State employees become eligible for post retirement benefits if they reach retirement age while working for the State. The costs of providing these benefits are shared between the State and the retired employee. The plan provisions are as follows:

Eligibility:

State Employees:

Early Retirement:

Age 55 with 15 years of service or any age with 25 years of service

Normal Retirement:

Age 62 with 5 years of service or age 60 with 15 years of service or any age with 30 years of service

Benefits:

During the fiscal year ended June 30, 2010, the State provided health insurance options through several providers.

Spouse and Survivor Coverage:

Both are available under any of the plan options with similar retiree contributions.

Employee Contributions:

If hired prior to July 1, 1991, no contributions are required. If hired on or after July 1, 1991 (except disability pension), contributions depend on years of service.

Retiree Contributions (hired on or after 07/01/1991):

<u>Years of Service</u>	<u>Percent of Premium Paid by State</u>
Less than 10	0%
10 - 14	50%
15 - 19	75%
20 or more	100%

Funding Policy

The State of Delaware funds the OPEB for current retirees on a pay-as-you-go basis along with funding for future benefits at a rate that is approved in the annual budget, but not actuarially determined. Additional funding has also been provided on an ad hoc basis. By State Statute Chapter 52, Title 29 of the Delaware Code, contribution requirements of plan members and the government are established and may be amended by the State Legislature. Funds are recorded in the OPEB Trust for the payment of retiree health care claims and administrative and investment expenses. Administrative costs are financed through investment earnings. State appropriations, other employer contributions, and retiree contributions for health care are recorded in the OPEB Trust. The funds available are invested under the management of the DPERS Board of Pension Trustees, which acts as the Board of Trustees for the OPEB Trust and is responsible for the financial management of the trust.

Contributions

The contribution rates for the employer and retiree are established annually by the budgeting process of the State. Those rates include an employer contribution based on projected pay-as-you-go financing requirements as a percent of covered payroll, with an additional amount to prefund benefits, which is not actuarially determined. The State contributed \$10.0 million in fiscal year 2010. For fiscal year 2010, the State contribution in relation to the annual required contribution (ARC) totaled \$171.5 million.

Retiree contribution rates are affected by the retiree date of hire, with eligible retirees hired after June 30, 1991 paying a proportionately higher rate if their years of service total less than 20. Retiree contributions for health coverage totaled \$5.6 million.

Annual OPEB Cost and Net OPEB Obligation

The State's annual OPEB cost is calculated based on the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with GAAP. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period of thirty years. Amounts "required" but not actually set aside to pay for these benefits are accumulated as part of the net OPEB obligations. The following table shows the components of the State's annual OPEB for fiscal year 2010 and the preceding fiscal year, the amount actually contributed to the plan, and the State's net OPEB obligation (dollar amounts in millions):

	Total	Governmental Activities	Business-Type Activities *
Net OPEB obligation at June 30, 2008	\$ 291.5	\$ 265.6	\$ 25.9
Annual required contribution	527.9	491.7	36.2
Adjustment to annual required contribution	2.8	2.7	0.1
Annual OPEB Cost	822.2	760.0	62.2
Employer contributions	(159.8)	(151.5)	(8.3)
Net OPEB obligation at June 30, 2009	\$ 662.4	\$ 608.5	\$ 53.9

	Total	Governmental Activities	Business-Type Activities *
Net OPEB obligation at June 30, 2009	662.4	\$ 608.5	\$ 53.9
Annual required contribution	498.3	459.6	38.7
Adjustment to annual required contribution	0.9	-	0.9
Annual OPEB Cost	1,161.6	1,068.1	93.5
Employer contributions	(174.7)	(162.0)	(12.7)
Net OPEB obligation at June 30, 2010	\$ 986.9	\$ 906.1	\$ 80.8

* This column includes DTC's OPEB activity.

The State's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the fiscal year 2010 and preceding fiscal year are as follows (dollar amounts in millions):

Ended June 30	OPEB Cost	Annual OPEB Cost Contributed	OPEB Obligation
2009	516.2	31%	641.5
2010	480.0	36%	956.5

Funded Status and Funding Progress

As of June 30, 2010, the plan was 1.8% funded. The actuarial accrued liability for benefits was \$5,884.0 million, and the actuarial value of assets was \$104.0 million, resulting in an unfunded

actuarial accrued liability (UAAL) of \$5,780.0 million for the primary government. The covered payroll (annual payroll of active employees covered by the plan) was \$1,798.0 million, and the ratio of the UAAL to the covered payroll was 321%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to the financial statements, will present information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits. This schedule will be expanded in future years to provide multi-year trend data.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the OPEB plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the June 30, 2010, actuarial valuation, the entry age normal actuarial cost method was used. Investments are valued at market rates. The actuarial assumptions included a 5.0% investment rate of return, which is a blended rate of the expected long-term investment returns on plan assets and on the State's own investments calculated based on the funded level of the plan at the valuation date, and an initial medical inflation rate of 9.0% with an ultimate rate of 5.0%. The UAAL is being amortized as a level percentage of projected payroll on a level percent open basis over 30 years using a 3.75% rate of salary increase.

Delaware Transit Corporation (DTC)

In June 2010, the Delaware Transit Corporation OPEB Fund Trust (the DTC OPEB Trust) was established pursuant to Section 115 of the Internal Revenue Code. The DTC OPEB Trust is administered by DTC. Policy for and management of the OPEB benefits provided to retirees are the responsibility of DTC. No stand-alone financial report is issued for the DTC OPEB Trust.

Plan Description

DTC provides continuation of medical insurance coverage to employees that retire. Based on collective bargaining agreements, any full-time employee is eligible to participate in the plan if the employee retires after meeting the eligibility requirements, which are: 1) age 65 with 5 years of service or after working for 25 years for contract employees or 2) age 55 with 10 years of

service or age 62 with five years of service for noncontract employees. Disabled employees must reach eligibility. Surviving spouses of participants are allowed access to the plan and receive the same subsidy as retirees.

DTC subsidizes the medical premium. The subsidized percentage is 90% of published rates for retirees less than age 65 and 100% for retirees age 65 or greater. DTC subsidizes 100% of the dental and vision coverage for noncontract employees. Contract employees are allowed to access to dental and vision coverage, but must pay the full premium.

Life insurance is provided to retirees. Retirees under age 70 receive \$6,000 in coverage. Once the participant reaches age 70, the coverage drops to \$5,000. Each participant must contribute \$0.25 per month per \$1,000 of coverage to receive the benefit.

The number of participants are 722 active employees and 79 retirees as of June 30, 2010, the effective date of the other post-employment benefit (OPEB) actuarial valuation report.

Funding Policy

DTC currently pays for post-employment health care benefits on a pay-as-you-go basis. Although DTC is studying the establishment of a trust that would be used to accumulate and invest assets necessary to pay the accumulated liability, these financial statements assume that the pay-as-you-go funding will continue. The cash basis costs associated with these benefits were \$865,354 and \$803,627 for the fiscal years ended June 30, 2010 and 2009 respectively.

Annual OPEB Cost and Net Obligation

DTC's annual OPEB cost (expense) is calculated based upon the annual required contribution (ARC) of the employer, an amount actuarially determined in accordance with GAAP. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed 30 years.

The following table shows the components of DTC's OPEB cost for the year, the amount actually contributed to the plan, and changes to DTC's net OPEB obligation (expressed in thousands):

Annual required contribution	\$ 11,677
Interest on net OPEB obligation	996
Adjustment to annual required contribution	(863)
Annual OPEB cost (expense)	<u>11,810</u>
Contributions made	<u>(2,365)</u>
Increase in net OPEB obligation	9,445
Net OPEB obligation - beginning of year	<u>20,941</u>
Net OPEB obligation - end of year	<u><u>\$ 30,386</u></u>

DTC's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation is as follows (expressed in thousands):

Fiscal Year Ended June 30	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2009	11,702	6.87%	20,941
2010	11,810	20.02%	30,386

Funded Status and Funding Progress

As of June 30, 2010, the plan was 1.80% funded. The actuarial accrued liability was \$82.6 million which is equivalent to the unfunded actuarial accrued liability. The covered payroll (annual payroll of active employees covered by the plan) was \$31.4 million and the ratio of the UAAL to the covered payroll was 38%.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the April 1, 2010 actuarial valuation, the projected unit credit method was used with linear pro-ration to assumed benefit commencement. The actuarial assumptions included a 4.75% investment rate of return, 4% payroll growth rate, a 3.2% inflation rate, and a healthcare cost trend rate of 8% initially, reduced by decrements to 6.9% after 10 years. The ultimate healthcare cost trend rate will remain constant at 5.2% after 2080. The unfunded liability is being amortized as a level percentage of payroll over a 30-year amortization period.

NOTE 15 PENSIONS**Primary Government****Pension Plans**

The State Board of Pension Trustees (Board) administers the following plans/funds (the Plans) of the Delaware Public Employees' Retirement System (DPERS) as described below:

- State Employees' Pension Plan;
- Special Fund;
- New State Police Pension Plan;
- Judiciary Pension Plans (Closed and Revised);
- County & Municipal Police and Firefighters' Pension Plans;
- County & Municipal Other Employees' Pension Plan;
- Delaware Volunteer Firemen's Fund;
- Diamond State Port Corporation Pension Plan; and
- Closed State Police Pension Plan.

With the exception of the Diamond State Port Corporation Pension Plan, the State's General Assembly is responsible for setting benefits and contributions and amending plan provisions; administrative rules and regulations are adopted and maintained by the Board. The Board of Directors for the Diamond State Port Corporation is responsible for setting benefits and contributions and amending their plan provisions.

The Plans of DPERS are considered part of the State's financial reporting entity and are included in the accompanying financial statements as pension trust funds in the fiduciary funds. All of the investment assets of the plans and funds, with the exception of the Closed State Police Pension Plan and the Delaware Volunteer Firemen's Fund, are pooled and invested in a common DPERS Master Trust (Master Trust). Each of the plans or funds share in the Master Trust based on funds contributed and earnings or losses allocated. Individual investments in the Master Trust are not specifically identified to the various plans or funds.

Additionally, the following non-DPERS retirements funds/plans, described below, have been established under the custody of the Board for investment purposes only:

- County & Municipal Police and Firefighters' COLA Fund;
- Post-Retirement Increase Fund;
- Delaware Local Government Retirement Investment Pool.

The Delaware Local Government Retirement Investment Pool (DEL RIP) is presented separately as investment trust funds in the fiduciary funds statement of net assets and statement of changes in net assets. The remaining non-DPERS retirement funds/plans are included in the pension trust fund.

Non-DPERS Fund Descriptions and Contributions

County & Municipal Police and Firefighters’ COLA Fund

During 1990, the State passed legislation which established a mechanism for funding post-retirement increases granted by employers who participate in the County & Municipal Police and Firefighters’ Pension Plans. This mechanism allows the State to appropriate funds separate to a cost of living adjustment fund (COLA Fund) managed by the Board. The funds are generated by a 0.25% tax on the value of insurance premiums written within the State. The proceeds of the tax are transferred to the State and local governments on a per member basis. In 1994, the New State Police Plan began receiving funding for post-retirement increases from the Post-Retirement Increase Fund. Since that time, funds calculated for the State Police membership were re-directed into the COLA Fund. In accordance with Section 708 (c), Title 18 of the Delaware Code, when a participating employer grants a post-retirement increase for a plan outside of the DPERS County & Municipal Plans, funds are transferred from the COLA Fund to the employer. The participating employer must provide funds to match the State’s contribution. Allocated funds that are unused will be reverted to the State General Fund.

Post-Retirement Increase Fund (PRI)

The State passed legislation which established a mechanism for funding ad hoc post-retirement increases granted by the General Assembly to members retired under the State Employees’ Plan, the New State Police Plan, and the Judiciary Plans (Closed and Revised) beginning in fiscal year 1994. The mechanism allows the State to appropriate actuarially determined employer contributions to a separate PRI fund managed by the Board. The actuary uses the current actuarial assumptions, methods, and population data to calculate the estimated additional liability resulting from the potential benefit increases. When the Legislature grants an ad hoc post-retirement adjustment, funds are transferred from this PRI fund on a monthly basis based on a five-year actuarial funding schedule to the appropriate pension plan from which the additional benefits are disbursed. For the fiscal year ended June 30, 2010, \$26.5 million was transferred to the appropriate plans in DPERS.

No post-retirement increase was granted by the General Assembly in Fiscal years 2008, 2009 and 2010. As of June 30, 2010, previously granted post-retirement increases have outstanding liabilities totaling \$13.8 million, which will be funded by the State and transferred to the appropriate plans over the remaining fiscal year as follows:

<u>Fiscal Year</u>	<u>(Expressed in Thousands)</u>
2011	13,825
Total	<u>\$ 13,825</u>

The Board adopts actuarially determined funding for the Post-Retirement Increase Fund. Funding for fiscal year 2010 was 1.4% of covered payroll. Funding for fiscal year 2011 will be 0.81%.

Local Government Retirement Investment Pool (DELRIP)

In June 1996, the State established DELRIP in the custody of the Board to allow local governments the option to pool their pension assets with the System for investment purposes. The DELRIP is an external investment pool that allows local governments within the State to potentially maximize their rate of return and reduce administrative expenses related to the investment of funds. Participation in the pool is voluntary. There were three participating entities in DELRIP as of June 30, 2010, which comprise the pool in its entirety: Sussex County and the Towns of Elsmere and Newport.

DELRIP is subject to the oversight of the System's Investment Committee and not subject to the regulatory oversight of the Securities and Exchange Commission (SEC). The System has not provided or obtained any legally binding guarantees during the year to support the value of shares. The fair value of the shares in the pool is determined in the same manner as the value of the Master Trust shares. Since this pool is a portion of the total System, the same accounting and investment policies apply.

Plan Membership, Benefit and Contribution Provisions

A description of the individual plans including eligibility provisions, types of benefits and contribution requirements are set forth in general terms below and on the following pages. Detailed information regarding these plans is available in the Delaware Code and in the Rules and Regulations of the Board.

State Employees' Pension Plan

Plan Description and Eligibility:

The State Employees' Pension Plan is a cost-sharing single employer defined benefit plan that covers virtually all full-time or regular part-time employees of the State, including employees of other affiliated entities.

Service Benefits: Final average monthly compensation multiplied by 2.0% and multiplied by years of credited service prior to January 1, 1997, plus final average compensation multiplied by 1.85% and multiplied by years of credited service after December 31, 1996, subject to minimum limitations. For this plan, final average monthly compensation is the monthly average of the highest three years of compensation.

Vesting: 5 years of credited service.

Retirement: Age 62 with 5 years of credited service; age 60 with 15 years of credited service; or after 30 years of credited service at any age.

Disability Benefits: Same as Service Benefits. Employee must have 5 years of credited service. In lieu of disability pension benefits, over 90% of the members of this plan opted into a disability insurance program offered by the State effective January 1, 2006.

Survivor Benefits: If employee is receiving a pension, the eligible survivor receives 50% of pension (or 75% with 3% reduction of benefit); if employee is active with at least 5 years of credited service, eligible survivor receives 75% of the benefit the employee would have received at age 62.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - 3% of earnings in excess of \$6,000.

Burial Benefit: \$7,000 per member.

Special Fund

Plan Description and Eligibility:

The Special Fund provides certain benefits granted to individuals through legislation passed by the General Assembly.

Service Benefits: Defined by special legislation.

Vesting: Defined by special legislation.

Retirement: Defined by special legislation.

Disability Benefits: Defined by special legislation.

Survivor Benefits: Same as State Employees' Plan.

Contributions: Employer contributions are actuarially determined and fully funded in advance by the General Assembly.

Burial Benefit: \$7,000 per member.

New State Police Pension Plan**Plan Description and Eligibility:**

The New State Police Pension Plan is a single-employer defined benefit plan that covers all State police officers appointed on or after July 1, 1980.

Service Benefits: 2.5% of final average monthly compensation multiplied by years of credited service up to 20 years, plus 3.5% of final average monthly compensation multiplied by years of service in excess of 20 years. For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation.

Vesting: 10 years of credited service at age 62.

Retirement: Age 55 with 10 years of credited service; age plus credited service (but not less than 10 years) equals 75; or 20 years of credited service.

Disability Benefits: Duty – *Total Disability* - 75% of final average compensation plus 10% for each dependent not to exceed 25% for all dependents. *Partial Disability* - calculated the same as Service Benefits, subject to minimum 50% of final average compensation.

Non-Duty – same as Service Benefits.

Survivor Benefits: If employee is receiving a pension, the eligible survivor receives 50% of pension; if employee is active, eligible survivor receives 75% of compensation.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - 7% of compensation.

Burial Benefit: \$7,000 per member.

Judiciary Pension Plans (Closed and Revised)**Plan Description and Eligibility:**

The Closed Judiciary Pension Plan is a single-employer defined benefit plan that covers members of State Judiciary appointed before July 1, 1980.

The Revised Judiciary Pension Plan is a single-employer defined benefit plan that covers members of State Judiciary appointed on or after July 1, 1980 or members appointed before July 1, 1980 who accept the provisions of this Plan.

Assets of one plan can be used to satisfy the liabilities of the other plan.

Service Benefits:

- Closed - 3% of final average compensation multiplied by years of credited service, subject to maximum and minimum limitations
- Revised - 1/24th of final average monthly compensation multiplied by years of service up to 12 years, plus 1/48th of final average monthly compensation, multiplied by years of service from 13 to 24 years, subject to maximum limitations.
For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation.

Vesting: 12 years of credited service.

Retirement:

- Closed - Age 65 with 12 years of credited service, or any age with 24 years of credited service.
- Revised - Age 62 with 12 years of credited service, or any age with 24 years of credited service.

Disability Benefits: Same as Service Benefits.

Survivor Benefits:

- Closed - If employee is receiving a pension, the eligible survivor receives 2/3 of pension; if employee is active with 12 years of credited service, then eligible survivor receives 2/3 of pension the employee would have been eligible to receive.
- Revised - If employee is receiving a pension, the eligible survivor receives 50% of pension (or 2/3 with 2% reduction of benefit); if employee is active with at least 5 years of credited service, eligible survivor receives 2/3 of the benefit the employee would have received at age 62.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member:
 - Closed - \$500 per year for the first 25 years of service.
 - Revised - 3% of earnings that exceed \$6,000 per year, plus 2% of earnings that exceed the Social Security Wage Base for the first 24 years of service.

Burial Benefit: Not applicable.

County & Municipal Police and Firefighters' Pension PlansPlan Description and Eligibility:

County & Municipal Police and Firefighters' Pension Plans, both FICA and Non-FICA, are cost-sharing multiple-employer defined benefit plans that cover police officers and firefighters employed by a county or municipality of the State which has become part of the Plan.

Service Benefits: 2.5% of final average monthly compensation multiplied by years of credited service up to 20 years, plus 3.5% of final average monthly compensation multiplied by years of service in excess of 20 years. For this plan, final average monthly compensation is the monthly average of the highest three consecutive years of compensation.

Vesting: 5 years of credited service.

Retirement: Age 62 with 5 years of service; age plus credited service (but not less than 10 years) equals 75; or 20 years of credited service.

Disability Benefits:

- Duty - *Total Disability* - 75% of final average compensation plus 10% for each dependent not to exceed 25% for all dependents;
Partial Disability - calculated the same as Service Benefits, subject to minimum 50% of final average compensation.
- Non-Duty - Same as Service Benefits.

Survivor Benefits: If employee is receiving a pension, then eligible survivor receives 50% of pension; if employee is active, eligible survivor receives 50% of pension the employee would have received at age 62.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - 7% of compensation.

Burial Benefit: Not applicable.

County and Municipal Other Employees' Pension PlanPlan Description and Eligibility:

County and Municipal Other Employees' Pension Plan is a cost-sharing multiple employer defined benefit plan that covers employees of counties or municipalities which have become part of the Plan.

Service Benefits: 1/60th of final average monthly compensation multiplied by years of credited service, subject to maximum limitations. For this plan, final average monthly compensation is the monthly average of the highest five years of compensation.

Vesting: 5 years of credited service.

Retirement: Age 62 with 5 years of credited service, age 60 with 15 years of credited service; or after 30 years of credited service.

Disability Benefits: Same as Service Benefits. Employee must have 5 years of credited service.

Survivor Benefits: If employee is receiving a pension, then eligible survivor receives 50% of pension; if the employee is active, eligible survivor receives 50% of pension the employee would have received at age 62.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - 3% of earnings in excess of \$6,000.

Burial Benefit: Not applicable.

Delaware Volunteer Firemen's Fund

Plan Description and Eligibility:

The Delaware Volunteer Firemen's Fund is a cost-sharing length of service award plan that covers all actively participating volunteers of fire departments, ladies auxiliaries, or ambulance organizations within the State.

Service Benefits: \$5 multiplied by years of credited service (not to exceed 25 years) per month.

Vesting: 10 years of credited service.

Retirement: Age 60 with 10 years credited service.

Disability Benefits: Not applicable.

Survivor Benefits: Not applicable.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - \$60 per member per calendar year.

Burial Benefit: Not applicable.

Diamond State Port Corporation Pension Plan

Plan Description and Eligibility:

The Diamond State Port Corporation Pension Plan is a single-employer defined benefit plan which covers all employees of the Diamond State Port Corporation.

Service Benefits: 1.75% of final average monthly compensation multiplied by the years of credited service (not to exceed 30 years). For this plan, final average monthly compensation is the monthly average of the highest consecutive five years of compensation within the last ten years of employment.

Vesting: 5 years of credited service.

Retirement: Age 65 with 5 years of credited service, or age (not less than 55 years) plus credited service equals 90.

Disability Benefits: Same as Service Benefits. Employee must have 15 years of credited service.

Survivor Benefits: If employee is receiving a pension, the eligible survivor receives 50% of pension; if employee is active with at least 15 years of credited service, then eligible survivor receives 50% of pension the employee would have received at age 65.

Contributions:

- Employer - Determined by Board of Pension Trustees.
- Member - 2% of compensation.

Burial Benefit: Not applicable.

Closed State Police Pension Plan

Plan Description and Eligibility:

The Closed State Police Pension Plan is a single-employer defined benefit plan that covers all State police officers appointed before July 1, 1980.

Service Benefits: 50% of monthly salary.

Vested/Retirement: 20 years of credited service or age 55.

Disability Benefits: Duty - 75% of monthly salary.
Non-Duty – Same as Service Benefits.

Survivor Benefits: If employee is active or is receiving a service or service-related disability pension, the eligible survivor receives 75% of pension; if employee is receiving a non-service related disability pension; eligible survivor receives 50% of pension.

Contributions:

- Employer - Funded on a pay-as-you-go basis.
- Member - 5% of salary with 20 years or less of credited service;
2% of salary with over 20 years credited service.

Burial Benefit: \$7,000 per member.

Historical Trend Information

Historical trend information for the current year and the preceding five years designed to provide information about progress made by the individual plans in accumulating sufficient assets to pay benefits when due is presented in the separately issued financial report of the DPERS.

The DPERS issues a publicly available financial report that includes financial statements and required supplementary information for each of the individual plans and funds identified above. The financial report may be obtained by writing to the State Board of Pension Trustees and Office of Pensions, McArdle Building, Suite 1, 860 Silver Lake Boulevard, Dover, Delaware 19904-2402.

NET PENSION OBLIGATION (NPO)

The Annual Pension Cost (APC) and Net Pension Obligation (NPO) for the Closed State Police Pension Plan for the fiscal years ended June 30, 2010, 2009, and 2008 are as follows:

Net Pension Obligation (NPO)
(Expressed in Thousands)

	Fiscal Year Ended June 30, 2010	Fiscal Year Ended June 30, 2009	Fiscal Year Ended June 30, 2008
Annual Required Contribution	\$ 27,214	\$ 26,423	\$ 26,017
Interest on Net Pension Obligation	9,012	8,706	8,380
Adjustment to Annual Required Contribution	<u>(9,942)</u>	<u>(9,504)</u>	<u>(9,060)</u>
Annual Pension Cost	26,284	25,625	25,337
Less Contributions Made	<u>(23,367)</u>	<u>(21,796)</u>	<u>(21,269)</u>
Increase in Net Pension Obligation	2,917	3,829	4,068
Net Pension Obligation, Beginning of Year	<u>112,652</u>	<u>108,823</u>	<u>104,755</u>
Net Pension Obligation, End of Year	\$ <u><u>115,569</u></u>	\$ <u><u>112,652</u></u>	\$ <u><u>108,823</u></u>

Delaware Transportation Authority

Generally, employees of the Expressways Operations/Toll Administration are covered under DPERS. The Delaware Transit Corporation (DTC), a subsidiary public corporation of the Delaware Transportation Authority, contributes to two single-employer defined benefit plans consisting of the Contributory Pension Plan and the Delaware Transit Corporation (DTC) Pension Plan. Each plan provides retirement, disability and death benefits to plan members and beneficiaries. Each plan issues a publicly available financial report that includes financial statements and required supplementary information. Financial data for these plans has not been included in the fiduciary statements due to immateriality.

The trustees of each plan establish and may amend the contribution requirements of plan members and DTC. The most recent information available for DTC's annual pension cost and related information for each plan as well as information concerning funding policies and annual pension costs may be found in the Required Supplementary Information on pages 122 - 134.

Annual pension cost is equal to the respective plans required and actual contributions.

Three-Year Trend Information
(Expressed in Dollars)

	<u>Plan Year Ended</u>	<u>Contribution Made</u>	<u>Annual Pension Cost</u>	<u>Percent Of APC Contributed</u>	<u>Net Pension Asset</u>

Deferred Compensation Plan

The State offers its permanent employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The Plan, available to all State of Delaware employees, permits them to defer a portion of their salary to future years. Participation in the Plan is optional. The deferred compensation is not available to employees until termination, retirement, death or unforeseeable emergency.

NOTE 16 AFFILIATED ORGANIZATIONS**State Lottery****Multi-State Lottery Association**

The State Lottery is a member of the Multi-State Lottery Association (MUSL), which operates online games on behalf of participating state lotteries. Each MUSL member sells game tickets through its agents and makes weekly wire transfers to the MUSL in an amount equivalent to the member's share of the estimated grand prize liability. Each MUSL member pays lesser prizes directly to the winners. The MUSL operates the Powerball games, as well as the Powerplay feature associated with Powerball. The MUSL also operates the Hot Lotto game, in which the Lottery began participating during fiscal year 2008. Participating lotteries are required to maintain deposits with MUSL for contingency reserves to protect MUSL from unforeseen prize liabilities. The money in this reserve fund is refundable to MUSL members if the MUSL disbands or if a member leaves the MUSL Board.

The amount the Lottery had on deposit with MUSL as of June 30, 2010, was \$2.3 million. This amount is reported by the Lottery as a liability on its balance sheet because it represents the amount to be paid to the State upon separation from the MUSL if the MUSL is not required to use a portion of the Lottery's reserves held by the MUSL.

Complete separate financial statements for the MUSL may be obtained at the Multi-State Lottery Association, Suite 210, 1701 48th Street, West Des Moines, IA 50266-6723.

NOTE 17 COMMITMENTS**Primary Government**

The State has entered into various contractual commitments that contracts for services and for construction of various highway, capital, and lottery projects. These commitments are expected to be funded from existing program resources, current and future appropriations and from the proceeds of revenue and general obligation bonds to be issued. Commitments of the governmental funds totaling \$325.7 million are shown on the balance sheet as encumbrances. Commitments of the proprietary fund include \$280.7 million for DelDOT.

Component Units**Diamond State Port Corporation (DSPC)**

DSPC has various contracts for construction and renovation of significant facilities in accordance with the Capital Budget approved by its Board of Directors. As of June 20, 2010, DSPC had \$15.0 million in cash and investments committed to capital projects.

Riverfront Development Corporation (RDC)

The RDC has an outstanding letter of credit in the amount of approximately \$4.0 million which expires on November 2012. RDC is required to maintain a letter of credit sufficient to redeem the aggregate outstanding principal amount of the bonds payable plus 39 days of interest. The letter of credit is secured by certain real property owned by RDC and assignment of the lease between RDC and National Railroad Passenger Corporation.

NOTE 18 CONTINGENCIES**Primary Government**

Various parties have made claims against the State. For those cases in which it is reasonably possible that a loss will be incurred and in which the amount of the potential judgment can be reasonably estimated, the State estimates the liability to be \$3.7 million. The State recognized \$2.2 million in governmental activities as claims and judgments liabilities for pending litigation settlements estimated to be probable as of June 30, 2010. In the opinion of the Attorney General of the State, however, the remaining cases are either subject to a valid defense or are not expected to result in an impairment of the State's financial position. Management believes the settlement in aggregate of claims outstanding will not result in amounts material to the financial statements of the State.

The State receives significant financial assistance from the federal government in the form of grants and entitlements. The right to these resources is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the expenditure of the resources for eligible purposes. Substantially all grants are subject to financial and compliance audits by the grantors. Any disallowances as a result of these audits become a liability of the State. The State does not believe that the liabilities that may result from such audits for periods through June 30, 2010 would have a material effect on its financial position or the results of operations.

GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, provides guidance for state and local governments in estimating and reporting the potential costs of pollution remediation. While GASB Statement No. 49 does not require the State to search for pollution, it does require the State to reasonable estimate and report a remediation liability when any of the following obligating events has occurred:

- Pollution poses an imminent danger to the public and the State is compelled to take action;
- The State is in violation of a pollution related permit or license;
- The State is named or has evidence that it will be named as responsible party by a regulator;
- The State is named or has evidence that it will be named in a lawsuit to enforce a cleanup; or
- The State commences or legally obligates itself to conduct remediation activities.

Site investigation, planning and design, cleanup and site monitoring are typical remediation activities underway across the State. Several State organizations have dedicated programs, rules and regulations that routinely deal with remediation related issues; others become aware of pollution conditions in the fulfillment of their missions. The State has the knowledge and expertise to estimate the remediation obligations presented herein based upon prior experience in identifying and funding similar remediation activities. The standard requires the State to calculate pollution remediation liabilities using the expected cash flow technique. Where the State cannot reasonably estimate a pollution remediation obligation, it does not report a liability; however, the State has not identified any of these situations.

The remediation obligation estimates that appear in this report are subject to change over time. Cost may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors that could result in revisions to these estimates. Prospective recoveries from responsible parties may reduce the State's obligation. Capital assets may be created when pollution remediation outlays are made under specific circumstances.

During fiscal year 2010, the State acquired property from an automobile manufacturer. This property will be used by the University of Delaware. This property was not able to be fully tested to determine an estimate of the pollution.

At June 30, 2010, the State had a total pollution remediation liability of \$23.4 million, with an estimated potential recovery of \$4.5 million from the U.S. Environmental Protection Agency.

The State Lottery has discharged its primary responsibility for payment of annual installments (generally 14 to 20 years) to winners of jackpots greater than \$150,000 by purchasing annuities from private insurance companies. The Lottery remains liable for future periodic payments of deferred prize obligations (approximately \$2 million at June 30, 2010) in the event that the annuity issuers default on their obligations.

Component Units

DSHA has amounts received or receivable from grant agencies that are subject to audit and adjustments by grantor agencies, principally the federal government. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures that may be disallowed by the grantor cannot be determined at this time, although DSHA expects such amounts, if any, to be immaterial.

NOTE 19 SUBSEQUENT EVENTS

Primary Government

On October 28, 2010, the State issued \$310.7 million of its general obligation bonds maturing between July 1, 2011 and July 1, 2030. The bonds consist of Series 2010B, \$135.3 million traditional tax-exempt bonds, Series 2010C, \$115.8 million federally taxable Build America Bonds, and Series 2010D, \$59.6 million federally taxable Qualified School Construction Bonds.

Series 2010B bonds included \$51.1 million in principal issued to refund higher priced bonds resulting in a net present value savings of \$3.4 million, or 6.3% of the principal refunded. The refunding bonds, together with \$84.3 million issued for new projects, were sold to retail and institutional investors, will mature between July 2011 and July 2024 and bore coupons between 2% and 5%. The Series 2010C and 2010D bonds, which were designated as Build America Bonds and Qualified School Construction Bonds for the purposes of the American Recovery and Reinvestment Act of 2009, are federally taxable bonds. As such, the State will elect to receive a cash subsidy from the U.S. Treasury of 35% of the interest payable on the Series 2010C bonds and a cash subsidy of 100% of the interest payable on the Series 2010D bonds. The coupons on the taxable bonds ranged from 3.1% to 4.6% and matured between July 2019 and July 2030.

The proceeds from the new money general obligation bonds, a total of \$259.6 million, will be used to provide funds for capital projects across the State.

Component Units

Riverfront Development Corporation (RDC)

The RDC and the State of Delaware had filed a claim against BP Products of North America for additional environmental remediation costs that were incurred for land formerly owned by RDC, due to unanticipated conditions discovered at the site. The claim has been settled, and RDC's share of the claims is approximately \$0.6 million. These amounts are expected to be received in October, 2010.

Delaware State Housing Authority (DSHA)

As of September 28, 2010, the Authority has borrowed an additional \$40,020,473 from FHLB Pittsburgh. This additional borrowing was used for the purchase of mortgage backed securities and will be repaid with the proceeds of a bond issue expected to occur in the near future.

REQUIRED
SUPPLEMENTARY
INFORMATION
SECTION

NOTES TO REQUIRED SUPPLEMENTARY INFORMATION

BUDGETARY REPORTING

BUDGETARY BASIS VS. GAAP

While GAAP requires the use of the fund structure described in Note 1(b), the State's budget system uses only a general fund and a special fund, each of which uses the basis of accounting described below. Additionally, the activities of certain component units of the State, which are not substantially supported by tax revenues, are not included in the budget data. Reconciliation of the accrual adjustments necessary to convert budgetary basis information to GAAP basis is presented in Required Supplementary Information.

The State Constitution requires the Governor to prepare and submit to the General Assembly a State budget for the ensuing year. The State budgets and controls its financial activities on the cash basis of accounting. In compliance with State law, the State records its financial transactions in either of two major categories – the general fund or the special fund. References to these two funds in this document include the terms “budgetary” or “budgetary basis” to differentiate them from the GAAP funds of the same name which encompass different funding categories. The General Assembly enacts the budget through the passage of specific line-item appropriations by department, the legal level of budgetary control, the sum of which must not exceed 98 percent of the estimated revenues and available unencumbered cash balance from the prior year pursuant to the State Constitution. The Governor has the power to approve or veto each appropriation passed by the General Assembly. The General Assembly may also enact supplement appropriation or special appropriation bills after it completes action on the State's budget.

The budgetary general fund provides for the cost of the State's general operations and is credited with all tax and other revenue of the State not dedicated to budgetary special funds. Certain Special Funds are subject to appropriation, referred to herein as budgetary or appropriated Special Funds. Unexpended appropriations at year-end are available for subsequent expenditure to the extent that they have been encumbered at that date or legislatively extended for another year. Budget data represents original appropriations modified by interdepartmental transfers, supplemental, continuing, and carried-over encumbered appropriations. Subsequent modifications to the budget require the approval of the Controller General and the Budget Director. Additional detailed information regarding compliance with the legal level on control can be obtained by contacting the Office of Management and Budget at (302) 739-4206. Summary information regarding individual department budgets and the compliance with the legal level of budgetary control is presented on the following pages.

Encumbrance accounting is employed in governmental funds. Encumbrances (e.g., purchase orders) outstanding at year-end do not constitute expenditures or liabilities and are reported as reservations of fund balances because the commitments will be honored during the subsequent year.

The budget schedules in Required Supplemental Information a) reflect the adjustments made to increase the special fund's excess of revenues over expenditures for certain revenue sources not previously recognized; b) eliminates the net activity of certain operations that are accounted for within both the special fund and also in the separate accounts of certain component units or

agency funds that are not principally accounted for within the special fund; and c) presents the accrual adjustments necessary to convert budgetary basis information to GAAP basis.

Statutory/Budgetary Presentation

The Budgetary Comparison Schedule – Budget to Actual (Non-GAAP Budgetary Basis) presented on the following pages provides a comparison of the original and final legally adopted budget with actual data on a budgetary basis.

The original budget and related estimated revenues represent the spending authority enacted into law by the appropriations bill as of June 30, 2010, and do not include encumbrances and multi-year projects budgetary carry-forwards from the prior fiscal year. GAAP requires that the final legal budget be reflected in the “final budget” column; therefore, updated revenue estimates available for appropriations as of the last Delaware Economic and Financial Advisory Council (DEFAC) meeting in June 2010, as well as the amounts shown in the original budget, are reported. The final legal budget also reflects encumbrances and multi-year projects budgetary carry-forwards from the prior fiscal year.

The tables on the following two pages represent the Budgetary Statements of Revenues, Expenditures and Changes in Fund Balance – General and Special Funds. Also included is a schedule showing the budgetary fund balance designations. Of the \$538.5 million budgetary general fund balance at June 30, 2010, \$186.4 million is reserved for the budgetary reserve account and \$147.2 million is designated as continuing and encumbered appropriations. The \$204.9 million of undesignated fund balance, for the most part, is not available for new spending as these funds have been committed based on State statues which are subject to review and change by the Legislature.

(See Budgetary Basis vs. GAAP in Notes to Required Supplementary Information)

Statutory/Budgetary Reconciliations

Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with GAAP, a reconciliation is required of resulting basis, perspective and entity differences in the revenues in excess of (less than) expenditures and other financing sources (uses) between budgetary and GAAP presentations.

The following two schedules represent the accrual adjustments necessary to convert budgetary basis information to GAAP basis.

Budget vs. GAAP Revenue Reconciliation For the Fiscal Year Ended June 30, 2010 (Expressed in Millions)

Budget basis general and special fund revenue for fiscal year 2010		\$3,941.2
Non-appropriated revenue by category:		
Other revenue	79.1	
License, fees, permits, and fines	56.9	
Personal, business, and other taxes	50.1	
Federal government	9.6	
Rentals and sales	10.0	
Interest and other investment income	4.9	
Adjustments and accruals:		
DeIDOT fund revenue	(232.5)	
Lottery sales	(333.6)	
Local school districts	(13.2)	
Interfund revenue	(79.6)	
Other accruals and adjustments	(35.1)	
	\$3,457.8	
Total general fund revenues for fiscal year 2010		\$3,457.8
Federal fund revenue	1,406.2	
Local school fund revenue	493.8	
Capital projects fund revenue	1.2	
	1,901.2	
		\$5,359.0
Total GAAP basis governmental funds revenue for fiscal year 2010		\$5,359.0

Budget vs. GAAP Expenditures Reconciliation
For the Fiscal Year Ended June 30, 2010
(Expressed in Millions)

Total budget basis general and special fund expenditures for fiscal year 2010		\$3,785.4
Non appropriated expenditures by function:		
General government	\$542.9	
Health & children's services	26.2	
Judicial & public safety	17.6	
Natural resources & environmental control	32.7	
Labor	12.5	
Education	65.0	
Transportation	14.1	
Adjustments and accruals:		
Tax refunds	(296.3)	
Component units	95.8	
Interfund expenses	(85.4)

Capital projects fund expenditures	244.8	
		2,089.2
Total GAAP basis governmental funds expenditures for fiscal year 2010		\$5,833.9

Required Supplementary Information

Information About Infrastructure Assets Reported Using the Modified Approach

As allowed by GASB Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments*, the State has adopted an alternative process for recording depreciation expense on selected infrastructure assets. Under this alternative method, referred to as the modified approach, the State expenses certain maintenance and preservation costs and does not report depreciation expense. Assets accounted for under the modified approach include approximately 4,447 centerline miles and approximately 1,556 bridges that the State is responsible to maintain.

The condition of the State’s road pavement is measured using the Overall Pavement Condition (OPC) system, which is based on the extent and severity of various pavement distresses that are visually observed. The OPC system uses a measurement scale that is based on a condition index ranging from 0.0 for poor pavement to 5.0 for pavement in good condition.

The condition of bridges is measured using the “Bridge Condition Rating” (BCR) which is based on the Federal Highway Administration (FHWA) Coding Guide, “Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation’s Bridges.” The BCR uses a measurement scale that is based on a condition index ranging from 0 to 9, 0 to 4 for substandard bridges and 9 for bridges in good condition. For reporting purposes, substandard bridges are classified as those with a rating of 4 or less. The good or better condition bridges were taken as those with ratings of between 6 and 9. A rating of 5 is considered fair. The information is taken from past “Bridge Inventory Status” reports.

It is the State’s policy to maintain at least 85% of its highways at a fair or better condition level and 75% of its bridge systems at a good or better condition level. No more than 10% of bridges and 15% of roads should be in substandard condition. Condition assessments are determined every year for roads and every two years for bridges. Due to the timing of these condition assessments, information for the fiscal year ended June 30, 2010 is not available.

Amortization Method	Level Percent Open
Remaining Amortization Period	30 years
Asset Valuation Method	Market Value
Actuarial Assumptions:	
Investment Rate of Return	5.00%
Rate of Salary Increases	3.75% (plus merit scale)
Ultimate Rate of Medical inflation	5.00%
Initial Rate of Medical Inflation	9.00%

	Total	Governmental Activities	Business Type Activities
Net OPEB obligation at June 30, 2009	\$ 662.4	\$ 608.5	\$ 53.9
Annual required contribution	498.3	459.6	38.7
Adjustment to annual required contribution	0.9	-	0.9
Annual OPEB cost	1161.6	1068.1	93.5
Employer contribution	(174.7)	(162.0)	(12.7)
Net OPEB obligation at June 30, 2010	\$ 986.9	\$ 906.1	\$ 80.8

The State's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for the fiscal year 2010 are as follows (dollar amounts in millions):

Fiscal Year Ended June 30	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2010	\$ 480.0	36%	\$ 956.5

Delaware Transit Corporation - OPEB

As of June 30, 2010, the plan was 1.80% funded. The actuarial liability was \$82.6 million. The covered payroll (annual payroll of active employees covered by the plan) was 31.4 million, and the ratio of the UAAL to the covered payroll was 38%.

In April 1, 2010 actuarial valuation, the projected unit credit method was used the linear proration to assumed benefit commencement. The actuarial assumptions included a partially funded 4.75% investment rate of return, 4.0% payroll growth rate, a 3.2% inflation rate, and a healthcare cost trend rate of 8.0% initially, reduced by decrements to 6.9% after 10 years. The ultimate healthcare cost trend rate will remain constant at 5.2% after 2080. The unfunded liability is being amortized as a level percentage of payroll over a 30-year amortization period.

STATISTICAL
SECTION

Statistical Section Index

The statistical section of the Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, notes to the financial statements, and required supplementary information of the primary government says about the State's overall financial health.

<u>Contents</u>	<u>Page</u>
Financial Trends Information	
These schedules contain trend information to assist the reader in understanding and assessing how the State's financial position has changed over time.	
Government-wide Perspective	
Net Assets by Component, Last Nine Fiscal Years.....	149
Changes in Net Assets, Last Nine Fiscal Years.....	150
Fund Perspective	
Changes in Fund Balances, Governmental Funds, Last Ten Fiscal Years.....	152
Fund Balances, Governmental Funds, Last Ten Fiscal Years.....	154
Revenue Capacity Information	
These schedules contain information to assist the reader in understanding and assessing the factors affecting the State's ability to generate its own-source revenues.	
Personal Income by Industry, Last Ten Calendar Years.....	155
Personal Income Tax Rates, Last Ten Calendar Years.....	156
Personal Income Tax Filers and Liability by Income Level, Calendar Year 2008 and Ten Years Prior.....	157
Franchise Taxes, Last Ten Calendar Years.....	158
Debt Capacity Information	
These schedules present information to assist the reader in understanding and assessing the State's debt burden and its ability to issue additional debt in the future.	
Ratios of Outstanding Debt by Type, Last Ten Fiscal Years.....	159
Debt Limits, Last Ten Fiscal Years.....	160
General Obligation Debt Support, Last Nine Fiscal Years.....	161
Pledged Revenue Coverage, Last Ten Fiscal Years.....	162
Demographic and Economic Information	
These schedules offer demographic and economic indicators to assist the reader in understanding the environment in which the State's financial activities take place.	
Demographic and Economic Statistics, Last Ten Calendar Years.....	163
Principal Employers by Industry, Last Ten Calendar Years.....	164
State Employees by Function, Last Nine Fiscal Years.....	165
Operating Information	
These schedules contain information to assist the reader in understanding how the financial information relates to the services the State provides and the activities it performs.	
Operating Indicators by Function, Last Eight Fiscal Years.....	166
Capital Asset Statistics by Function, Last Eight Fiscal Years.....	167
Capital Asset Balances by Function, Last Ten Fiscal Years.....	168

Sources: Unless otherwise noted, the information in these schedules is derived from the State's Comprehensive Annual Financial Report for the relevant fiscal year. In fiscal year 2002, the State implemented GASB Statement No. 34, *Basic Financial Statements - and Management's Discussion and Analysis - for State and Local Governments*; schedules presenting government-wide information include information beginning in that year. Fund schedules are presented for the last ten years, except where noted.

Statement of Net Assets, as presented in the State's Comprehensive Annual Financial Report for the applicable fiscal year

Notes:

GASB Statement No. 44, *Economic Condition Reporting: The Statistical Section - an amendment of NCGA Statement 1*, recommends, but does not require, the information in the statistical section to cover the last ten years or the period retroactive to the adoption of GASB Statement No. 34. The State implemented GASB Statement No. 34 in fiscal year 2002; therefore, ten years of data is not available, but will be accumulated over time.

* The State implemented GASB Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, during fiscal year 2009. The provisions of GASB Statement No. 49 require the measurement of pollution remediation liabilities at July 1, 2008; therefore, the State's ending net assets for fiscal year 2008 have been restated.

Statement of Revenues, Expenditures and Changes in Fund Balances (Deficits), as presented in the State's Comprehensive Annual Financial Report for the applicable fiscal year.

Notes:

- (1) Taxes include personal income taxes and business taxes.
- (2) General government summarizes the expenditures of the following General Government Departments: Legislative, Executive, Technology and Information, Other Elective Offices, State, Finance, Office of Management and Budget, Agriculture, Elections, and the Advisory Council for Exceptional Citizens.
- (3) Health and children's services summarizes the expenditures of the Departments of Health and Social Services, and Services for Children Youth and Their Families.
- (4) Judicial and public safety summarizes the expenditures of the following Departments: Judicial, Legal, Corrections, Safety and Homeland Security, Fire Prevention and the Delaware National Guard.
- (5) Education summarizes the expenditures of the Departments of Higher Education and Public Education.
- (6) "Other" summarizes the expenditures of the following Departments: Labor, Agriculture, Elections, Fire Prevention, the Delaware National Guard and the Advisory Council for Exceptional Citizens. Effective fiscal year 2001, the category "Other" was eliminated and departments were grouped with similar or related functions.
- (7) The Department of Transportation, including debt service, is reported as an enterprise fund effective fiscal year 2002.
- (8) Presented by department and function prior to fiscal year 2002.
- (9) Reclassification of expenses in fiscal year 2002 due to GASB Statement 34.
- (10) Cost of issuance of debt reported as an expense effective fiscal year 2004.

Source:

Personal income by major source and earnings by industry is provided by the Bureau of Economic Analysis, U.S. Department of Commerce (www.bea.gov/regional/spi) through estimates released October 2009.

Notes:

- (1) Contributions for government social insurance are included in earnings by type and industry, but they are excluded from personal income.
- (2) The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: wage and salary disbursements to U.S. residents commuting to Canada less wage and salary disbursements to Canadian and Mexican residents commuting into the United States.
- (3) Rental income of persons includes the capital consumption adjustment.
- (4) This component of personal income is payments to persons for which no current services are performed. It consists of payments to individuals and to nonprofit institutions by federal, state, and local governments and by businesses. Government payments to individuals includes retirement and disability insurance benefits, medical payments (mainly Medicare and Medicaid), income maintenance benefits, unemployment insurance benefits, veterans' benefits, and federal grants and loans to students. Government payments to nonprofit institutions excludes payments by the federal government for work under research and development contracts. Business payments to persons consists primarily of liability payments for personal injury and of corporate gifts to nonprofit institutions.

Statement of Revenues, Expenditures and Changes in Fund Balances (Deficits), as presented in the State's Comprehensive Annual Financial Report for the applicable fiscal year. Personal income is provided by the Bureau of Economic Analysis, U.S. Department of Commerce (www.bea.gov/regional/spi) through estimates released October 2009. Delaware Department of Finance Fiscal Notebook

Notes:

- (1) Personal income tax revenue is net of refunds, on a cash basis, for the fiscal year.
- (2) Personal income is reported on a calendar basis.
- (3) The total direct rate for personal income is not available. Average effective rate equals personal income tax revenue divided by personal income.
- (4) The tax rate table is used to determine gross liability. Amounts shown are for all filing status returns.

<u>Authorized Share Method</u>	Tax Year 2000-2002	Tax Year 2003-2007	Tax Year 2008	Tax Year 2009	Tax Year 2010
3,000 shares or less, minimum tax	\$30.00	\$35.00	\$75.00	\$75.00	\$75.00
3,001-5,000 shares	\$50.00	\$62.50	\$75.00	\$75.00	\$75.00
5,001-10,000 shares	\$90.00	\$112.50	\$150.00	\$150.00	\$150.00
Each additional 10,000 shares, add	\$50.00	\$62.50	\$75.00	\$75.00	\$75.00
Maximum yearly tax	\$150,000	\$165,000	\$165,000	\$180,000	\$180,000

Assumed Par Value Capital Method

- 1 Calculate "assumed par" by dividing total gross assets by total issued shares carrying the decimal to six places.
- 2 Multiply the assumed par by the number of authorized shares having a par value less than the assumed par.
- 3 Multiply the number of authorized shares with a par value greater than the assumed par value by their respective value.
- 4 Add the results of #2 and #3 above. The result is your assumed par value capital.
- 5 Calculate the tax by dividing the assumed par value capital, rounded up to the next million if it is over \$1,000,000 and multiply by \$200.00 for tax years 2000-2002. For tax years 2003 to 2008, the multiplier is \$250. Beginning tax year 2009, the multiplier increased from \$250 to \$350.

Source:

Delaware 145th General Assembly, House Joint Resolution No.6

Notes:

There is no constitutional debt limit for the State.

In 1991, the General Assembly passed legislation to replace prior statutory debt limits with a three-part debt limit, as follows:

- 1 The aggregate principal amount of new "tax-supported obligations of the State" may not exceed 5% of the estimated budgetary general fund revenue for that fiscal year.
- 2 No "tax-supported obligations of the State" and no "Transportation Trust Fund debt obligations" of the Delaware Transportation Authority may be incurred if the aggregate maximum annual payments on all such outstanding obligations exceed 15% of the estimated budgetary general fund revenue plus Transportation Trust Fund revenue for the fiscal year following the fiscal year in which such obligations is incurred (the 15% test).
- 3 No general obligation debt (with certain exceptions) may be incurred if the maximum annual debt service payable in any fiscal year on all such outstanding obligations will exceed the estimated cumulative cash balances (including all reserves) for the fiscal year following the fiscal year in which the obligation is incurred.

Source:

Number of employees by industry is provided by the Bureau of Economic Analysis, U.S. Department of Commerce (www.bea.gov/regional/spi) through estimates released October 2009.

Notes:

Due to statutory requirements (confidentiality provisions), the State can not disclose the number employed by the ten largest employers. As an alternative comparison, this schedule presents the number employed by nonfarm related industries. The ten largest employers are nonfarm related; therefore, the number employed by those employers could be expected to fall within this schedule. Farming related employment is not included on this schedule because most farms are not large enough to be required to provide the necessary data to the State Department of Labor.

Notes:

(1) Reflects changes as a result of GASB Statement No. 34.

Information regarding Infrastructure can be found in the Required Supplementary Information contained on page 128. Information is given as to the number of bridges and their condition as well as the center-lane miles and their condition for the past three years. The State preserves farmland under the Department of Agriculture which is part of General Government. In addition, land is preserved as park land under the Department of Natural Resources and Environmental Control. Other land is used for functional purposes of the department, including housing building to perform the Department's function.
