

**TAMPER
PROOF**

(AGR) Advanced Guardrail Tower

The *Euro* Tamper Proof Advanced Guardrail is another solution to safe tower assembly.

The ergonomic design lends itself to quick easy assembly and provides collective fall prevention before the operator accesses the platform and cannot be removed before the operator descends from the platform.

The specially designed guardrail units can be used in conjunction with the *Euro* Ladder Frame and *Euro232* range of towers.

Features include...

- Correct guardrail heights achieved every time
- Fast, safe assembly and disassembly
- Collective protection before the operator accesses the platform
- Guardrails cannot be removed without descending and removing the platforms first
- Double torsion stainless steel spring with Auto-locking kliker for faster connection

The Euro Ladder frame tower is approved to TUV BSEN 1004 European standard.
