

**CRAFTSMAN STYLE**  
YOUR WINDOW AND DOOR GUIDE

Artistry. Precision. Natural beauty. These traits are reflected in Craftsman homes—from their tapered columns to their decorative braces. You'll also find these qualities in reliable JELD-WEN® windows and doors. We make each one with great care, so they're a worthy choice for your custom home. And while all these windows and doors call to mind architecture of the past, they're built to remain beautiful and energy efficient well into the future.

Regardless of your price range, this guide will help you find window and door styles and options that are best suited for your Craftsman home. For example, we've highlighted the most appropriate wood species. You'll be glad to know this includes solid pine AuraLast™ wood, a JELD-WEN exclusive that's guaranteed to resist wood decay and termite infestation for 20 years.

## AuraLast™ wood

At JELD-WEN, we want to help your Craftsman home look beautiful for many years to come. That's why our wood windows and select doors in pine are made from AuraLast wood, which provides superior protection against wood decay, water absorption and termite infestation and is supported by a 20-year warranty. In addition, our Premium Fiberglass doors feature edges made from AuraLast wood. To learn more and see complete AuraLast wood product warranties, visit [www.jeld-wen.com/auralast](http://www.jeld-wen.com/auralast).

AuraLast wood (shown in purple) provides virtually 100 percent penetration of the protective ingredients—from the surface to the core. In contrast, dip-treated wood (shown in blue) is protected on the surface only, so its effectiveness will be compromised by most installation methods.

NOTE: Colors are used for illustration purposes only; AuraLast wood has a clear pine color.

JELD-WEN wood windows and doors made with AuraLast wood have earned the Good Housekeeping Seal.

# Unmatched artistry

Creating an architecturally accurate home requires careful attention to detail. JELD-WEN helps you achieve that goal with custom windows and doors that are available with nearly every option you could want, from the finest wood species to the widest selection of exterior metal clad colors. These windows and doors are made by experts who know how to make reliability as elegant as it is authentic.

### Steel exterior doors

- Created to resist rust and corrosion
- Optional steel edge for added security and a fire rating up to 90 minutes
- Courtyard Collection French doors come standard with Low-E glass
- Matching door and sidelight designs

# Performance considerations

## Climate

Every climate has its own benefits and challenges, which is why it's a deciding factor in how much maintenance your windows and doors will require. We've provided the following chart to help you select appropriate products for your climate.

PRODUCT TYPE	OPTIMAL CLIMATE	MAINTENANCE LEVEL
<b>Wood windows and patio doors*</b>	Temperate climates	Moderate maintenance
<b>Metal-clad-wood windows and patio doors*</b>	Most climates	Minimal maintenance
<b>Vinyl windows and patio doors</b>	Any climate	Virtually no maintenance
<b>Custom Wood exterior doors</b>	Temperate climates (appropriate overhang required)	Moderate maintenance
<b>Fiberglass exterior doors</b>	Any climate (excellent for coastal and desert areas or in extreme conditions)	Virtually no maintenance
<b>Premium Wood exterior doors*</b>	Temperate climates (appropriate overhang required)	Moderate maintenance
<b>Steel exterior doors</b>	Any climate	Minimal maintenance
<b>Composite garage doors</b>	Any climate	Minimal maintenance

\* JELD-WEN wood windows and doors made from AuraLast™ wood require less maintenance, which means they're appropriate for more climates. To learn more about AuraLast wood, see page 3.

## Energy efficiency

All JELD-WEN® wood and metal-clad-wood windows and patio doors, Premium Wood exterior doors (with glass inserts) and Steel Courtyard Collection French exterior doors come standard with energy efficient Low-E glass. This glass helps you save money on your heating and cooling bills and reduces fading due to UV exposure. Low-E glass is also an affordable option for JELD-WEN vinyl and aluminum windows. With the proper glass options, your JELD-WEN windows and doors\*\* will meet ENERGY STAR® requirements. JELD-WEN has been an ENERGY STAR partner since 1998.

\*\*A door system includes a door slab, frame and hardware; all these components must be qualified for an ENERGY STAR rating.

In warm weather, Low-E glass reflects the sun's energy and prevents it from entering the home.

### Exposures: windows and patio doors

The placement of windows and patio doors on certain walls can determine the kind of natural light that enters into your home, or even the temperature inside your home. South- and east-facing windows bring in bright, golden light. North-facing windows usher in cooler, muted light. And west-facing windows let in abundant direct sunlight, as well as the beauty of sunsets. Consider that windows on south-, southwest-, southeast- or west-facing walls may be more susceptible to heat gain.

### Exposures: exterior doors

If you select a wood exterior door, it's imperative to consider exposure. To adequately protect the door and extend its life, you'll have to take into account your climate and the direction the door will be facing. Then you must determine the amount of overhang needed to protect the door from the elements, which can be obtained by following a simple formula:  $Y=1/2X$  (in most cases). For example, if the measurement from the base of your door to the bottom of your overhang is ten feet, then the overhang should be a minimum of five feet deep.

*X = Distance from the bottom of door to base of overhang.*

*Y = The amount of overhang protection required.*

In cold weather, Low-E glass reduces the amount of heat loss by reflecting it back inside.

### Building codes

Building codes are published ordinances that will regulate many aspects of your project, such as design loads, opening widths and material selection. JELD-WEN® windows and doors are designed and tested with these local building codes in mind. Many of our products even meet the toughest standards for hurricane-prone regions. To learn more, visit [www.jeld-wen.com/resources](http://www.jeld-wen.com/resources).
