RE: Request to be considered as a contributor to the work of the Global Alliance to Eliminate Lead in Paint

The Department of Chemistry in the College of Biological and Physical Sciences of the University of Nairobi endorses the goals and objectives of the Global Alliance to Eliminate Lead in Paint and wishes to be considered as a contributor to the work of the Global Alliance. The contribution that we would like to make will be under the leadership of Dr. Faridah Hussein Were and Mr. Godfrey Wafula on the basis of their research work and areas of specialization. The contribution will be as follows:

1. Carrying out collaborative activities with other contributors of lead alliance partners within Kenya and globally with the aim of phasing out lead in paint.
2. Offering technical support and working closely with government agencies, paint manufacturing industries and suppliers, and other stakeholders with the aim of eliminating lead in paint.
3. Supervision and training of students and industrial personnel.
4. Creating public awareness with the involvement of students at the community level and globally through exchange programmes.

The Department of Chemistry understands that this letter of intent is not legally binding and that a copy of this letter of commitment and the name of the University of Nairobi will be publicly listed on the Global Alliance Websites.

Yours sincerely,

Prof. John Onyari
Chairman, Department of Chemistry, University of Nairobi
