## **INSTRUCTIONS FOR FREEZING & RE-HEATING PIES**

---

**TO FREEZE PIE:** Wrap the pie well in plastic wrap. Replace in box and freeze.

**TO RE-HEAT A FRUIT PIE:** (It is not necessary to defrost the pie first.) Remove the plastic wrap and bake in a pre-heated 350° - 375° oven for 40 - 50 minutes. Test the center to make sure it is warmed completely through.

**FOR PUMPKIN PIE:** Simply defrost the pumpkin pie at room temperature, and warm before serving (optional).

---

**NOTE:** Meringue pies and cream pies should not be frozen.
