NEW!

ESTATE SUPER SPORT COMPETITION TARGET SHOTSHELLS

Economy Without Skimping On Quality Or Consistency

Premium loads at an economical price, excellent for any kind of clay target. Estate shotshells deliver the dependability and affordability that high-volume shotgun shooters demand, without skimping on quality. Features progressive powder for consistent burn, brass-plated metal head, magnum-grade extra-hard lead shot, and reloadable hulls. 25 shells per box.

FEDERAL PERSONAL DEFENSE HANDGUN AMMUNITION

Controlled Expansion + High-Weight Retention = Outstanding Stopping Power

The choice of law enforcement agencies nationwide, Federal's unique Hydra-Shok jacketed hollow point bullet delivers controlled expansion and efficient energy transfer to penetrate barriers while retaining stopping power. The deep penetration of the Hydra-Shok bullet satisfies even the FBI's stringent testing requirements. On impact, the notched jacket hydrostatically ruptures along designated fault lines and mushrooms until the hardened center post base stops the expansion, leaving almost 100% of the bullet's weight in the target.

REMINGTON UMC® HANDGUN AMMUNITION

Reliable, Economical, Popular Handgun Calibers & Loads

Made with Remington components right here in the USA, UMC ammo provides shooters with an excellent blend of value and performance. It's available in today's most popular pistol and revolver calibers with both metal case (MC) or jacketed hollow point (JHP) bullets. For target shooting, tactical training, action-pistol competition, or any other high-volume shooting activity, UMC handgun ammunition offers outstanding performance without any compromise in quality or reliability. Many of the most sought-after calibers are available in convenient bulk packs. You'll be hard-pressed to find a better value anywhere.

A Note on Ammunition Availability

As this catalog goes to press in July 2015, ammunition availability is vastly improved from what it was two years ago. Shortages persist on certain loads and brands.

We've listed here a sample of what we currently have available, and barring unforeseen circumstances, we expect the situation continue improving as 2015 progresses into 2016. Supply is still unpredictable for some cartridges (for example, rimfire), and we cannot guarantee the items listed here will be available through the entire life of Catalog #68. We receive shipments from our suppliers every day. Please check Brownells.com often for current stock.

ATTENTION: You must be 18 or older to purchase rifle or shotgun ammunition and 21 years of age to purchase handgun ammunition. Check your state and local laws for any additional regulations that may apply. Always make sure to use the correct ammunition for your firearms. Ammunition is shipped UPS Ground and CANNOT be shipped outside of the United States.

REMINGTON CORE-LOKT® RIFLE AMMUNITION

The Right Loads For Any Size Game

There's probably been more big game taken with Remington Core-Lokts than any other ammunition. One of the first controlled-expansion bullet designs, it's still one of the most effective ever developed, with a tapered copper jacket "Lokt" to a solid lead core for deep penetration and superb expansion with high weight retention. The Soft Point Core-Lokt (SPCL) bullet offers broad frontal area for high-energy impact and rapid expansion. The Pointed Soft Point Core-Lokt (PSPCL) style has a Spitzer-shaped profile for improved velocity and flat trajectory. For the varmint hunter, the explosive Power-Lokt® (PL) bullet delivers unmatched terminal performance with minimal risk of ricochets. An ultra-thin copper jacket is electrolytically plated to the lead core for near-perfect concentricity and balance. For exceptional long-range performance on medium-sized game, the Bronze Point (BP) delivers high-power ballistics and a flat trajectory, with the bronze tip driven backward on impact to create rapid, controlled expansion.

REMINGTON UMC® RIFLE AMMUNITION

Consistent, Value-Priced, Factory New In Popular Rifle Calibers & Loads

Available in today's most popular rifle calibers with metal case (MC) or jacketed hollow point (JHP) bullets, UMC ammunition is made from all-new Remington components right here in the USA. It offers outstanding performance without any compromise in quality to provide the shooter with an excellent value for target practice, varmint hunting, or preparing for that major hunt or competition without burning up expensive premium ammo.

REMINGTON GUN CLUB SHOTSHELLS

Economical, High-Performance Target Shells—Reloadable, Too

Remington Gun Club Target Loads are an excellent choice for the price-conscious shooter who wants consistent, high-performance shotshells. Loaded with extra-hard Gun Club lead shot cradled in Remington's Power Piston® one-piece wad driven by specially blended powder ignited by the ultra-reliable STS® primer. The one-piece compression-formed hull delivers smooth cycling in pumps and semi-autos, and unlike some budget-priced shells, it can be reloaded, allowing shooters to stretch their ammo dollars even further. 25 shells per box.

SAMSON INTERNATIONAL RIFLE AMMUNITION

Economical, Reloadable & Noncorrosive

Produced by IMI of Israel, Samson rifle ammo is great for practice - and no more expensive than reloads or suspect mil surp ammo. FMJ bullets feed reliably and minimize your exposure to lead contamination. This is non-corrosive, boxer-primed ammo with the primer crimp. Brass cases are reloadable.

WINCHESTER USA AMMUNITION

Economical Ammo For A Variety Of Shooting Applications

Classic Winchester USA brand "white box" ammo gives the high-volume shooter great performance at an affordable price. Available in popular bullet styles and weights for semi-autos and revolvers. Traditional "ball" full metal jacket (FMJ) bullets deliver reliable function and good accuracy without bullet expansion or barrel leading, while jacketed hollow point (JHP) rounds have a back-weighted design that enhances accuracy without sacrificing reliable expansion. 🇺🇸
