The tradition of placing the Wedding Ring on the third finger of the left hand is perhaps because during Medieval Times, a ring was placed on three of the bride's fingers in turn to represent the Holy Trinity - the Father, the Son, and the Holy Spirit. Or perhaps it's because the ancient Romans believed that the vein in the third finger ran directly to the heart, so the wearing of rings on that finger joined the couple's hearts and destinies.

What's new?

An increase in demand for medium weight wedding rings

High metal prices coupled with the global credit crunch has seen customers looking for a slightly cheaper price point when making their special purchase of a wedding ring.

We have recognised this and added many new medium weight ranges in both 9 & 18ct White and Yellow gold.

NEW

Hundreds of new rings added to the range

Including 9ct and 18ct Yellow & White D Shape and Court ranges. Plus additional flat ranges in 9ct Yellow, 18ct Yellow and White.

SEE PAGE 15

Palladium

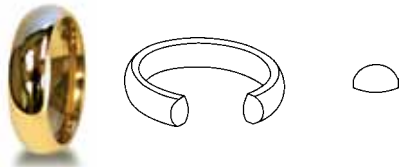

The success of Palladium over the past two years has exceeded all expectations. The ring has become a real alternative white metal for both men and women and we anticipate that sales will grow further as the UK hallmark is now available.

We have introduced a brand new range of medium weight Courts and E-Fits alongside extra widths. 2, 7 & 8mm have been added to the existing heavy weight range of Courts, Flats and E-Fits.

ALL GOLD RINGS ARE HALLMARKED

Did You Know?
 The earliest rings have been found in Egyptian tombs - these were usually signet rings and were worn with a crest or pattern to identify the wearer and were used to authenticate documents.

Ring Size Cutter

Avoid wasting precious metal that usually occurs in conventional sawing with this precision ring cutter, saving you time and money. Supplied with 7 cutters for removing the following: 1/2, 3/4, 1 1/4, 1 1/2, 1 3/4, and 2 full sizes. Choose the cutter that equals the amount you want to remove. Adjust the cutter bars and insert the ring, pull the handle to remove the exact amount of shank. The cut is always parallel, which make soldering fast and neat. The piece of shank removed can be reused to enlarge another appropriate width shank.

999 ST04 £211.75

ONLY £211.75

Ring Gauge Boxed Set

Boxed ring gauge set, contains 52 flat 4mm rings A 1/2 - Z 1/2. Includes an aluminium ring stick, British sizes D-Z +5, US & European sizes.

Round Steel Triblet Marked A-Z+6

Used to form and reshape and aid in the sizing of rings - (by tapping the shank carefully with a hammer). NB. Care should be taken as the size markings will react in the same way as surface markings and transfer onto the metal's surface! The triblet can be hand held or secured in a vice at the handle (secured at any other point the triblet will be marked and transfer the marks onto the metal's surface). Round Marked Triblet - Ring sizes A-Z+6. Width at top of blade - 10.2mm Width at bottom of blade - 25.5mm. Length of blade - 24cm/9.5in. Overall height - 33cm/13in

Did You Know?

The formality of the groom asking the father of the bride to be for her hand in marriage, relates to olden times and is an acknowledgment that respect should be paid to a woman's family for the loss of their daughter.

Stainless Steel Wheatsheaf Ring Stick

Made from stainless steel, with a wooden handle, this industry standard tapered ring stick is marked with concentric, equidistant circles running the length of the stick. Each circle symbolises a size and is marked with a letter - size A-Z + 6 (British sizes).

14 CAPABILITY RANGE

The Cookson Capability Range

50,000
MANUFACTURED
BLANKS

Sometimes “Off the Peg” just isn’t good enough!

If you can’t find the ring you are looking for from our extensive stock range then Cookson can produce a bespoke weight or wall thickness ring blank to order.

All you need to do is choose the alloy, width, style, finger size and weight or wall thickness you require and we will do the rest!

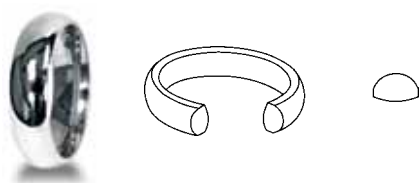

We can even supply them hallmarked or unhallmarked, and are happy to produce “one off” pieces. Please contact a member of our sales team to discuss your requirements.

CALL 0845 100 1122 for details. Even more choice from Cookson

The Palladium hallmark

There are three recognised fineness standards for Palladium which are 500 parts per thousand, 950 parts per thousand and 999 parts per thousand.

500 950 999

The 950 fineness is thought to be the most widely used.

Two of the fineness standards match Platinum - 950 & 999, however the shape of the surrounds are different.

A voluntary traditional mark depicts Pallas Athene, Goddess of War, Wisdom and Craft after whom Palladium was named.

All Cookson Precious Metals palladium ring blanks are now hallmarked. The mark comprises of:

-  Our Sponsors Mark
- 950 Fineness Mark
-  Assay Office Mark
-  Voluntary Palladium Mark

On the 22nd July 2009 amendments to the UK Hallmarking Act were finally approved which enabled the Assay offices in the UK to hallmark Palladium. The hallmark was voluntary until the 31st December 2009, becoming compulsory on the 1st January 2010.

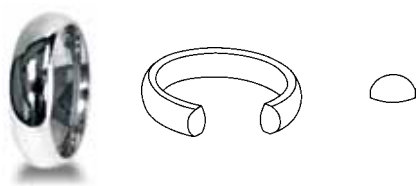

The success of Palladium over the past two years has exceeded all expectations. The ring has become a real alternative white metal for both men and women and we anticipate that sales will grow further as the UK hallmark is now available.

We have introduced a brand new range of medium weight Courts and E-Fits alongside extra widths. 2, 7 and 8mm have been added to the existing heavy weight range of Courts, Flats and E-Fits.

"Create beautiful textured finishes quickly & easily"

Frosting wheels

Used for obtaining a satin finish on a surface. Constructed with a 3/32 shank and wheel into which are attached sections of equal lengths of steel wire, fixed in such a way that the wires have movement from side to side. Once turning the object is offered up to the frosting wheel and as the steel wires brush along the surface so a satin finish appears.

RC230X drill kit with flexi drive set

This 230v RC230X drill with flexi-drive set can be used as a hand-held drill or converted to a pendant drill with flexi-drive and hanging stand. Includes over 100 accessories, including sanding discs, polishing wheels and mandrels, variable speed setting - from 8,000 to 25,000 rpm, and 2 grip positions - palm and pen. This drill kit comes in a handy aluminium carry and storage case with full instructions.

999 AVL3 £44.50

Ultrasonic Cleaner for only £199

Ultrasonic cleaning is fast, safe and much more effective than brushing and steaming. High frequency sound is passed through the cleaning fluid creating waves of high and low pressure bubbles which breakdown dirt and grease from jeweller's polish. This, coupled with heat, accelerates the cleaning process even further.

ULTRASONIC CLEANING
999 AJZ6

Tank size: 265x164x100mm (LxWxH) - 3 litres

Frequency: 42HKz
