### Abstract

Taxonomic placement of genera have been changing rapidly as taxonomists widely use DNA sequence data in phylogenetic and evolutionary studies. It is essential to update existing databases/outlines based on recent studies, since these sources are widely used as a foundation for other research. In this outline, we merge both asexual and sexual genera into one outline. The phylum Ascomycota comprises of three subphyla *viz.* *Pezizomycotina* (including 13 classes, 124 orders and 507 families), *Saccharomycotina* (including one class, one order and 13 families) and *Taphrinomycotina* (five classes, five orders and six families). Approximately, 6600 genera have been listed under different taxonomic ranks including auxiliary (intermediate) taxonomic ranks.

**Keywords** Asexual genera · Classification · Sexual genera · Systematic · Taxonomic ranks

### Introduction

The Kingdom *Fungi* contains a huge number of species, which continues to rise with more collections. Our current fungal classification system has been subjected to various updates over the years, following the discovery of many novel species and inclusion of DNA sequence data to provide a more natural system of classification that reflects evolutionary relationships. Lumbsch and Huhndorf (2010)

provided an outline with three subphyla (*viz.* *Pezizomycotina* with eleven classes; *Saccharomycotina* with one class and *Taphrinomycotina* with four classes). There have been major developments in fungal taxonomy over the last few years with many additions leading to subsequent classification changes (Liu et al. 2015; Senanayake et al. 2015; Li et al. 2016; Wijayawardene et al. 2016; Hyde et al. 2017a, b). Hence, it is essential to update our current classification to inadvertently avoid confusion and provide a platform where mycologists can use a standard system to assign taxa to appropriate ranks. There is also a need to integrate asexual species into our current classification. Kendrick (1979, 1989) advocated the incorporation of asexual genera in a natural classification system, but this was given little attention. However, with the concept of *One fungus- One name*, which deals with the inconsistencies of the dual nomenclatural system pertaining to pleomorphic fungi, this has changed (Hawksworth 2012). Hyde et al. (2011) compiled a number of asexual morph names into an outline with a view to providing a stable and reliable system to integrate asexual names in our classification and avoid nomenclatural bias. It is also very important to update our current classification system as several nomenclatural changes have been proposed since 2011 (Art. 59). DNA based sequence analyses have also

provided huge insights and changes into the taxonomy of the *Ascomycota*, especially at a higher hierarchical level.

In this paper, we provide an update of the outline published by Lumbsch and Huhndorf (2010) by integrating sexual and asexual genera wherever possible, taking into account recent papers dealing with taxonomic changes (e.g Hyde et al. (2011); Wijayawardene et al. (2012, 2017a, b)) and recently published articles where changes in classification have been proposed. This outline is not exhaustive, but does make an attempt to depict the latest taxonomic changes. In this outline, three subphyla *Pezizomycotina* (including 13 classes *viz.*, *Arthoniomycetes*, *Coniocybomycetes*, *Dothideomycetes*, *Eurotiomycetes*, *Geoglossomycetes*, *Laboulbeniomycetes*, *Lecanoromycetes*, *Leotiomycetes*, *Lichenomycetes*, *Orbiliomycetes*, *Pezizomycetes*, *Sordariomycetes* and *Xylonomycetes*), *Saccharomycotina* (including one class, *viz.* *Saccharomycetes*) and *Taphrinomycotina* (including five classes, *viz.* *Archaeorhizomycetes*, *Neoleotiomycetes*, *Pneumocystidomycetes*, *Schizosaccharomycetes* and *Taphrinomycetes*) are included and a summary of other taxonomic ranks are summarized in Table 1.

## Materials and methods

We used Lumbsch and Huhndorf (2010), Hyde et al. (2011), Wijayawardene et al. (2012, 2017a, b) and Jaklitsch et al. (2016a) to compile both asexual and sexual genera (and other higher taxonomic ranks) into a single outline. However, we do not list the suppressed names (Art. 59.1) since all the synonyms (or suppressed names of pleomorphic genera) are listed in Wijayawardene et al. (2017a). Nevertheless, several new synonymized lichen genera which are not listed in Wijayawardene et al. (2017a) are included within brackets after the accepted name. Several genera which were not listed in Wijayawardene et al. (2017a) are added and details of these genera will be provided in a future publication. Notes are provided only for recently introduced genera (mark with an asterisk in the outline).

|                                   |                                   | <i>Diporothecaceae</i> (1)         |

**Table 1** (continued)

| Class | Order <sup>a</sup> | Family <sup>a</sup>           |
|-------|--------------------|-------------------------------|
|       |                    | <i>Eoterfeziaceae</i> (2)     |
|       |                    | <i>Epigloeaceae</i> (1)       |
|       |                    | <i>Harpidiaceae</i> (2)       |
|       |                    | <i>Microcaliciaceae</i> (1)   |
|       |                    | <i>Mucomassariaceae</i> (1)   |
|       |                    | <i>Phyllobatheliaceae</i> (2) |
|       |                    | <i>Saccardiaceae</i> (12)     |
|       |                    | <i>Seuratiaceae</i> (2)       |
|       |                    | <i>Strangosporaceae</i> (1)   |

Number of genera in each family is provided inside the brackets after the family name

<sup>a</sup>Orders/families could be listed under different subclasses in outline. In the table, we do not consider auxiliary (intermediate) taxonomic ranks

<sup>b</sup>Ascomycota/Pezizomycotina orders *incertae sedis*

<sup>c</sup>Ascomycota/Pezizomycotina families *incertae sedis*

|   |   |
|---|---|

- Lichenostigmatales** Ertz et al.  
**Phaeococomycetaceae** McGinnis & Schell  
*Etayoa* Diederich & Ertz  
*Lichenostigma* Hafellner  
*Phaeococomyces* de Hoog
- Class Coniocybomycetes** M. Prieto & Wedin  
**Coniocybales** M. Prieto & Wedin  
**Coniocybaceae** Rchb.  
*Chaenotheca* (Th. Fr.) Th. Fr.  
*Sclerophora* Chevall.
- Class Dothideomycetes** sensu O.E. Erikss & Winka  
**Subclass Dothideomycetidae** P.M. Kirk et al.  
**Capnodiales** Woron.  
**Antennulariellaceae** Woron.  
*Achaetobotrys* Bat. & Cif.  
*Antennulariella* Woron.  
*Capnofrasera* S. Hughes
- Capnodiaceae** (Sacc.) Höhn. ex Theiss.  
*Capnodium* Mont.  
*Leptoxyphium* Speg.  
*Limaciniaseta* D.R. Reynolds  
*Phragmocapnia* Theiss. & Syd.  
*Plurisperniopsis* Pereira-Carv. et al.  
*Scoriadopsis* Mend.  
*Scorias* Fr.
- Cladosporiaceae** Nann.  
*Acroconidiella* J.C. Lindq. & Alippi  
*Cladosporium* Link  
*Davidiellomyces* Crous  
*Graphiopsis* Trail  
*Hoornsmania* Crous  
*Rachicladosporium* Crous et al.  
*Toxicocladosporium* Crous & U. Braun  
*Verrucocladosporium* K. Schub. et al.
- Cystocoleaceae** Locq. ex Lücking et al.  
*Cystocoleus* A. Massal.
- Dissoconiaceae** Crous & de Hoog  
*Dissoconium* de Hoog et al.  
*Pseudoveronaea* Crous & Batzer  
*Ramichloridium* Stahel  
*Uwebraunia* Crous & M.J. Wingf.
- Euantennariaceae** Hughes & Corlett\*  
*Capnokyma* S. Hughes  
*Euantennaria* Speg.  
*Hormisciomyces* Bat. & Nascim.  
*Plokamidomyces* Bat. et al.  
*Rasutoria* M.E. Barr  
*Strigopodia* Bat.  
*Trichothallus* F. Stevens
- Extremaceae** Quaedvl. & Crous  
*Extremus* Quaedvl. & Crous  
*Petrophila* de Hoog & Quaedvl.  
*Pseudoramichloridium* Cheew. & Crous  
*Saxophila* Selbmann & de Hoog  
*Staninwardia* B. Sutton  
*Vermiconia* Egidi & Onofri
- Metacapnodiaceae** Hughes & Corlett  
*Capnobotrys* S. Hughes  
*Hyphosoma* Syd.  
*Metacapnodium* Speg.
- Mycosphaerellaceae** Lindau  
*Acervuloseptoria* Crous & Jol. Roux  
*Achorodothis* Syd.  
*Amycosphaerella* Quaedvl. & Crous  
*Anguillosporella* U. Braun\*  
*Annellophora* S. Hughes  
*Annellophragmia* Subram.\*  
*Annellosympodia* McTaggart et al.\*  
*Annelosympodiella* Crous & Assefa  
*Apseudocercosporella* Videira & Crous  
*Asperisporium* Maubl.  
*Asteromidium* Speg.\*  
*Australosphaerella* Videira & Crous\*  
*Brunneosphaerella* Crous  
*Brunswicksiella* Videira & Crous\*  
*Bryopelta* Döbbeler & Poelt  
*Camptomeriphila* Crous & M.J. Wingf.  
*Camptomeris* Syd.\*  
*Caryophylloseptoria* Verkley et al.  
*Catenulocercospora* C. Nakash. et al.\*  
*Ceratosperma* Speg.\*  
*Cercoramularia* Videira et al.\*  
*Cercosperma* G. Arnaud ex B. Sutton & Hodges\*  
*Cercosphaerella* Kleb.\*  
*Cercospora* Fresen.  
*Cercosporella* Sacc.  
*Cercosporidium* Earle  
*Chuppomyces* Videira & Crous\*  
*Cladosporiella* Deighton  
*Claro hilum* Videira & Crous\*  
*Clypeispora* A.W. Ramaley  
*Clypeosphaerella* Guatimosim et al.  
*Collarispora* Videira & Crous\*  
*Colletogloeum* Petr.  
*Coremiopassalora* U. Braun et al.  
*Cytostagonospora* Bubák\*  
*Deightonomyces* Videira & Crous\*  
*Devonomyces* Videira & Crous\*  
*Dictyosporina* Abreu et al.  
*Distocercospora* N. Pons & B. Sutton  
*Distocercosporaster* Videira et al.\*

- Distomycovellosiella* U. Braun et al.\*  
*Dothistroma* Hulbary  
*Epicoleosporium* Videira & Crous  
*Episphaerella* Petr.\*  
*Euryachora* Fuckel  
*Exosporium* Link\*  
*Exutisphaerella* Videira & Crous\*  
*Filiella* Videira & Crous  
*Fulvia* Cif.\*  
*Fusodiella* Videira & Crous  
*Gillotia* Sacc. & Trotter  
*Graminopassalora* U. Braun et al.\*  
*Hyalocercosporidium* Videira & Crous\*  
*Hyalozasmidium* U. Braun et al.  
*Lecanosticta* Syd.  
*Lembosiopsis* Theiss.  
*Lophiosphaerella* Hara  
*Madagascaromyces* U. Braun et al.\*

*Xenodium* Syd.  
*Zalerion* R.T. Moore & Meyers
- Class Xylonomycetes** R. Gazis & P. Chaverri  
**Xylonomycetales** R. Gazis & P. Chaverri  
**Xylonomycetaceae** R. Gazis & P. Chaverri  
*Symbiotaphrina* Kühlw. & Jurzitz ex W. Gams & Arx  
*Trinosporium* Crous & Decock  
*Xylona* Gazis & P. Chaverri
- Pezizomycotina** orders *incertae sedis*  
**Thelocarpales** Lücking & Lumbsch  
**Thelocarpaceae** Zukal  
*Sarcosagium* A. Massal.  
*Thelocarpon* Nyl
- Vezdaeales** Lumbsch & Lücking  
**Vezdaeaceae** Poelt & Vezda ex J.C. David & D. Hawksw.  
*Vezdaea* Tsch.-Woess & Poelt
- Pezizomycotina** family *incertae sedis*

- Harpidiaceae** Vezda ex Hafellner  
*Euopsis* Nyl.  
*Harpidium* Körb.
- Pezizomycotina** genera incertae sedis  
*Biatoridium* J. Lahm ex Korb.  
*Cyanoporina* Groenh.  
*Eopyrenula* R.C. Harris  
*Frigidopyrenia* Grube  
*Melanophloea* P. James & Vezda  
*Milospium* D. Hawksw.  
*Oevstedalia* Ertz & Diederich  
*Psammina* Sacc. & M. Rousseau ex E. Bommer & M. Rousseau  
*Pyrenocollema* Reinke  
*Trizodia* Laukka  
*Wadeana* Coppins & P. James
- Subphylum SACCHAROMYCOTINA** O.E. Erikss. & Winka  
**Class Saccharomycetes** O.E. Erikss. & Winka  
**Saccharomycetales** Kudrjanzev  
**Ascoideaceae** J. Schröter  
*Ascoidea* Bref.
- Cephaloascaceae** L.R. Batra  
*Cephaloascus* Hanawa
- Debaryomycetaceae** Kurtzman & M. Suzuki  
*Babjeviella* Kurtzman & M. Suzuki  
*Debaryomyces* Lodder & Kreger-van Rij  
*Hemisphaericaspora* Hui et al.  
*Kurtzmaniella* M.A. Lachance & W.T. Starmer  
*Lodderomyces* Van der Walt  
*Meyerozyma* Kurtzman & M. Suzuki  
*Millerozyma* Kurtzman & M. Suzuki  
*Priceomyces* Kurtzman & M. Suzuki  
*Scheffersomyces* Kurtzman & M. Suzuki  
*Schwanniomyces* Klöcker emend. M. Suzuki & Kurtzman  
*Spathaspora* N.-H. Nguyen et al.  
*Suhomyces* M. Blackwell & Kurtzman  
*Teunomyces* Kurtzman & M. Blackwell  
*Yamadazyma* Billon-Grand
- Dipodascaceae** Engl. & E. Gilg  
*Blastobotrys* Kłopotek  
*Dipodascus* Lagerh.  
*Galactomyces* Redhead & Malloch  
*Geotrichum* Link  
*Magnusiomyces* Zender  
*Saprochaete* Coker & Shanor
- Lipomycetaceae** E.K. Novák & Zsolt  
*Dipodascopsis* Batra & P. Millner emend. Kurtzman et al.  
*Kockiozyma* Jindam. et al.
- Limitongia* Jindam. et al.  
*Lipomyces* Lodder & Kreger  
*Myxozyma* Van der Walt et al.
- Metschnikowiaceae** T. Kamienski  
*Clavispora* Rodr. Mir.  
*Danielozyma* Kurtzman & Robnett  
*Kodamaea* Y. Yamada et al.  
*Metschnikowia* T. Kamienski  
*Wickerhamia* Soneda
- Phaffomycetaceae** Y. Yamada et al.  
*Barnettozyma* Kurtzman et al.  
*Cyberlindnera* Minter  
*Phaffomyces* Y. Yamada  
*Starmera* Y. Yamada et al.  
*Wickerhamomyces* Kurtzman et al.
- Pichiaceae** Zender  
*Brettanomyces* Kufferath & van Laer  
*Dekkera* Van der Walt  
*Hyphopichia* von Arx & van der Walt  
*Komagataella* Y. Yamada et al.  
*Kregervanrija* Kurtzman  
*Kuraishia* Y. Yamada et al.  
*Martiniozyma* Kurtzman  
*Nakazawaea* Y. Yamada et al.  
*Ogataea* Y. Yamada et al.  
*Pachysolen* Boidin & Adzet  
*Peterozyma* Kurtzman & Robnett  
*Pichia* E.C. Hansen  
*Saturnispora* Z.W. Liu & Kurtzman
- Saccharomycetaceae** G. Winter  
*Citeromyces* Santa Maria  
*Cyniclomyces* Van der Walt & D.B. Scott  
*Eremothecium* Borzi emend. Kurtzman  
*Hagleromyces* Sousa et al.  
*Kazachstania* Zubcova  
*Cluyveromyces* Van der Walt  
*Lachancea* Kurtzman  
*Metahypopichia* Sipiczki & Pfiegl  
*Nakaseomyces* Kurtzman  
*Naumovozyma* Kurtzman  
*Saccharomyces* Meyen  
*Tetrapisispora* Ueda-Nishimura & K. Mikata emend. Kurtzman  
*Torulaspora* Lindner  
*Vanderwaltozyma* Kurtzman  
*Yueomyces* Q.M. Wang  
*Zygosaccharomyces* B.T.P. Barker  
*Zygotorulaspora* Kurtzman
- Saccharomycodaceae** Kudrjanzev  
*Hanseniaspora* Zikes

- Kloeckera** Janke  
**Saccharomycodes** E.C. Hansen
- Saccharomycidaceae** Arx & Van der Walt  
*Ambrosiozyma* Van der Walt  
*Saccharomyopsis* Schiønning
- Trichomonascaceae** Kurtzman & Robnett  
*Blastobotrys* Klopotek  
*Deakozyma* Kurtzman & Robnett  
*Diddensiella* Péter  
*Groenewaldozyma* Kurtzman  
*Middlehovenomyces* Kurtzman & Robnett  
*Nadsonia* Syd.  
*Spencermartinsiella* Péter et al.  
*Starmerella* Rosa & Lachance  
*Sugiyamaella* Kurtzman & Robnett  
*Wickerhamiella* Van der Walt  
*Yarrowia* Van der Walt & Arx  
*Zygoascus* M.T. Sm.
- Trigonopsidaceae** M.A. Lachance & C.P. Kurtzman  
*Botryozyma* Shann & M.Th. Smith emend. Lachance & Kurtzman  
*Tortispora* Lachance & Kurtzman  
*Trigonopsis* Schachner emend. Kurtzman & Robnett
- Saccharomycetales** genera *incertae sedis*  
*Aciculonconidium* D.S. King & S.C. Jong  
*Candida* Berkhout (= *Lodderomyces* Van der Walt)\*  
*Coccidiascus* Chatton  
*Conidiascus* Holterm.  
*Diutina* Khunnamwong et al.  
*Endomyces* Reess  
*Endomyces* Reess  
*Macrorhabdus* Tomaszewski et al.  
*Oosporidium* Stautz  
*Oscarbrefeldia* Holterm.  
*Phialoascus* Redhead & Malloch  
*Selenozyma* Yarrow  
*Sporopachydermia* Rodr. Mir.
- Subphylum TAPHRINOMYCOTINA** O.E. Erikss. & Winka
- Class Archaeorhizomycetes** Rosling & T.Y. James  
**Archaeorhizomycetales** Rosling & T.Y. James  
**Archaeorhizomycetaceae** Rosling & T.Y. James  
*Archaeorhizomyces* Rosling & T.Y. James
- Class Neolectomycetes** O.E. Erikss. & Winka  
**Neoletales** Landvik et al.  
**Nelectaceae** Redhead  
*Nelecta* Speg.
- Class Pneumocystidomycetes** O.E. Erikss. & Winka  
**Pneumocystidales** O.E. Erikss.
- Pneumocystidaceae** O.E. Erikss.  
*Pneumocystis* P. Delanoë & Delanoë
- Class Schizosaccharomycetes** O.E. Erikss. & Winka  
**Schizosaccharomycetales** O.E. Erikss. et al.  
**Schizosaccharomycetaceae** Beij. ex Klöcker  
*Schizosaccharomyces* Lindner
- Class Taphrinomycetes** O.E. Erikss. & Winka  
**Taphrinales** Gäum. & C.W. Dodge  
**Protomycetaceae** Gray  
*Burenia* M.S. Reddy & C.L. Kramer  
*Protomyces* Unger  
*Protomycopsis* Magnus  
*Saitoëlla* Goto et al.  
*Taphridium* Lagerh. & Juel ex Juel  
*Volkartia* Maire
- Taphrinaceae** Gäum.  
*Taphrina* Fr.
- Ascomycota**, families *incertae sedis*  
Families and genera that cannot be placed in any of classes and orders accepted in the present classification with a high degree of probability are listed below.
- Aphanopsidaceae** Printzen & Rambold  
*Aphanopsis* Nyl. ex Syd.  
*Steinia* Korb.
- Diporothecaceae** R.K. Mibey & D. Hawksw.  
*Diporotheca* C.C. Gordon & C.G. Shaw
- Eoterfeziaceae** G.F. Atk.  
*Acanthogymnomyces* Udagawa & Uchiyama  
*Eoterfzia* G.F. Atk.
- Epigloeaceae** Zahlbr.  
*Epigloea* Zukal
- Microcaliciaceae** Tibell  
*Microcalicium* Vain.
- Mucomassariaceae** Petr. & Cif.  
*Mucomassaria* Petr.
- Phyllobatheliaceae** Bitter & F. Schill.  
*Phyllobathelium* (Müll. Arg.) Müll. Arg.  
*Phyllocratera* Sérusiaux & Aptroot
- Saccardiaceae** Höhn.  
*Angatia* Syd.  
*Ascolectus* Samuels & Rogerson  
*Cyanodiscus* E. Müll. & M.L. Farr  
*Dictyonella* Höhn.  
*Epibelonium* E. Müll.  
*Henningsiella* Rehm\*  
*Johansonia* Sacc.  
*Phillipsiella* Cooke

- Pseudodiscus* Arx & E. Müll.  
*Rivilata* Kohlm. et al.  
*Saccardia* Cooke  
*SchenckIELLA* P. Henn.  
*Vonarxella* Bat. et al.
- Seuratiaceae** Vuill. ex M.E. Barr  
*Seuratia* Pat.  
*Seuriopsis* Woron.
- Strangosporaceae** S. Stenroos et al.  
*Strangospora* Korb.
- Ascomycota** genera *incertae sedis*
- Abropelta* B. Sutton  
*Acarella* Syd.  
*Acarellina* Bat. & H. Maia  
*Acaroconium* Kocourk. & D. Hawksw.  
*Acarocybe* Syd.  
*Acarocybella* M.B. Ellis  
*Acarocybellina* Subram.  
*Acarocybiopsis* J. Mena et al.  
*Acaropeltis* Petr.  
*Achoropeltis* Syd.  
*Acleistia* Bayl. Ell.  
*Acontium* Morgan  
*Acrodictyella* W.A. Baker & Partr.  
*Acrodictyopsis* P.M. Kirk  
*Acrodontiella* U. Braun & Scheuer

## Notes

**Acericola** Wanás. et al.

Hyde et al. (2017b) introduced this genus and showed that it belongs in *Phaeosphaeriaceae*.

**Acrodontium** de Hoog

Videira et al. (2017) accepted this genus as in *Teratosphaeriaceae*.

**Aegeanispora** E.B.G. Jones & Abdel-Wahab

Abdel-Wahab et al. (2017) introduced this coelomycetous genus and showed that it belongs in *Pleosporales* genera *incertae sedis*.

**Akanthomyces** Lebert

Kepler et al. (2017) treated *Torrubiella* Boud. and *Leucanillium* W. Gams & Zare as synonyms of this genus.

**Alanomyces** Sharma

Sharma et al. (2017) introduced this genus and showed that phylogenetically it belongs in *Aplosporellaceae*.

**Alinaceae** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate a single genus *Alina* Racib. which was previously treated as *Perisporiopsidaceae*.

**Allocryptovalsa** Senwanna et al.

Senwanna et al. (2017) introduced this monotypic genus and accepted it as a genus in *Diatrypaceae* based on phylogenetic analyses.

**Amphisphaeriales** D. Hawksw. & O.E. Erikss.

Hongsanan et al. (2017a) accepted *Amphisphaeriales* as a distinct order in *Xylariomycetidae*.

**Amplistromataceae** Huhndorf et al.

Daranagama et al. (2017) re-visited the family and accepted *Acidothrix* Hujslová & M. Kolařík, *Amplistroma* Huhndorf et al. and *Wallrothiella* Sacc. as the members of the family based on morpho-molecular analyses.

**Anguillosporella** U. Braun

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

**Annellophragmia** Subram.

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Annelosympodia*** McTaggart et al.

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Annulatascaceae*** S.W. Wong et al.

Zhang et al. (2017a) provided morpho-molecular background of the family.

***Aphanostigme*** Syd.

Boonmee et al. (2017) transferred this genus to *Phaeosphaeriaceae* based on morphology.

***Apiognomonia*** Höhn.

Senanayake et al. (2017a, b) treated *Discula* Sacc. as a synonym of *Apiognomonia*

***Aquadictyospora*** Z.L. Luo et al.

Li et al. (2017c) introduced this aquatic hyphomycetous genus and confirmed its placement in *Dictyosporiaceae*.

***Aquaticola*** W.H. Ho et al.

Zhang et al. (2017a) tentatively placed this genus in *Diaportheomycetidae* genera *incertae sedis*

***Arthopyreniaceae*** W. Watson

Jaklitsch et al. (2016a) accepted this family which comprises single genus *viz.* *Arthopyrenia* A. Massal. However, Liu et al. (2017) did not accept this family.

***Asterinales*** M.E. Barr ex D. Hawksw. & O.E. Erikss.

Liu et al. (2017) treated *Asterotexiales* as a synonym of *Asterinales*.

***Asterolibertia*** G. Arnaud

Firmino et al. (2016) reinstated the genus and placed in *Asterinaceae* based on phylogenetic analyses.

***Asteromidium*** Speg.

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Atractospora*** Réblová & J. Fourn.

Zhang et al. (2017a) showed that this genus as distinct phylogenetic lineage in *Diaporthomycetidae*. Thus, *Atractosporales* and *Atractosporaceae* were introduced to accommodate the genus.

***Australosphaerella*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Balladynaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Balladyna* Racib., *Balladynocallia* Bat. and

*Balladynopsis* Theiss. & Syd. based on their parasitic lifestyle on living leaves.

***Banhegyia*** L. Zeller & Tóth

Ekanayaka et al. (2017) accepted this genus as in *Patellariaceae*.

***Barbatosphaeriaceae*** H. Zhang et al.

Zhang et al. (2017a) introduced this family to accommodate *Barbatosphaeria* Réblová, *Ceratostomella* Sacc. and *Xylomelasma* Réblová.

***Barlaea*** Sacc.

Ekanayaka et al. (pers com) accepted this genus as in *Pyronemataceae*.

***Barrmaeliaceae*** Voglmayr & Jaklitsch

Voglmayr et al. (2018) introduced this new family in *Xylariales* to accommodate *Barrmaelia* Rappaz. and *Entosordaria* (Sacc.) Höhn.

***Biatriosporaceae*** K.D. Hyde

Tibpromma et al. (2017) accepted this family in *Pleosporales*.

***Biciliopsis*** Diederich

Hyde et al. (2017b) re-visited and illustrated the type species of the genus. Further they concluded that it belongs in *Sordariomycetes incertae sedis*.

***Botryosphaeriaceae*** Theiss. & H. Syd.

Liu et al. (2017) treated *Pseudofusicoccumaceae* and *Endomelanconiopsisaceae* as synonyms of *Botryosphaeriaceae*. However, no formal synonymies were proposed and these two families must be regarded as valid.

***Brunswicksiella*** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Brycekendrickomyces*** Crous & M.J. Wingf.

Wijayawardene et al. (2017a) erroneously stated as the genus belongs in *Trichomeriaceae*.

***Bryochiton*** Döbbeler & Poelt

Hyde et al. (2017b) treated this genus as in *Teratosphaeriaceae*

***Bryomyces*** Döbbeler

See under *Pseudoperisporiaceae*.

***Calosphaeriales*** M.E. Barr

Hongsanan et al. (2017a) treated *Jobellisiales* M.J. D'souza & K.D. Hyde as a synonym of this order.

***Camptomeris*** Syd.

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Candida*** Berkhout

Wijayawardene et al. (2017a) stated that this genus belongs in *Candidaceae* S. Goldst. However, Index Fungorum (2017) listed this family as invalid.

***Carinispore*** K.D. Hyde

Hyde et al. (2017b) showed that this genus is belongs in *Pseudoastrophaeriellaceae*.

***Castellaniomyces*** Senan. et al.

Hyde et al. (2017b) introduced this genus and showed that it belongs in *Xylariales incertae sedis*.

***Catenulocercospora*** C. Nakash. et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Cenangiaceae*** Rehm

Ekanayaka et al. (2017) erroneously treated this family as a synonym of *Hemiphacidiaceae* Korf. However, Jaklitsch et al. (2016a) and Pärtel et al. (2017) and Wijayawardene et al. (2017a, b) accepted *Cenangiaceae* over *Hemiphacidiaceae*.

***Ceratosperma*** Speg.

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Cercoramularia*** Videira et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Cercosperma*** G. Arnaud ex B. Sutton & Hodges

Videira et al. (2017) tentatively accepted this genus as in *Mycosphaerellaceae*.

***Cercosphaerella*** Kleb.

Videira et al. (2017) provisionally accepted this genus as in *Mycosphaerellaceae*.

***Chuppomyces*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Claro hilum*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Clavicipitaceae*** (Lindau) Earle ex Rogerson

Hongsanan et al. (2017a) treated *Flammocladiellaceae* Crous et al. as a synonym of *Clavicipitaceae*.

***Cleistosphaeraceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Cleistosphaera* Syd. & P. Syd. which was previously treated as *Perisporiopsidaceae*.

***Cocciscia*** Norman

Hyde et al. (2017b) treated this genus as in *Verrucariaceae*.

***Coccoidella*** Höhn.

Boonmee et al. (2017) comprehensive background of the genus with illustration of the type species

***Collarispora*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Coniochaetales*** Huhndorf et al.

Hongsanan et al. (2017a) treated *Cordanales* M. Hern.-Rest. & Crous as a synonym of *Coniochaetales*.

***Conlarium*** F. Liu & L. Cai

Zhang et al. (2017a) introduced *Conlariaceae* (in *Atractosporales*) to accommodate the genus.

***Coremiopassalora*** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Corinectria*** C. González & P. Chaverri

González and Chaverri (2017) introduced this genus to accommodate *Neonectria fuckeliana* in *Nectriaceae*.

***Coronophorales*** Nannf.

Hongsanan et al. (2017a) treated *Melanosporales* N. Zhang & M. Blackw. as a synonym of *Coronophorales*

***Coryneaceae*** Corda

Senanayake et al. (2017a, b) treated *Pseudovalsaceae* M.E. Barr as a synonym of *Coryneaceae*.

***Coryneliomycetidae*** A.R. Wood et al.

Wood et al. (2016) introduced this subclass in *Eurotiomycetes*.

***Cucurbitariaceae*** G. Winter

Wanasinghe et al. (2017d) treated *Fenestellaceae* as a synonym of *Cucurbitariaceae*.

***Cytosporaceae*** Fr.

Senanayake et al. (2017a, b) treated *Valsaceae* Tul. & C. Tul. as a synonym of *Cytosporaceae* Fr.

***Cytostagonospora*** Bubák

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Deightonomyces*** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Delonicicola*** R.H. Perera et al.

Perera et al. (2017) introduced this genus, which was found associated with *Delonix regia* seed pods. The genus showed distinct phylogenetic lineage in *Xylariomycetidae*, thus *Delonicicolales* and *Delonicicolaceae* were introduced.

***Delonicicolales*** R.H. Perera et al.See under *Delonicicola* R.H. Perera et al.***Delonicicolaceae*** R.H. Perera et al.See under *Delonicicola* R.H. Perera et al.***Dendroseptoria*** Alcalde

Koukol et al. (2017) showed that this genus has closer relationship with *Cyanodermella* (*Stictidaceae*, *Ostropales*, *Lecanoromycetes*). Thus, we placed the genus in *Stictidaceae*.

***Devonomyces*** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Diaporthales*** Nannf.

Senanayake et al. (2017a, b) revised the order and introduced several new families viz. *Apiosporopsidaceae*, *Apharknessiaceae*, *Asterosporiaceae*, *Auratiopycnidielaceae*, *Erythrogloeaceae*, *Melanconiellaceae* and *Prosopidicolaceae*.

***Dictyospora*** Brahamanage et al.

Brahmanage et al. (2017) introduced this genus with hyphomycetous asexual morph. DNA sequence analyses showed that it belongs in *Tubeufiaceae*.

***Dimeriella*** Speg.

Boonmee et al. (2017) transferred this genus to *Venturiaceae*.

***Dimerium*** (Sacc. & P. Syd.) McAlpine

Boonmee et al. (2017) reinstated the family *Dimeriaceae* to accommodate this genus.

***Distocercosporaster*** Videira et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Distomycovellosiella*** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Dothiorella*** Sacc.

Yang et al. (2017) treated *Spencermartinsia* as a synonym of *Dothiorella*.

***Dysrhynchisceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Dysrhynchis* Clem.

***Endoxylina*** Romell

Hyde et al. (2017b) treated this genus as in *Diatrypaceae*.

***Episphaerella*** Petr.

Boonmee et al. (2017) transferred this genus to *Mycosphaerellaceae* based on its morphology.

***Eremothecium*** Borzi emend. Kurtzman

Wijayawardene et al. (2017a) treated this genus as in *Saccharomycetaceae*.

***Euantennariaceae*** Hughes & Corlett

Liu et al. (2017) treated this family as a member in *Capnodiales*.

***Eumela*** Syd.

Boonmee et al. (2017) re-visited the genus and accepted as a genus in *Dothideomycetes* genera *incertae sedis*.

***Exopassalora*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Phaeothecoidiellaceae*.

***Exutisphaerella*** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Fasciatispora*** K.D. Hyde

Daranagama et al. (2018) placed this genus in *Amphisphaerales* genera *incertae sedis*

***Foliophoma*** Crous

Crous and Groenewald (2017) introduced this coelomycetous genus. Wanasinghe et al. (2017a) showed that it belongs in *Pleosporales*.

***Fulvia*** Cif.

Videira et al. (2017) reinstated this genus and accepted as in *Mycosphaerellaceae*.

***Fuscostagonosporaceae*** Jayasiri et al.

Hyde et al. (2017b) introduced this family to place *Fuscostagonospora* Kaz. Tanaka & K. Hiray.

***Fusiconidium*** J.F. Li et al.

Li et al. (2017a) introduced this genus which accommodated in *Melanommataceae*

***Fusoidispora*** D. Vijaykrishna et al.

Zhang et al. (2017a) excluded the genus from *Annulatasaceae* and placed this genus in *Diaportheomycetidae* genera *incertae sedis*.

***Genabea*** Tul. & C. Tul.

Ekanayaka et al. (pers com) accepted this genus as in *Pyronemataceae*.

***Graminopassalora*** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Graphostromataceae*** M.E. Barr et al.

Hongsanan et al. (2017a) and Wendt et al. (2018) accepted *Graphostromataceae* as a distinct family in *Xylariales*.

***Haematomyxa*** Sacc.

Ekanayaka et al. (2017) accepted this genus as in *Patellariaceae*.

***Halodiatripe*** Dayarathne & K.D. Hyde

Dayarathne et al. (2016) introduced this genus and confirmed its placement in *Diatrypaceae*.

***Halokirschsteiniothelia*** Boonmee & K.D. Hyde

Ekanayaka et al. (2017) transferred this genus to *Mytilinidiaceae*.

***Helminthosporium*** Link

Voglmayr and Jaklitsch (2017) treated *Exosporium* Link as a synonym of *Helminthosporium* Link. Further, Voglmayr and Jaklitsch (2017) accepted *Helminthosporium* has massarina- or splanchnonema-like sexual morphs and placed in *Massarinaceae*.

***Hemiascosporium*** L.R. Batra

Ekanayaka et al. (pers com) accepted this genus as in *Ascodesmidaceae*.

***Henningsiella*** Rehm

Phookamsak et al. (2016) transferred this genus to *Saccardiaceae*.

***Hyalomeliolinaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Hyalomeliolina* F. Stevens

***Hyalocercosporidium*** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Hyalozasmidium*** U. Braun

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Hypoxylaceae*** DC.

Daranagama et al. (2018) revisited the family and the list of genera in this study is based on their study.

***Hypoxyylon*** Bull.

Based on mega blast researches, *Camporesia* W.J. Li & K.D. Hyde is treated as a synonym of *Hypoxyylon* (personal communication with M. Stadler)

***Hysteropatella*** Rehm

Ekanayaka et al. (2017) accepted this genus as in *Patellariaceae*.

***Immotthia*** M.E. Barr

Hyde et al. (2017b) treated this genus as in *Roussellaceae*.

***Inocyclus*** Theiss. & Syd.

Boonmee et al. (2017) transferred this genus to *Parmulariaceae* based on morphology

***Ionomidotis*** E.J. Durand ex Thaxt.

Ekanayaka et al. (2017) accepted *Ionomidotis* as genus a genus in *Cordieritidaceae*.

***Kalmusibambusa*** Phook. et al.

Thambugala et al. (2017) introduced this genus and confirmed its placement in *Didymosphaeriaceae* based on phylogenetic analyses.

***Keratosphaera*** H.P. Upadhyay

Boonmee et al. (2017) treated this genus as doubtful.

***Koorchalomella*** Chona et al.

Hyde et al. (2017b) introduced *Koorchalomella salmonispora* Abdel-Aziz and Abdel-Wahab and showed that it belongs in *Stachybotriaceae*.

***Lahmiomyces*** Cif. & Tomas.

Ekanayaka et al. (2017) accepted this genus as in *Patellariaceae*.

***Lentomitellaceae*** H. Zhang et al.

Zhang et al. (2017a) introduced this family to accommodate *Lentomitella* Höhn. and placed it in *Diaporthomycetidae* families *incertae sedis*

***Leptomeliola*** Höhn.

Boonmee et al. (2017) treated this genus as *Dothideomycetes incertae sedis*.

***Leptosporella*** Penz. & Sacc.

Konta et al. (2017) showed that this genus has distinct phylogenetic lineage in *Chaetosphaeriales* thus, new family, *Leptosporellaceae* was introduced.

***Leveillina*** Theiss. & Syd.

Boonmee et al. (2017) treated this genus as a member in *Dothideomycetes*.

***Libertasomycetaceae*** Crous

Crous and Groenewald (2017) introduced this family to accommodate *Libertasomyces*.

***Licopolia*** Sacc. et al.

Hyde et al. (2017b) treated this genus as in *Vizellaceae*.

***Linocarpaceae*** Konta & K.D. Hyde

Konta et al. (2017) showed that *Linocarpon* Syd. & P. Syd. and *Neolinocarpon* K.D. Hyde have distinct phylogenetic lineages in *Chaetosphaeriales*. Thus, the new family, *Linocarpaceae* was introduced to accommodate both genera.

***Linopeltis*** I. Hino & Katum.

Phookamsak et al. (2016) transferred this genus to *Dothideomycetes* genera *incertae sedis* based on morphology.

***Lizoniaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Lizonia* (Ces. & De Not.) De Not.

***Lojkania*** Rehm

Phookamsak and Hyde (2015) excluded the genus from *Fenestellaceae* and placed in *Testudinaceae*.

***Longitudinalis*** Tibpromma & K.D. Hyde

Hyde et al. (2017b) introduced this genus and showed that it belongs in *Plectosphaerellaceae*.

***Madagascaromyces*** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Mamianiella*** Höhn.

Senanayake et al. (2017a, b) treated *Anisogramma* Theiss. & Syd. and *Mamiania* Ces & De Not. as synonyms of *Mamianiella*.

***Marsupiomycetes*** Senan. & K.D. Hyde

Senanayake et al. (2017a, b) introduced this genus and showed that it belongs in *Gnomoniaceae*.

***Melanocarpus*** Arx

Wang et al. (2016) treated this genus as in *Chaetomiaceae*.

***Melaspileaceae*** W. Watson

Lücking et al. (2017) treated *Melaspileaceae* over *Eremithallaceae*. However, Ekanayaka et al. (2017) accepted *Eremithallaceae* over *Melaspileaceae* erroneously. In here we follow Lücking et al. (2017).

***Micronematomyces*** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Micropeltidaceae*** Clem. & Shear

Hongsanan and Hyde (2017) excluded the family from *Microthyriales* and placed in *Lecanoromycetes*.

***Mniaecia*** Boud.

Wijayawardene et al. (2017a) treated this genus as in *Helotiaceae*. However, Jaklitsch et al. (2016a) accepted *Mniaecia* as in *Phacidiales*. In here we follow Jaklitsch et al. (2016a).

***Montagnula*** Berl.

Wanasinghe et al. (2016) treated *Munkovalsaria* Aptroot as a synonym of *Montagnula*.

***Muripulchra*** Z.L. Luo et al.

Luo et al. (2017) introduced this hyphomycetous genus and showed that it belongs in *Tubeufiaceae*.

***Muritestudina*** Wan. et al.

Wanasinghe et al. (2017c) introduced this saprobic genus which can be accommodated in *Testudinaceae*.

***Mycocaliciaceae*** A.F.W. Schmidt

Ekanayaka et al. (2017) treated *Sphinctrinaceae* M. Choisy as a synonym of this family.

***Mycodiella*** Crous

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Myxophora*** Döbbeler & Poelt

Boonmee et al. (2017) transferred this genus to *Botryosphaeriaceae* based on its morphology.

***Neoaquastroma*** Wan. et al.

Wanasinghe et al. (2017b) introduced this genus which resides in *Parabambusicolaceae*.

***Nematotheciaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate three genera viz. *Nematothecium* Syd. & P. Syd., *Nematostigma* Syd. & P. Syd., and *Ophioparodia* Petr. & Cif.

***Neocamarosporiaceae*** Wan. et al.\*

Wanasinghe et al. (2017a) introduced this family to accommodate *Neocamarosporium* Crous & M.J. Wingf.

***Neocercosporidium*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Neocoleroa*** Petr.

Boonmee et al. (2017) transferred this genus to *Venturiaceae*.

***Neohelicomyces*** Z.L. Luo et al.

Luo et al. (2017) introduced this hyphomycetous genus and showed that it belongs in *Tubeufiaceae*.

***Neoparodiaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Neoparodia* Petr. & Cif.

***Neophloeospora*** U. Braun et al.

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

***Neophyllachora*** Dayarathne & K.D. Hyde

Dayarathne et al. (2017) introduced this genus with Spermatial or conidial stage. Phylogenetic analyses showed that it belongs in *Phyllachoraceae*.

***Neoramichloridium*** Phook. et al.

Thambugala et al. (2017) introduced this hyphomycetous genus and confirmed its placement in *Mycosphaerellaceae* based on phylogenetic analyses.

***Neotubeufia*** Chaiwan et al.

Chaiwan et al. (2017) introduced this genus which morphologically resembles *Tubeufia*. In their phylogenetic analyses, *Neotubeufia* can be accommodated in *Tubeufiaceae*.

***Novomicrothelia*** Aptroot et al.

Zhang et al. (2017b) introduced new non-lichenized species *viz.* *N. pandanicola* and confirmed its placement in Trypetheliaceae.

**Nothopassalora** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Nothopericoniella** Videira & Crous

Videira et al. (2017) and showed that it belongs in Mycosphaerellaceae.

**Nothophaeocryptopus** Videira et al.

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Opegrapha** Ach.

Boonmee et al. (2017) re-visited the genus and provided current status. *Kalaallia* Alstrup & D. Hawksw. was treated as a synonym of *Opegrapha*.

**Ophiobolopsis** Phook. et al.

Phookamsak et al. (2017) introduced this monotypic genus to accommodate ophiobolus-like species in Phaeosphaeriaceae based on morphological and phylogenetic distinctiveness.

**Orthobellus** Silva & Cavalc.

Phookamsak et al. (2016) treated this genus as in *Dothideomycetes* genera *incertae sedis* based on morphology.

**Otideaceae** Eckblad

Ekanayaka et al. (pers com) resurrected the family and accepted eight genera *viz.* *Acervus*, *Arpinia*, *Ascosparsassis*, *Monascella*, *Otidea*, *Wenyingia*, *Diehlomyces* and *Warcupia*.

**Pantospora** Cif.

Videira et al. (2017) accepted this genus as in Mycosphaerellaceae.

**Pachyramichloridium** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Paracercosporidium** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Paramycovellosiella** Videira et al.

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Paraophiobolus** Phook. et al.

Phookamsak et al. (2017) introduced this genus to accommodate ophiobolus-like taxa in Phaeosphaeriaceae

that the genus formed a distinct lineage from *Ophiobolus sensu stricto*.

**Parapallidocercospora** Videira et al.

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Perisporiopsidaceae** E. Müll. & Arx ex R. Kirschner & T.A. Hofm.

Boonmee et al. (2017) accepted only *Chevalieropsis*, *Parodiellina* and *Perisporiopsis* as the members in this family.

**Peyronelia** Cif. & Gonz. Frag.

Ekanayaka et al. (2017) accepted this genus as in Mytilinidiaceae.

**Phaeoappendicospora** Senan. et al.

Senanayake et al. (2017a, b) introduced this genus and showed that belongs in Diaporthales.

**Phaeodimeriellaceae** Boonmee et al.

Boonmee et al. (2017) introduced this family to accommodate *Phaeodimeriella* Speg.

**Phaeopoacea** Thambug. et al.

Thambugala et al. (2017) introduced this genus with coelomycetous asexual morph and phylogenetic analyses showed its placement in Phaeosphaeriaceae.

**Phaeostigme** Syd. & P. Syd.

Boonmee et al. (2017) provided the current status of the genus and accepted as a genus in *Dothideomycetes* genera *incertae sedis*.

**Phaeothecoidiellaceae** K.D. Hyde & Hongsanan

Hongsanan et al. (2017b) introduced this family based on the genus *Phaeothecoidiella* Batzer & Crous.

**Phragmeriella** Hansf.

Boonmee et al. (2017) transferred this genus to *Sordariomycetes* *incertae sedis* based on its unitunicate ascii.

**Pilgeriella** Henn.

Boonmee et al. (2017) transferred this genus to *Botryosphaeriaceae* based on its morphology.

**Pleostigma** Kirschst.

Wijayawardene et al. (2017a) erroneously stated as the genus belongs in *Dothideomycetes*. Boonmee et al. (2017) accepted this genus as in *Chaetothyriales* genera, *incertae sedis*.

**Pluripassalora** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in Mycosphaerellaceae.

**Pleopassalora** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

**Pleuropassalora** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

**Pleurotremataceae** Walt. Watson

Norphanphoun et al. (2017) treated *Dyfrolomycetaceae* as a synonym of this family. Further, they showed that *Pleurotremataceae* can be accommodated in *Dothideomycetes* and accepted *Dyfrolomyces* K.D. Hyde et al., *Melomastia* Nitschke ex Sacc. and *Pleurotrema* Müll. Arg. as members of the family.

**Pododimeriaceae** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Chaetoscutula* E. Müll. and *Pododimeria* E. Müll.

**Polyclypeolinaceae** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Polyclypeolina* Bat. & I.H. Lima.

**Polystigmataceae** Höhn. ex Nannf.

Dayarathne et al. (2017) resurrected this family which comprises only one genus i.e. *Polystigma* DC. and accepted its placement in *Xylariales*.

**Pseudoannulatasca** Z.L. Luo et al.

Zhang et al. (2017a) excluded the genus from *Annulatascae* and placed this genus in *Diaportheomycetidae* genera *incertae sedis*.

**Pseudocoleodictyosporaceae** Doilom & K.D. Hyde

Doilom et al. (2017) introduced this family to accommodate new genera, *Pseudocoleodictyospora* Doilom & K.D. Hyde and *Subglobosporium* Doilom & K.D. Hyde.

**Pseudopericoniella** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

**Pseudoophiobolus** Phook. et al.

Phookamsak et al. (2017) introduced this genus to accommodate ophiobolus-like taxa in *Phaeosphaeriaceae* that the genus formed a distinct lineage from *Ophiobolus sensu stricto* and is closely related with *Nodulosphaeria*.

**Pseudoperisporiaceae** Toro

Boonmee et al. (2017) re-visited the family and accepted *Eudimeriolum* Speg., *Lasiostemma* Theiss. and *Nematostoma* Syd. & P. Syd. as the members of the family. Hyde et al. (2017b) accepted *Bryomyces* Döbbeler as the fourth genus of the family.

**Pseudophaeophleospora** C. Nakash. et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

**Pseudoproboscisporaceae** H. Zhang et al.

Zhang et al. (2017a) introduced *Pseudoproboscisporaceae* (in *Atractosporales*) to accommodate *Diluvicola* K.D. Hyde et al. and *Pseudoproboscispora* Punith.

**Pseudozasmidium** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

**Purpurepithecium** Jayasiri & K.D. Hyde

Jayasiri et al. (2017) introduced this genus with hyphomycetous asexual morph. Phylogenetic analyses showed that the genus belongs in *Gloniaceae*.

**Querciphoma** Crous

Crous and Groenewald (2017) introduced this genus and showed that it belongs in *Leptosphaeriaceae*.

**Raciborskiomyces** Siemaszko

Boonmee et al. (2017) treated this genus as doubtful.

**Ragnhildiana** Solheim

Videira et al. (2017) reinstated this genus and accepted as in *Mycosphaerellaceae*.

**Rhachisphaerella** U. Braun et al.

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

**Rimula** Velen.

Ekanayaka et al. (2017) accepted this genus as in *Patellariaceae*.

**Rosisphaerella** Videira & Crous

The genus was introduced by Videira et al. (2017) and showed that it belongs in *Mycosphaerellaceae*.

**Roussellaceae** J.K. Liu et al.

Tibpromma et al. (2017) accepted this family as a well resolved family in *Pleosporales*.

**Schizothyriaceae** Höhn. ex Trotter et al.

Phookamsak et al. (2016) mentioned that the placement of *Kerniomycetes* Toro, *Metathyriella* Syd., and *Myriangiella* Zimm. is doubtful. However, we provisionally place them in *Schizothyriaceae* pending future studies.

**Scolionema** Theiss. & Syd.

Boonmee et al. (2017) treated this genus as *Dothideomycetes* genus *incertae sedis*.

**Semifissispora** H.J. Swart

Boonmee et al. (2017) re-visited the genus and accepted as a member in *Massarinaceae*.

**Septorioides** Quaedvl. et al.

Crous et al. (2016), in their phylogeny, regarded *Septoriooides* as a genus in *Saccharataceae* and not as a family. However, formal synonymy was not proposed and therefore *Septorioideaceae* must be regarded as a valid family.

***Sepultaria*** (Cooke) P. Karst.

Ekanayaka et al. (pers com) accepted this genus as in *Pyronemataceae*.

***Seynesia*** Sacc.

Daranagama et al. (2018) placed this genus in *Amphisphaeriales* genera *incertae sedis*

***Sirosporium*** Bubák & Serebrian.

Videira et al. (2017) tentatively placed this genus in *Mycosphaerellaceae*.

***Sordariomycetidae*** O.E. Erikss & Winka

Hongsanan et al. (2017a) treated *Meliolomycetidae* P.M. Kirk & K.D. Hyde as a synonym of *Sordariomycetidae*.

***Sphaeronaemella* s. lato**

Senanayake et al. (2017a, b) accepted *Sphaeronaemella fragariae* belongs in *Melanconiellaceae*.

***Sporidesmajora*** Batzer & Crous

Videira et al. (2017) accepted this genus as in *Phaeothecoidiellaceae*.

***Sporocadaceae*** Corda

Jaklitsch et al. (2016b) treated *Bartaliniaceae*, *Discositaceae*, *Pestalotiopsidaceae* and *Robillardaceae* as synonyms of *Sporocadaceae*.

***Staurosphaeria*** Rabenh.

Wanasinghe et al. (2017a) showed that this genus belongs in *Coniothyriaceae*.

***Stomatogeneceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Stomatogene* Theiss.

***Strumella*** Fr.

Ekanayaka et al. (pers com) accepted this genus as in *Sarcosomataceae*.

***Sultanomyces*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Sydiowiellaceae*** Lar.N. Vassiljeva

Senanayake et al. (2017a, b) re-visited the family and provided a comprehensive morpho-molecular background. Furthermore, Senanayake et al. (2017a, b) introduced six new genera based on morphology and phylogeny viz. *Italiomyces*, *Ranulospora*, *Tenuiappendicula*, *Alborbis*, *Breviappendix*, and *Paragnomonia*.

***Taeniolaella*** S. Hughes

Ekanayaka et al. (2017) transferred this genus to *Mytilinidiaceae*.

***Testudinaceae*** Arx

Wanasinghe et al. (2017c) confirmed the placements of *Angustospora* Abdel-Aziz, *Lepidosphaeria* Parg.-Leduc, *Muritestudina* Wanash. et al., *Neotestudina* Segretain & Destombes and *Ulospora* D. Hawksw. et al. in *Testudinaceae* based on phylogenetic analyses.

***Toroaceae*** Boonmee & K.D. Hyde

Boonmee et al. (2017) introduced this family to accommodate *Toroa* Syd.

***Tubeufiales*** Boonmee & K.D. Hyde

Liu et al. (2017) treated *Bezerrromycetales* and *Wiesneriomycetales* as synonyms of *Tubeufiales*.

***Uleomyces*** P. Henn.

Boonmee et al. (2017) transferred this genus in *Myriangiaeae* based on its morphology.

***Virosphaerella*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Woswasiaceae*** H. Zhang et al.

Zhang et al. (2017a) introduced this family to accommodate *Cyanoannulus* Raja et al., *Woswasia* Jaklitsch et al. and *Xylochrysis* Réblová et al.

***Xenosonderhenia*** Crous

Videira et al. (2017) accepted this genus as in *Mycosphaerellaceae*.

***Xenosonderhenioides*** Videira & Crous

Videira et al. (2017) introduced this genus and showed that it belongs in *Mycosphaerellaceae*.

***Xylariaceae*** Tul. & C. Tul.

Hongsanan et al. (2017a) treated *Clypeosphaeriaceae* G. Winter as a synonym of *Xylariaceae*.

***Yunnanensis*** Karun. et al.

Karunaratna et al. (2017) introduced this genus which resided in *Phaeosphaeriaceae*.

***Zalaria*** Visagie et al.

Humphries et al. (2017) introduced this genus and new family *Zaliaceae* in *Dothideales*.

***Zasmidium*** Fr.

Videira et al. (2017) *Periconiella* Sacc., *Biharia* Thirum. & Mishra, *Stenellopsis* B. Huguenin, *Verrucisporota* D.E. Shaw & Alcorn and *Verrucispora* D.E. Shaw & Alcorn as synonyms of this genus

**Zygosporium** Mont.

Li et al. (2017b) showed that this genus had distinct phylogenetic lineage in *Xylariales*, thus introduced *Zygosporiaceae*.

**Acknowledgements** We would like to thank Alan J.L. Phillips, Dinushani A. Daranagama, Dhnushka Wanasinghe, Indunil C. Senanayake, Paul M. Kirk, Saranyaphat Boonmee and Singang Hongsanan for their comments and suggestions. Kevin D. Hyde would like to thank the Thailand Research Funds entitled Biodiversity, phylogeny and role of fungal endophytes on above parts of *Rhizophora apiculata* and *Nypa fruticans* (Grant No.: RSA5980068), The future of specialist fungi in a changing climate: baseline data for generalist and specialist fungi associated with ants, Rhododendron species and Dracaena species (Grant No.: DBG6080013), Impact of climate change on fungal diversity and biogeography in the Greater Mekong Subregion (Grant No.: RDG6130001) and Mae Fah Luang University for a grant “Diseases of mangrove trees and maintenance of good forestry practice” (Grant No.: 60201000201), Taxonomy diversity, Phylogeny and Evolution of fungi in Capnodiales (Grant No.: 666713), and the Chinese Academy of Sciences, Project Number 2013T2S0030, for the award of Visiting Professorship for Senior International Scientists at Kunming Institute of Botany. Rungtiwa Phookamsak thanks to the CAS President’s International Fellowship for Postdoctoral Researchers (Project No. 2017PB0072), the Research Fund from China Postdoctoral Science Foundation (Grant No. Y71B283261) and Chiang Mai University for financial support.
