

Benefit from SIPStation, Sangoma's SIP Trunking Service

Feature-rich Telephony Services

SIPStation is Sangoma's SIP Trunking service providing Canadian and USA Small-to-Medium businesses (SMBs) and large enterprises with feature-rich telephony services using a standard internet connection.

Aside from guaranteed cost savings over traditional telecom providers, SIPStation SIP trunks also allow you to:

- ◉ Month-to-month service with no obligation or save even more money with our service plans
- ◉ Send and receive faxes using our integrated FAXStation solution for high latency business critical environments
- ◉ Port your own phone numbers to us
- ◉ Choose your own phone numbers and represent your business nationally from outside your office location
- ◉ Create High Volume SIP trunks that are FAX and SMS compatible
- ◉ Share your voice services across multiple locations, reducing monthly costs

Cost Savings

Instant cost savings when switching from your traditional telephony provider to SIPStation.

Inbound Numbers & Porting

Add as many Inbound numbers as you need. You can also port your existing telephone numbers.

Business Continuity

Remote Call Forwarding automatically directs calls to mobile phones or other locations in the event of a service outage.

International Calling, T.38 Faxing & SMS

SIPStation phone lines come ready with enhanced features, all managed through your SIPStation Store account.

Integrated with Switchvox Prem, FreePBX & PBXact

Sign-up process is simple, just plug in the keycode to auto-configure your Sangoma PBX.

Integrated Fax Services

IP based faxing that allows you to send and receive faxes from a web interface or from your local fax machine with incredible reliability.
