WESTERN STATES DECKING WILL DO ALL WITHIN OUR POWER TO LIMIT SCRATCHES. THIS IS NOT A REASON FOR REJECTION IF MATERIAL GETS TO JOB SITE WITH SCRATCHES.

Western States Decking, Inc. does not provide any warranties, expres or implied on Bonderized & Rezibond Roofing or flat Stock. Material may develop white rust/oxidization after installation.

7. Oil - Canning - Flat metal surfaces will display waviness commonly referred to as 'oil-canning'. This is caused by steel mill tolerances, variations in the substrate and roofing underlayments. Oil canning is characteristic, not a defect, of panels manufactured from light-gauge metal. Panels are factory "corrective-levelled" to minimize oil canning. Oil canning is not a cause for panel rejection. Stirations and stiffen ribs will minimize oil canning.

8. Western States Decking, Inc. does not provide any warranties express or implied on "Secondary Material". This material is "SOLD AS IS". No Warrant or Merchantability or fitness for any particular End-Use is implied. The material grade of the steel cannot be confirmed therefore all LOAD CALCULATIONS AND LOAD TABLES DO NOT APPLY.
