

Curriculum Vitae of Andrea Morichetta

Personal information

Surname(s) / First name(s)

Andrea Morichetta

Address(es)

o

Telephone(s)

Email(s)

Nationality(-ies)

Date of birth

Gender

Current position

PostDoctoral Research Fellow in the School of Science and Technology, University of Camerino.

Education

February 2013 – February 2016

Ph.D. in Computer Decision and Systems Science, in the System Modelling and Analysis Group, IMT-Institute for Advanced Studies, Lucca, Italy.

Admitted with full scholarship.

Thesis title: "A Formal Approach to Decision Support on Mobile Cloud Computing Applications".

Final dissertation: 13/7/2016.

Advisor: Rocco De Nicola, Co-Advisor: Francesco Tiezzi.

November 2014 - April 2015

Visiting Professor Kim G. Larsen

The research activity was focused on the definition of a new verification techniques used for decision support in Mobile Cloud Computing Systems. The decision support was based on exploiting a series of techniques from the real-time model checker UPPAAL. The main result for finding an infinite scheduling strategy to be used for the decision support, was obtained using a so-called cost/horizon method. Other approaches was developed using the statistical model checker and a new verification extension called STRATEGO devoted to solve optimization problems.

March 2011 - June 2011

Erasmus Period, University of Iceland

The research activity focused on implementing and testing a machine learning method such as Gaussian Mixture Models in the Speaker recognition field.

2009-2011

Master's Degree in Computer Science, Università di Camerino, Italy

Final dissertation on "Run-Time fault forecast for evolving software systems".

Supervised by Professor Andrea Polini

110/110 cum laude

2006-2009

Bachelor's Degree in Computer Science, Università di Camerino, Italy

Thesis title: "Progetto ed implementazione dell'interfaccia Web di Tourist in Palm".

Supervised by Professor Andrea Polini

107/110

Professional experiences

January 2017 - Now

PostDoctoral Researcher in the School of Science and Technology, University of Camerino. The research activity is focused on "Business Process modeling, analysis and implementation".

April 2016 - December 2016

Research Fellow in the School of Science and Technology, University of Camerino. The research activity is focused on "Mobile Cloud Computing Solutions for Learning".

March 2012- February 2013

Research Fellow in the Software Engineering group at the I.S.T.I. "A. Faedo" CNR Pisa, Italy.

The research activity funded by the EU project CHOReOS, focused on the development of monitoring techniques for service oriented architectures. The main work consisted on developing a monitoring framework able to validate the run-time behavior of dynamic distributed systems relying on the adequacy of established criteria.

Teaching Experience

2016/2017

Contract Professor Course of Business Process Digitalization and Cloud Computing (University of Camerino, Computer Science Division)

November 2016 - January 2017

Lectures - Course of Informatica (Liceo Scientifico A. Gentili San Ginesio)

February 2016 - June 2016

Lectures - Course of Informatica (Liceo Scientifico A. Gentili San Ginesio)

June/July 2015

External examiner in the high school final exam

Research activity

Research Interest

Morichetta's research interest focuses on Mobile Cloud Computing (MCC) and in applying formal verification analysis for demanding applications that run on small mobile devices, as well as consumer electronic devices such as cell phones, tablets etc.. These platforms are limited in compute cycles, storage capacity, and battery energy, making this area a fun and challenging one in which to work.

Seminars and Talks

Morichetta has given several seminars at IMT Institute for Advanced Studies Lucca and he also given some talks titled:

- Specifying and Verifying SCEL programs with SPIN in the ASCENS Project (Modena, IT).
- Decision Support for Mobile Cloud Computing Applications via Model Checking in the IEEE Mobile Cloud Conference (San Francisco, US)
- A cost/reward method for optimal infinite scheduling in Mobile Cloud Computing in the FACS Conference (Rio de Janeiro, BR)
- Optimal Scheduling for Mobile Cloud Computing Applications via Model Checking in the CINA Project (Civitnova Marche, IT)

Personal skills and competences

Mother tongue(s)

Italian

Self-assessment
European level^(*)

Understanding		Speaking		Writing

^(*) Common European Framework of Reference (CEF) level

Social skills and competences	During the university period and working period Morichetta enhanced good social skills and competences derived by several working group and interactions with experts of other research fields.
Technical skills and competences	<p>Good knowledge of: Java and related technologies (Servlet, JSP, GWT, . . .); Web Services and related technologies (HTML, XML, XSD, DTD, SOAP, WSDL, WS-BPEL, BPMN, . . .); Mobile technologies (Android, FirefoxOS, . . .) Web Server (Axis, Tomcat, IIS, . . .) Programming languages HTML, CSS, DOT.NET, OSGI(Equinox), Drools, C, C++, SQL, PHP, Pascal, Matlab; Operative systems: Windows, Linux and Mac OS X Formal verification, Model checking, Mobile Cloud Computing DSL XText, MobiCa IC3</p> <p>Relevant courses completed: Complex system design, Distributed calculus, Logic, Home automation, SOA, Software Verification and Validation, Machine Learning, Concurrent and Distributed programming, Cloud Computing, Model checking, Modeling and verification reactive systems, Software engineering and service-oriented systems.</p>
