INTEGRATED MODE OF TEACHING & LEARNING

Our teaching-learning approach incorporates syndicate learning, case studies, regular assessments and immersion in real-life industry projects designed to deepen students knowledge in a particular area of interest and to expose them to the real world scenarios.

Workshops, Seminars, Guest Lectures, Industry Interface - At ARKA JAIN UNIVERSITY, workshops and seminars are conducted throughout the year. Experts from industry and academicians are invited to deliver lectures to our students. Students are also encouraged to organize seminars & give presentations to improve their technical and presentation skills. Eminent speakers from various walks of life including Industry, Academia, Private Sector, Public Sector, etc. visit our University and share their expertise & experience with our students.

Speaker Series - Speaker series is conducted every semester. The speakers involved are from private, public and educational sectors who educate via presentations on relevant topics related to Computer Science & Information Technology.

Projects / Mini-Projects - Mini projects and Projects are part of regular curricula of BCA / MCA programs at AJU. Students are exposed to all the latest technologies while developing Projects at our lab facilities in the University. Projects are mentored in various areas of technology related to fields of Computer Science & Information Technology. Based on the Students' area of interest projects are guided under mentorship of our Professors.

Coding Competition - Coding competition is an integral part of BCA/MCA programs and is regularly conducted in every semester. All the students are encouraged to participate in this competition which helps the students to test their skills in different domain areas, like coding, Data Science, Machine Learning, Artificial Intelligence, IoT, etc. One of the primary elements of this competition is RE-CODING. In this competition, program codes are given in a particular language and the participants are asked to re-code it in some other language.

Tech-Minds - Extracurricular activities lead to great passion and value which give students an opportunity to develop their skills. Different types of technology-based activities like quizzes, presentations, cultural events etc. are organized from time to time. Technical talks are also integrated part of this. The activity is planned with a purpose of letting everyone be aware of the importance of having a strong foundation in technical skills, which is mainly targeted when it comes to the industry, along with a perspective of testing each participant's knowledge about existing software and technical skills.
