

Survey structure

1. Introduction

1.1. Survey structure and methodology

1.2. Paper collection methodology

2. ML at the edge

2.1 Lighter and Faster Architectures

2.2 Distributed Inference

2.3 Model Compression

2.4 Distributed Training

3. ML-based Applications at the Edge

3.1 Computer Vision Applications

3.2 Automatic Speech Recognition

3.3 User Privacy

3.4 Fraud Detection

3.5 Creating New Datasets

3.6 Autonomous vehicles

3.7 Smart Homes and Cities

3.8 Edge AI for Human Safety

3.9 Augmented Cognition

4. ML Frameworks, Software, and Hardware

4.1 Frameworks and Software

4.2 Hardware

5. Challenges and Future Directions

6. Conclusion
