

ChatGPT Cheat Sheet

Introduction

AI is everywhere, and for a good reason: you, too, can use machine learning to automate and speed up various tasks with the right prompts.

Need help touching up your code? AI can help you out. Suffering from writer's block or needing a hand with SEO research? Ask AI to do the heavy lifting.

Start by creating an account with [OpenAI](#). Once you're logged in, simply start a new chat.

In order to get the most out of your prompts, remember to:

- Be specific
- Provide context
- Role-play
- Use quotation marks
- Give examples

You can also ask the AI to act as different tools or professions. For example, you can ask it to act as a copywriter, a web developer, or a domain name generator.

Branding

- How would you describe the target audience of [brand type], and what tone of voice would be most effective in reaching and engaging with this [target audience]?
- Can you create a [type of brand/business]'s voice that would convey [excitement/urgency/sensitivity etc.]?
- What are some common [keywords or phrases] associated with [brand type], and how can these be incorporated into this brand's tone of voice to strengthen the [brand identity]?

- What is our [type of brand/business] personality, and how do we want to come across to our [target audience]?
- What are the values and beliefs that [type of brand/business] represents, and how should they be reflected in our tone of voice?

Troubleshooting

The AI stopped replying mid-sentence. What should I do?

Simply ask the AI to continue writing or ask it to finish its answer.

What's the maximum amount of characters ChatGPT can use in its responses?

That depends on the version you're using:

GPT-3.5 has an input limit of 2048 characters

GPT-4 has an input limit of 4096 characters
