

RAMBLER TARPON represents a radical styling concept for American Motors Corporation, which unveiled the car for the winter auto show season. Overall length of the fastback is only 180 in., height 52.5 in. Special cast-aluminum wheels have knock-off hubcaps, and sports car theme is carried through the 4-passenger interior. Full instrumentation, walnut steering wheel rim, complete the ensemble.

TWO FOR SHOW

SATELLITE II convertible by Plymouth has a removable center section covered in black vinyl while the rest of the car is finished in gold. Bucket seats, both front and rear, are finished in leather and nylon while the interior is highlighted by hand-rubbed walnut appointments and steering wheel. The landau canopy is said to reduce wind buffeting for passengers when top is down.
