AVRROM **SPLASH** 3 LAYER WATER TANK

www.avrrom.com

Avrrom SPLASH 3 Layer Water Tank

Air Ventilation

This allows the water to maintain natural oxygen level, thus keeping it fresh

Heavy Threaded Lid

The lid is heavy and provides a tight fit, thus ensuring protection from dust particles, monkeys etc. Also this design prevents them from getting blown off by strong winds.

Food Grade Material

Food Grade Material: 100% Virgin Food Grade Plastic is used which ensures safety & hygiene of stored water.

Antimicrobial Inner Layer

Microban/ Antimicrobial technology against bacteria, virus, fungi, algae prevents contamination of water.

UV Stabilized

Unique heat reflective technology to enhance durability by avoiding any physical damage by sun rays and reducing overall heat absorption.

Strong Built

Designed in such a way that it helps to avoid any stress formations and adds strength, durability in the tank.

3 Layer Specifications

Layer 1

The outer white/coloured (Blue/Green/Orange/Granito) layer is aesthetically designed to match your exteriors. It is made from 100% pure raw material which makes it stronger and long lasting. It is U.V. stabilized thus, as a result it protects water from harsh UV rays and prevents heat absorption.

Layer 2

Sunlight is conducive for microbial activity in the water. The middle black layer is the protective layer which prevents harsh sun rays from penetrating into the tank thus acting as a barrier between the water and the light. As a result, it prevents any bacterial growth in the water.

Layer 3

This is the innermost layer which is in direct contact with the stored water. Thus, it is made from 100% food grade quality raw material. It is an odor free layer. Also, the white color of this layer ensures bottom visibility.

| Capacity (L) | Height | | Diameter | | Manhole Diameter | |
|-----------------|--------|----------|----------|----------|------------------|----------|
| | Mm | (Inches) | Mm | (Inches) | Mm | (Inches) |
| 500 | 925 | 37 | 825 | 33 | 362.5 | 14.5 |
| 750 | 1025 | 41 | 975 | 39 | 362.5 | 14.5 |
| 1000 | 1187.5 | 47.5 | 1025 | 41 | 362.5 | 14.5 |
| 1500 | 1550 | 62 | 1150 | 46 | 350 | 14 |
| 2000 | 1625 | 65 | 1325 | 53 | 387.5 | 15.5 |

- Aesthetic Looks: Available in

- Ideal for residential as well as commercial projects as it is available in multiple sizes which include 500L, 750L, 1000L, 1500L and 2000L.

AVRROM **PEARL** 4 LAYER WATER TANK

Avrrom PEARL

4 Layer Water Tank

Air Ventilation

This allows the water to maintain natural oxygen level, thus keeping it fresh

Heavy Threaded Lid

The lid is heavy and provides a tight fit, thus ensuring protection from dust particles, monkeys etc. Also this design prevents them from getting blown off by strong winds.

Food Grade Material

Food Grade Material: 100% Virgin Food Grade Plastic is used which ensures safety & hygiene of stored water.

Antimicrobial Inner Layer

Microban/ Antimicrobial technology against bacteria, virus, fungi, algae prevents contamination of water.

UV Stabilized

Unique heat reflective technology to enhance durability by avoiding any physical damage by sun rays and reducing overall heat absorption.

Strong Built

Designed in such a way that it helps to avoid any stress formations and adds strength, durability in the tank.

4 Layer Specifications

Layer 1

The outer white/coloured (Blue/Green/Orange/Granito) layer is aesthetically designed to match your exteriors. It is made from 100% pure raw material which makes it stronger and long lasting. It is U.V. stabilized thus, as a result it protects water from harsh UV rays and prevents heat absorption.

Layer 2

Sunlight is conducive for microbial activity in the water. The middle black layer is the protective layer which prevents harsh sun rays from penetrating into the tank thus acting as a barrier between the water and the light. As a result, it prevents any bacterial growth in the water.

Layer 3

This layer is made of foam which helps to maintain lower water temperature by preventing heating of water and further filtering the sunlight from entering the inner layer. It also provides structural support to the tank, increasing its strength.

Layer 4

This is the innermost layer which is in direct contact with the stored water. Thus, it is made from 100% food grade quality raw material. It is an odor free layer. Also, the white color of this layer ensures bottom visibility.

| Capacity (L) | Height | | Diameter | | Manhole Diameter | |

6 Layer Water Tank

Air Ventilation

This allows the water to maintain natural oxygen level, thus keeping it fresh

Heavy Threaded Lid

The lid is heavy and provides a tight fit, thus ensuring protection from dust particles, monkeys etc. Also this design prevents them from getting blown off by strong winds.

Food Grade Material

Food Grade Material: 100% Virgin Food Grade Plastic is used which ensures safety & hygiene of stored water.

Antimicrobial Inner Layer

Microban/ Antimicrobial technology against bacteria, virus, fungi, algae prevents contamination of water.

UV Stabilized

Unique heat reflective technology to enhance durability by avoiding any physical damage by sun rays and reducing overall heat absorption.

Strong Built

Designed in such a way that it helps to avoid any stress formations and adds strength, durability in the tank.

6 Layer Specifications

Layer 1 :- The outer white/coloured (Blue/Green/Orange/Granito) layer is aesthetically designed to match your exteriors. It is made from 100% pure raw material which makes it stronger and long lasting. It is U.V. stabilized thus, as a result it protects water from harsh UV rays and prevents heat absorption.

Layer 2 :- Sunlight is conducive for microbial activity in the water. The middle black layer is the protective layer which prevents harsh sun rays from penetrating into the tank thus acting as a barrier between the water and the light. As a result, it prevents any bacterial growth in the water.

Layer 3 :- This layer is made of foam which helps to maintain lower water temperature by preventing heating of water and further filtering the sunlight from entering the inner layer. It also provides structural support to the tank, increasing its strength.

Layer 4 :- This is an additional layer which provides strength to the tank, makes it more durable and at the same time creates an additional barrier between the external environment and the stored water, making it safe for human consumption.

Layer 5 :- This is the intermittent foam layer just like the layer 3 and keeps water resistant from external temperature variation even under extreme conditions thus helps to maintain water temperature in all weather conditions, be it winter or summer.

Layer 6 :- This is the innermost layer which is in direct contact with the stored water. Thus, it is made from 100% food grade quality raw material. It is an odor free layer. Also, the white color of this layer ensures bottom visibility.

| Capacity (L) | Height | | Diameter | | Manhole Diameter | |
