Distributors

Fast to produce and innovate on unique styles and patterns. It's easier to ship and store, but most importantly it gives your clients an attractive and cost-effective alternative to tile.

Contractors

The unique patterns and benefits of acrylic helps contractors differentiate themselves & win more jobs. They can complete 3-5x as many installs for the same labour cost as one tile job meaning a big boost on profit.

Homeowners

Even the most particular customers love the look and feel of acrylic once it's installed. Acrylic is one of the best products for preventing water damage, on top of the durability, lack of maintenance and lifetime warranty.

Acrylic surrounds are generally less expensive than tile walls. Generally one technician can install an acrylic bathwall system in 2-3 hours.
