FOREVER

GREEN

"WHAT DOES GREEN REALLY MEAN?"

Efficiency of operation? Using sustainable materials?  
At Bevolo Gas and Electric Lights, it means both.

**NATURAL GAS** is clean, abundant, reliable, efficient, safe, domestic, and is the cleanest burning fossil fuel. Bevolo's natural gas light fixtures feature the lowest burning gas tips on the planet, making them both environmentally-friendly, and money savers when it comes to fuel usage.

**SUSTAINABLE MATERIALS**  
Sustainability means existing for an indefinite period without damaging the environment or without depleting a

resource. Once installed, Bevolo lanterns will last a lifetime and beyond, negating repeated replacements and disposal of discards that would negatively impact the environment.

**HAND CRAFTSMANSHIP** Each Bevolo light is constructed entirely by hand, from the first cut of the copper sheeting to the final hammered rivet, making our impact on the environment negligible.

"With designs that will accommodate the latest bulb technologies and lifetime burners, not having to change a light bulb for 20 years or a gas burner for over 50 is truly remarkable.

Whether it's changing a light bulb or lighting a match, Bevolo's ease of operation, accessibility and structural design are legendary."

- Drew Bevolo
