GAS & ELECTRIC LIGHTS

[WWW.BEVOLO.COM](http://WWW.BEVOLO.COM)

## BEVOLO® HISTORY

Drew Bevolo, third generation owner of Bevolo® Gas & Electric Lights, is unlike most business owners. Sure, he can give you the facts and figures of last month's sales, what designs the company is currently working on and how many countries he has shipped to, but he can also hand-make a historical and beautiful piece of lighting artwork out of simple sheets of copper, thanks to the lessons he learned from the ground up and the advice from his uncle.

Bevolo® Gas & Electric Lights began in the French Quarter in 1945 when Andrew Bevolo, Sr. revolutionized the production of gas fixtures. Utilizing a hand riveting technique rather than making brittle soldered joints, he created sustainable gas lights. Bevolo Sr. honed his skills while working for historic manufacturing companies including Ford, Sikorsky, and Higgins. His master craftsmanship and artistic style paired up with the talents of renowned architect A. Hays Town to create what would become known as the French Quarter® lantern. Try taking a step through the old French Quarter without catching a glimpse of this now iconic copper fixture and you'll soon find that it simply can't be done.

Fast-forward over 75 years and you will see that this innovative company is still going strong, and continues producing each and every piece by hand. Perhaps this might have something to do with third generation owner Drew Bevolo's passion for the art form and his unique business education at the hands of his uncle. "I came down to New Orleans after having a successful stock broker career in Baton Rouge to help my uncle, the company's second generation owner, with the family business," says Bevolo. "The company was in a natural state of transition, as most of the old world artisans were becoming harder and harder to find in an increasingly high-tech world."

In order to reinvigorate the business, Bevolo soon found that hard work and a unique hands-on education was in order. "My uncle brought me on at \$100 a week," Bevolo recalls. "He insisted that I start at the bottom. I did everything from welding to delivery. He was hard on me, and it was the greatest gift he could have given me." It did not take long for the hard work to pay off, as the company was rejuvenated and Drew Bevolo slowly took over the reigns. "We now have over 40 employees, and, because my uncle gave me the gift of coppersmithing, I know I can talk to my employees about anything; any step of the process."

What started out as a job in the family business soon grew into a passion that Bevolo fully embraces today. "Now I can't help but look at every light I see. I continue to study," he says. "As the company grew, and as I grew with it, I knew that our success would depend on continuing that high quality that people expected from Bevolo® Gas & Electric Lights. People recognize it. They know we have the best product." Proof of that fact isn't hard to find. Bevolo® lanterns grace not only New Orleans' historic landmarks such as the The Cabildo, Jackson Square, and Brennan's Restaurant, they have also been sold to customers in all 50 states and 28 countries. This is one family business that has certainly branched out.

Where would one be without the other? A true original creation of the French Quarter®, Bevolo® Gas & Electric Lights has embraced the romantic and artistic flair that makes this destination like no other. "The French Quarter® lantern is a trademark of New Orleans," says Bevolo. "This is a company that was born and bred here, using local artists and craftspeople." Perhaps fueled by the flavor of a unique place, the flickering fantasy of the French Quarter® fixture casts a romantic glow on an art form that, thanks to the Bevolo family, will never be lost.

# BEVOLO® DESIGN SERVICE

There are so many questions that go into choosing the perfect lights for your home: What style goes with the architecture? How many lights should there be? Where do they go? Gas or electric? What is the proper scale? Don't be overwhelmed...we can help.

Bevolo® Gas & Electric Lights has a team of lighting designers with generations of experience. Every aspect of the home will be taken into account when we look at your project. We will narrow down your options from the hundreds of combinations in our line to help you make the best decision for your home.

## Here is how it works:

- Send us a copy of your elevation or a photo via email or mail.
- We will look at your project in its entirety and come up with a comprehensive plan for every light in the home.
- You will then receive photos, schematics, installation instructions and even utility locations if needed.

Bevolo® offers this complementary service to all of our clients because we take as much pride in designing the perfect lighting plan as we do in hand placing every rivet on your Bevolo® lanterns.

*Tradition*

# FRENCH QUARTER®

The Original French Quarter® lantern was designed by Andrew Bevolo, Sr. and A. Hays Town the night they met. Mr. Town was a young architect at the time, and was wandering the streets of the French Quarter when he was drawn into the shop by the orchestra of hammers. He poked his head into the door and asked "Can you make a light?" Mr. Bevolo responded simply, "If you can draw it, I can make it." Little did they know that they would be creating an iconic symbol of the city of New Orleans. This fixture has now found its way to homes and buildings all across the country and abroad.

This light can be altered in many different ways to complement multiple levels of formality and styles of architecture. It can also be displayed with a variety of bracket and mounting options.

French Quarter® lanterns are available with natural gas, liquid propane and electric lighting sources.

- Standard sizes are 14", 18", 21", 24", 27", 30", 36"

# WILLIAMSBURG™

The Williamsburg™ lantern is a classic colonial replication. This lantern can be made as both a flush or bracket mounted fixture. There is a natural complement in styles between the French Quarter® and the Williamsburg™, which allows the two to work very well together in an application.

Williamsburg™ fixtures are available with natural gas, liquid propane and electric lighting sources. Note: 10", 12", 15" are not available in NG or LP.

- Standard sizes are 10", 12", 14", 15", 16", 18", 22"

# COTTON EXCHANGE®

The Cotton Exchange® lantern was originally replicated from the lights found on the old "Cotton Exchange" building in New Orleans. The simple and rustic nature of the light fixture lends itself well to a number of different types of architecture, and has been used often in Mediterranean style homes, as well as on many beach houses.

Cotton Exchange® fixtures are available with natural gas, liquid propane and electric lighting sources. Note: 10", 12", 15" are not available in NG or LP.

- Standard sizes are 10", 12", 14", 15", 16", 18", 22"

## GOVERNOR®

The Governor® lantern is another historic lantern replication. The fixture's tall, masculine nature complements a number of architectural styles and is best suited to address vertical features of buildings. Elements, such as columns and French doors, are always a favorite spot for the Governor® lantern to find a home. This lantern can be used as a flush or bracket mounted fixture.

Governor® fixtures are available with natural gas, liquid propane and electric lighting sources.

## COACH HOUSE®

The Coach House® lantern exudes old world charm in a rustic way. The straight lines of the Coach House® lantern and brass cross bars are accentuated by the copper loop on top. This lantern complements many styles of architecture, and is best suited for New England and Tudor style homes. This lantern can be used as a flush or bracket mounted fixture.

Coach House® fixtures are available with natural gas, liquid propane and electric lighting sources.

## VIEUX CARRÉ® SERIES

The Vieux Carré is a National Historic Landmark of Louisiana and the United States. Better known to many as the French Quarter, this area of New Orleans is oozing with culture, from the music and food to the wrought iron rails and beautiful architecture. Perhaps no other symbol captures the unique charm of the city better than Bevolo® gas lanterns.

The Vieux Carré® Series is a collection of custom designs named after the restaurant, hotel or landmark each lantern was originally designed for, such as Café du Monde, Napoleon House Restaurant, The Royal Sonesta Hotel and The Cabildo, among many others.

Each handmade fixture showcases refined craftsmanship, unsurpassed quality and exceptional detail. These lanterns come in a variety of sizes, mounting options and utilities. Contact one of our Lighting Designers to help pick out the perfect one to complement your home's architecture.

# POSTS

If you're looking to enhance your home with outdoor copper lighting our intricately designed cast aluminum posts can make quite a statement. With several design options available, we can help you achieve the perfect look for your home or business.

## Holland® post 6'5"

The Holland® post is the perfect scale size for most residential applications. It is delicately detailed throughout, and scaled perfectly for a 21" French Quarter® lantern.

## New Orleans post 7'6", 9'6"

The New Orleans post provides a masculine and clean post option. This post is still in residential scale, and is complemented by many styles in the Bevolo® line.

## Mailbox post 3'6"

Add a little curb appeal with the post mounted mailbox and post. Our hand-crafted mailboxes are the perfect complement to Bevolo lanterns.

# WHY BEVOLO®

Since 1945, Bevolo® has been manufacturing the highest quality traditional, antique and custom hand-crafted lighting fixtures. We hold true to the belief that old world craftsmanship is what truly makes our lights last a lifetime. Today, Bevolo® Gas & Electric Lights is the largest manufacturer of handmade, open flame copper lanterns in the world. We take pride in being the leader in copper lighting for over 70 years.

## EFFICIENT BURNER

Our lights feature the most energy efficient burner (Patent No. 9416960) in the world. Our 800 BTU burners will save you between \$100 and \$200 per light, per year.

## STAYS LIT

Our lights are specifically designed, with over 75 years of experience, to stay lit and not blow out. Lifetime patented burners and secondary baffling systems ensure operability in any climate/environment.

## SAFETY FLAME FEATURE

Our patent pending gas tip assembly prevents excessive gas flow and unsafe flame height. Our electric fixtures are Edison Testing Laboratories (ETL) approved and tested for your safety.

## UNIQUE BATWING FLAME

Our uniquely shaped flame is designed exclusively for Bevolo® lanterns.

## SUSTAINABILITY

Bevolo® lanterns are lifetime fixtures and will be the last you will ever have to buy. The purest copper has a life of 300 years, and the hand forged iron used to make our weather resistant brackets is finished with the highest grade primers and paints.

## HAND RIVETED

Aviation technology is the root of our hand riveted lights' strength. This technique stands the test of time, climate and fire, unlike soldering.

## TOMORROW'S ANTIQUES TODAY

Bevolo® lanterns only increase in beauty as the copper ages. Each fixture has a unique serial number to authenticate its origin and creation date.

## EXPERT LIGHTING ANALYSIS

We care about putting the correct size and style fixture on your home. We offer a complimentary lighting analysis by designers with 50 + years of experience.

## SELECTION

Bevolo® offers over 500 styles and sizes to appropriately complement any architecture, and we never discontinue a style of light.

## MADE IN AMERICA

We are proud to be not only American made, but Louisiana made in Orleans, Jefferson and St. Tammany Parishes, supporting local economies for generations.
