

INTRODUCING...

# BOTTLE CYCLER

THE FUTURE OF  
GLASS RECYCLING

# THE BETTER WAY TO RECYCLE YOUR GLASS!

**With over 2000 machines across Australia and over 85% of the market, we've been the market leader since we invented the first glass crushing machine back in 2002.**

Our glass crushing machine is designed to sit neatly behind your bar. Quiet and efficient, our machine can crush up to 80 bottles per minute and store up to 300 beer bottles or 200 wine bottles in every BottleCycler bin.

## HOW DOES IT WORK?

Simply feed the empty glass bottles into the top. The bottles will be instantly (and quietly) crushed into the easily manageable 60 litre bin that sits below.

Our machine's safety smarts will let you know when it's full. From here, simply attach the ergonomic handle to the bin and wheel it to the collection point. It's that easy. No tipping, no heavy lifting

# THE JOURNEY OF YOUR GLASS BOTTLES

# BETTER FOR YOUR BUSINESS

## SAVE SPACE, SAVE MONEY

Why throw money away disposing of glass the old way? Our glass crushing machine reduces your waste volume by up to 80% so you can store up to five times the amount of bottles in the same space. Plus your staff can stay where they are most profitable – behind the bar serving customers.

## EASY TO WORK WITH

With our new online business portal, you can manage your account 24/7, including invoice payment, CO2 reports and booking your next glass collection.

## FULL-SERVICE SOLUTION

We take care of everything from on-site machine maintenance and call out support to glass collection. 6 days a week. All you need to do is drop the bottles into the machine and we do the rest.

## REDUCE YOUR WASTE VOLUME BY

STORE

FIVE TIMES

MORE  
BOTTLES

# BETTER FOR YOUR PEOPLE

## SAFER FOR STAFF

BottleCycler helps with OH&S by removing the danger of carrying, sorting and disposing of glass bottles. It eliminates the need to lift heavy bins or remove them to unpleasant outdoor waste areas during the shift. Plus our advanced built-in safety features make it the safest machine on the market!

## BETTER FOR EVERYONE

BottleCycler is quieter than any other glass crushing machine - about the same as a coffee grinder - and the crushed glass makes far less noise during early morning glass collections. Which is great for your customers, your staff and your neighbours!

# BETTER FOR THE PLANET

## A WORLD WHERE NO GLASS IS WASTED

At BottleCycler, we believe that sustainability is everyone's business! Which is why almost every glass bottle that goes through a BottleCycler machine gets recycled back into a new glass container again! Never into landfill.

What's more, the reduced glass volume will result in fewer trucks, smaller trucks, less petrol, less CO2 pollution and less noise pollution.

It's a much better outcome for the environment. Something we're sure your customers will be VERY glad to hear too!

# WHAT DO OUR CUSTOMERS SAY?

**Customers say once they switch to BottleCycler they never look back! Which is why many of our high profile hospitality venues have been with us for over a decade.**

I have used BottleCycler for many years and the system was crucial to The Bathers' Pavilion to expand my business. The space saved gave me the opportunity to open our Bathers' Beach Kiosk which contributed greatly to the growth of my business. I found the system and the service efficient and professional and would be happy to recommend BottleCycler to any organisation in need of a space saving system for their business.

The Bathers Pavilion, Balmoral

THE  
BATHERS'  
PAVILION

THE STAR

BottleCycler have always been an excellent company to deal with. They take what they do very seriously and will make sure their equipment is functioning 100% at all times. There is always an extremely quick response to service calls and there is always a prompt follow up shortly after. I highly recommend them for any size business.

The Star, Sydney

BottleCycler has provided the club with an effective and reliable glass management solution since 2011. The system is fast, safe and saves space in the venue while also helping us to decrease our carbon footprint. The company is a pleasure to deal with and I highly recommend their services.
