Mitigate Business Risk

Single version of truth ensures auditability and avoids knowledge silos.

Auditable paper trail
- How likely is it that your deals have been recorded accurately?
- Do you have an audit trail of every step in your rebate management process?

Improved accrual forecasting
- What degree of confidence do you have in the accuracy of your accruals forecast?
- How much effort is spent annually to collect and provide data for audit accruals?

Cross-departmental shared view
- Do all departments get the visibility they require?
- What commercial risk does the lack of visibility create for the sales or procurement teams?

Protect yourself from human error
- What is the risk of your rebate management process being affected by human error?
- How sustainable is it to rely on manual calculations?

Remove people overdependency
- How many people in your organization have full understanding of how your rebate programs work?
- Have you risk-assessed your rebate management process for key person dependencies?

Retire on-premise legacy tools
- What legacy tools do you currently use to manage your rebate deals and how reliable are these tools?
- What are the costs and risks and security implications of maintaining the legacy tools?
