

Bring Your Data to Life with Advanced Reporting

enable

If you deal with rebates regularly, you know how time-consuming and tedious reporting on them is—especially when data is buried in spreadsheets and disparate systems.

Let Enable do the heavy lifting for you.

With Advanced Reporting from Enable, you can build powerful reports to understand the bigger picture and make your next best business decision.

Enable helps drive profits and increase margins by:

- Gain unparalleled visibility into the progress and success of your rebate programs
- Empower your teams to make more data-driven decisions
- Save time and effort by seamlessly generating custom reports on specific datasets

1

Fully Customizable

Business decisions aren't made based on a single metric. Modify your reports as needed to meet any specific reporting requirements you may have.

2

Schedule Around Your Business

Export the report results via SFTP on a set schedule so your reports are always available when you need them. Plus, you can send a notification of a completed report to any email any day, anytime.

3

Identify Critical Insights in Real Time

Populated with real-time information, Advanced Reporting puts your data at your fingertips like never before, giving you the ability to uncover real-time insights and deliver more value, faster.

4

Truly Dynamic Reporting

Get insights into variances between reports. Unlock the ability to see any updates to your partners' rebate earnings or changes to any rebate agreement terms.

5

Control Access and Permissions

Set granular permissions to specify who should have access to your reporting. Elect to receive reports securely via SFTP instead of downloading them directly.

Ready to eliminate the guesswork from your decision-making? Reach out to us at hello@enable.com to see how we can help.
