enable | Built for **ORACLE** **NETSUITE**

Choose Technology that Transforms Your Organization

Enable and NetSuite have come together to build the ultimate rebate management solution. Enable is an out-of-the-box solution that natively integrates with your NetSuite applications. By connecting Enable to your NetSuite applications, you can take control of your rebate and incentive programs to boost financial performance, increase operational efficiency and mitigate business risk.

## Enable and NetSuite Brings You Closer to:

1. **Driving efficiency and removing administrative burden** by systematically sharing your product information, sales transactions and complex rebate data between NetSuite and Enable.

2. **Seamless payment processing** with automated credit memo creation for your approved rebate agreements.

3. **Unlocking your revenue potential and understanding your true returns** with up-to-date reports giving you immediate visibility into an incredible amount of information including units sold, rebate dollars accrued and status of your customer accounts.

> "
> *"STEMCO is excited about the potential to have full visibility of our business and total control of our rebate deals using Enable and NetSuite."*
