

# Better Rebate Management for Finance Teams

While rebates are a strategic driver of trading partner behavior, managing them can be quite challenging. Finance teams grapple with administrative burdens daily. As the complexity of rebate programs increases, so does the potential for errors. Inaccurate data and manual calculations heighten the risk of overpayments or unclaimed rebates. Where do we go from here?

With Enable, you'll spend less time administering rebates and more time unlocking their strategic value. Drive your finance team forward by converting risks into opportunities, improving cash flow and boosting profitability.

## Let Enable give you back full control.

*"Previously, arriving at an answer would require us to spend countless hours on manual work. By the time you modify a report after investing so much time, the accuracy of the data becomes uncertain. With Enable, the confidence comes from the system pulling data in real time."*

**Ron Fogel | Director of Finance, Jones Heartz**

### Simplify End-to-End Rebate Management

Say goodbye to manual workflows, miscalculations and siloed data. Say hello to a comprehensive, collaborative and controlled environment for managing the entire rebate process in one easy-to-use platform.

#### Comprehensive

Effectively manage every deal type. Track, analyze and optimize the entire rebate management process.

#### Collaborative

Create, negotiate, and execute deals with trading partners. Improve alignment by tracking progress in one trusted location.

#### Controlled

Share the data you want to share, internally and externally. Configure workflows, approval processes, and audit trails to maintain transparency and compliance.

### Key Business Outcomes

1

Automate month-end calculations and spend 35% less time closing the books.

2

Eliminate overpayments that erode profits or ensure you collect every rebate dollar.

3

Gain confidence that your rebate accruals are 100% accurate.

4

Save an average of 36 hours per month on rebate management.

5

Simplify reporting on complex deals so you can optimize deal performance.
