- Consumes **70% less energy**.
- Can be built in **4-6 months**.
- **Costs less** to construct and operate.
- Produces **less waste** in construction.
- **Built off-site** in a controlled environment.

THE CLASSIC NEW ENGLAND FARMHOUSE.

As the classic, gable-end, white farmhouse with a full-length farmer's porch, the Appledore draws from its local roots for inspiration. This design acknowledges the growing desire for master suites on the first floor and has the potential for expansion on the second floor. Featuring cutting-edge design and energy-efficient construction, the Appledore is capable of producing as much energy as it will consume in one year, achieving Net Zero Energy status.
