

Danita Nemmers

Inventory Control Specialist

I am an experienced Inventory Control Specialist with over 2 years of experience overseeing the management of warehouse inventory and supplies. I have a proven track record of success in reducing inventory levels, improving accuracy and efficiency, and increasing customer satisfaction. I am highly organized and pay close attention to detail, and am skilled in utilizing inventory systems and software to ensure accurate tracking of all inventory items. I am also skilled in conducting physical inventories and resolving discrepancies. I am an excellent communicator and work well with both internal and external teams.

Employment History

Inventory Control Specialist at Walmart, MO

Jan 2023 - Present

- Developed and implemented an inventory control system that reduced the number of out-of-stock products by 45% in Walmart's Missouri stores.
- Streamlined the inventory tracking process, resulting in a 50% reduction in time spent on manual inventory counts.
- Spearheaded a project that improved the accuracy of on-shelf inventory levels by 70%, resulting in an increase in sales of 5%.

Inventory Control Associate at Cintas Corporation, MO

Aug 2021 - Nov 2022

- Reduced inventory shrinkage by 20% over the course of a year: As an Inventory Control Associate at Cintas Corporation, MO, I monitored and supervised the proper storage and stocking of inventory on a daily basis. I implemented a system of regular cycle counts, which identified discrepancies and enabled me to identify and address any issues with accuracy and efficiency. This resulted in a 20% reduction in inventory shrinkage over the course of the year.
- Improved inventory accuracy to 95%: I worked closely with the warehouse staff to ensure that all inventory was accurately tracked and recorded. I conducted regular audits of the inventory system and provided training and guidance to staff on proper inventory control procedures. By the end of the year, I had improved inventory accuracy to 95%.
- Streamlined inventory tracking process: I designed and implemented an inventory tracking system that streamlined the process of ordering, receiving, and stocking inventory. This new system allowed the warehouse staff to quickly and easily access inventory information, resulting in a more efficient inventory tracking process.
