

Core predictable WHO country presence

Differentiated approach

WHO presence type	A Policy support ¹	B Targeted technical & strategic support	C Moderate technical support	D Full technical support with emergency response	E Full support incl. field operations
WHO support model & primary channel	Short-term support on strategic/policy areas of health system transformation & selected programmes, esp. in line with WHO comparative advantage RO / HQ ² *Backed up from RO/HQ	Selective long-/ short-term strategic and technical support to countries in selected areas in UHC, health emergencies or healthier populations based on data trends. WCO + RO/HQ *Backed up from RO/HQ	Longer term extensive technical support in health systems foundations, in areas where country is lagging behind in many impact targets and for addressing inequalities with the country WCO + sub-regional *Backed up from RO/HQ	Full range of long-term support to build health systems foundations, programmes, address high vulnerabilities, inequalities and respond to health emergencies [i.e., health emergency <i>localized</i> , not national], in areas with a high aid-dependency WCO + sub-national offices *Backed up from RO/HQ	“Full presence (D)” plus operational action, e.g., coordination of health clusters, direct provision of services & supplies in health emergencies and humanitarian crisis] WCO + field operations *Backed up from RO/HQ
WHO roles required	Policy dialogue <i>Develop health systems of the future</i>		A + Selective technical and strategic support <i>Build high performing health systems</i>	B + substantial technical assistance <i>Strengthen national institutions</i> C + full range of technical support + emergency <i>Provide additional technical capacities</i>	D + Service delivery <i>Fill critical gaps incl health services</i>

¹ support may be provided through a liaison or desk office

² for highly-specialized support or as requested by Regional Offices

SIDS – Small Island Devt. States are incorporated
