Weathering Material *No Finish Warranty (These materials will change appearance)*

Zincalume® Plus AZ-55 is a 55% aluminum, 45% zinc metallic coating over steel. Due to batch differences, color or spangle matching of this product is not available. No Finish Warranty - 25 Year Perforation Warranty.

Zincalume® Plus/Galvalume® AZ-55 SRI-65

Galvanized G-90, metallic coating over steel, no Finish Warranty, no Perforation Warranty.

Galvanized G-90

Rusteel Plus™ (A606)
general appearance prior to being exposed to the weather

Rusteel Plus™ is an ideal design for a historic, weathered look. Rusteel Plus™ is best suited for dryer, less humid environments. Rusteel Plus™ has no metallic coating and offers no warranty. The designer should be aware of rust runoff on decks and concrete without gutter protection or separation. Rusteel Plus™ meets ASTM A606-96 Type 4. Type 4 has improved corrosion resistance when compared to carbon steel.

Rusteel Plus™ (A606)
potential look after weather exposure

Other Taylor Metal Companies:

In partnership with:

SRI=Solar Reflective Index. These printed chips provide a close representation of the colors. Metal samples are available upon request. Custom colors available. "Oil canning" is an inherent characteristic of roof and wall products, and not a defect, which is not a cause for panel rejection.

Paint Specifications

In testament to our commitment to deliver the highest quality products backed by exceptional service, Taylor Metal offers a **40-Year, Limited Manufacturer's Warranty** covering fading, chalking, chipping, cracking and peeling.

Oil Canning – All light gauge metals can display waviness often referred to as "oil canning". This is caused by steel mill tolerances, substrate variation and relative reflectivity. "Oil canning" is an inherent characteristic of steel products, not a defect, and is not a cause for rejection.
