

Protect Your Business With A

Security

Risk Assessment

Let us assess your security needs and create a proactive plan for your defense.

A Security Risk Assessment (SRA) is essential for identifying potential threats like hacking attempts, network misconfigurations, and missing security policies. Our SRA evaluates your entire security system to highlight risks and recommend effective mitigation strategies. By understanding your security infrastructure's strengths and weaknesses, you can make informed decisions to protect valuable data. Our team conducts a thorough assessment across IT, operations, HR, and accounting, ensuring your technology and processes are secure while offering practical steps to improve overall security and compliance. Defeat the new generation of threats when you change your cybersecurity strategy from reactive to proactive.

The SRA Process

Scanning

Experts will conduct internal and external vulnerability scans, data assessment, system configuration reviews, baseline phishing tests, and user phishing awareness evaluations.

Awareness

Gain a full view into your organization's security posture, including critical system reviews, EMR assessments, and physical site evaluations to identify key vulnerabilities.

Analysis

Receive expert assessments to identify critical vulnerabilities, evaluate current policies and business associate workflows, and assess your organization's security risks.

Consultation

Ascend delivers a comprehensive explanation of results, including detailed reports and professional recommendations for next steps.

The Ascend Advantage

Experts You Can Trust

Award-Winning Team

Team Ascend's renowned experts are some of the best in the industry. Ascend consistently ranks among the top MSPs in the country, earning positions on award charts such as Channel Future's top 501 MSPs, the CRN MSP 500 & Elite 150, and Inc. 5000.

ITIL-Based Processes

Our unwavering mission is to maximize efficiency by making the onboarding, implementation, and rollout journey seamless and enjoyable. Leveraging the ITIL framework, we bridge the gap between security and compliance to enhance overall effectiveness.

Zero Trust Security Approach

Adopting a "trust no one" strategy safeguards your company information from the inside out. We implement continuous authorization, strict access controls and ongoing monitoring for your ultimate protection.
