

Botox Information

With real, noticeable results, no surgery and no recovery time, there are many reasons why BOTOX® Cosmetic is the best non-surgical treatment for fine lines and wrinkles. With high patient satisfaction; Dr. Timothy Jochen and his staff's immense experience make them the top .01% in the nation.

WHAT IS BOTOX?

Botox a purified protein that is injected into muscles and is the first and only FDA approved prescription product that temporarily improves the appearance of both moderate to severe frown lines between the brows and moderate to severe crow's feet in adults.

HOW DOES IT WORK?

Your experienced provider will inject tiny quantities of Botox directly into your facial muscles. You will feel a stinging sensation that will subside immediately. The purified protein is a nonsurgical treatment that is injected directly into the muscles between the brows, along forehead, around they eyes (crow's feet) or other specified areas. It works by relaxing the muscles. This then reduces muscle activity that causes moderate to severe lines to form.

HOW SOON WILL I SEE RESULTS AND HOW LONG WILL IT LAST?

The full effect will be seen after two to three days. One treatment can show visible results for two to four months, and then the area can be retreated. After several treatments, some patients experience longer periods of time between follow-ups. Most patients can return to full activity immediately after the procedure.

ARE THERE ANY SIDE EFFECTS?

Side effects are minimal and are typically around the injection site. Soreness or mild bruising, while uncommon, may occur around the injection site. Makeup may be worn after treatment, but care should be taken to avoid pressing or massaging the area for several hours.

DOES IT HURT?

Like most injections, Botox can be slightly uncomfortable, but we do offer topical anesthesia ten minutes before the procedure or ice the area to numb it. Another new approach is using a small hand vibrator to distract the nerves from the feeling of the injection.

HOW MUCH DOES IT COST?

Pricing varies based on quantity; each patient will need a customized dosage as our needs vary based on age and muscle strength. A quick cosmetic consultation can help determine how many units will be needed for proper treatment.
