CLASSIC GLASS PENDANTS

Bowl

Teardrop

Round

Traditional

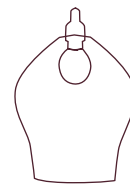

Our Classic Pendant range can be blown to order as Small, Medium or Large.

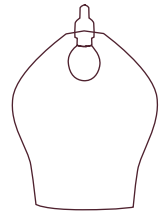

When glass is free hand-blown the colour will naturally vary depending on the shape and thickness of the piece. We embrace imperfections within the glass such as bubbles, swirls, variations in shape, colour and size as they are part of the hand crafted process.

IS A CURIOUSA FREE BLOWN LIGHT RIGHT FOR YOU?

What is hand-blown & free-blown glass?

Although both are traditional methods of blowing glass by hand, there is actually quite a big difference between them. Most commercial hand-blown glass is blown into moulds, this allows many more pieces to be made at a time and each will be, more or less, identical to one another.

Free-blown glass however is shaped purely by hand, without the use of any moulds. The glass blower must stretch and manipulate the molten glass into the required form, using tools and gauges, whilst maintaining the temperature by repeatedly returning the piece to the furnace. It's a much slower process and relies totally on the skill and experience of the glass blower.

But the end result is a piece of glass that is like no other, it will be truly, totally unique.

What to expect from your Curiousa light

As no two pieces of our glass are the same, it follows every piece has some variation. It may be a difference in size or colour, or because we use some recycled glass, there may be small bubbles, marks or swirls - but we believe these differences should be celebrated and cherished.

A shade blown by Allister in Stourbridge may look slightly different to the same shade blown by Jonathan in Derbyshire. We think it's amazing that each piece has the mark and personality of their maker, but of course it's not right for everyone. If you are looking for perfection or for an identical matching pair, you may want to look elsewhere.

But, if like us you want to celebrate the individual charm of a truly hand-crafted light piece, one that you can enjoy for generations to come, then we'll look forward to hearing from you.

SHAPE & SIZE VARIANCE

We work with our glass blowers to a 10% size tolerance from the original design. For matching sets there may be a 5% to 10% size difference between each shade.

VARIATIONS IN COLOUR

Coloured glass is applied whilst molten to the inside of the shade, so there will be some variation in density of colour between shades or sometimes within a single piece of glass.

SEMI OPAQUES

Our semi-opaque glass can show marbling and banding and small tooling marks can sometimes be seen on the rim.

BUBBLES & SWIRLS

To form the required shape, the glass blower must continuously roll the molten glass backwards and forwards. This can often leave slight swirls or bubbles visible within the glass and are all part of the making process.

LARGE CLUSTERED CHANDELIERS

Cylinder Suspension in Walnut or Oak. Choose your fitting finish, shades and length.

Every light piece is hand-blown and hand-built to order, so each design can be made to your exact requirements. We can work directly with architects and structural engineers, not only ensuring your chandelier is visually stunning, but that the technical design and installation goes as smoothly as possible.

DRAWING SERVICE

Our in-house drawing service helps bring your bespoke chandelier to life by visualizing the style, colour, and scale, giving you a clear sense of the final design before commissioning.

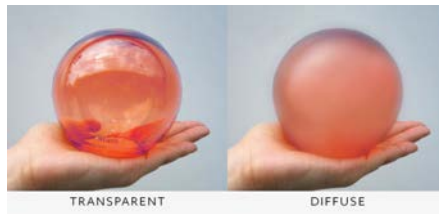

By using industry standard software, our design files can be used by architects and interior designers to integrate our lights into their own design schemes, whilst our in-house visualisations and renders hugely help our customers make informed decisions.

GLASS COLOURS

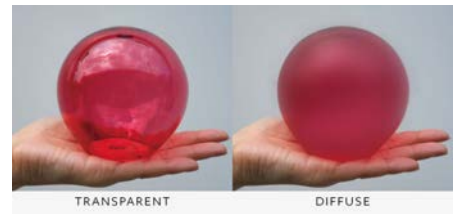

Glass samples can be ordered from our contact page on the website. These colours are only a guide. When glass is free hand-blown the colour will naturally vary depending on the shape and thickness of the piece.

MAYA COLLECTION

Ceramic Colours

These colours are only a guide, due to their hand-made nature. Exact colours and intensities may vary.

Flex Colours

Introducing five new flex colours available exclusively for the Maya Collection.

Ceramic, Glass & Flex samples can be ordered from our contact page on our website.

BATHROOM LIGHTING

Wall Lights, and many of our single Pendants, Chandeliers and Sculptural Stacks, can now be made to IP Rating for bathrooms, meaning they can be used in wet areas, near sinks and showers (Zones 1 & 2) and are fully compliant with BSEN 60598-1(2015).

Note: Our bathroom lights are not certified for North America.

Each light piece is made to measure using round, fabric covered flex (non twisted) or metal rods and feature an enclosed LED G9 bulb.
