SAP.iO Portfolio Overview

# SAP.iO Artificial Intelligence (AI) Startup Partner Ecosystem

December 2023 | PUBLIC

# Overview

SAP.iO curates a relevant and diverse startup ecosystem to help extend the value of SAP solutions and meet your continuously evolving needs. This document provides an overview of the 125+ AI-powered startups solutions in the SAP.iO portfolio that are pre-integrated with SAP and are available to adopt via the SAP Store. By bridging the gap between startup and corporates, SAP continues to propel the transformation of nearly every line of business and industry.

If you are interested in learning more about one of these startups or getting involved with SAP.iO, please email sapio@sap.com.

# Table of Contents

# Disclaimer

This portfolio overview was curated by SAP.iO to simplify the discovery of startup partner solutions in our portfolio and is solely for informational purposes. Definitions regarding topics including Artificial Intelligence continue to evolve and the contents of this overview are based on information from sources believed to be reliable, but accuracy and completeness cannot be guaranteed.

# Customer Experience

## Adverity
### Analytics & intelligence platform for marketing, sales and ecommerce teams
➔ https://store.sap.com/dcp/en/product/display-2001008686_live_v1/
➔ www.adverity.com

Developer of an online marketing analytics platform designed to manage client campaigns seamlessly across all channels. The company's platform's automated connectivity to hundreds of data sources and destinations transforms siloed data into actionable insight, helping data-driven marketing teams to make faster and better decisions, and improves performance and accuracy.

**Product Sub-Category**
Marketing, Data and Analytics

**SAP Product Integration**
SAP Analytics Cloud Planning, SAP Marketing Cloud, S/4HANA Cloud EX & STE, OP/HEC Support Offerings

**Technologies Used**
Artificial Intelligence, Big Data, Generative AI

## Aiola
### Virtual analyst that helps to make data-driven decisions maximizing performance
➔ https://store.sap.com/dcp/en/product/display-2001008348_live_v1/
➔ www.aiola.com

Developer of a sales analytics platform designed to integrate data from multiple planning software systems into one place. The company's platform offers services such as generating accurate sales and demand forecasting, trade promotions optimization, new product launch analysis and market share forecasting, enabling clients to prepare new strategies in order to identify cost savings, Improve efficiency and maximize revenues for their business growth.

**Product Sub-Category**
Commerce, Data and Analytics

**SAP Product Integration**
SAP ERP, SAP Commerce Cloud, CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence, Machine Learning, Natural Language Processing

## Aisera
### Transform support operations with Generative AI and AI Copilot solutions
➔ https://store.sap.com/dcp/en/product/display-2001016386_live_v1/aisera-ai-customer-service
➔ https://aisera.com/

Developer of service management software designed to automate the resolution of service issues. The company's software utilizes artificial intelligence to auto-resolve tasks and actions, as well as offers to automate workflows in an interactive manner, enabling enterprise and consumer organizations to deliver a personalized omnichannel service experience to both employees and customers.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
YaaS Core, Cloud for Customer, SF Employee Central, SF Employee Central Payroll, SF Foundation, SF Employee Central Service Center, SF People Central Hub, SF Visa and Permit Management

**Technologies Used**
Artificial Intelligence, Natural Language Processing, Generative AI

## Alcmeon
### Improve your e-commerce website CX with a best-of-breed hybrid messaging widget
➔ https://store.sap.com/dcp/en/product/display-2001008726_live_v1/
➔ www.alcmeon.com

Developer of a brand engagement platform designed to provide modern ways for brands to reach their consumers. The company's platform transforms messages for iOS into customer service, messaging marketing, and conversational commerce channels, enabling clients to maintain real-time connections with their social messaging accounts.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence

## AmplifAI Solutions
### AI-driven coaching, performance intelligence, and gamification solutions for contact centers
➔ https://store.sap.com/dcp/en/product/display-2001016409_live_v1/amplifai-performance-enablement
➔ www.amplifai.com

Operator of an AI-driven performance enablement platform intended to monitor and identify practices and micro-learnings to drive performance. The company's platform utilizes artificial intelligence to identify and automatically distribute performance-specific micro-learnings to employees and to direct managers with personalized coaching blueprints for each employee's skill development, enabling companies to increase their workforce's quality of production.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
Cloud for Customer

**Technologies Used**
Artificial Intelligence

## Ascendo AI
### AI assisted support operations for resolutions, risk, churn and visibility of install base
➜ https://store.sap.com/dcp/en/product/display-2001016387_live_v1/ascendo-ai-resolution-prediction
➜ https://www.ascendo.ai

Developer of support software designed to improve the way companies provide customer support. The company provides a highly accurate game plan for complex expert, remote, field, contact center or self-service support, superior AI explainability, teams reduce resolution time and escalations, and identify patterns to become proactive in service operations and spare parts logistics operations, enabling clients to predict root cause, recommend the most appropriate alternative and avoid future problems for even complex issues.

**Product Sub-Category**
Service, Supply Chain Logistics

**SAP Product Integration**
Mobile Customer & Contacts, Cloud for Customer, SAP CRM Service, Customer Engagement Center, SAP Customer Data Cloud, SAP Customer Data Platform

**Technologies Used**
Artificial Intelligence, Generative AI, Natural Language Processing

## Babel, Inc.
### A conversation intelligence tool for sales teams
➜ https://store.sap.com/dcp/en/product/display-2001013987_live_v1/
➜ www.babel.jp

Developer of a video advertising platform designed to provide marketing options. The company's platform provides smartphone video-based advertising planning that reaches every individual with the know-how of producing videos with their own media, enabling companies to conduct marketing digitally.

**Product Sub-Category**
Sales, Commerce, Service

**SAP Product Integration**
Mobile CRM Sales, Sybase Mobile Sales, SAP Commerce, Cloud for Customer, SAP CRM Sales, SAP CRM Interaction Center, SAP CRM Service, Customer Engagement Center

**Technologies Used**
Artificial Intelligence

## Bigthinx
### Fashion size and fit predictor that reduces returns
➜ https://store.sap.com/dcp/en/product/display-2001014032_live_v1/
➜ www.bigthinx.com

Developer of a fashion software designed to assist in online shopping, fitness, and health. The company's software uses artificial intelligence to carry out a 3D body scan using two photos from a smartphone and calculates 44 precise body measurements and body composition ratios with over 95% accuracy, enabling users to get personalized virtual avatars to experiment with different fabrics, look and drape.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce

**Technologies Used**
Artificial Intelligence, Machine Learning, Metaverse, Digital Twin, AR/VR/XR/3D

## Bounti.ai
### AI growth monitoring platform that detects key signals across all your customers
➜ https://store.sap.com/dcp/en/product/display-2001016449_live_v1/bounti-growth-os
➜ https://bounti.ai

Developer of real-time growth signals software designed for sales and service teams to engage with their customers. The company's platforms help businesses to find the right customers at the right times by providing real-time responses and actionable insights to save and gain new business, enabling sales force teams and their clients to grow their businesses in an effective manner.

**Product Sub-Category**
Data and Analytics, Customer Data

**SAP Product Integration**
Mobile CRM Sales, Mobile Pipeline Simulation, Mobile Sales Manager, Mobile Sales Order Notification, SAP CRM Sales, Extended Core Retail Cloud, SAP Customer Data Platform

**Technologies Used**
Artificial Intelligence

## Breinify
### AI platform for predicting a consumer's purchase behavior
➜ https://store.sap.com/dcp/en/product/display-2001007998_live_v1/
➜ www.breinify.ai

Developer of an artificial intelligence-based platform designed to predict individual behavior and preferences to democratize data science for consumer enterprises. The company's platform blends traditional machine learning with complex temporal algorithms to learn, react, be proactive, and make extremely granular intelligent decisions that vary for each individual at any time, enabling brand marketers to deliver powerful predictive personalization in real-time and at scale.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning, Predictive Analytics

## eStoreMedia
### E-commerce analytics and e-content automation for brands
→ https://store.sap.com/dcp/en/product/display-2001012205_live_v1/
→ www.estoremedia.com

Developer of software focused on digital intelligence and execution for consumer goods brands. The company's product information management and AI-based research methodologies provide product manufacturers with the complete toolkit for navigating the fast-growing e-commerce channel from full category analysis and insight to online content management and distribution, enabling clients to identify, prioritize and execute to protect and accelerate online sales.

**Product Sub-Category**
Commerce

**SAP Product Integration**
YaaS Core

**Technologies Used**
Artificial Intelligence

## FINDMINE
### Content engine powering styling, outfitting, and complete the look experiences
→ https://store.sap.com/dcp/en/product/display-2001007643_live_v1/
→ www.findmine.com

Developer of cloud-based retail technology designed to provide personalized style suggestions. The company's technology uses machine learning to scale the manual and tedious process of product curation such as outfit creation, sets of furniture and decor, compatible electronics and ingredients for recipes, enabling shoppers to check merchandise and styles in various combinations.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning

## Footprint Technologies
### Digital shoe size consultant for individualized and sustainable online shopping
→ https://store.sap.com/dcp/en/product/display-2001012290_live_v1/
→ www.footprinttech.de

Developer of a foot measurement platform intended to transform online shoe shopping into an individual and sustainable experience. The company's platform provides users to measure the length and width of their feet to the millimeter at home, enabling clients to avoid returns and also make online shopping sustainable.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Computer Vision, Artificial Intelligence

## Idiomatic
### Customer intelligence platform that automatically classifies unstructured feedback
→ https://store.sap.com/dcp/en/product/display-2001007420_live_v1/
→ www.idiomatic.com

Operator of a data analysis platform intended to analyze customer feedback. The company's platform gains customer insight eliminates hassle integration, facilitates customizable reports, and provides account analysis, enabling companies to make informed decisions about what customers want, need, and will love.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning

## Inflect Technologies Private Limited
### Advanced image recognition and retail execution analytics for CPG
→ https://store.sap.com/dcp/en/product/display-2001015260_live_v1/
→ www.infilect.com

Developer of a visual intelligence platform designed to derive insights from how consumers interact with retail products. The company's platform helps retail brands gain visibility into the presence, placement, positioning, and performance of their products across stores as well as helps them to eliminate the mismatch between shelf availability and supply chain from manufacturer to retail shelves, and share-of-shelf and market share of a retail brand, enabling retailers and brands to improve their product offerings, operations, and customer experience.

**Product Sub-Category**
Service, Sales

**SAP Product Integration**
Cloud for Customer

**Technologies Used**
Artificial Intelligence, Computer Vision

## InsideBoard
### Digital success platform that drives adoption of key business tools
➔ https://store.sap.com/dcp/en/product/display-2001016353_live_v1/insideboard
➔ https://www.insideboard.com/

Operator of a SaaS-based employee performance management platform intended to encourage user adoption, ongoing team performance, and transformation success. The company's platform helps employees of a company to earn points, and badges through various challenges as well as change management, enabling clients to revolutionize organizational change management through the use of digital technology.

**Product Sub-Category**
Employee Experience Management, Enterprise Asset Management

**SAP Product Integration**
Cloud for Customer, SAP CRM Sales, SAP CRM Service, SF Foundation, Ariba Supplier Inform. & Perform. Mgmt, S/4HANA Manufact. Plan. & Sched. Cloud

**Technologies Used**
Artificial Intelligence

## Jebbit
### Interactive digital experiences that capture 1st-party data at scale
➔ https://store.sap.com/dcp/en/product/display-2001012132_live_v1/
➔ www.jebbit.com

Developer of a mobile marketing platform designed to collect and activate relevant consumer data through innovative mobile experiences. The company's declared data platform permits brands to build their own sets of first-party data through innovative consumer experiences, enabling clients to build fun, engaging quizzes and customer experiences that their customers and the audience will love.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
SAP Customer Data Cloud

**Technologies Used**
Artificial Intelligence, Generative AI

## Knowmax
### Guided knowledge platform for customer experience teams
➔ https://store.sap.com/dcp/en/product/display-2001016447_live_v1/knowmax-ai-powered-knowledge-management-for-contact-centers-self-service-field-and-retail
➔ https://knowmax.ai/

Developer of an artificial intelligence-based knowledge management platform designed to offer disruptive IT services. The company offers managed services to leading brands across telecom, banking, e-commerce, utilities, and more, enabling it to offer omnichannel customer services.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
Cloud for Customer, SAP CRM Interaction Center, SAP CRM Service, Customer Engagement Center

**Technologies Used**
Artificial Intelligence

## Lucy
### AI-powered enterprise answer engine
➔ https://store.sap.com/dcp/en/product/display-2001016382_live_v1/lucy
➔ www.Lucy.ai

Developer of a knowledge management platform designed to help enterprise teams make the most of their data through business insights. The company's AI-powered platform reads watches, listens, and remembers all that have been shared to provide specific answers and meaningful insights from texts, audio, and videos, enabling clients to easily find answers with ease which helps to free up valuable time and boosts organizational productivity.

**Product Sub-Category**
Service, Sales

**SAP Product Integration**
Mobile CRM Sales, Cloud for Customer, SAP CRM Sales, SAP CRM Service, Enhanced Maint. & Service Planning

**Technologies Used**
Generative AI, Natural Language Processing, Artificial Intelligence

## Mercaux
### Omnichannel digital solutions & in-store data collection for physical retail
➔ https://store.sap.com/dcp/en/product/display-2001008342_live_v1/
➔ www.mercaux.com

Developer of the next-generation in-store experience, universal basket, and checkout platform designed to provide customers with a frictionless shopping experience. The company's experience layer redefines how customers interact with the physical store, through assisted selling and self-service solutions, enabling customers to complete the transaction anywhere, using any payment.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence

## Neuron7
### Resolve service issues in seconds with AI-generated resolution intelligence
→ https://store.sap.com/dcp/en/product/display-2001016498_live_v1/neuron7.ai-resolution-intelligence
→ https://neuron7.ai/

Developer of a service and diagnostics intelligence platform intended to help service leaders deliver on crucial metrics like first call resolution, turn-around time, and service margins. The company's platform delivers service predictions in seconds by ingesting and analyzing signals across structured and unstructured enterprise data, as well as input from top experts, enabling organizations to achieve their impactful service outcomes.

**Product Sub-Category**
Service

**SAP Product Integration**
Cloud for Customer, SAP CRM Service, Field Service Management

**Technologies Used**
Artificial Intelligence

## nyris
### Visual search platform to instantly identify and find spare parts using images and more
→ https://store.sap.com/dcp/en/product/display-2001008397_live_v1/
→ www.nyris.io

Developer of a visual search platform designed to find products and objects in images and videos. The company's platform uses a wide range of technologies for image recognition including artificial intelligence and neural networks to display results in less than one second, enabling users to conduct a unified, simple, and fast search.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence, Generative AI

## Okkular Pty Ltd
### Automatically generate product information and tags for retailers using AI technology
→ https://store.sap.com/dcp/en/product/display-2001012975_live_v1/
→ www.okkular.io

Developer of an automated product tagging and visual search platform designed to help fashion businesses boost sales by creating an enhanced product catalog. The company's platform provides automated product tagging, product descriptions, and visual search using computer vision and deep learning technology, enabling retailers to improve customer experience, reduce costs, and drive sales with insightful automation and personalization.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning, Computer Vision, Generative AI

## Pryon Incorporated
### Enterprise AI platform that provides trusted answers from approved content
→ https://store.sap.com/dcp/en/product/display-2001016410_live_v1/pryon-sap
→ https://pryon.com/

Developer of an enterprise knowledge management platform designed to streamline artificial intelligence adoption. The company's platform connects customers and employees to unstructured data, extending their ability to find and use knowledge, drive workflows, and make informed decisions, enabling businesses to reduce complexity, costs, and deployment times.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
Cloud for Customer, SAP Cloud Platform Marketplace

**Technologies Used**
Artificial Intelligence, Computer Vision, Natural Language Processing

## Quiq
### Powering next generation conversations between consumers and brands
→ https://store.sap.com/dcp/en/product/display-2001016407_live_v1/quiq-the-conversational-cx-platform
→ https://quiq.com/

Developer of a cloud-based messaging platform designed to connect consumers with enterprises. The company's system permits consumers to talk and interact with their desirable brands by permitting them to text or send messages to agents directly via digital messaging channels, enabling customers to have effortless interactions between staff and customers in their moment of need.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
Cloud for Customer, SAP CRM Service

**Technologies Used**
Artificial Intelligence, Generative AI

## QVALON
### Mobile solution for managing retail operational processes
→ https://store.sap.com/dcp/en/product/display-2001013869_live_v1/retail-operational-quality
→ www.qvalon.com

Developer of an application platform designed to manage, monitor, and magnify retail business. The company's platform uses analytical instruments to discover bottlenecks and operational inefficiency, enabling clients to manage efficiency for field teams and operational processes.

**Product Sub-Category**
Sales, Service, Talent Management

**SAP Product Integration**
SAP Analytics Cloud Planning, BO Integration, BO Sales Analysis Retail, Infinite Insight, Predictive Analysis, Predictive Analytics Library, Cloud Portal & Fiori (Legacy)

**Technologies Used**
Artificial Intelligence

## Rezo.AI
### Automate conversations across contact center channels with the power of AI and analytics
→ https://store.sap.com/dcp/en/product/display-2001013977_live_v1/
→ www.rezo.ai

Developer of AI-powered software designed to automate conversations over voice, emails, WhatsApp, social media, and chats. The company's platform simplifies workflows by performing many of the time-consuming, manual tasks that humans are unable to perform at the speed and scale required for efficient and effective customer interactions, enabling companies to automate enterprise workflows with limited intervention.

**Product Sub-Category**
Service, Sales

**SAP Product Integration**
YaaS Core, Mobile Customer & Contacts, SAP CRM Marketing, Cloud for Customer, S/4HANA Enterprise Mgmt, Customer Journey Manager, Customer Engagement Center

**Technologies Used**
Artificial Intelligence, Machine Learning, Predictive Analytics, Natural Language Processing

## SaleAssist.ai
### Live video commerce platform for online businesses to increase sales & engagement
→ https://store.sap.com/dcp/en/product/display-2001014939_live_v1/
→ www.saleassist.ai

Developer of live customer engagement platform designed to improve digital customer experience. The company's platform offers artificial intelligence-powered conversations, video chat, co-browsing, and live chat, enabling e-commerce businesses to engage customers and boost sales.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Artificial Intelligence

## Salesroom
### AI-powered video conferencing platform for effective customer meetings
→ https://store.sap.com/dcp/en/product/display-2001016369_live_v1/
→ www.salesroom.com

Developer of a video conferencing platform designed to sell and show products virtually. The company offers virtual rooms, a real-time sales coach, and artificial intelliggence that accelerates alignment, and meeting engagement tools, enabling clients to pursue more ambitious leads or land larger accounts.

**Product Sub-Category**
Sales

**SAP Product Integration**
Mobile CRM Sales, SAP CRM Sales, SAP CRM Service

**Technologies Used**
Artificial Intelligence, Generative AI

## SegmentStream
### Predictive marketing attribution and optimization platform
→ https://enhance.emarsys.com/product/segmentstream/
→ www.segmentstream.com

Developer of a data intelligence platform designed for the collection and unification of customer data for advanced marketing and analytics. The company's platform offers an artificial intelligence-powered end-to-end marketing analytics solution based on a single API along with automatically collecting data from various sources into Google BigQuery, enabling enterprises to streamline their data integration process with numerous marketing technology vendors.

**Product Sub-Category**
Marketing

**SAP Product Integration**
SAP Emarsys

**Technologies Used**
Machine Learning, Artificial Intelligence

## Sociograph Solutions (DaveAI)
### Visually immersive and personalized sales experiences powered by a virtual avatar
➔ https://store.sap.com/dcp/en/product/display-2001013978_live_v1/daveai-virtual-sales-avatar
➔ www.iamdave.ai

Developer of a full-stack artificial intelligence platform designed to create immersive and personalized sales experiences. The company's proprietary virtual avatar technology helps bridge the gap between self-assisted online discovery and salesperson-assisted offline discovery by providing real-time personalized product and brand discovery experiences to customers, enabling businesses to drive sales effectively.

**Product Sub-Category**
Customer Data

**SAP Product Integration**
Cloud for Customer

**Technologies Used**
Artificial Intelligence, Machine Learning, Big Data, Digital Twin, AR/VR/XR/3D

## Velou
### AI copilot assistant to automate the listing and sales process of products in online stores
➔ https://store.sap.com/dcp/en/product/display-2001008116_live_v1/
➔ www.velou.com

Developer of an AI-powered search tool designed to increase e-commerce conversions and revenue using a product ranking algorithm. The company's tool takes consumer behavior, shopper profile, trends, and even seasonality into account to optimize the display order of products in online marketplaces, automatically and in real-time, enabling e-commerce retailers to show better search results when a customer is searching for an item on their website or mobile application.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Machine Learning, Artificial Intelligence

## Wisy
### Fast, precise retail execution with real-time analytics and task automation
➔ https://store.sap.com/dcp/en/product/display-2001015800_live_v1/
➔ www.wisy.ai

Developer of an artificial intelligence platform designed to collect shelf and retail data at the point of sales with image recognition and turn it into real-time insights at the store and product level. The company's platform offers goods manufacturers and retailers to reduce out-of-stock and waste while increasing profitable revenue with augmented analytics, smart tasks, and remote coordination, enabling consumer product companies to increase sales.

**Product Sub-Category**
Commerce

**SAP Product Integration**
Retail Execution, Cloud for Customer, S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, HANA Cloud

**Technologies Used**
Artificial Intelligence

## Xplorazzi
### 3D data driven in-store item recognition that delivers frictionless retail experiences
➔ https://store.sap.com/dcp/en/product/display-2001014558_live_v1/
➔ https://xplorazzi.com

Developer of visual merchandising solutions for consumer goods companies. The platform combines computer vision and deep learning technology to detect shelves, promotional displays, and SKUs on the shelf for shelf planogram compliance. It also offers online visual merchandising that converts images into 3D models optimized for the AR experience. Its additional product offerings include task management, planogram compliance, and out-of-stock management.

**Product Sub-Category**
Commerce

**SAP Product Integration**
HANA Cloud

**Technologies Used**
Computer Vision, Artificial Intelligence, AR/VR/XR/3D

## Yellow.ai
### Enterprise-grade conversational AI platform
➔ https://store.sap.com/dcp/en/product/display-2001014764_live_v1/
➔ www.yellow.ai

Developer of a conversational AI platform designed to facilitate customer engagement. The company's platform automates and orchestrates intelligent conversations with customers across channels such as the web, app, Alexa, Google Assistant, Interactive Voice Response, and email, enabling enterprises to unlock business potential at scale.

**Product Sub-Category**
Sales, Service, Commerce, Core HR and Payroll

**SAP Product Integration**
Cloud for Customer, SF Foundation, CP Integration Suite

**Technologies Used**
Artificial Intelligence, Generative AI

## YZR

**Leverage AI to clean, enrich, and integrate textual product data at scale**

→ https://store.sap.com/dcp/en/product/display-2001015647_live_v1/

→ www.yzr.ai

Developer of a data preparation platform intended for the automated normalization of textual data. The company's platform offers automatic data correction, artificial intelligence-powered tagging, multi-language data management and supercharged productivity, enabling organizations to normalize product information management and add intelligent and automatic tags.

**Product Sub-Category**
Data and Analytics, Commerce

**SAP Product Integration**
SAP Commerce Cloud

**Technologies Used**
Big Data, Machine Learning, Generative AI, Artificial Intelligence

## Zoovu

**AI content discovery platform that connects people to the products they need**

→ https://store.sap.com/dcp/en/product/display-2001012097_live_v1/

→ zoovu.com

Operator of a product discovery platform intended to find the right product and content. The company's platform utilizes artificial intelligence to offer a suite with a business-user-friendly interface that offers interactions with guided selling assistants, product configurators, and search tools as well as provides personalized insights, enabling businesses to improve sales, increase long-term customer satisfaction, and operational efficiencies.

**Product Sub-Category**
Commerce

**SAP Product Integration**
SAP ERP Private Cloud, SAP Commerce, S/4HANA Enterprise Mgmt, SAP ERP, Advanced Variant Configuration, SAP Configure  Price  Quote, SAP Commerce Cloud, Solution Sales Configuration Cloud

**Technologies Used**
Artificial Intelligence

# ERP & Financial Management

## AiVidens
### Predict customers' payment issues and prioritize collection efforts with AI
➔ https://store.sap.com/dcp/en/product/display-2001008206_live_v1/
➔ www.aividens.com

Developer of a credit risk management platform designed to help companies reduce bad debts and improve their cash flows. The company's platform is based on algorithms and artificial intelligence to determine the collection strategy aligned with the company objectives for a particular period as well as offers customer satisfaction, proactivity, creativity, and continuous learning, enabling companies to get help in decision making and set priorities for the short and medium-term goals.

**Product Sub-Category**
Data and Analytics, "Accounts Receivable, Billing, and Revenue Management"

**SAP Product Integration**
SAP Analytics Cloud Planning, SAP ERP, CP Integration Suite

**Technologies Used**
Artificial Intelligence

## BigID
### Operationalize data privacy, enterprise protection and privacy of personal data
➔ https://store.sap.com/dcp/en/product/display-2001011898_live_v1/
➔ www.bigid.com

Developer of a data-driven protection and privacy compliance platform designed to transform how enterprises protect and manage the privacy of personal data. The company's platform uses advanced machine learning and identity intelligence to help enterprises safeguard and assure the privacy of their sensitive data, reduce breach risk and meet compliance requirements for emerging data protection regulations like the European Union (EU) General Data Protection Regulation, enabling enterprises to safeguard and steward the important asset organizations to manage their customer data effectively.

**Product Sub-Category**
Commerce, "Governance, Risk, Compliance (GRC), and Cybersecurity"

**SAP Product Integration**
S/4HANA Cloud EX & STE, OP/HEC Support Offerings, SAP Commerce Cloud, Cloud Platform Pers - Other DB Serv

**Technologies Used**
Artificial Intelligence, Big Data, Machine Learning, Natural Language Processing

## Discover Dollar Inc
### Identify and resolve overpayments and revenue leakages using AI
➔ https://store.sap.com/dcp/en/product/display-2001015140_live_v1/
➔ www.discoverdollar.com

Provider of recovery analytic and merchandise analytic services intended to help retailers detect and resolve over-payments, missed discounts, and unrecovered vendor incomes. The company's services use algorithms that can scan through available data sources including unstructured data like emails and contracts and notify relevant people in organizations about potential over-payment and resolve it online, enabling retailers to discover hidden profits and capture over-payments.

**Product Sub-Category**
"Accounts Receivable, Billing, and Revenue Management"

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, S/4HANA Cloud EX & STE

**Technologies Used**
Big Data, Artificial Intelligence

## EAGLYS
### Bring your own key (BYOK) solutions to protect your data sovereignty
➔ https://store.sap.com/dcp/en/product/display-2001013381_live_v1/
➔ www.eaglys.co.jp

Developer of a secure computing platform designed to securely store, integrate, and analyze encrypted data using machine learning and deep learning. The company's solution facilitates the construction of secure analysis and AI operation platforms to safely and securely utilize big data among different databases, enabling corporations, and organizations to perform high-precision analysis, AI construction, operation, and data management all at once based on encrypted data.

**Product Sub-Category**
Data and Analytics

**SAP Product Integration**
SAP Analytics Cloud Planning, HANA DB

**Technologies Used**
Artificial Intelligence, Machine Learning

## Leanpath, Inc.
### Make food waste prevention and measurement everyday practice in your operation
➔ https://store.sap.com/dcp/en/product/display-2001013672_live_v1/
➔ www.leanpath.com

Developer of a food waste tracking technology intended to make food waste prevention and measurement everyday practice in the world's kitchens. The company's technology combines a built-in scale, camera, and touchscreen user interface that tracks real-time data on the number of food items bought per family and recommends approximate quantity that can be an excess purchase which can further be reduced while ordering food items from retail stores, enabling users to reduce food wastage by not selling or buying food above consumption limits, thus optimizing costs and savings.

➔ https://store.sap.com/dcp/en/product/display-2001014344_live_v1/mysupply-sourcing-plugin

➔ www.mysupply.ai

Developer of a digital sourcing platform intended for the full potential of procurement negotiations. The company's platform uses game theory and AI-driven algorithms to digitalize and optimize the entire tendering process, with seamless integration, automated negotiations, and sustainable sourcing, enabling clients to unleash their full potential of procurement negotiation strategy and automate the sourcing process.

**Product Sub-Category**
Procurement, Supplier Management

**SAP Product Integration**
HEC IaaS, Ariba Buying, Ariba Network - Buy-side, Ariba Network - Sell-side, Ariba Sourcing, Ariba Buying and Invoicing

**Technologies Used**
Artificial Intelligence

## Staple.iO
### Leverage AI to read, interpret and extract structured data from documents at scale
➔ https://www.concur.com/app-center/listings/600b21474b6f2e0015002fbc

➔ www.staple.io

Developer of a deep learning platform designed to convert documents into structured data. The company's platform helps to see extracted data and make edits to continuously improve data capture behavior and automate data extraction from documents, enabling businesses to liberate employees from mundane, repetitive financial workflows.

**Product Sub-Category**
Invoices and Payments, Travel and Expense

**SAP Product Integration**
Concur Invoice Processing

**Technologies Used**
Artificial Intelligence, Machine Learning

## Versed AI

**AI-powered supply chain visibility to monitor, manage and mitigate risk**

➜ https://store.sap.com/dcp/en/product/display-2001016517_live_v1/supply-chain-inherited-risk

➜ https://www.versed.ai/

Developer of a SaaS-based platform designed for the extraction of supply chain intelligence from natural language text and other data sources. The company platform focuses on the automatic extraction of supply chain maps from web documents as well as pinpointing possible points of failure in the supply chain, enabling organizations to help monitor, manage, and mitigate supply chain risks.

**Product Sub-Category**
Supplier Management, "Governance, Risk, Compliance (GRC), and Cybersecurity", Supply Chain Planning

**SAP Product Integration**
Integrated Business Planning (IBP), CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence

## WorkTrips.com (Formerly: Hotailors)

**AI-powered travel platform that helps companies save up to 30% on travel costs**

➜ https://www.concur.com/app-center/listings/5efcf06f412bd3001366be48

➜ www.worktrips.com

Developer of a travel management platform designed to facilitate online bookings of hotels, flights, and destinations by aggregating customer data in real time. The company's platform uses artificial intelligence to collect and utilize metadata, compare hotels and travel prices offered across various travel sites, and display the prices, offers, customer reviews, and feedback in real-time, enabling travel agencies to access, compare and book hotels by bringing all the data including price, cancellation policy, descriptions and images all in one place.

**Product Sub-Category**
Procurement, Travel and Expense

**SAP Product Integration**
Ariba Buying

**Technologies Used**
Artificial Intelligence

# SAP.iO AI Startup Partner Ecosystem for
# Supply Chain Management

## 4tiitoo
### Boost efficiency and ergonomics through eye control
→ https://store.sap.com/dcp/en/product/display-2001012866_live_v1/
→ www.4tiitoo.com

Developer of an AI-based enterprise SaaS designed for gaze control of computers. The company's software is used by numerous large companies across various industries as it helps to improve efficiency and ergonomics when using standard office software and provides more impact and trust in video conferences through natural eye contact and eye-controlled and across all video conferencing platforms, enabling businesses to control everyday devices and applications in a consistent and natural way.

**Product Sub-Category**
Manufacturing, External Workforce and Services
**SAP Product Integration**
SF other/cross, Cloud Platform Pers - HANA/ASE, OP/HEC Support Offerings, Fieldglass Cross Product

**Technologies Used**
Computer Vision, Speech Recognition, Artificial Intelligence

## 36ZERO Vision GmbH
### AI-based software solution for visual quality automation
→ https://store.sap.com/dcp/en/product/display-2001015666_live_v1/36zero-vision
→ 36zerovision.com

Developer of quality automation platform designed for visual quality inspection in real time. The company's platform uses artificial intelligence and machine learning to automatically tracks parts, anomalies, missing parts, and industrial defects, and inform necessary corrections in real-time, enabling clients to automatically carry out fault detection with increased transparency and productivity.

**Product Sub-Category**
Manufacturing

**SAP Product Integration**
Digital Manufacturing Execution, Digital Manufacturing Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning, Computer Vision

## Agranimo
### Micro-climate intelligence for fresh produce supply chain
→ https://store.sap.com/dcp/en/product/display-2001013563_live_v1/
→ www.agranimo.com

Developer of real-time micro-climate sensors and data analysis tools intended to increase farm productivity and increase climate adaptation of the food supply chain. The company's services consist of installing soil and environment sensors and providing software analytics and visualization dashboard, and agronomic support, enabling farming organizations to cut costs and increase yields, retailers to forecast supply and improve supplier management, and insurance companies to provide customized farm insurance.

**Product Sub-Category**
Data and Analytics, Supply Chain Planning

**SAP Product Integration**
SAP Analytics Cloud Planning, S/4HANA Enterprise Mgmt, CP Integration Suite, CF App RT & MC Infrastructure

**Technologies Used**
Machine Learning, IoT, Artificial Intelligence

## AI_Link
### Uninterrupted production line monitoring powered by AI & 5G technology
→ https://store.sap.com/dcp/en/product/display-2001013769_live_v1/
→ www.ailinking.com

Provider of 5G edge cloud services. The company develops 5G networks and mobile edge computing platforms to provide a full range of 5G services including terminals, base stations, and cloud platforms, enabling businesses in varioius industries such as transportation, real estate, communities, schools, industry, and tourism to have comprehensive 5G solutions.

**Product Sub-Category**
Data and Analytics, Manufacturing

**SAP Product Integration**
SAP Analytics Cloud Planning

**Technologies Used**
Artificial Intelligence, 5G

## AltumLab/AiBruna
### Predict quality of raw material and optimize production processes
→ https://store.sap.com/dcp/en/product/display-2001014834_live_v1/
→ www.bruna.ai

Developer of productive management software designed to optimize the operating parameters of each part of the production process. The company uses the full potential of artificial intelligence to optimize the efficient use of all production lines, reduce production costs, energy use, and waste reduction, and free the use of the plant, helping clients to increase the profitability of a product.

**Product Sub-Category**
Procurement

**SAP Product Integration**
SAP ERP Private Cloud, Mobile Material Availability, S/4HANA Enterprise Mgmt, AR Warehouse Picker, Operational Process Intelligence

**Technologies Used**
Artificial Intelligence, Predictive Analytics, Big Data

## Andonix
**Connecting workers with machines and supervisors so that factories produce more**
➜ https://store.sap.com/dcp/en/product/display-2001015544_live_v1/
➜ www.andonix.com

Developer of workstation platform intended to empower and connect front-line automotive manufacturing workers. The company's platform offers value by effectively enhancing operational performance, improving communication and reporting tool that offers valuable insights into people and process, enabling customers in the automotive manufacturing sector to find ways to train and supervise workers and enhance on-the-job training.

**Product Sub-Category**
Manufacturing

**SAP Product Integration**
SAP ERP Private Cloud, SAP ERP

**Technologies Used**
Artificial Intelligence

## AutoScheduler.AI
**Intelligent warehouse orchestration platform that improves productivity**
➜ https://store.sap.com/dcp/en/product/display-2002000170_live_v1/autoscheduler-autopilot
➜ autoscheduler.ai

Developer of warehouse management systems focused on accelerating critical activities in warehouses. The company's software manages dock scheduling, loading, unloading, case picking and the creation of transfer orders, enabling companies to manage inventory and logistics efficiently.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
Extended Warehouse Management, S/4HANA Extended Warehouse Mgmt, Extended Warehouse Mgmt for Fashion, EWM add-on for Consumer Products

**Technologies Used**
Artificial Intelligence

## C2RO
**Privacy-aware AI video analytics solutions for physical spaces**
➜ https://store.sap.com/dcp/en/product/display-2001011630_live_v1/
➜ www.c2ro.com

Developer of a proprietary universal machine vision artificial intelligence software designed to leverage the power of the cloud while providing high performance and precision. The company's platform uses proprietary real-time cloud AI to provide data-driven businesses with global analysis and recognition tools to transform their physical spaces into highly personalized and interactive smart environments, enabling businesses to develop advanced human interaction and behavioral analysis, which can be leveraged to increase their efficiency or reshape and enhance their customers' on-site experiences.

**Product Sub-Category**
Data and Analytics

**SAP Product Integration**
SAP Analytics Cloud Planning, S/4HANA Enterprise Mgmt, SAP Datasphere, Data Intelligence Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning, Computer Vision, Big Data

## CamCom Technologies Private Limited
**AI platform for defect/damage assessment of automobiles**
➜ https://store.sap.com/dcp/en/product/display-2001014195_live_v1/
➜ www.camcom.ai

Developer of an artificial intelligence-based quality assessment platform intended to construct the product description through image submission. The company's platform provides Natural Language Image Processing Service (NLP) to analyze uploaded images, classify the product, detect their details and provide a description, enabling clients to make product discoveries hassle-free for business continuity.

**Product Sub-Category**
Enterprise Asset Management

**SAP Product Integration**
S/4HANA Enterprise Mgmt, CP Integration Suite, Digital Manufacturing Cloud

**Technologies Used**
Artificial Intelligence, Machine Learning, Computer Vision

## ChAI
**Create straightforward, impartial, explainable commodity price forecasts**
➜ https://store.sap.com/dcp/en/product/display-2001011487_live_v1/
➜ www.chaipredict.com

Developer of a commodity price prediction platform intended to eliminate the chance of commodity price volatility. The company's platform leverage artificial intelligence, satellite imagery, freight data, economic statistics, and financial information to make accurate predictions ranging from one day to one year into the future, enabling clients to manage their cash flow, investments, and hedging strategies accordingly.

**Product Sub-Category**
Data and Analytics, Supply Chain Planning

**SAP Product Integration**
SAP ERP

**Technologies Used**
Artificial Intelligence

## Chekkit Technologies
### Traceability & serialization solution for last-mile consumer engagement
→ https://store.sap.com/dcp/en/product/display-2001013860_live_v1/
→ www.chekkitapp.com

Developer of assets and inventory tracking technology designed to offer consumer intelligence and anti-counterfeiting services. The company's technology offers real-time product authentication, consumer engagement and supply chain tracking services to producers of quality human-friendly products, enabling FMCG and pharmaceutical producers to sell more products, connect with consumers and regain market share lost to counterfeit products.

**Product Sub-Category**
Enterprise Asset Management, Supply Chain Logistics

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, Advanced Track&Trace Pharma

**Technologies Used**
Blockchain, Artificial Intelligence

## Clarifruit
### Optimize quality control across your entire produce supply chain
→ https://store.sap.com/dcp/en/product/display-2001012106_live_v1/
→ www.clarifruit.com

Developer of artificial intelligence-powered SaaS platform designed to measure quality, freshness, and durability for the fresh produce industry. The company's automated quality control platform, leveraging proprietary computer-vision technology and big data and analytics capabilities, empowers the world's retailers, wholesalers, marketing companies, and growers to make data-driven business decisions to reduce waste and maximize profitability, enabling businesses to make data-driven decisions, resulting in a better match of quality of fresh produce to customer demand and favorable revenue opportunities.

**Product Sub-Category**
Manufacturing

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt

**Technologies Used**
Computer Vision, Artificial Intelligence

## Cogniac Corporation
### AI-based deep learning software solution to automate visual inspection tasks
→ https://store.sap.com/dcp/en/product/display-2001011428_live_v1/
→ www.cogniac.ai

Operator of a visual intelligence platform intended to redefine human performance, productivity and efficiency by maximizing the value of visual data. The company's platform combines upgraded artificial intelligence models, based on convolutional neural networks, cloud computing and big data management, enabling customers to achieve industry standards through visual data management and automation.

**Product Sub-Category**
Manufacturing, Enterprise Asset Management

**SAP Product Integration**
ASE

**Technologies Used**
Artificial Intelligence, Computer Vision

## COI Energy Services
### Full-service digital energy management solution to bring demand management in-house
→ https://store.sap.com/dcp/en/product/display-2001006508_live_v1/
→ www.coienergy.com

Developer of an energy optimization platform intended to eliminate waste, save on energy costs, and protect the environment through artificial intelligence. The company's platform allows it to buy and sell capacity and eliminates energy waste by optimizing energy behaviors with the ability to monetize energy assets for use with demand response, energy efficiency, and renewable energy markets, enabling utilities and businesses to become energy efficient by getting custom alerts on energy wastage.

**Product Sub-Category**
Data and Analytics, Enterprise Asset Management

**SAP Product Integration**
BI Suite, HANA DB, OP/HEC Support Offerings

**Technologies Used**
Machine Learning, Artificial Intelligence

## Darvis
### Maximize operational efficiency with AI-driven virtual mapping
→ https://store.sap.com/dcp/en/product/display-2001016506_live_v1/darvis-ai
→ https://www.darvis.com/

Developer of an artificial intelligence (AI)-powered asset management platform designed to provide businesses with real-time insights and analytics on their physical assets and operations. The company's product includes digital services, like inventory track and trace, Optical-Character-Recognition (OCR), fill level detection, and more and its platform uses proprietary artificial intelligence algorithms to detect, zoom in, and analyze the object of interest while georeferencing it onto a virtual map, enabling businesses to monitor key metrics and track the location and movement of assets in real-time.

**Product Sub-Category**
Enterprise Asset Management, Manufacturing

**SAP Product Integration**
Digital Spaces, Supply Chain Info Center, HEC IaaS, SAP Personnel Admin, SF Foundation, CP Extension Factory Kyma RT, BN Supply Chain Collaboration

**Technologies Used**
Artificial Intelligence, Computer Vision

## Drivin
**Drive efficiencies in your logistics operation while improving your customers experience**
➔ https://store.sap.com/dcp/en/product/display-2001015667_live_v1/
➔ www.driv.in

Developer of a SAAS-based transportation management platform intended to serve the fleet management sector. The company's platform evaluates, manages, monitors and optimizes routes, enabling logistic industries to optimally manage the fleet in real time.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
Transportation Management, Logistics Business Network

**Technologies Used**
Artificial Intelligence, Machine Learning

## Everstream Analytics
**Keep the world moving by keeping risk out of the way**
➔ https://store.sap.com/dcp/en/product/display-2001012109_live_v1/
➔ www.everstream.ai

Developer of a supply chain risk management platform designed to leverage machine learning and Artificial intelligence AI to predict, assess and mitigate the risk of supply chain disruptions. The company's platform helps to keep track of risk in combination with business performance indicators to ensure business continuity, build risk profiles, and identify critical hotspots using heat maps to mitigate risks and turn potential disruptions into a competitive advantage, enabling companies to improve the ability to monitor and respond to potentially disruptive events as well as visualize, track, and protect their business operations.

**Product Sub-Category**
Extended Planning and Analysis, Supply Chain Planning

**SAP Product Integration**
Logistics Business Network

**Technologies Used**
Predictive Analytics, Artificial Intelligence, Machine Learning

## Flowlity
**Technology to plan and optimize your inventories better and faster than ever before**
➔ https://store.sap.com/dcp/en/product/display-2001011427_live_v1/
➔ www.flowlity.com

Developer of supply chain management software designed to connect to customers and suppliers in a global flow network. The company's platform computes the optimal stock level and replenishment using a combination of artificial intelligence and optimization in real-time, enabling companies to visualize the order status, inventory levels, and planning.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
S/4HANA Enterprise Mgmt

**Technologies Used**
Artificial Intelligence, Machine Learning

## Geek+
**Logistics robot product lines and solutions that enable enterprises to achieve intelligent logistics upgrades**
➔ https://store.sap.com/dcp/en/product/display-2001013875_live_v1/
➔ www.geekplus.com.cn

Developer of robotics technology designed to improve automation for logistics and warehouses. The company applies advanced robotics and artificial intelligence technologies to realize high-flexibility and intelligent logistics automation solution, providing clients with a reliable and one-stop enterprise-level service with strong technological strength, customer understanding, and thorough after-sales service quality systems.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, S/4HANA Extended Warehouse Mgmt, CP Integration Suite

**Technologies Used**
Robotics/Drones, Artificial Intelligence

## GenLots SA
**Harmonize real-world data to optimize supply plans, inventory, transactions and prices using machine learning.**
➔ https://store.sap.com/dcp/en/product/display-2001012923_live_v1/
➔ www.genlots.com

Developer of enterprise resource planning (ERP) software designed to bring machine learning to the supply chain. The company's platform provides savings from total purchasing costs and gets a direct impact on the gross margin and also handles factors such as quantity discounts, storage constraints, perishable items, and many more, enabling clients to get optimal order plans anytime and increase profits while maintaining existing information technology (IT) infrastructure and business processes.

**Product Sub-Category**
Supply Chain Planning

**SAP Product Integration**
S/4HANA Public Cloud edition

**Technologies Used**
Artificial Intelligence, Machine Learning

## goFlux
**Leading B2B freight trading platform for transportation heavy users in Brazil**
→ https://store.sap.com/dcp/en/product/display-2001015313_live_v1/
→ goflux.com.br

Operator of a SAAS marketplace platform designed to connect companies and service providers. The company's platform allows companies to connect to service providers such as carriers and logistics operators and gives transparency to the process of quotation and contracting of transport, enabling shippers, transporters, and suppliers to boost the business.

**Product Sub-Category**
Supply Chain Logistics, Sourcing and Contracts

**SAP Product Integration**
Mobile Material Availability, S/4HANA Transportation Management

**Technologies Used**
Artificial Intelligence

## GROUND
**Enhance put-away and picking activities while reducing unnecessary walks**
→ https://store.sap.com/dcp/en/product/display-2001008372_live_v1/
→ www.groundinc.co.jp

Operator of a logistics technology company intended to empower logistics organizations with advanced technologies. The company offers an artificial intelligence-based robot that performs various logistics-related tasks different from conventional material handling, enabling logistic businesses to adapt easily to volatile and unpredicted customer demands.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
SAP ERP

**Technologies Used**
Artificial Intelligence, Robotics/Drones, Predictive Analytics

## H3 Dynamics
**Infrastructure inspections using robots & AI**
→ https://store.sap.com/dcp/en/product/display-2001008464_live_v1/
→ www.h3dynamics.com

Developer of telerobotics drones designed to provide real-time response services and analysis. The company's robotic drone technology turns vast amounts of complex images, video, LiDAR, and other sensor data into expert-validated inspection reports as a cloud-based service for asset owners, operators, contractors, and financial services companies, enabling clients to gain access to aerial analytics or delivery at a minute's notice.

**Product Sub-Category**
Enterprise Asset Management, Manufacturing

**SAP Product Integration**
CP Integration Suite, CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence, Robotics/Drones

## HyBird
**Automated inspections for high-consequence assets**
→ https://store.sap.com/dcp/en/product/display-2001008583_live_v1/
→ www.hybirdtech.com

Developer of a drone technology designed to manage and interact with site data from anywhere. The company's technology offers drones providing commercial aerial inspection, enabling clients to access places with climatic conditions and also inside unsafe structures.

**Product Sub-Category**
Enterprise Asset Management, Manufacturing

**SAP Product Integration**
SAP ERP, CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence, Robotics/Drones

## Inspectorio Inc
**Manage supply chain risks through digitalized quality, compliance, and production tracking programs**
→ https://store.sap.com/dcp/en/product/display-2001013138_live_v1/
→ www.inspectorio.com

Developer of a quality inspection and compliance verification network platform designed to optimize quality, operations, and sustainability. The company's platform includes real-time data sharing, predictive-recommended action plans, defect prediction algorithm, risk assessment, the adaptive inspection process, and other related functions, enabling forward-thinking organizations to create continuous and mutual value, secure operational efficiency, and increase return on innovation investments.

**Product Sub-Category**
Product Lifecycle Management, Supply Chain Planning

**SAP Product Integration**
S/4HANA Enterprise Mgmt

**Technologies Used**
Artificial Intelligence, Generative AI

## Kinexon GmbH
### Smart technologies that take your performance to the next level
➔ https://store.sap.com/dcp/en/product/display-2001013991_live_v1/
➔ www.kinexon.com

Developer of specialized IoT technologies designed to connect and automate operations. The company's technology gathers localization data in real-time and translates it simultaneously into powerful actions for industries, sports, and entertainment entities, enabling clients to connect assets, automate processes, and generate insights as quickly and intelligently as possible with real-time intelligence.

**Product Sub-Category**
Manufacturing

**SAP Product Integration**
S/4HANA Enterprise Mgmt, Digital Manufacturing Cloud

**Technologies Used**
Artificial Intelligence, IoT

## LiLz
### Solution for simplifying inspections
➔ https://store.sap.com/dcp/en/product/display-2001008359_live_v1/lilz-gauge
➔ www.lilz.jp

Operator of a cloud-based platform intended to make on-site work easier. The company's platform integrates machine learning and IoT technologies to offer site inspection services and remotely perform visual patrol inspections such as analog meters, enabling clients to streamline operations and increase productivity.

**Product Sub-Category**
Enterprise Asset Management

**SAP Product Integration**
SAP Marketing Cloud, SAP ERP

**Technologies Used**
Artificial Intelligence, Machine Learning, IoT

## LiveEO
### Keep infrastructure operational with cost-effective insights from space
➔ https://store.sap.com/dcp/en/product/display-2001008552_live_v1/
➔ www.live-eo.com

Developer of real-time earth observation technology designed for improved safety and operational efficiency. The company's platform leverages satellite imagery to provide infrastructure monitoring in the verticals of railway, electricity, and pipelines, enabling industries to save on operational expenses and avoid dangers from vegetation, height changes, and third-party interactions.

**Product Sub-Category**
Enterprise Asset Management

**SAP Product Integration**
SAP ERP, Product Compliance, CP Integration Suite, Ariba Sourcing, Ariba Supplier Risk

**Technologies Used**
Satellite Imagery, Artificial Intelligence

## MaintainX
### Modern maintenance management built for the new industrial workforce
➔ https://store.sap.com/dcp/en/product/display-2001013711_live_v1/
➔ https://www.getmaintainx.com/

Operator of the work order and procedure digitization platform intended to empower frontline workers with mobile-first digitized workflow. The company's platform offers environmental and training checklists, tooling and gauge reporting, auditing workflows and quality control inspections, enabling plant managers to become efficient operators by delivering real-time business insights from the field.

**Product Sub-Category**
Supply Chain Planning, Enterprise Asset Management

**SAP Product Integration**
HANA DB, S/4HANA Enterprise Mgmt, CP Integration Suite

**Technologies Used**
Artificial Intelligence

## Memorence AI
### AI learning platform for enterprise visual quality inspection
➔ https://store.sap.com/dcp/en/product/display-2001008499_live_v1/
➔ www.memorence.ai

Developer of an artificial intelligence learning platform intended to provide visual learning and recognition systems for enterprises and consumers. The company's platform provides smart and faster local learning and recognition systems that can improve product quality and operation efficiency in any business, enabling customers to use artificial intelligence to verify and confirm the benefits of process improvement in a business.

**Product Sub-Category**
Enterprise Asset Management, Manufacturing

**SAP Product Integration**
OP/HEC Support Offerings

**Technologies Used**
Artificial Intelligence, Machine Learning, Computer Vision

## Partsimony
### Powering adaptive supply chains, optimized for sustainability and resilience
→ https://store.sap.com/dcp/en/product/display-2001016456_live_v1/partsimony-ai-powered-adaptive-manufacturing-supply-chains
→ https://partsimony.com/

Developer of an intersection platform designed to connect inventors and businesses. The company's platform connects innovators and manufacturers with vetted local or large manufacturers to simplify the creative process and achieve lower manufacturing costs and improve the supply chain, enabling businesses to find and collaborate effectively with existing or new manufacturer networks across multiple projects.

**Product Sub-Category**
Invoices and Payments, Data and Analytics, Product Lifecycle Management, Manufacturing, Supply Chain Planning, Supplier Management, Sourcing and Contracts, Procurement

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, Supply Chain Info Center, Supply Network Collaboration, Supply Chain Performance Mgmt, CP Integration Suite, Sourcing Simul. & Optim. for Industries, BN Supply Chain Collaboration

**Technologies Used**
Artificial Intelligence

## Queen of Raw
### Automate buying and selling excess inventory with sustainability benefits
→ https://store.sap.com/dcp/en/product/display-2001008381_live_v1/
→ resale.queenofraw.com

Developer of a science-based software designed to take action on excess inventory, measure, report and turn pollution into profit. The company's software uses proprietary algorithms developed in line with science-based standards to measure the environmental and economic impacts of activities on-chain, enabling clients to meet regulatory requirements, reduce inventory losses and build a financially successful business at the product and operational level.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
SAP ERP

**Technologies Used**
Blockchain, Artificial Intelligence

## Revuze
### Consumer insights from online reviews powered by Generative AI
→ https://store.sap.com/dcp/en/product/display-2001013116_live_v1/
→ www.revuze.it

Developer of cloud-based business software designed to offer an all-automated customer opinions analyzer. The company's software analyzes customer reviews, online opinions, and offline pieces of unstructured data to deliver experience-related insights and intelligence, enabling clients to monitor and manage customer experiences and maintain a view of what customers are saying about the competition.

**Product Sub-Category**
Product Lifecycle Management

**SAP Product Integration**
SAP Enterprise Product Development

**Technologies Used**
Artificial Intelligence, Generative AI

## Sedna
### Transaction and collaboration workflow management
→ https://store.sap.com/dcp/en/product/display-2001008353_live_v1/
→ www.sedna.com

Developer of a maritime email data platform designed to lighten the manual work of managing email and presenting data so teams can drive commercial success. The company's software provides businesses with a competitive edge by seamlessly connecting an organization's ecosystem with their communication, leveraging data and messages to empower teams with vital context and faster ways to manage email, enabling teams to bring collaboration, scalability, and efficiency to company workflows.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
SAP ERP, CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence, Natural Language Processing, Machine Learning

## Shippeo
### Instant access to predictive and real-time information for all your deliveries
→ https://store.sap.com/dcp/en/product/display-2001008171_live_v1/
→ www.shippeo.com

Developer of a supply chain platform designed for real-time and multimodal transportation visibility. The company's platform integrates with transportation management systems, telematics products, and electronic logging device technology among other data sources to give real-time location data, delivery tracking, and a proprietary algorithm to calculate a shipment's estimated time of arrival, enabling companies to lower the transportation costs, increase customer satisfaction, and achieve more sustainable operations.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
OP/HEC Support Offerings

**Technologies Used**
Artificial Intelligence

## Solena Ag Inc.
### Detect crop diseases early with soil pathogen risk alerts
➜ https://store.sap.com/dcp/en/product/display-2001015488_live_v1/
➜ www.solena.ag

Developer of biological capital technologies designed to assist in increasing agricultural production by understanding, preserving and calibrating soil diversity. The company's technologies measure appraise and improve farmers' biological capital by offering a sampling kit to provide measurement and valuation results for the soil, enabling farmers to get access to tools to achieve a sustainable and environmentally friendly approach to current-day agriculture.

**Product Sub-Category**
Supply Chain Planning

**SAP Product Integration**
Connected Agriculture, CF App RT & MC Infrastructure

**Technologies Used**
Artificial Intelligence

## Specright
### Digitize and manage your specs for products, ingredients, packaging & more
➜ https://store.sap.com/dcp/en/product/display-2001013093_live_v1/
➜ www.specright.com

Developer of a cloud-based enterprise specification management software designed to optimize for sustainability at any phase of the product life cycle or stage of the supply chain. The company's platform digitizes and manages all specification data from raw materials, ingredients and formulas to packaging and finished goods and collaborates across teams and suppliers, enabling clients to digitize, map and take action across their supply chain to reduce costs, increase profitability and drive sustainability.

**Product Sub-Category**
Supply Chain Planning

**SAP Product Integration**
Master Data Governance

**Technologies Used**
Artificial Intelligence

## StreamwiseDI Pty Ltd
### Monitor, manage, and automate your wastewater in real-time
➜ https://store.sap.com/dcp/en/product/display-2001012424_live_v1/
➜ www.streamwisedi.com

Developer of enterprise-grade artificial intelligence (AI) software designed to drive digital transformation in industrial applications through data automation and decision intelligence. The company platform offers various features such as lowering operational costs, improving compliance, reducing operational risk, and increasing data transparency, and offers a solution that reduces the operating expenses of wastewater operations by 60 percent through significant savings on chemical, asset management, compliance, and energy costs.

**Product Sub-Category**
Enterprise Asset Management

**SAP Product Integration**
Asset Intelligence Network, CF App RT & MC Infrastructure

**Technologies Used**
Machine Learning, Digital Twin, Artificial Intelligence

## ThroughPut Inc
### Industrial AI for supply chain optimization and predictive replenishment
➜ https://store.sap.com/dcp/en/product/display-2001015623_live_v1/
➜ www.throughput.world

Developer of artificial intelligence-driven supply chain optimization platform designed for companies to increase output, quality, profitability, and sustainability through bottleneck elimination. The company's platform provides real-time root cause analysis for end-to-end supply chain management using existing time-stamped data by leveraging powerful artificial intelligence algorithms and practices, enabling decision-makers to take real-time corrective measures and save time, money, resources, and brand integrity.

**Product Sub-Category**
Supply Chain Planning

**SAP Product Integration**
S/4HANA Public Cloud edition, S/4HANA Enterprise Mgmt, CP Integration Suite, SAP Datasphere

**Technologies Used**
Artificial Intelligence

## Unravel Carbon
### AI-powered decarbonization platform that helps organizations measure, reduce, and report their carbon emissions
➜ https://store.sap.com/dcp/en/product/display-2001015123_live_v1/
➜ www.unravelcarbon.com

Operator of a decarbonization platform intended to reduce carbon footprint and fight against climate change. The company's platform uses a proprietary carbon emission factor model to convert any company's accounting data into full supply chain carbon data and also provides detailed emission analytics, enabling companies to measure, reduce, and report their carbon emissions.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
S/4HANA Cloud EX & STE

**Technologies Used**
Artificial Intelligence

## Verusen

**Predictive inventory for manufacturing and supply chains**
→ https://store.sap.com/dcp/en/product/display-2001008869_live_v1/
→ www.verusen.com

Developer of a vendor support management tool designed to automate the entire sales and procurement process for materials management. The company's tool provides clear EP data insights, process automation and load balance while its neural artificial intelligence merges and structures the data records across locations and divisions, enabling manufacturers to run leaner operations and avoid downtime by analyzing their parts inventory efficiently across their entire network.

**Product Sub-Category**
Supply Chain Planning, Manufacturing

**SAP Product Integration**
SAP ERP

**Technologies Used**
Artificial Intelligence, Machine Learning

## Wise Systems

**Autonomous dispatch and routing for today's dynamic world**
→ https://store.sap.com/dcp/en/product/display-2001011452_live_v1/
→ www.wisesystems.com

Developer of an automated dispatching and routing software designed to regulate delivery route planning. The company's software uses machine learning to automatically schedule, monitor, and adjusts routes in real-time, considering multiple variables and constraints, enabling fleet managers to optimize transportation operations and make deliveries efficient at decreased costs.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
S/4HANA Enterprise Mgmt

**Technologies Used**
Artificial Intelligence, Machine Learning

## WoocarJO

**Combine AI and behavioral sciences for fleet management, driving behavior and CO2 emission reduction**
→ https://store.sap.com/dcp/en/product/display-2001015249_live_v1/
→ www.woocar.io

Developer of a fleet management platform intended to reduce road incidents. The company's platform helps to measure metrics such as the use of the cell phone when driving, generating audio alerts, and controlling driver routes, enabling drivers to reduce their fleet carbon footprint.

**Product Sub-Category**
Supply Chain Logistics

**SAP Product Integration**
Logistics Business Network

**Technologies Used**
Artificial Intelligence

## Zerynth

**Industrial IoT & AI platform to connect any industrial machinery**
→ https://store.sap.com/dcp/en/product/display-2001015650_live_v1/
→ www.zerynth.com

Developer of a business platform intended to assist developers, system integrators, and businesses. The company's platform offers products such as a device manager to securely register, organize, monitor, update, and remotely manage IoT devices at scale as well as a range of engineering services, enabling clients to get tools for creating connected devices and for the digitization of industrial processes.

**Product Sub-Category**
Enterprise Asset Management, Manufacturing

**SAP Product Integration**
S/4HANA Enterprise Mgmt, Cloud Platform Pers - HANA/ASE, HANA Cloud, CF App RT & MC Infrastructure

**Technologies Used**
IoT, Artificial Intelligence, Blockchain
