CODING COMPETITION

DESCRIPTION:

In this competition, we will give some questions to solve in any programming language. This will help to boost knowledge and problem-solving skills. We will host this coding contest on the HackerRank official platform. Before the contest, we will arrange a workshop in which we will give some knowledge about competitive coding and teach them some important topics of programming, and based on that topic we will give questions in the contest. This will also help those students who don't have any idea about coding.

This coding contest will be separate year wise. For 1st year students, there will be low-level questions. For 2nd year student low and easy level questions. For 3rd year student's low, easy and medium level questions. For 4th year student's low, easy, medium and high-level questions will be there. The time duration of this contest will be 3hr those students who submit their code early and correct will be winner of this contest.

ROUNDS:

There will be only one round for each year. Those students who have highest rank will be the winner of this competition.

TEAM-MEMBERS:

We have created team of 6 members. To know about team members

EQUIPMENT:

1. Availability of Lab.
2. Availability of PC and Wi-Fi.

In the FIT Week Presents Workshop

Title: All About Software Development

Description:

As we are from technical backgrounds the most promising and highly professional skill now the day is Software Development, every student of our IT department must acquire these skills to produce real-life solutions to a problem using Software.

I attempt to provide the learning which I gathered in these 3 years of B-Tech to all the students of our IT department. It starts from the problem statement, requirement gathering, problem solution and crafting of the product (app/game with frameworks like Flutter and Unity 3D). The AIM is to form a community of developers dedicated to building their apps and games so that every student could make their semester project and which will make their resume lucrative.

Rounds:

- 1) A seminar will be taken to tell students about the perks of software development, benefits, objectives and goals, that they can pursue. I will point light on my little development background and what I achieved doing in this 3 year of B-tech course.
- 2) A workshop will be taken in which App development will be taught using Flutter Framework.
- 3) In the end, some quizzes around the Framework will be taken and a small problem statement will be given, from which an app should be crafted as a challenge, the students who stand on the expectations will declare as winners.

No of Members:

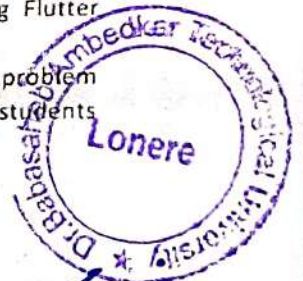

We are a team of six people, including 4 of 3rd Yr, and 1 of each from 1st and 2nd Yr.

Equipment:

- 1) Projector or TV screen for the seminar
- 2) WIFI and PC
