At Sussex, we believe in making *beautifully* functional products, manufactured entirely in Australia

*Making it Right*

We know, that Making it Right today, means Making it Right for tomorrow. Making with the highest principles, for a greener and more sustainable future.

Making it Right means made to last, timeless, beautiful and engineered to perfection.

Our four pillars that drive and support Making it Right:

### Sustainability Leadership

As the first and only Australian tapware manufacturer to reach carbon neutrality, we are now the country's most sustainable tapware manufacturer by delivering on our promises and leading the way for others to follow.

### Our People

We are a family of like-minded individuals, from our local Australian craftsmen to the dedicated partners and conscious customers that share our values. This ever-growing, living community is united under one cause: to do better, to be better, and to make better.

### Manufacturing Mastery

Mastery is a long-term journey. For us, this means finding the balance between traditional techniques and the latest cutting-edge technology as well as competing on the world stage while remaining entirely in Australia.

### Design Craftsmanship

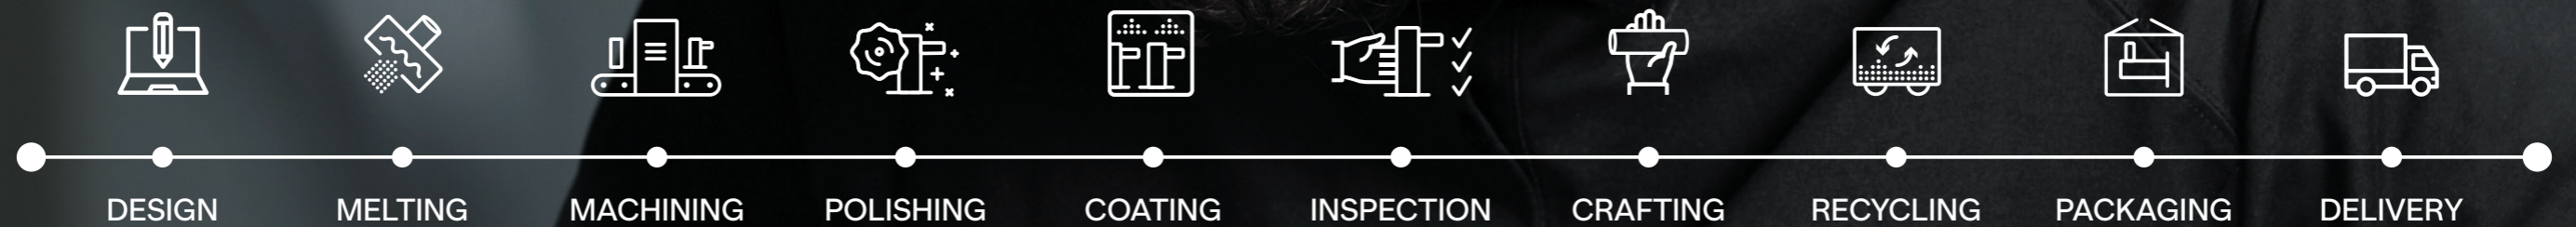

Our story of craftsmanship began in 1997 with our founder, whose passion and pride in craft still lies in our heart. You'll see it in our tapware, designed for mindful moments. Take your time to enjoy our time spent.

# Australian made from start to finish

SCALA  
AUSTRALIAN MADE

Sussex is a unique Australian manufacturer that produces tapware and accessories from its own foundry and workshop in Melbourne. We don't believe in sourcing product from overseas because we prefer to create our own original designs and employ our own dedicated artisans. We take full responsibility for the social and environmental impact of everything we make.

We are here to stay.

# We are the most *sustainable* tapware company in Australia

Sustainability has always been in our DNA.

Because it's so essential for us, we've built our purpose, vision, and values around sustainability. Our ambitious goal of transforming our manufacturing operation and all our products to reach net zero emissions hasn't been easy, but it was necessary.

This is because we're committed to Making it Right. It means putting our future first.

We hope our accomplishments inspire others as much as they inspire us, and we challenge others to take bold action.

Our commitment to sustainability:

## Embracing renewable energies

We have installed solar panels to reduce our emissions by 332 tonnes and upgraded energy systems to reduce yearly greenhouse gasses.

## Recycling materials

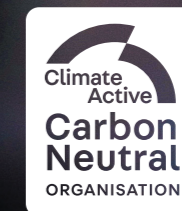

We source most of our raw metals and manufacture our tapware in Australia. Our operation is a fully cyclical process, from the raw materials in our foundry to product delivery.

## Integrating sustainable technologies

We are continuously refining our processes to minimize operational waste and maximize recycling opportunities at every step. This year we installed state-of-the-art, energy-efficient PVD technology with a fully automated cleaning process for water filtration and recycling.

## Australia's first Carbon Neutral tapware manufacturer

We've done it BIG in 2021 – not only are we Australia's first carbon neutral tapware company, but we are also proudly an official member of the Climate Active network, one of the strictest carbon neutral certification bodies in the world.

Our Sussex  
story is a *family*  
adventure to build  
an Australian  
business with  
sustainability at  
its heart

*Nick van Putten*

**Nicolaas Johannes van Putten**  
Our founder

SUSSEX

In 1997, we were founded by Dutch watchmaker and jeweller Nicolaas Johannes van Putten. Guided by his spirit of adventure and courage to dream big, we confidently look forward, while respecting his traditional roots. Today we continue this vision to make the best product and leave an Australian-made legacy that creates a sustainable future for our next generation.

# Introducing LUXPVD<sup>®</sup> to Australia - the next generation of *finishes*

At Sussex, we have the bold ambition  
to be an innovative and world-class  
Australian manufacturer.  
Our LUXPVD<sup>®</sup> technology reflects  
this design and engineering  
excellence by offering luxurious,  
unique, and exceptional finishes.

# LUXPVD<sup>®</sup>

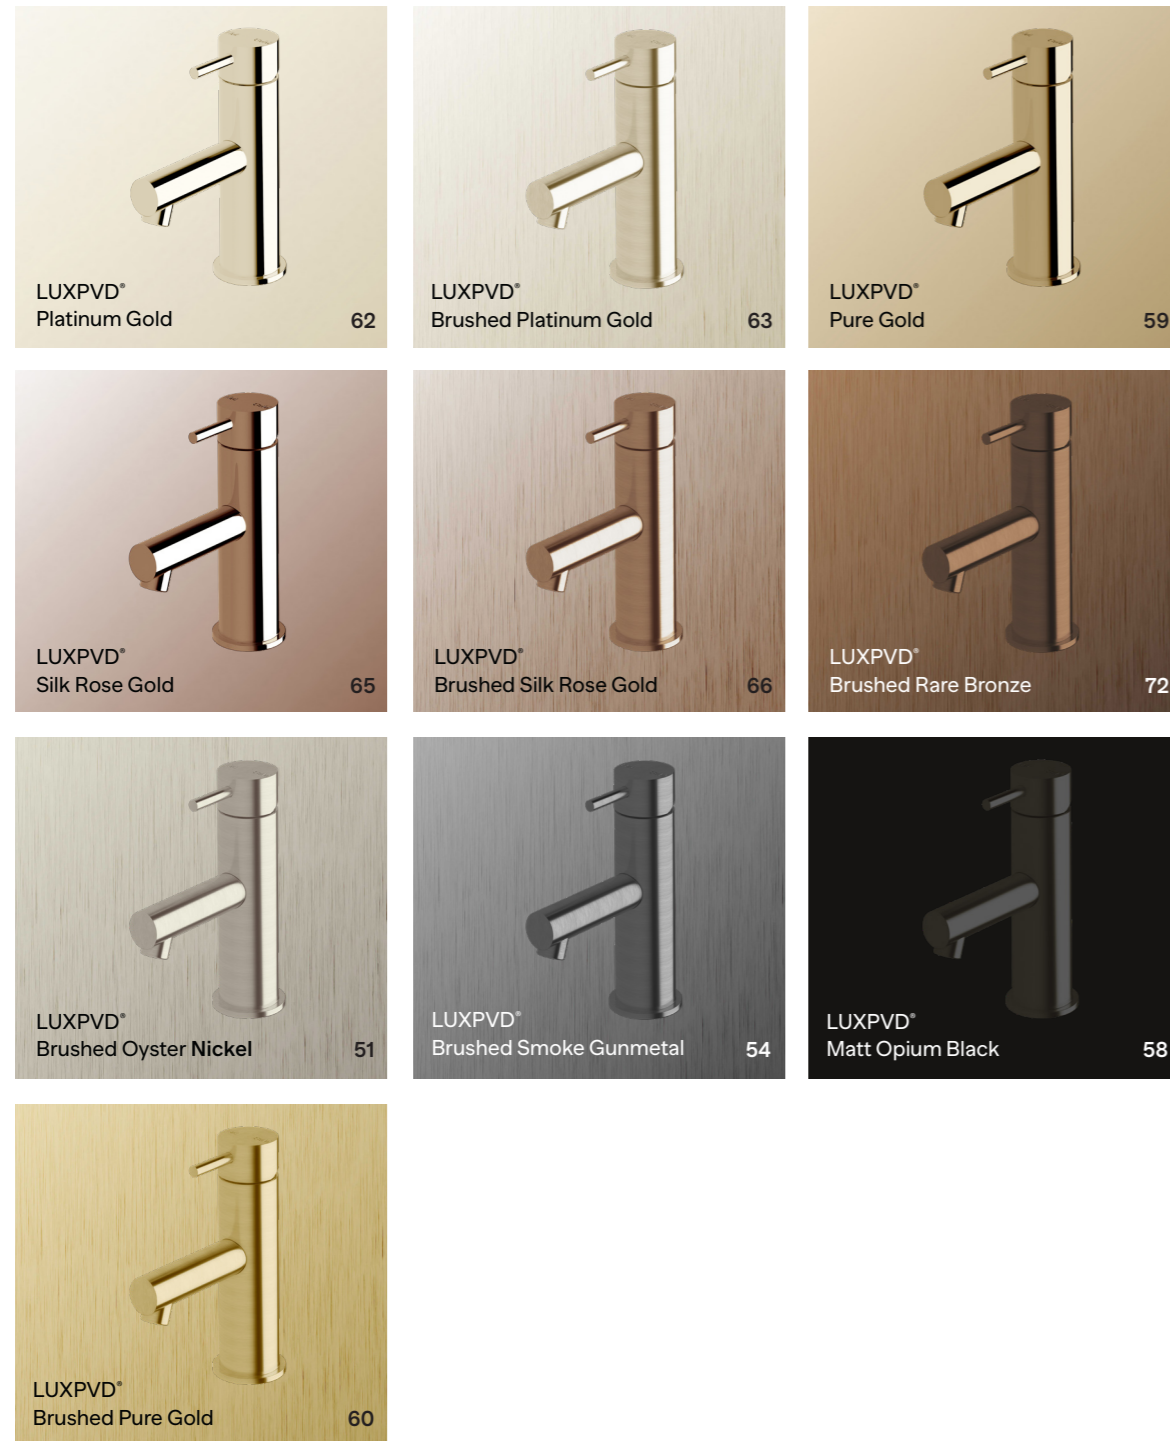

*Perfect finishes  
every single time.*

Required for all floor mount mixers installed.  
Solid brass body for maximum strength.  
Solid stainless steel base plate.

A unique innovation

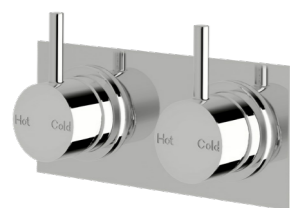

Masterfit is an innovative all-in-one installation unit for our Mixer Systems that saves time and labour costs. Its proven simplicity eliminates the need for precise measuring of the distance between fittings as the tap alignment takes care of itself.

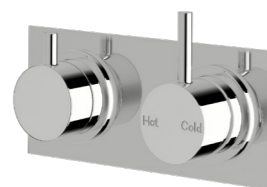

## Mixer systems

Scala mixer systems are integrated with Sussex Masterfit. This labour-saving installation system requires minimal effort. Backplates, mixers and outlets fit perfectly every time.
