

# ParaGREEN<sup>™</sup> Vegetated Roof Solutions

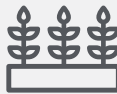

ParaGREEN Vegetated Roof Solutions provide integrated, single-source assemblies that offer the flexibility to meet your design and technical requirements.

## Siplast<sup>®</sup> ParaGREEN<sup>™</sup> Assemblies

### EXTENSIVE MODULAR

ParaGREEN Vegetated Roof Modules arrive at the project fully vegetated, delivering instant impact. Each module is 12"x 24", and available in 4", 6", or 8" fixed depths.

### EXTENSIVE

ParaGREEN Extensive layered vegetated roof assemblies incorporate shallower media depths commonly ranging from 3"-8" and can be tailored to fit within project thresholds. ParaGREEN Extensive can be planted with ParaGREEN Vegetated Mats or containerized herbaceous plants.

### SEMI-INTENSIVE

ParaGREEN Semi-Intensive is most commonly vegetated with turf grasses or meadow style plantings with media depths between 8"-12" and is designed to withstand the traffic from active spaces and meet the horticultural demands of turf grass.

### INTENSIVE

ParaGREEN Intensive layered vegetated roof assemblies incorporate deeper media depths, typically  $\geq 12"$ , supporting a wide range of plant material. ParaGREEN Intensive solutions are employed in applications from amenity decks to immersive landscapes on podium.

## Features & Benefits

### CUSTOMIZABLE

Expertise to help you design the right Vegetated Roof Solution to fit within project thresholds, meet the design intent, and maximize performance.

### PRE-VEGETATED AND MODULAR

Provides simplified installation on logistically challenging projects.

### WIND TESTED

Wind tested Vegetated Roof Solutions in both layered and modular assemblies.

### RIGHT-SIZED STORMWATER SOLUTIONS

Stormwater solutions can be seamlessly incorporated into Vegetated Roof Solutions and Amenity offerings to help meet both detention and retention requirements.

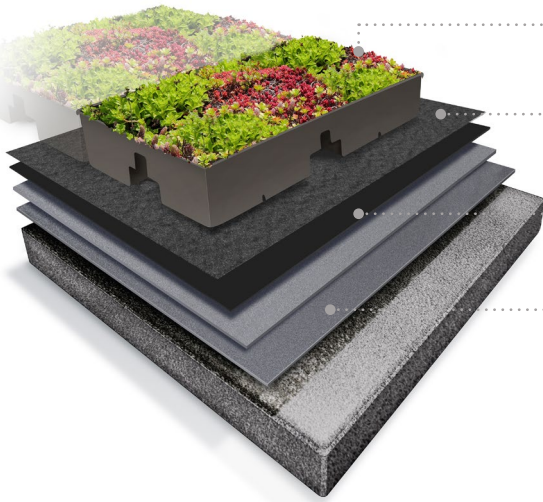

### SINGLE SOURCE SOLUTIONS

Membrane through vegetation, complete Vegetated Roof Solutions to meet your project needs, ensuring compatibility and providing comprehensive guarantees.

# Siplast ParaGREEN Assemblies:

## EXTENSIVE MODULAR

- ParaGREEN Vegetated Roof Module
- ParaGREEN Filter Fabric
- ParaGREEN Root Barrier (20 Mil)
- Membrane Assembly

## EXTENSIVE

- ParaGREEN Prevegetated Sedum Mat
- ParaGREEN Extensive Growing Media
- ParaGREEN Drainage and Water Retention Layer
- ParaGREEN Root Barrier (20 Mil)
- Membrane Assembly

## SEMI-INTENSIVE

- Semi-Intensive Vegetation
- ParaGREEN Semi-Intensive Growing Media
- ParaGREEN Drainage and Water Retention Layer
- ParaGREEN Root Barrier (20 Mil)
- Membrane Assembly

## INTENSIVE

- Intensive Vegetation
- ParaGREEN Intensive Growing Media
- ParaGREEN Drainage and Water Retention Layer
- ParaGREEN Root Barrier (40 or 60 Mil)
- Membrane Assembly
