SHAMPOOS FOR SPECIAL CONSIDERATIONS

Many common shampoo products can cause irritation of the scalp. This frequently manifests as redness and itchiness when the products are applied. However, not all products actually cause scalp problems at first – and some start out with irritation of the FEEN- face, eyelids, ears and neck

FRAGRANCE- FREE SHAMPOOS

Scalp sensitivities can rarely be from fragrance sensitivities. These can also cause reactions on the face and neck. A great majority of shampoos contain fragrance.

The following are fragrance Free Shampoos:

COCAMIDOPROPYL BETAINE FREE SHAMPOOS

Cocamidopropyl betaine is a common allergen. It is derived from coconut. Some of our patients who are allergic to CAPB first develop various forms of dermatitis on the face, ears or eyelids – not necessarily on the scalp. Scalp sensitivities can rarely be from fragrance sensitivities. These can also cause reactions on the face and neck. 50 % of shampoos contain CAPB. The following are Cocamidopropyl betaine free Shampoos:
