Revision Summary	101

The Kimball International family of brands offer an extensive materials portfolio including wood, laminate, paint, and textiles.

Each material collection is created to blend seamlessly with the others to provide optimal consistency throughout our wide product offering. We consider all vertical markets and provide appropriate color selections for any application. Coordinating finishes and textiles across Brands allows for ease in specifying complementary color palettes through all areas of your facility.

While we strive to provide a robust offering for any type of client, we realize that at times, there will be a need for customization.

We are happy to accommodate Customer-specified textiles, leathers, finishes, laminates and paints upon request.

Wood

Our wood finish offering provides beautiful, natural-looking finishes to meet today's design expectations. From the lightest, to the darkest, our finishes were chosen with great attention to offer a complete range of color options making it simple to get the look you want. You can achieve contemporary or transitional looks, or choose to update your traditional style by selecting one of our walnut or cherry finishes. We carefully select veneers and solid woods to provide high quality wood furniture. Variations in color, grain, and texture occur naturally in all wood species, but are most apparent in lighter colored woods, and especially in natural finishes.

Laminate

Our comprehensive laminate collection offers a wide range of neutrals as well as woodgrains. Many of our woodgrain options have been developed to be an exceptional complementary match to our wood finish. For those who prefer consistent color and pattern over the natural characteristics of wood veneer, we have a broad collection to suit your design style.

Paint

Our paint offering provides a wide range of neutrals, accent colors and metallics. All are specifically developed to complement our textiles, wood finishes and laminates. Our paint finishes are exceptionally durable and allow you to create classic, timeless settings as well as those spaces where you want to add some fun and personality.

Mixing materials that are curated to create a cohesive look across products, functional areas, and design styles allows flexibility, options and ease of specification to create beautiful spaces quickly and effortlessly every time.

Textiles

Our collection of textiles offers timeless classics as well as the latest in colors to keep the offering fresh and current. The textiles collection contains both standard in-line and alliance patterns. Our alliance partners are chosen with great care to provide the best selections and service in the industry. We work closely with our Alliance Partners to develop carded programs for simplicity and ease of specification, however, we do have hundreds of patterns that are graded in and available for each of our partnering textiles suppliers.

WOOD

Overview

Wood Finish System

Our proprietary wood finish system utilizes a combination of topcoats engineered for the various applications found in the furniture industry. It is exceptionally clear and durable, and allows the beauty of wood to show through. The durability, depth, clarity, and beauty of our wood finishes meet the high expectations of our customers, and meet or exceed indoor air quality (IAQ) standards.

Wood Characteristics

The beauty of wood is that, as a natural product, it will have unique grain characteristics and color.

Maple veneers are plain sliced and slip matched.

Walnut veneers are plain sliced, and applied book matched.

Cherry veneers are plain sliced and slip matched. Grain characteristics of cherry veneer such as gum streaks and gum pockets occur naturally and add to the authentic look and feel of natural veneer. These are inherent to this veneer and should not be considered defects.

The wood collection offers a number of light finishes that will not hide or mask the natural characteristics of wood. Mineral streaks, pitch pockets, and color variations from piece to piece are all characteristics that occur in natural veneers and are what make each piece unique. While the finishing process is identical for all pieces, each finished piece accepts the stain differently to create its own individual beauty. These characteristics are part of the inherent natural beauty of wood and are not considered defects.

Grain Direction

Two surfaces with grain directions that are at different angles to a light source will reflect the light differently and look a slightly different color. This natural phenomenon is called flip. This can happen within a single piece as alternating veneer leaves are placed side by side or from piece to piece. Flip is often noticed on work-surfaces installed at a 90° angle to each other. Our experience in wood finishing extends from past generations of craftsmen to present day state-of-the-art technology.

Sheen

Finish sheen levels are consistent across all series, featuring a satin finish with a 40° sheen, except for select traditional casegoods and select tables as noted on their respective overview pages.

Color Change & Scratches

All wood products are susceptible to color change from age and exposure to UV rays (sunlight and other sources), especially cherry, maple, and straight grain veneers. Although a special UV inhibitor is added to finishes, care in placement of furniture near light sources and elimination of prolonged covering of surfaces is necessary to reduce uneven color change of the wood.

Fine scratches from everyday use may be more visible on furniture with dark finishes. Darker finishes absorb more light, while fine scratches reflect the light. Therefore, scratches can be more emphasized due to this contrast. The use of a desk pad can be considered to keep scratching to a minimum.

Wood Species

The wood species on seating may vary from the wood species on casegoods or systems products. Different wood species offer unique texture and grain which provide more variation in finish color; however seating finishes are compatible with casegoods and systems finishes.

Clear Finishes

When specifying a clear coat finish, such as Clear Walnut (EX) or Clear Beech (CE), the natural wood characteristics of the veneer/wood will be visible. These characteristics include, but are not limited to, color and woodgrain variations.

Coordinating Laminates

Select coordinating woodgrain laminate options are also available for the customer who wants complete color and grain consistency throughout.

To Maximize Longevity and Beauty of the Wood Finish:

- Clean all surfaces frequently with a water dampened soft cloth. Always wipe with the grain.
- Dry with a separate cloth if needed. Always wipe with the grain.
- Avoid exposure to strong sunlight or extremes in temperature or humidity.
- Avoid exposure to harsh solvents and always remove any spilled liquids immediately with a blotting action.
- Use a desk pad. This will help protect against possible damage and imprinting caused by writing instruments and sharp objects.
- Pads with foam backing are not recommended.
- If using a protective glass top, always place felt spacer pads under the glass to allow the wood to breathe.
- Do not leave plastic, vinyl, or rubber items on finished wood surfaces. Sustained contact could damage the finish.
- Lift objects to move them; never pull objects across the finished surface.

WOOD

Special Finishes | Overview

The following options are available for special wood finishes:

- Standard finish color on alternate wood species
- Previously developed special finish
- Custom finish

Standard finish colors available on an alternate wood species

include:

- Amber on Maple
- Amber on Walnut
- Mocha on Walnut

These finishes can be specified without going through the finish approval process described at right.

Previously developed special finishes

can be selected from an extensive library. Samples of previously developed special finishes are available from Customer Service upon request.

Custom finishes can be developed to meet specific needs, if an acceptable match is not available in our library.

IMPORTANT: We reserve the right to decline the opportunity to match a finish color.

Upcharges:

A one-time fee of **\$300** (US net) will be billed for the development of each new custom finish. This fee covers all product lines on which the finish may be used.

A **10%** upcharge per line item (model number) will be applied for a standard finish on an alternative wood species, a previously developed special finish, or a custom finish. This upcharge is calculated on the base price, before other option upcharges are added.

For upholstered products, the upcharge is calculated on the Grade 1 textile price then added to the price for the selected textile grade, to arrive at the list price.

Approval Process:

- ① Send desired finish sample (no smaller than 3" x 5"), along with a purchase order for the \$300 (US net) special finish development fee, to Customer Service along with a complete list of the products and wood species for which the special custom finish is to be applied. Include dealer name, contact, and project reference.
- ② If a previously developed sample is found to be compatible, a sample will be sent for customer approval. If not, a custom finish will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

Note: The one-time fee of \$300 (US) net will not be charged unless a custom match finish is required.

Applicability:

Applicability of special finish colors depends on the wood species for which they are applied.

For Kimball series:
▶ See page 14.

For National series:
▶ See page 15.

For Interwoven series:
▶ See page 16.

For David Edward series:
▶ See page 17.

Surface Materials

Key:

- = Available
- ▶ See the price list for models to which finishes apply.

How to Specify

- ① **Model:**
Build the complete model specification by following the How to Specify steps on the pricing page for the product that is to receive the special finish.
- ② **Finish type:**
For the "Finish type" step, insert a special code (in place of STD):
ZCHY1 = Special cherry finish
ZMAP1 = Special maple finish
ZWAL1 = Special walnut finish
Note: Choose the special finish code based on the standard wood species used in the series.
- ③ **Finish designator:**
For the "Finish designator" step, insert the designator below or the one provided to you by Customer Service:
MA00174KOG = Amber on Maple
WA02905KOG = Amber on Walnut
WA02905KOG = Mocha on Walnut

IMPORTANT: The list at left reflects the complete HPL woodgrain offering; however, not all products are offered in all colors.

➤ See the appropriate price list for the list of colors available for each product line.

Gallery program laminates are also available.

➤ See page 44 for program details.

IMPORTANT: Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminated surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

FOOTNOTES:

¹ Acorn is a commercial compatible match for clear walnut wood finish.

IMPORTANT: Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminate surfaces on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

Gallery program laminates are also available.
➤ See page 44 for program details.

Customer-specified laminate (CSL)
➤ See page 23 for program details.

FOOTNOTES:
¹ Acorn is a commercial compatible match for clear walnut wood finish.

LAMINATE

High-Pressure Laminate (HPL) | Customer-Specified Laminate (CSL)

Customer-specified **high-pressure laminate** (CSL) is available on select laminate products.

- See the matrix on the following page for brand and series to which CSL applies.
- See the appropriate price list to see if CSL is available on a particular product.
- Contact your Customer Service Team to initiate approval.

Kimball, National, and Interwoven reserve the right to decline a customer specified laminate which may not be suitable for application.

Kimball, National, and Interwoven assume no responsibility for the durability, consistent coloration or any other performance characteristic of a customer specified laminate.

Metal, embossed, specialty, and supplier discontinued laminates must be custom quoted.

- Contact **By Design** at 800.482.1717, extension 8880.

Kimball, National, and Interwoven orders and procures all customer specified laminates.

Laminate sheen level must not exceed 60° for maximum durability of worksurfaces.

Lead times may vary for certain laminates. Minimum order quantities may apply.

Due to CSL sheet size availability, some restrictions may occur.

Select a Kimball, National, or Interwoven vinyl edge to complement the CSL laminate.

UL approved suppliers are:

- Arbonite
- Formica
- Lamin-Art
- Lamitech
- Nevamar
- Pionite
- Wilsonart

Kimball Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

National Pricing:

A **10% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

Interwoven Pricing:

A **20% upcharge per line item** (model) for CSL orders for supplier standard laminates applies. Upcharge is calculated on the base price, before other option upcharges are added.

How to Specify

- ① **Model:** Build the complete model specification (excluding the finish type and finish designator) by following the How to Specify on the appropriate pricing page for the product that is to receive the special finish.
- ② **Finish type:** For the “Finish type” step, insert a special finish code (in place of STD).
ZARB1 = Arbonite
ZFMA1 = Formica
ZLMT1 = Lamin-Art
ZLTC1 = Lamitech
ZNEV1 = Nevamar
ZPTE1 = Pionite
ZWST1 = Wilsonart
- ③ **Finish designator:** For the “Finish designator” step, insert the laminate designator (color number) of the laminate to be applied to the product.

IMPORTANT: The list at left reflects the complete TFL woodgrain offering; however, not all products are offered in all finishes.

➤ See the appropriate price list for the list of TFL colors available for each product line.

Gallery program laminates are also available.

➤ See page 44 for program details.

IMPORTANT: Woodgrain laminate is a commercially compatible match to the wood finish of the same name and designator with consideration for the most common application—laminates on a wood chassis. When laminate and wood are mixed in other applications, the flip that occurs naturally in veneer may influence the overall match from piece to piece.

FOOTNOTES:

¹ Acorn is a commercial compatible match for clear walnut wood finish.

LAMINATE

Gallery Program

Program Details:

The Gallery program is an on-trend collection curated from trusted laminate suppliers. As we know, trends come and go, sometimes quite quickly. When we see colors/patterns losing industry presence, we will delete and replace with new styles. Gallery laminates that remain popular could possibly transition into the standard laminate program.

HPL, TFL, and vinyl rims are included in the program; however not all products in our offering are available with the Gallery laminate option. Due to Gallery laminate size availability, some restrictions may occur on specific product sizes.

➤ See the series chapter within the applicable price list for availability details by product and/or model.

Ordering Process:

- Kimball, National, or Interwoven orders and procures all Gallery laminates.
- Order Gallery laminate in the same manner as ordering standard laminate
- Specify GAL1 or GAL2 for the laminate price group and the applicable color designator
- Allow a six-week lead time
- Warranty will be the same as with standard laminate

Upcharges:

A percentage of upcharge based on the group is applied to each Gallery laminate selection and the total is added to the original list price. Gallery group 2 incurs a 6% upcharge. **IMPORTANT:** Individual models may incur multiple upcharges based on the total number of locations for which a Gallery laminate is specified.

➤ See examples at right.

Example 1:

Kimball Priority double pedestal desk, model 53KE3060DDFBLL8

Laminate Location	Laminate Selection	Upcharge
Worksurface	G1008 Timeless (group 2)	6%
Front	G1008 Timeless (group 2)	6%
Chassis	G1008 Timeless (group 2)	6%
Vinyl rim	G1008 Timeless (group 2)	6%
Total list upcharge	4 Gallery selection areas	24%

Example 2:

National Tessera double pedestal desk, model 59N3684DDFFL8

Laminate Location	Laminate Selection	Upcharge
Drawer/door	G1008 Timeless (group 2)	6%
Chassis Laminate	478 Platinum Grey (standard)	n/a
Total list upcharge	1 Gallery selection area	6%

Example 3:

Kimball Footprint worksurface, model SS2472WSSLL1

Laminate Location	Laminate Selection	Upcharge
Worksurface	G1008 Timeless (group 2)	6%
Vinyl rim	G1008 Timeless (group 2)	6%
Total list upcharge	2 Gallery selection areas	12%

Colors:

6% upcharge

Key:

- = Available
- See the price list for models to which finishes apply.

IMPORTANT: The list at left reflects the complete paint offering; however, not all products are offered in all finishes.

➤ See the appropriate price list for the list of paint colors available for each product line.

Metallic paint finishes may appear to have variations in color due to its reflective qualities.

Customer-specified paint (CSP) is available.

➤ See page 66.

FOOTNOTE:

¹ These paint colors are a lower sheen than other paint colors in the offering, providing more of a soft, subtle color.

² Silver Satin and Clear a non-paint metal finishes.

PAINT

Customer-Specified Paint (CSP)—Kimball

Customer-specified paint (CSP) is available on select painted products.

➤ See the appropriate price list to see if CSP is available on a particular product.

Pricing:

A **one-time fee of \$300** (US net) will be billed for the development of each new custom (customer specified) paint. This fee covers all product lines on which the paint may be used. Models receiving a custom paint will also be assessed an upcharge.

A **10% upcharge per line item** (model) for customer specified non-metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

A **20% upcharge per line item** (model) for customer specified metallic paint applies. Upcharge is calculated on the base price, before other option upcharges are added.

The Process:

- ① Send desired paint sample (no smaller than 3" x 5") to Customer Service along with a complete list of the products for which the custom paint is to be applied. **Include dealer name, contact, and project reference.**
- ② Custom paints will generally require at least a week for a matched sample. Samples sent to the customer will advise of any restrictions that may apply.
- ③ Customer signs off on the sample and returns the approval form to Customer Service. Approval is required prior to order entry.

IMPORTANT: Kimball International reserves the right to decline the opportunity to match a paint color.

How to Specify:

- ① **Model:**
Build the complete model specification (excluding finish type and finish designator) by following the "How to Specify" on the appropriate pricing page for the product that is to receive the custom paint.
- ② **Finish type:**
For the "Finish type" step, insert a special paint code (in place of STD):
ZPNT1 = Special non-metallic paint
ZPNTM1 = Special metallic paint
- ③ **Finish designator:**
For the "Finish designator" step, insert the designator provided to you by Customer Service.

WOOL FELT

Kimball

Surface Materials

IMPORTANT: The list at right reflects the complete Kimball Wool felt offering; however, not all products offered in wool felt are offered in all colors. ▶ See the appropriate Kimball price list for the list of colors available for each product line.

Wool felt colors are coordinates to same-name paint colors.

Wool felt is not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

Colors

19103	Chive
19105	Spinach Green
19106	Cloud Blue
19107	Dark Blue
19111	Apricot Orange
19112	Tango Red
19113	Golden Rod
19117	Heathered Oatmeal
19118	Heathered Stone
19119	Heathered Slate

Cleaning Codes:

Cleaning Code S

- Use only mild, pure water-free cleaning solvents.
- Cleaning by a professional furniture service is recommended.

Cut Yardage Program:

All Kimball textiles are available on a cut yardage basis. Textiles are available in whole yards only. Roll length is 72"W. List price includes freight.

TRANSLUCENT/WHITE SCREEN FABRIC

Translucent/white screen fabric is a PVDF (polyvinylidene fluoride) material. It allows 80% light transmission with minimal color shift. It is permanently UV resistant and color-fast, and dirt and water repellent. The textile structure and its feel are state of the art; slight variations in the appearance of the screen fabric are due to small differences in raw materials.

Available on:

- Narrate privacy doors
- Xsite privacy doors
- Xsite file pockets
- Kore carts

Content:	100% PVDF
Cleaning:	See at right.

Cleaning Information:

- A lot of contaminations can be removed with hot water.
- Always rub off stains carefully, because powerful mechanical attack can cause damage at the coating or the structure of the screen fabric.
- Cleaning should be done from the outside to the inner side of the stain to avoid dispersing it.
- Most suitable for cleaning is to use an absorbent white cloth; microfiber cloth recommended.
- Repeat the cleaning procedure to remove stubborn stains. If the stains of the dirt is old and dried, it might have a negative effect on complete cleaning.

For Oil and Grease

- Use a petroleum ether as a detergent for best results.
- Depending on the type of oil and grease, it may be necessary to repeat the cleaning procedure for several times.

For Dust and Dirt

- Dust should be moistened with hot water and then rubbed off carefully.
- If the stain is still on the textile, hot water with some detergent "tenside" added may be used. The detergent tenside should be carefully rubbed on to the stained area and then rinsed with fresh water.

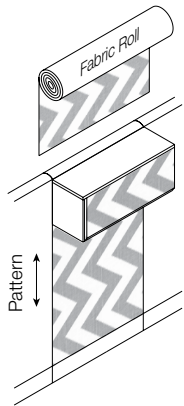

Important:

- Cleaning detergents should always be used with care, and if necessary tested on a hidden section of the textile.
- Avoid using high pressure cleaners since they may damage the coating and the structure of the woven textile; specifications might be influenced in a negative way.
- In no case should the textile may be treated with ketones (e.g. acetone), since this damages the coating irreparably.
- Use of abrasives should be avoided because it could damage the textile surface.

VERTICAL TEXTILES

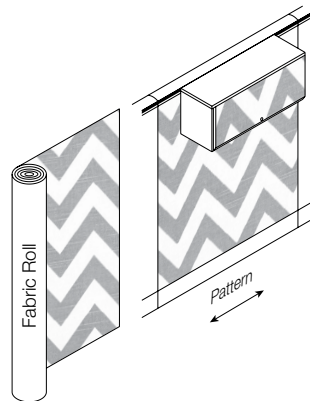

Overview

Standard Application:

Directional textiles are “cut up the roll” for standard application unless specified differently.

Railroad Application:

All textiles will be applied in railroad (horizontal) fashion to:

- Exhibit
- NAC privacy set-on screen
- Narrate tiles
- Priority tiles and wall panels
- Stow wallpanels
- Tackboards greater than 48"W when using a seating textile or greater than 60"W when using a vertical textile
- Tessara
- Xsite tiles
- Xsede tiles

When viewing swatch cards or memo samples, turn 90° to get an accurate indication of how the textile will appear on when railroaded.

Railroad application of vertical textiles and COM for all products that are not listed above or do not have railroading listed as an option in the applicable price list requires a custom quote.

▶ Please contact **By Design**.

IMPORTANT: Textiles reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all textiles and is not considered a defect. Flip is more easily recognized on textiles with a nap or shimmer when viewing textiles applied in standard application and railroad application side by side.

Cut Yardage Program:

All vertical textiles are available on a cut yardage basis. Fabric is available in whole yards only. List prices include freight.

SEATING TEXTILES

Overview

Characteristics:

- Certain textiles may relax over time (e.g., some woven textiles) creating a loosely upholstered appearance.
- Some textiles may wrinkle, pill, fuzz, or puddle as a normal, inherent characteristic. This does not indicate that the covering or application is deficient.
- Fabrics are cut to provide the best match possible when transitioning from piece to piece.
- Fabrics reflect light differently when viewed at various angles, creating a natural phenomenon called “flip.” Flip is visible on all textiles and is not considered a defect; it is more easily recognized on textiles with a nap or shimmer and more apparent on crescent or corner units.
- Kimball International will always ship a satisfactory commercial match. Because of industry dye-lot variation, colors may not match exactly.
- Fabrics are not warranted against fading and wear, discoloration from contact with liquids, or change in color or texture caused by application of finishes (flame proofing, stain resistance).

- Some upholsteries may experience dye transfer from clothing to the seating upholstery. This does not mean that the textile application is deficient, but rather it is inherent characteristics of that textile or application, and is considered normal behavior.
- Due to Bloom’s three-dimensional back and arm design, comfort wrinkles (CW) are common with many upholsteries. This is especially true for leathers, vinyls, and denims.
- Follow this link for Bloom Upholstery Guidelines.

TB133 Factor:

TB133 factor is a full-scale fire test for furniture manufactured for public use in which an entire piece of furniture is tested as a unit. Kimball offers a wide variety of seating products that can be manufactured to meet TB133.

➤ Please contact **By Design**.

Railroad Application:

Railroad application of any textile must be custom quoted.

➤ Please contact **By Design**.

Advisory:

Purchaser must consult local fire and code official to determine the suitability of product being selected for any particular application.

Certain jurisdictions may require the use of additional fire retardants or composite flammability testing. Kimball assumes no responsibility for composite testing or for compliance with any particular code or other flammability standards different than as contained in applicable catalog information unless such requirements are specified in writing by purchaser to Kimball prior to confirmation of order. Cost of additional flammability treatments or testing needs of purchaser shall be borne by purchaser.

Cleaning Leather:

Regular Cleaning

- Remove as much soil or staining as possible by carefully vacuuming or brushing.
- Dust with a dry or damp cloth.

Deep Cleaning

- Use mild non-detergent soap or cleaner. Repeat with clean water.
- Do not soak leather.
- Air dry.

For Florence Leather Only

- Cleaning solutions with up to 10% bleach solution may be used with caution.

Note: Never use furniture polishes, oils, solvents, varnishes, abrasive cleaners, ammonia, wax, or saddle soaps on leather.

Characteristics:

- Leather is a natural product. Healed scars, scratches, cuts, and stretch marks are natural markings and are characteristic of leather.

Applicability Codes:

► See page 98 for Textile Applicability Guidelines & Restrictions.

ALLIANCE PROGRAM SEATING TEXTILES

Overview

Kimball has formed partnerships with the top textile companies in the industry to provide a broad range of design-oriented textiles. These textiles can be specified using our standard ordering process, eliminating the need for additional expense and efforts required for COMs.

Patterns from Arc-Com, Carnegie, CF Stinson, Designtex, Maharam, Mayer Fabrics, Momentum, and Ultrafabrics are available in a variety of design aesthetics and price points to meet all of your textile needs.
➤ See Surface Materials at www.kimballinternational.com for a list of graded-in textiles from our alliance program partners.

IMPORTANT: Orders cannot be cancelled for alliance program textiles.

Application of Alliance Program textiles will be as depicted on the website or memo sample unless otherwise instructed on the order.

Directional textiles, such as stripes, patterns, and plaids, may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return.

Textiles that requires non-stock special treatments such as flame proofing, anti-microbial treatment, electrical conductive backing, water repellent, stain repellent, or acrylic backing are not part of this program. Such orders should be specified as a COM.

Alliance graded pricing includes the cost of the material. Repeat is also accounted for and no additional up-charge is required.

Different textiles and seating constructions will respond better than others to specific seating applications. Certain textile constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the textile or application is deficient, but is considered normal behavior as an inherent characteristic of the textile.

➤ See page 98 for Textile Applicability Guidelines & Restrictions.

IMPORTANT: The information provided in this section of the price list is the most current information available at the time this reference guide was published.

➤ Contact Customer Service before finalizing any orders to check availability.

Lead Time:

Lead times for alliance textiles are based on supplier availability. Pre-planning orders can help facilitate arrival of products as needed. Each supplier reserves the right to discontinue patterns or colors. Kimball will not be held responsible for supplying discontinued patterns/colors or when minimum order quantities apply. Contact Customer Service for availability before finalizing orders.

TB133:

Contact **By Design** about TB133 requirements.
Note: Many of these textiles may pass additional flammability tests. Please inquire about compliance with specific regulations.

Samples:

For memo samples, contact our alliance partners directly.

How to Specify

- ① Follow the “How to Specify” steps listed on the alliance upholstery pricing page within each section.
- ② For the “textile grade” step, add the appropriate three-letter supplier prefix to the textile grade:
ARC[grade] = Arc-Com
CAR[grade] = Carnegie
CFS[grade] = CF Stinson
DT[grade] = Designtex
MHM[grade] = Maharam
MAF[grade] = Mayer Fabrics
MOM[grade] = Momentum
ULT[grade] = Ultrafabrics
- ③ For the “textile designator” use the designator for the pattern/color:

Examples:

① ② ③ ④
K58CT **CARJ** 6576_10 STD
⑤
MC

① ② ③
N95MA **ARCA** ATMO_63880
④ ⑤
405 423

CUSTOMER'S OWN MATERIAL & LEATHER

COM for Panels, Tiles, Screens, Overhead Storage, and Highback Organizers

Surface Materials

GSA Non-Contract

COM Policy:

While Kimball International inspects textiles for mill imperfections, some are difficult to recognize. Kimball is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings. Customers are responsible for ordering COM textiles and expediting delivery of the material.

IMPORTANT: Kimball International reserves the right to decline a textile that may not be suitable for application to product.

COM Application Testing:

Application testing is required for non-preapproved textiles on panels, tiles, screens, overhead storage, and highback organizers.

➤Contact your Customer Service Team for the appropriate forms to initiate application testing.

The application test will render your textile either:

- Approved
- Not recommended
- Restricted

A “not recommended” result is usually due to questionable construction of the material or pattern that is difficult to align. You will be required to sign a waiver to use any “not recommended” COM.

Preapproved COM:

➤Contact your Customer Service Team to obtain information on preapproved COMs.

UL Recognized/Flammability:

Before Kimball accepts and enters an order that will have COM textiles, COM must be UL recognized for use on:

- Cetra
- Narrate
- Xsede
- Xsite

As well, COM must be UL listed, meet ASTM E84 Class A, NFPA 701, or GSA 100% Polyester Waiver Program for use on:

- Alloy
- EverySpace center screens and privacy screens
- Exhibit
- Kore
- NAC edge-mount divider screens
- Perks
- Priority wall panels & privacy screens
- Stow
- Tackboards (Definition, EverySpace, Perks, Priority, Senator)
- Tessera
- Traxx tiles
- Waveworks

All COM testing and processing costs are the responsibility of the customer. A minimum of 2 yards of production run yardage is required for UL application and flammability testing. Approval of a COM textile may result in extended lead times. For

cost estimates, yardage requirements and project lead times, consult your Customer Service Team.

Yardage/Measurements

Directional and non-directional yardage requirements have been calculated based on 66”W directional, 66”W non-directional, and 54”W directional (where applicable). If your textile is less than 66”W, some size restrictions may apply.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

Shipment of COM

After the textile has passed the approval process described, Kimball International will enter the product order and send an acknowledgement of the tentative ship date. A notification will be sent giving the date the COM must be received. If it is not received by the specified date, your ship date will be reassigned.

Ship your material to the appropriate location based on the product you are ordering.

➤See page 97.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional textile required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Repeats:

It is Kimball International standard process to match repeats on fabric-covered overhead and highback organizer doors.

Repeats will be matched in what Kimball International deems the best possible application of the pattern.

Additional COM yardage is required for textiles with a repeat.

Repeat	<i>Additional Yardage Required per Overhead Door</i>
0–6”	None
6”–12”	0.166 yards
12”–18”	0.500 yards
18”–24”	0.666 yards
24” or more	1.000 yard

Note: If the customer requires that the textile with repeat be applied in a random fashion, Kimball requires written notification in advance of order processing to that effect.

➤Contact your Customer Service Team to obtain necessary waiver.

Checklist:

When ordering COM, please make sure you have done the following:

- Supplied vendor name, textile name, color name and number.
- Supplied arrival date of COM to Kimball.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

CUSTOMER'S OWN MATERIAL & LEATHER

COM for Tackboards and Cushion-Top Pedestals

COM Policy:

While Kimball International inspects textiles for mill imperfections, some are difficult to recognize. Kimball is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring, appearance, or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Customers are responsible for ordering COM textiles and expediting delivery of the material to Kimball.

IMPORTANT: Kimball International reserves the right to decline a textile that may not be suitable for application to product.

Materials with heavy backings and vinylized textiles are not recommended for application to tackboards or cushion-top pedestals.

COM Application Testing:

Kimball International *recommends* that a sample be submitted for application approval prior to an order being placed.

For cushion-top pedestals—
Sample should be no smaller than 5" x 7". Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:
Kimball International
Attn: COM Administration
1600 Royal Street
Jasper, IN 47546

For tackboards—
Contact Customer Service to confirm yardage required (yardage varies by series). Reference "application approval" and send to:
Kimball International
Attn: COM Department
Docks 12-13 Plant 5
1037 E 15th Street
Jasper, IN 47546

Kimball International approval signifies only that such materials can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball as to appearance, behavior, or durability of the material.

Orders will be acknowledged with a tentative ship date. A notification will be sent with the date the COM must be received. If material is not received by the specified date, your ship date will be reassigned. It is the responsibility of the purchaser to expedite delivery of the material.

Preapproved COM:

➤ Contact your Customer Service Team to obtain information on preapproved COMs.

Yardage/Measurements

Directional and non-directional yardage requirements have been calculated based on 66"W vertical textiles and 54"W seating upholstery for tackboards. If your textile is less than 66"W, some size restrictions may apply.

➤ Refer to the applicable price list chapter for yardage requirements for specific models.

Shipment of COM

Ship your material to the appropriate location based on the product you are ordering.

➤ See page 97.

Production of Order:

When COM production yardage is received, COM is cut for the order and inspected for flaws. If flaws are found, you will be notified of the additional textile required.

A return tag (e.g. COD shipment, UPS call tag) is required from the specifier within 45 days of the acknowledged ship date or all excess COM yardage will be discarded.

Checklist:

When ordering COM, please make sure you have done the following:

- Supplied vendor name, textile name, color name and number.
- Supplied arrival date of COM to Kimball.
- Received application testing approval before sending purchase order (or signed waiver if not approved for application).
- Received U.L. listing before sending purchase order.

CUSTOMER'S OWN MATERIAL & LEATHER

COM/COL for Seating

COM Policy:

Kimball International inspects tetiles for mill imperfections, but some are difficult to recognize. Kimball is solely responsible for upholstery workmanship and cannot assume responsibility or liability for the durability, tailoring appearance or other qualities such as color inaccuracies, dye lot variations, and other such flaws or defects of customer furnished coverings.

Different textiles and seating constructions will respond better than others to specific seating applications. Certain tetile constructions are more prone to relaxing over time and may demonstrate characteristics such as wrinkling, pilling, fuzzing, or puddling. This does not indicate that the tetile or application is deficient, but is considered normal behavior as an inherent characteristic of the textile.

Directional upholstery, such as stripes, patterns, and plaids may not be suitable for chairs with contoured shapes, tufting, or decorative stitching. Every effort is made to upholster all chairs as expertly as possible; however such orders are not subject to return. If in doubt about an upholstery application, please contact Customer Service prior to placing the order.

Yardage/Measurements:

Kimball International has analyzed each model to most accurately reflect the yardage requirements. The yardage requirement for each model is based on 54"W tetile and cutting the

textile up the roll.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

For widths other than 54", increase the yardage requirement by the factors below:

Textile width	Increase yardage
50"-53"	15%
48"-49"	30%
45"-47"	45%

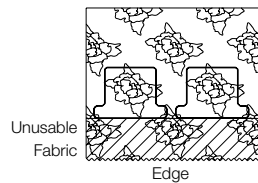

When ordering 10 or more chairs in the same COM, yardage requirements may be reduced.

➤Contact Customer Service.

Decorative Patterns:

Yardage requirements are greatly affected by not only the size of repeats, but also by the print or pattern. Kimball International cuts all seating patterns with aesthetic concerns in mind for high quality and consistency.

➤Refer to the applicable price list chapter for yardage requirements for specific models.

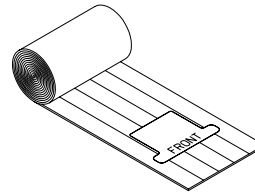

The illustration above depicts two seat cushions in the proper placement on a piece of decorative

textile. Please note the unusable textile. It is not always appropriate to place a seat pattern at the edge of the textile. Due to this circumstance, please include an additional one-half yard per order.

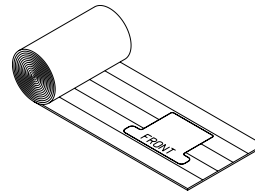

Note: If repeats are not to be matched, please contact Customer Service.

Directional Textiles:

Some COM textiles are considered directional that may not be considered directional by the textile supplier due to the upholstering process used by Kimball International.

"Up the Roll"

"Railroaded"

Application of COM textiles—"up the roll" or "railroaded"—will be as depicted on the swatch card or website. If a different application is desired, the

pattern must be custom quoted.

➤Please contact **By Design**.

Customer's Own Leather:

Customer's own leather yardage (size) requirements for Kimball seating are based on an average hide size of 45-50 sq. feet. Consult Customer Service for requirements for other hide sizes.

The shape of a hide and the usable, clean square footage may make it necessary for us to request more leather after COL is received.

Calf hides must be at least 30 square feet of clean, usable, matching hides. When specifying calf hides, add 15% to COL requirements.

Leather is a natural product and variation in texture is a pleasing quality belonging exclusively to high grade, full top grain leathers.

COM/COL Storage:

Kimball International will store excess COM/COL for 6 weeks after completion of order for Kimball seating. Unallocated COM textiles will be stored for three months.

Kimball International must be advised if COM is to be retained longer than three months for a future order or if it is to be returned.

Flammability Compliance:

All COM/COL must meet application codes and regulations, including TB117-2013, California Proposition 65, and California AB 2998.

➤www.p65warnings.ca.gov/products/furniture-products
 ➤www.leginfo.ca.gov (search for bill AB2998; session 2017-2018)

By selecting COM/COL, customer certifies that the material meets such codes and regulations. Customer is solely responsible for compliance and may contact the textile manufacturer to confirm certification or Kimball International for assistance.

Kimball International strives to create upholstered products with no added fire retardants. Written documentation, preferably from the material manufacturer, is required confirming that tetile or leather (COM/COL) provided by the customer does NOT contain any added fire retardant chemicals. Kimball International will label the product(s) with "Contains no added flame retardant chemicals."

CUSTOMER'S OWN MATERIAL & LEATHER

Process for Seating & Cushion-Top Pedestals

Surface Materials

GSA Non-Contract

Step ①

Review applicability guidelines and restrictions for the seating frame, if applicable.

▶ See page 98.

Step ②

Send a sample to Kimball International for application testing/ approval. Sample should be no smaller than 5" x 7" for textile or 4" x 4" for leather. Include a list of model numbers on which you wish to use the COM. Reference "application approval" and send to:

Kimball
Attn: COM Administration
1600 Royal Street
Jasper, IN 47546

Kimball International will advise of approval or disapproval. Approval signifies only that such textiles or leather can be applied to the products for which intended. Such approval does not constitute any responsibility nor any warranty on the part of Kimball International as to appearance, behavior, or durability of the textile or leather.

Step ③

Verify yardage requirements.

Step ④

Prepare and send your purchase order. Purchase order must include:

- Textile vendor
- Pattern number and name
- Color number and name
- Application instructions (i.e., direction of pattern) for striped, plaid, patterned, or unusual textiles and which face to use if textile is reversible.

Note: If you do not supply application instructions, Kimball will apply the textile in what it determines to be the best manner, and cannot be held responsible after the upholstery is applied.

Kimball International will send an acknowledgement of your order with a tentative order ship date and the date by which your COM or COL must be received. If your material is not received by the specified date, your ship date will be reassigned.

Step ⑤

After you receive order acknowledgment from Kimball International, ship your material to the appropriate location based on the product you are ordering.

▶ See page 97.

Please include:

- Dealer name and p.o. number
- Kimball seating model number
- Quantity of chairs
- Kimball International acknowledgment number

IMPORTANT: If you are using a COM on products produced at two different facilities, such as Interwoven seating and Kimball seating, you must have the correct yardage of COM shipped to both manufacturing facilities. Do not ship it to just one facility.

Due to difficulty of handling large rolls of textile, COM needs to weigh less than 40 lbs.

CUSTOMER'S OWN MATERIAL & LEATHER

Where to Ship

Surface Materials

GSA Non-Contract

Jasper, Indiana—Royal Street

Applies to:

- All COM application testing material for casegoods and seating products

► Contact Customer Service regarding application and “ship to” information for systems products.

- Kore cart backs and bench cushions
- All cushion-top pedestals

Ship to:

Kimball International
Attn: COM Department
340 E 11th Avenue
Jasper, IN 47546

IMPORTANT: If you are using COM or COL on products produced at two different facilities, you must have the correct yardage or square footage amounts shipped to both manufacturing facilities.

Do not ship it to just one facility.

IMPORTANT: Include the following information with all COM/COL shipments:

- Dealer name
- Dealer PO number
- Model number(s) for application
- Sales order number, if applicable

Codes & Regulations:

All COM/COL must meet application codes and regulations, including TB117-2013, California Proposition 65, and California AB 2998.

► www.p65warnings.ca.gov/products/furniture-products

► www.leginfo.ca.gov (search for bill AB2998; session 2017-2018)

By selecting COM/COL, customer certifies that the material meets such codes and regulations. Customer is solely responsible for compliance and may contact the textile manufacturer to confirm certification or Kimball for assistance.

Kimball International strives to create upholstered products with no added fire retardants. Written documentation, preferably from the material manufacturer, is required confirming that textile or leather (COM/COL) provided by the customer does NOT contain any added fire retardant chemicals. Kimball will label the product(s) with “Contains no added flame retardant chemicals.”

TEXTILE APPLICABILITY GUIDELINES & RESTRICTIONS

Kimball

Surface Materials

GSA Non-Contract

Please follow these general applicability guidelines for each seating frame due to application constraints or aesthetic concerns.

Appearance guidelines indicate characteristics that may be apparent when certain types of textiles are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster textiles associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of textiles that cannot be used on the indicated seating line. Fabrics associated with restrictions 5, 6, and 7 prevent us from upholstering them on the applicable chair series.

Due to Bloom's three-dimensional back and arm design, comfort wrinkles are common with many upholsteries. This is especially true for leathers, vinyls, and denims.

► Follow this link for Bloom Upholstery Guidelines.

IMPORTANT: These guidelines do not constitute any responsibility nor any warranty on the part of Kimball International as to appearance, behavior, or durability of a material.

Key:

- = Guideline or restriction applies to seating line.

Appearance Guidelines:

- 1 Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- 2 Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- 3 Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- 4 Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

- 5 Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the textile face from the backing, or glue bleeding through the textile.
- 6 Thin and/or loosely woven textiles cannot be used due to potential textile separation at the seams.
- 7 Textiles that have an uneven or irregular surface cannot be used with topstitched upholstery. The topstitch disrupts the visual appearance of the upholstery. Contact **ByDesign** to see if it is possible to eliminate the topstitch in order to use the textile.

Appearance Guidelines:

- Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

- Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the textile face from the backing, or glue bleeding through the textile.
- Thin and/or loosely woven textiles cannot be used due to potential textile separation at the seams.
- Textiles that have an uneven or irregular surface cannot be used with topstitched upholstery. The topstitch disrupts the visual appearance of the upholstery. Contact **ByDesign** to see if it is possible to eliminate the topstitch in order to use the textile.

TEXTILE APPLICABILITY GUIDELINES & RESTRICTIONS

Interwoven & David Edward

Surface Materials

GSA Non-Contract

Please follow these general applicability guidelines for each seating frame due to application constraints or aesthetic concerns.

Appearance guidelines indicate characteristics that may be apparent when certain types of textiles are applied; these are not restrictions, but are intended to educate customers on the potential appearance of their product. Guidelines 1 through 4 are explanations of what you may see on your chair. We can still upholster textiles associated with these guidelines, but you may see some of the characteristics described.

Restrictions indicate types of textiles that cannot be used on the indicated seating line. Textiles associated with restrictions 5, 6, and 7 prevent us from upholstering them on the applicable chair series.

IMPORTANT: These guidelines do not constitute any responsibility nor any warranty on the part of Kimball International as to appearance, behavior, or durability of a material.

Key:

- = Guideline or restriction applies to seating line.

Appearance Guidelines:

- Thick or stiff textiles may result in gathers and puckers around corners, contours and certain seams.
- Matched directional textiles, such as stripes, plaids, and patterns, may not align properly (e.g., decorative stitching, tufting, buttons, seams, seat-to-back match, etc.)
- Textiles with high nylon or wool content (more than 50%) may show signs of material stretch and lack of rebound when room temperatures fluctuate.
- Mohair, velvet, and chenille may be easily bruised or have the potential for crooked seams due to the heavy nap and flip.

Restrictions:

- Textiles that are not approved for glue application cannot be used. Potential issues could include poor adhesion quality to the mating surface, separation of the textile face from the backing, or glue bleeding through the textile.
- Thin and/or loosely woven textiles cannot be used due to potential textile separation at the seams.
- Textiles that have an uneven or irregular surface cannot be used with topstitched upholstery. The topstitch disrupts the visual appearance of the upholstery. Contact **ByDesign** to see if it is possible to eliminate the topstitch in order to use the textile.

REVISION SUMMARY

Reference

This section provides a summary of revisions made to the price list by release date, providing a one-year look back.

12.13.24

Laminate

Discontinued HPL and TFL colors

include:

480	Antique White
403	Chamois

Discontinued Gallery Group 1

HPL and TFL colors include:

G1001	Citadel
G1011	Pepperdust

Discontinued 3D laminate colors

include:

MC	Amber
DF	Driftwood
MH	Mocha
YO	Monterey
NW	Tuscan
450	Fog

Vinyl Edge

Discontinued colors include:

480	Antique White
403	Chamois

Discontinued Gallery Group 1

colors include:

G1001	Citadel
G1011	Pepperdust

Worksurface Wire Manager

Discontinued colors include:

480	Antique White
403	Chamois

Discontinued Gallery Group 1

colors include:

G1001	Citadel
G1011	Pepperdust

Solid Surface

Discontinued colors include:
