

View north-west of Erf 1510. Erf 1509 can be seen to left.

Secondary dune thicket is present on the site.

View to the north-east showing Erf 1511 and 1512. No visible boundary exists between Erf 1510 and 1511; therefore, the development site must be marked out and cordoned off prior to construction.

View to the west showing secondary dune thicket vegetation on the proposed site.

Vegetation connecting Erf 1510 and Erf 1511

Photograph showing the varying gradient of the site.
