## LETTER OF TRANSMITTAL

To The Honorable Philip B. Scott, Governor,  
The Honorable David Zuckerman, Lieutenant Governor,  
Chairs of House Committees on Appropriations, Institutions and Ways and Means,  
Senate Committees on Appropriations, Finance and Institutions, and  
The Citizens of the State of Vermont:

Pursuant to 32 VSA § 182 (a)(8), the Department of Finance and Management is pleased to present the Comprehensive Annual Financial Report (CAFR) of the State of Vermont for the fiscal year ended June 30, 2019. The Department prepared these financial statements and assumes responsibility for the completeness and reliability of the information presented. To provide a reasonable basis for making these representations, the Department has established a comprehensive internal control framework designed to protect the state's assets from loss, theft, or misuse and to compile sufficient, reliable information for the presentation of this report in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). The cost of internal controls should not outweigh their benefits. Vermont's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements are free of material misstatement. I believe the accompanying financial statements are accurate and fairly stated in all material respects and presented in a manner designed to report fairly the State of Vermont's financial position, results of operations and changes in net position/fund balances.

Please pay particular attention to two important items contained in this CAFR. The first item is the Management Discussion and Analysis (MD&A) that follows the Independent Auditors' Report. This analysis is designed to provide, in understandable terms, an overview of the state's financial position. The Basic Financial Statements (BFS) follow the MD&A. The BFS were prepared in conformity with GAAP as prescribed by the GASB. The BFS contain government-wide statements that present the state's financial activities in a manner similar to that of a private corporation. Fund statements report governmental, proprietary, and fiduciary fund financial activity; discretely presented component unit financial activity; and note disclosures that explain and enhance the basic financial statements.

In addition to the MD&A and BFS, this CAFR includes a Required Supplementary Information (RSI) section, Other Supplementary Information section, and a Statistical section. The RSI section contains various schedules relating to the state's defined benefit pension and other postemployment benefits plans, and Budget to Actual comparison schedules for the state's General and major special revenue funds with Notes reconciling budgetary fund balance to the governmental funds' GAAP fund balance. The Other Supplementary Information section contains combined fund financial statements for the state's Non-major Governmental, Proprietary, and Fiduciary Funds, and discretely presented Component Units. The Statistical section presents data relating to financial trends, revenue and debt capacity, and demographic and operating information about the State of Vermont. Please note the information contained in the MD&A, RSI and Statistical sections is unaudited.

This CAFR includes the funds and entities for which the state is accountable based on GASB's criteria for defining the financial reporting entity. The criteria include fiscal dependence, financial accountability and legal standing. Please refer to Note I for more information regarding the reporting entity and the component units.

## **State Profile**

Vermont, known as the Green Mountain State, was first settled by the French in 1666, then by the English in 1690, and joined the Union as the fourteenth state in 1791. Rural in character, the state measures 9,615 square miles of land and water area, ranking the state 45th in terms of land and water area among the 50 states. Vermont's population, as measured by the last decennial Census on April 1, 2010, was 625,741, ranking the state 49th among the 50 states - unchanged from the 2000 and 1990 Censuses per the U.S. Bureau of the Census. The state capital is Montpelier and the largest city is Burlington. As of calendar year 2017, 92.6 percent of Vermonters aged 25 or older were at least high school graduates (ranked number 6 in the country) while 38.3 percent had at least a college bachelor's degree (ranked number 8 in the country), per the U.S. Bureau of the Census.

The State Constitution provides for three traditional branches of Government – the Legislative, the Executive, and the Judicial. The Legislative branch is comprised of the House of Representatives (150 members) and the Senate (30 members); all are elected for two-year terms. The Executive branch includes six elected officers – the Governor, Lieutenant Governor, Treasurer, Secretary of State, Auditor of Accounts, and the Attorney General – all elected for two-year terms, without term limitations. The Governor is responsible for the faithful execution of all laws and the management of the departments and agencies of the Executive Branch – including the agencies of Administration; Transportation; Natural Resources; Commerce and Community Development; Education; Agriculture, Food and Markets; Digital Services; and Human Services, as well as other departments – through which the functions of state government are carried out. The Judicial branch of the state comprises the Supreme Court, Superior Courts and the Judicial Bureau. The judges are appointed by the Governor with the advice and consent of the Senate and serve six-year terms.

## **Budget Adoption and Legal Compliance/Budgetary Results**

The Required Supplementary Information section includes Budget to Actual comparison schedules for the General Fund and the five budgeted special revenue funds. The state's budgeting process is described in the Notes to the Budget to Actual comparison schedules. These schedules present each fund's original budget, final budget, actual expenditures incurred on a budgetary basis, and the variance between the final budget and actual expenditures incurred. The adopted budget provides legal control over spending. Vermont law prohibits expenditures in excess of amounts appropriated. Budgetary control is exercised by fund within appropriation.

## **The General Fund**

The General Fund accounts for all revenues and other receipts that are not required by law to be accounted for or deposited in other funds, as well as the expenditures associated with these revenues. In fiscal year 2019, General Fund tax revenues accounted for 94.6 percent of total General Fund revenues. The two principal tax revenue contributors – the personal income tax and the meals and rooms tax – accounted for 66 percent of General Fund total tax revenues, or approximately 62.4 percent of total General Fund revenues. General Fund expenditures used 62.7 percent of the total revenues, and these expenditures occurred in the following major governmental functional categories: General Government, Protection to Persons and Property, Human Services, Labor, General Education, Natural Resources, and Commerce and Community Development. Most of the remainder of the resources provided by 2019 General Fund revenues was transferred to other funds and used for various purposes. Please see Note IV.D. for a summary of these transfers.

## **Economic Condition**

The consensus economic forecast includes a Vermont economy that is expected, for the most part, to follow a similar path as the U.S. economy throughout calendar year 2019 through calendar year 2021. The U.S. data corresponds to the most recent Administration-Legislative Joint Fiscal Office (JFO) consensus forecast of the macroeconomic environment for the Vermont economy for the upcoming three calendar year period. The forecast was developed in the winter of 2018 and was subsequently adjusted as needed for the January 2019 consensus revenue forecast process. The updated forecast calls for the current state economic upturn to continue for real output (as measured by Gross State Product), for inflation-adjusted or real personal income, and for most labor market indicators throughout the period. It is also expected that the pace of forward progress in Vermont will continue at a historically moderate pace, due, in part, to a combination of the state's demographic situation and the late-cycle dynamics of a maturing expansion.

Vermont has recently experienced reduced population growth due to historically low birth rates and a slowdown in domestic migration following the Great Recession. This period of reduced population growth has coincided with a roughly five-year period when the state's labor force was declining or flat. This demographic situation may impact future workforce growth and Vermont's economic growth potential. Domestic out-migration has decreased in recent years, however, which may be attributable to the recovery of housing prices throughout the country and in New England. Coupled with increased international in-migration, the state has experienced a return to modest population growth over the last two years according to mid-year population estimates from the U.S. Census Bureau.

As of Spring 2019, housing prices in the state were well above the peak price levels experienced prior to the Great Recession. Vermont was the second state in New England to complete its full housing market price recovery from the mid-2000s, following Massachusetts. This is a particularly noteworthy development because with very low birth rates in Vermont, migratory inflows into the state are an important component of population change.

The State's annual average unemployment rate is expected to average 2.7 percent for calendar year 2019 and then rise to 3.2 percent in calendar year 2020 and 3.6 percent in calendar year 2021. If estimates are correct, Vermont's unemployment rate as of the end of calendar year 2021 would be 0.9 percentage points below the forecasted U.S. unemployment rate for the same period. The rate of payroll job growth is expected to increase by 0.2 percent in calendar years 2020 and 2021. For calendar year 2019 through 2021, Vermont's nominal dollar personal income is expected to increase between 2.5 percent per year and 2.8 percent per year. Housing prices, as measured by the Federal Housing Finance Agency, for calendar year 2019 are expected to increase by 5.3 percent, representing the first time housing prices have increased by over 5.0 percent since the mid-2000s. Housing prices in Vermont are then expected to increase by 6.2 percent and 6.1 percent in calendar years 2020 and 2021, respectively.

## **Long-term Financial Planning**

As part of the state's long-term financial planning, the Legislature created a Capital Debt Affordability Advisory Committee which is required to present to the Governor and General Assembly, no later than September 30th of each year, a recommendation as to the maximum amount of net tax-supported debt the state may prudently issue for the ensuing fiscal year while maintaining the state's Aa1/AA+ debt rating. The recommendation is calculated and presented in accordance with certain debt affordability guidelines and other matters that may be relevant to the proposed debt to be authorized.

At its September 2019 meeting the Committee made a recommendation of net tax-supported debt not to exceed \$123.2 million for the 2020-2021 fiscal year biennium. This represents a 7 percent reduction from the previous biennium's recommendation of \$132.5 million. In the 2019 legislative session, the General Assembly authorized \$123.2 million in total capital project spending in new general obligation debt and \$1.4 million in transfers and reallocations.

### **Independent Audit of These Financial Statements**

CliftonLarsonAllen LLP, an independent certified public accounting firm, performed an independent audit of the state's basic financial statements for the fiscal year ended June 30, 2019. The auditors have issued unmodified opinions, the most favorable outcome of the audit process. The audit described in the auditor's report is not intended to meet all requirements of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards rule (commonly called "Uniform Guidance") implemented in December 2014. Rather, the Uniform Guidance Audit Report for Vermont is issued under separate cover.

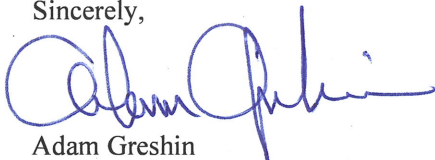

### **Awards and Acknowledgments**

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Vermont for its CAFR for the fiscal year ended June 30, 2018. This was the tenth year Vermont has received this prestigious award. To be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe this CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report involved the dedicated work of staff in the Department of Finance and Management, the Office of the State Treasurer, the Office of the Auditor of Accounts, and the support of all state agencies, departments, component units, the Legislature, and the Judiciary. We welcome inquiries concerning this report and the finances of the State of Vermont.

Sincerely,

Adam Greshin  
Commissioner  
Department of Finance and Management

## INDEPENDENT AUDITORS' REPORT

The Speaker of the House of Representatives,  
President Pro-Tempore of the Senate  
And the Governor of the State of Vermont

### Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Vermont (the State), as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit.

We did not audit the financial statements of certain agencies and component units of the State, which represent the indicated percentages of total assets and total revenues of the opinion units as presented in the table below. Additionally, we did not audit the information disclosed in Note V-E. Those financial statements and information in Note V-E. were audited by other auditors, whose reports thereon have been furnished to us, and our opinion, insofar as it related to the amounts included for those funds and component units, is based solely on the reports of the other auditors.

	Percentage Audited by Other Auditors	
	Assets	Revenues
Governmental Activities	8%	1%
Business-type Activities	7%	52%
Aggregate Discretely Presented Component Units	100%	100%
Special Fund	1%	2%
Federal Revenue Fund	72%	6%
State Lottery Fund	100%	100%

The Speaker of the House of Representatives,  
President Pro-Tempore of the Senate  
And the Governor of the State of Vermont

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

### ***Opinions***

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State as of June 30, 2019, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

### ***Emphasis of Matter***

#### ***Change in Accounting Principle***

As described in Note V-G. to the financial statements, the State has elected to change its method of accounting for the Vermont Energy Efficiency Utility Fund. Our opinion was not modified with respect to that matter.

### ***Other Matters***

#### ***Required Supplementary Information***

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and required supplementary information as listed in the accompanying table of contents (collectively referred to as RSI) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We and other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

The Speaker of the House of Representatives,  
President Pro-Tempore of the Senate  
And the Governor of the State of Vermont

*Other Information*

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, other supplementary information and statistical section are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The other supplementary information, as listed in the table of contents, is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and other auditors. In our opinion, based on our audit, the procedures performed as described above, and the report of other auditors, the other supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The introductory section and statistical section have not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

**Other Reporting Required by *Government Auditing Standards***

In accordance with *Government Auditing Standards*, we have also issued our report dated December 19, 2019, on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the State's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

## INTRODUCTION

We are pleased to present this analysis and discussion of Vermont's financial performance for the fiscal year ended June 30, 2019. This Management Discussion & Analysis (MD&A) section is intended to serve as an introduction to the state's basic financial statements, which have the following components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. The MD&A is designed to assist the reader in focusing on significant financial matters, provide an easily readable overview of the state's financial activities, identify any material changes from the original budget, and highlight financial matters that occurred during fiscal year 2019. The following presentation is in summary form; to gain a thorough understanding of the state's financial condition, the following financial statements, notes and required supplementary information should be reviewed in their entirety.

## FINANCIAL HIGHLIGHTS

### Government-wide

- Vermont reported a deficit net position of \$60.7 million, comprised of \$5.438 billion in total assets and \$730.4 million in deferred outflows offset by \$5.734 billion in total liabilities and \$495 million in deferred inflows at June 30, 2019 (Table 2). Of this deficit net position amount, \$2.661 billion represents the net investment in capital assets, \$1.066 billion is restricted for various purposes, and \$3.788 billion represents a deficit unrestricted net position. The reasons for the deficit unrestricted net position are discussed in the Government-wide Financial Analysis section.
- The primary government's net position has increased by \$137.4 million as a result of this year's operations. The net position for governmental activities increased \$61.5 million and net position for business activities increased by \$75.9 million (Table 3). The increase in net position for business activities was primarily due to improvements in the financial position of the Unemployment Compensation Trust Fund.

### Fund level

- Vermont's governmental funds reported a combined ending fund balance of \$1.057 billion, a decrease of \$13.7 million or 1.3 percent below the prior year. Of this ending fund balance, \$68.1 million is non-spendable, \$530.8 million is restricted for specific purposes, and \$457.6 million is available for spending (committed, assigned, and unassigned fund balance). The decrease in ending fund balance is primarily attributable to an increase in the fund balance of the General Fund (\$42.4 million), and an increase in Special Revenue Funds (\$28.8 million), offset by a decrease in Capital Projects Funds (\$85.4 million).
- Vermont's enterprise funds reported a combined net position of \$537.8 million, an increase of \$75.9 million over last year.
- Vermont's General Fund reported an ending fund balance of \$212.8 million, of which \$60.7 million is non-spendable, and \$152.1 million is available for spending (assigned and unassigned).

### Capital assets

- The carrying amount of capital assets for the primary government increased to \$3.088 billion, an increase of \$80.4 million over last year. The increase is primarily due to \$41.4 million in infrastructure assets and 42.7 million in construction in process.

### Long-term debt

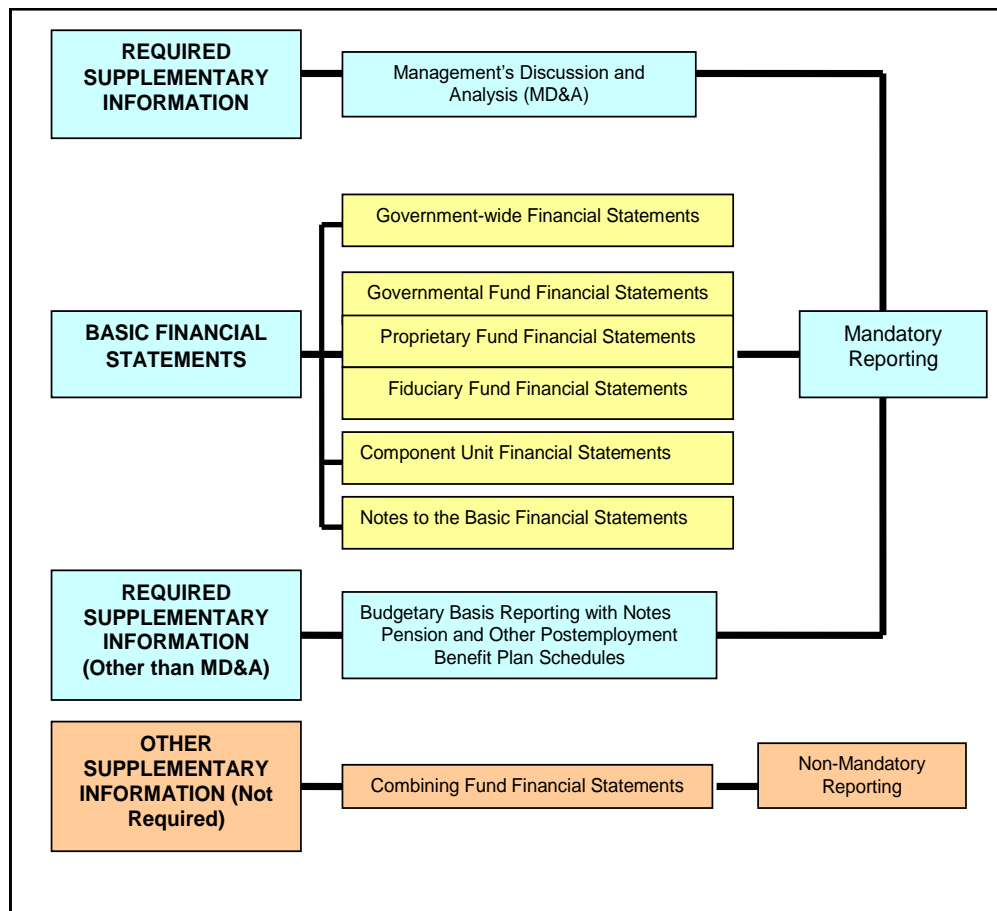

- Vermont's debt outstanding for general and special obligation bonds decreased \$53.4 million as compared to fiscal year 2018. In 2019, Vermont did not issue general obligation bonds, and retired \$51.8 million in general obligation bonds and \$1.6 million in special obligation bonds.

More information regarding the government-wide financial statements, fund level financial statements, capital asset activity and long-term debt activity can be found beginning on page 23.

## OVERVIEW OF THE FINANCIAL STATEMENTS

This Comprehensive Annual Financial Report (CAFR) consists of an introductory section, a financial section, and a statistical section. The financial section contains the Independent Auditor’s Report, this discussion and analysis section, the basic financial statements (BFS) with required supplementary information (RSI), and other supplementary information. Additional information regarding the above sections may be found below as well as in the notes to the financial statements.

The layout of the financial section and the relationship of the financial statements and supplementary information is presented in the following diagram. Notice the relationships between the various elements of the CAFR, such as “mandatory versus non-mandatory” reporting, or “required versus not required” supplementary information. This diagram is designed to illustrate how the various elements of the state’s financial activity fit together in this CAFR.

### Basic Financial Statements

Vermont’s basic financial statements (BFS) consist of four components: 1) government-wide financial statements, 2) fund financial statements, 3) component units’ financial statements, and 4) notes to the financial statements. The fund financial statements include governmental, proprietary, and fiduciary types of funds that will be described later in this analysis. Notes to the financial statements provide explanations and/or additional detail for all of the above financial statements and are considered an integral part of the financial statements.

Table 1 summarizes the major features of the basic financial statements with further explanations below:

<b>Table 1 - Major Features of the State's Government-wide and Fund Financial Statements</b>				
	Government-wide Financial Statements	Fund Financial Statements		
		Governmental Funds	Proprietary Funds	Fiduciary Funds
<b>Scope</b>	Entire State government (except fiduciary funds) and the State's discretely presented component units	The activities of the state that are not proprietary or fiduciary, such as Human Services and Transportation	Activities the state operates similar to private businesses, such as the Liquor Control Fund and State Lottery Fund	Instances in which the state is the trustee or agent for someone else's resources, such as the retirement plans for public employees
<b>Required financial statements</b>	Statement of Net Position Statement of Activities	Balance Sheet Statement of Revenues, Expenditures, and Changes in Fund Balances	Statement of Net Position Statement of Revenues, Expense, and Changes in Net Position, Statement of Cash Flows	Statement of Fiduciary Net Position Statement of Changes in Fiduciary Net Position
<b>Accounting basis and measurement focus</b>	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus	Accrual accounting and economic resources focus

**1) Government-Wide Financial Statements**

Vermont’s government-wide financial statements, which follow this MD&A section, are designed to present a broad view of the state’s operations and financial position in a manner similar to the accounting principles used by most private-sector business. All of Vermont’s activities except its fiduciary funds’ activities are reported in the government-wide statements. Fiduciary activities are not included because the resources of these funds are not available to support Vermont’s own programs.

The government-wide statements contain both short-term and long-term information about the state’s financial position and assist in assessing the state’s economic condition at the end of each fiscal year. Vermont prepares these statements using the “flow of economic resources” measurement focus and the accrual basis of accounting. The methods utilized to prepare these statements are similar to those used by most private sector businesses. They consider all financial activity connected with the reported fiscal year including revenues, expenses, transfers, sales or acquisitions of capital assets, and any other activity affecting or possibly affecting the financial

condition of the state, even if cash involved has not been received or paid.

The government-wide financial statements present two statements:

The *Statement of Net Position* presents a snapshot of both the primary government's and its component units' assets and liabilities and deferred outflows and deferred inflows, as of the date of this report, with the difference between the assets and deferred outflows, and liabilities and deferred inflows reported as "net position". Over time, increases or decreases in the primary government's net position may serve as an indicator as to whether the financial position of the state is improving or deteriorating.

The *Statement of Activities* presents the reported year's financial activity and hence, the reason(s) for the changes in net position included on the Statement of Net Position. All changes in financial activities are recognized as soon as the underlying event(s) giving rise to the changes occur, regardless of the timing of related cash flows. Thus, some revenues and expenses reported in this statement will not result in cash flows until future fiscal periods. This statement also presents the relationship between the state's major expenditure functions and the associated sources of program revenues associated with each expenditure function.

Both of the above financial statements segregate Vermont's financial activity into three categories: governmental activities, business-type activities, and discretely presented component unit activities. The governmental activities and business-type activities are combined to report on what is termed *primary government activities* which are separate and distinct from the *component units' activities* of the discretely presented component units.

### **Primary Government Activities**

*Governmental Activities* – The financial activities reported in this section generally represent those services (functions) normally performed by a government entity. These activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. The governmental activities include public education, general government, public health services, legal and judiciary services, natural resources, public safety, regulatory services, social services, and public transportation. Taxes, grants, and intergovernmental revenues are the main sources of funding for these activities.

*Business-Type Activities* – These business-type activities of the state include the operations of Vermont's enterprise activities. For financial reporting purposes, these activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. Activities categorized as major include the Unemployment Compensation Trust Fund program, Liquor Control Fund, and the State Lottery Fund. Activities reported as non-major include the Federal Surplus Property Program, making equipment loans to municipalities, and several other activities. Both major and non-major activities normally recover all or a portion of their costs through user fees and charges to the external consumers of their goods and services, much like a private business.

### **Component Units' Activities**

*Discretely Presented Component Units* – These are legally separate (incorporated) entities for which the primary government has the ability to impose its will on the entity, receive a benefit from activities of the entity, or could incur a financial burden due to the activities of the entity. Vermont's discretely presented component units are presented in the aggregate in the government-wide statements. This aggregate total consists of four major and five non-major component units. This categorization is determined by the entity's relative significance to Vermont. Additional information or financial statements for each of these individual component units can be obtained from their respective administrative offices. Addresses and additional information about the component units are presented in Note I to the financial statements.

*Blended Component Units* – Vermont has no blended component units.

Included with the basic financial statements are two schedules that reconcile the amounts reported on the governmental fund financial statements (modified accrual basis of accounting) with governmental activities (accrual basis of accounting) on the government-wide statements.

The following summarizes some of the differences in modified accrual and accrual accounting:

- Capital assets used in governmental activities are not financial resources and therefore are not reported in governmental fund statements.
- Certain revenues that are earned, but not available, are reported as revenues of governmental activities, but are reported as unavailable revenue on the governmental fund statements.
- Unless currently due and payable, long-term liabilities, such as capital lease obligations, compensated absences, net pension and other postemployment benefit obligations, and bonds and notes payable appear as liabilities in the government-wide statements but are not reported in the governmental fund statements.
- Internal service funds are reported primarily as governmental activities, but reported as proprietary funds in the fund financial statements.
- Capital outlay spending results in recording capital assets on the government-wide statements, but is reported as expenditures on the governmental fund statements.
- Bond and note proceeds result in liabilities on the government-wide statements, but are recorded as other financing sources on the governmental fund statements. Payments of bond and note principal results in a reduction in liabilities on the government-wide statements but are reported as expenditures on the governmental fund statements.
- Certain other outflows represent either increases or decreases in liabilities on the government-wide statements, but are reported as expenditures on the governmental fund statements.
- Net position balances are allocated as *net investment in capital assets* (capital assets, net of accumulated depreciation, and reduced by outstanding balances for bonds and notes attributable to those assets) *restricted net position* (those with constraints placed on their use by external sources or imposed by law through constitutional provision or enabling legislation) and *unrestricted net position* (the net amount of assets, deferred outflows of resources, liabilities and deferred inflows of resources that do not meet any of the above restrictions).

The notes to the basic financial statements provide additional information that is integral to understanding the data provided in the government-wide and fund financial statements.

## 2) Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. In line with practices in other state and local governments, Vermont uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus and report on the state's activities in more detail than the government-wide statements. All Vermont's funds have been divided into three categories for reporting purposes: governmental, proprietary, and fiduciary. For governmental activities, the governmental funds financial statements indicate how these services are financed in the short-term as opposed to the government-wide statements, which present a long-term view of the state's finances.

In accordance with GASB Statement No. 34, the focus of governmental fund financial statements has shifted from fund types to reporting on the most significant funds of the state, or major funds. Accordingly, the governmental and proprietary funds are divided into major and non-major categories as required by the Governmental Accounting Standards Board. For the governmental and proprietary funds, the major funds are reported in individual columns in the fund financial statements while the non-major funds are presented in a consolidated column in the fund financial statements. Combining schedules or statements in the Other Supplementary Information section present detailed non-major fund activity. Fiduciary funds are reported by fiduciary type (pension and other postemployment benefit trusts, private purpose trusts, and agency funds) with combining schedules or statements for the individual pension, other postemployment benefit, and agency funds presented in the Other Supplementary Information section.

The three categories of funds are Governmental Funds, Proprietary Funds, and Fiduciary Funds. It is important to note that these fund categories use different accounting methods and should be interpreted differently as

described below. Following is a brief overview of these three major categories of funds.

### **Governmental Funds**

Most of the basic services provided by Vermont are accounted for in the governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources as well as the balances of resources available at the end of the fiscal year. This approach uses the "flow of current financial resources" measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the state's finances that help determine whether adequate financial resources are available to meet the current needs of the state.

Because the time period focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented in the governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Schedules reconciling the governmental funds' Balance Sheet and Statement of Revenues, Expenditures, and Changes in Fund Balances to their respective government-wide statements are provided on the pages immediately following each governmental fund financial statement to facilitate this comparison.

Vermont reports twenty governmental funds of which six are classified as "major" governmental funds. These major funds are the General Fund, Transportation Fund, Education Fund, Special Fund, Federal Revenue Fund and Global Commitment Fund. Each major fund is presented in a separate column in the Governmental Funds' *Balance Sheet* and in the *Statement of Revenues, Expenditures, and Changes in Fund Balance*. The "non-major" governmental funds include the Fish and Wildlife Fund, two capital projects funds, two debt service funds, and nine permanent funds, all of which are presented in one consolidated column in the governmental fund statements. Combining and individual non-major governmental fund statements are reported in the Other Supplementary Information section of this report.

Fund balance (the difference between assets and deferred outflows of resources, and liabilities and deferred inflows of resources) is classified as non-spendable, restricted and unrestricted (committed, assigned or unassigned).

Vermont budgets and controls its financial activities on the cash basis of accounting. State law requires financial transactions to be recorded in either of two major categories – the General Fund or various special revenue funds. References to these funds in this report include the terms "budgetary" or "budgetary basis" to differentiate them from the GAAP funds of the same name which encompass different funding categories. Vermont adopts an annual appropriated budget for its budgetary general fund and each special revenue fund. A budgetary comparison schedule has been provided for these funds to demonstrate compliance with the approved budgets. These schedules can be found as part of the required supplementary information section of this report.

The governmental funds' financial statements immediately follow the government-wide financial statements.

### **Proprietary Funds**

This category of funds includes enterprise funds (business-type) and internal service funds. These funds report activities that operate much like those of commercial enterprises. These funds' financial reports include a *Statement of Net Position*; a *Statement of Revenues, Expenses and Changes in Net Position*; and a *Statement of Cash Flows*.

Enterprise funds provide the same type of information as the business-type activities section in the government-wide financial statements, only in more detail and at the fund level. Like the government-wide financial statements, enterprise fund financial statements use the accrual basis of accounting. Enterprise funds account for services provided to the general public, government, and non-state government entities. They normally derive their revenue by charging user fees in order to cover the costs of their services.

Vermont reports nine enterprise funds of which three are reported as major funds in separate columns on the

proprietary fund statements. These three are the Unemployment Compensation Fund, the Liquor Control Fund, and the State Lottery Fund. The other six enterprise funds are reported as "non-major funds" and are consolidated into one column on the proprietary fund statements.

Internal service funds are used to report activity that provides goods and services to other funds, departments, or agencies of the primary government and its component units, or to other governments on a cost reimbursement basis. These funds provide communication and information technology, facilities and property management, fleet management, printing, risk management and insurance services. The internal service fund activities are allocated proportionately between the governmental activities (predominately) and the business-type activities in the government-wide statements based on the benefit of the services provided to these activities. The reconciliation between the government-wide financial statements for business-type activities and the proprietary fund statements is presented at the end of the proprietary fund financial statements.

Vermont reports twenty-four internal service funds, which are reported in one consolidated column entitled "Governmental Activities – Total Internal Service Funds" on the Proprietary Funds Statement of Net Position; Statement of Revenues, Expenses, and Changes in Net Position; and Statement of Cash Flows.

The proprietary funds' financial statements immediately follow the governmental fund financial statements. Combining non-major enterprise and combining internal service fund statements may be found in the Other Supplementary Information section of this report.

### **Fiduciary Funds**

The fiduciary funds are used to account for assets held by Vermont in a trustee capacity or as an agent for individuals, private organizations, other governmental units, or other funds. Fiduciary funds are excluded from the government-wide financial statements because Vermont cannot use these assets to finance its operations. The fiduciary funds use the accrual basis of accounting.

Vermont's fiduciary funds are divided into the following three basic categories: Pension and Other Postemployment Benefit Trust Funds (includes three separate defined benefit pension plans, three separate defined contribution pension plans, two defined benefit other postemployment benefit plans, and one defined contribution other postemployment benefit plan); a Private Purpose Trust Fund (which reports only the Unclaimed Property Fund); and Agency Funds (nine agency funds which account for the assets held for distribution by Vermont as an agent for other governmental units, organizations or individuals). These funds' financial reports include a *Statement of Fiduciary Net Position*; and a *Statement of Changes in Fiduciary Net Position*.

The fiduciary funds financial statements can be found immediately following the proprietary funds' financial statements. Individual pension and other postemployment benefit trust funds', and agency funds' financial statements are reported in the Other Supplementary Information section of this report.

### **3) Discretely Presented Component Units' Financial Statements**

As mentioned previously, Vermont has included the net position and activities of four major component units in individual columns and five non-major component units in a single column on the statements. The component units' financial statements can be found immediately after the fiduciary funds. Combining individual non-major component units' financial statements can be found in Other Supplementary Information section of this report.

### **4) Notes to the Financial Statements**

The notes provide additional information that is essential to a full understanding of the data presented in the government-wide and the fund financial statements. They are an integral part of the financial statements and focus on the primary government and its activities. The notes also explain some of the information contained in the financial statements and provide more detail than is practical in the financial statements.

The notes include a summary of significant accounting policies; additional information regarding the reconciliation of government-wide and fund financial statements; discussions on stewardship, compliance and accountability; detailed notes on all activities and funds; and other information. The notes to the financial statements can be found immediately following the component units' financial statements.

Required Supplementary Information Other Than MD&A

The basic financial statements are followed by a section of required supplementary information. This section includes:

- The Schedule of Changes in Net Pension Liability and Related Ratios, the Schedule of Investment Returns, the Schedule of Employer and Non-employer Contributions, and the Schedule of the State's Proportionate Share of the Net Pension Liability for the two defined benefit pension trusts are included in the required supplementary information section. Also, this section includes the Schedule of Changes in Net OPEB Liability and Related Ratios, The Schedule of Investment Returns, Schedule of Employer and Non-employer Contributions, and the Schedule of the State's Proportionate Share of the Net OPEB Liability for the other postemployment benefit plans.
- Schedules for the General Fund and budgeted Special Revenue Funds comparing their original budgeted amounts; final budgeted amounts; actual inflows, outflows, and balances stated on a budgetary basis; and variances between the final budgeted amounts and actual amounts presented on a budgetary basis. See Note III. A. for additional information regarding the budgetary process, including the budgetary basis.
- Notes to Required Supplementary Information include a schedule reconciling the statutory fund balance presented on a budgetary basis to the fund balance prepared on a modified accrual basis as presented in the governmental fund financial statements for the general fund and each budgeted special revenue fund, as well as additional information regarding the budgetary process.

Other Supplementary InformationCombining Financial Statements

The combining fund financial statements referred to earlier in connection with non-major funds and non-major component units are presented following the Required Supplementary Information section. The total columns of these combining financial statements carry to the applicable fund financial statement. These combining statements include the following:

- Non-major governmental funds
- Non-major proprietary (enterprise) funds
- Internal service funds
- Fiduciary funds (including individual pension and other postemployment benefit trust funds, and agency funds)
- Non-major component units

Statistical Section

A statistical section containing information regarding financial trends, revenue capacity, and debt capacity, as well as operating, economic and demographic information is presented immediately following the combining financial statements.

**GOVERNMENT-WIDE FINANCIAL ANALYSIS****Net Position**

The following primary government condensed financial statement information is derived from Vermont's June 30, 2019 and 2018 government-wide Statement of Net Position. Although the government-wide statements include discretely presented component unit activity, the component unit activity has not been included in these condensed statements.

Vermont's combined deficit net position (governmental and business-type activities) totals \$60.7 million at the end of fiscal year 2019, as shown in Table 2. Approximately \$2.661 billion of the combined net position represents Vermont's investment in capital assets such as land, buildings, equipment, and infrastructure (roads, bridges, and other immovable assets) less any related debt still outstanding that was used to acquire those assets. This net investment in capital assets represents resources used to provide services to citizens, and therefore is not

available for future spending. Although the investment in capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities. Capital assets net of accumulated depreciation increased by \$80.4 million primarily due to a \$41.4 million increase in infrastructure assets, and \$42.7 million in construction in process.

An additional portion of the primary government's net position (\$1.066 billion) represents resources that are subject to external restrictions on how they may be used. This is an increase of \$24 million and is primarily a result of additional amounts that are restricted for unemployment compensation (\$56.8 million), natural resources (\$17.6 million), and protection to persons and property (\$10.4 million); offset by a decrease in capital projects (\$57.6 million) and a decrease in human services (\$7.6 million).

Internally imposed designations of resources are not presented as restricted net position. The remaining balance of unrestricted net position is a deficit of \$3.788 billion. The governmental activities' negative unrestricted net position balance is mainly the result of three actions: 1) the net pension and net other postemployment benefit liabilities; 2) the amount of net position that is restricted for various purposes; and 3) long-term debt issued by Vermont for municipal, non-profit or component unit capital purposes, \$198.4 million outstanding at June 30, 2019, that does not result in a governmental activities' capital asset.

Current assets increased by \$102 million primarily due to increases in cash and cash equivalents (\$92.1 million), investments (\$17.6 million), and in federal grants receivable (\$20.5 million). Long term liabilities decreased by \$146 million primarily due to the decrease in net pension liabilities and net other postemployment benefit liabilities (\$92.4 million) and in bonds, notes, and leases payable (\$58.2 million).

At the end of fiscal year 2019, Vermont reported positive total net position balances in its business-type activities and its discretely presented component units, and a deficit net position in its governmental activities.

### Changes in Net Position

Governmental type activities had an overall increase in net position of \$61.5 million, or a 9.3 percent reduction in the deficit net position, resulting from an operating gain of \$29.8 million and by net transfers in from business-type activities of \$31.7 million, primarily from the State Lottery Fund (\$29.2 million) to support education. The \$97.4 million increase in revenues over 2018 was due to a \$132.4 million increase in general revenues, offset by a decrease of \$35 million in program revenues.

Business-type activities had an overall increase in net position of \$75.9 million or 16.4 percent, resulting from an operating profit of \$107.6 million offset by net transfers out of \$31.7 million to governmental activities, primarily from the Lottery (\$29.2 million) to support education. Revenues increased from 2018, primarily due to an increase in ticket sales in the State Lottery Fund (\$6.8 million), an increase in revenue in the Liquor Control Fund (\$1.7 million) and investment income in the Unemployment Compensation Trust Fund (\$2.1 million). The revenue increases were offset by an increase in expenses, primarily due to an increase in expenses in the State Lottery (\$4.7 million).

The primary government condensed financial statement information is derived from Vermont's June 30, 2019 and 2018 government-wide Statement of Changes in Net Position. Although the government-wide statements include discretely presented component unit activity, the component unit activity has not been included in these condensed statements.

The beginning net position as of July 1, 2018 for Governmental Activities and Business-type Activities was restated for the accounting change to report the Electric Efficiency Utility Fund as a non-major enterprise fund, a

change from prior years when the Electric Efficiency Utility Fund was reported in the Special Fund.

Totals may not add due to rounding.						

The following graph illustrates the revenues of Vermont’s primary government for fiscal year 2019. Approximately 32.3 percent comes from other entities and governments in the form of operating and capital grants and contributions (primarily federal grant revenues). An additional 34.0 percent of total revenues are generated by the statewide education and income taxes.

Percentages may not equal 100 percent due to rounding.

The following graph illustrates the percentages of total primary government expenses for fiscal year 2019. The largest category of expense is for human services (41.1 percent of total expense) which provides for Vermont’s low-income, elderly care services and persons in state custody in the form of grants for selected services such as food stamps, health care, housing and child protective services. The second most significant category of expense is for general education (34.9 percent of total expenses) which provides for Vermont’s support to secondary and higher education.

(Chart on next page.)

**Governmental Activities**

In 2019, governmental activities’ revenues exceeded expense by \$29.8 million plus net transfers in of \$31.7 million from business activities, which resulted in an increase of \$61.5 million, for a 9.3 percent decrease in deficit net position. Revenues increased by \$97.4 million, primarily due to an increase in general revenues (\$132.4 million), offset by decrease in program revenues (\$35 million). Spending increased for general education (\$64.8 million), human services (\$67.3 million), natural resources (\$8.8 million); offset by a decrease in spending in protection to persons and property (\$81.3 million).

The following table provides a two-year comparison of governmental activities revenues:

*(Table on next page.)*

**TABLE 4**  
**Revenues - Governmental Activities**

Revenue Type	(In Millions)		
	2019	2018	Change

<b>Total</b>	<b>\$ 5,877.0</b>	<b>\$ 5,819.2</b>	<b>\$ 57.8</b>

The following table shows to what extent program revenues (charges for services and grants and contributions) covered program expenses. For fiscal year 2019, program revenues covered \$2.470 billion or 42 percent of \$5.877 billion in program expenses. The remaining \$3.407 billion or 58 percent of program expenses was paid for by state taxes and other general revenue.

(Table on next page.)

TABLE 6  
Net Program Revenue  
For the years ended June 30, 2019 and 2018

Functions/programs	Program Expenses	Less Program Revenues	Net Program (Expense)/Revenue		Program Revenues as a Percentage of Program Expenses

## FINANCIAL ANALYSIS OF THE PRIMARY GOVERNMENT'S INDIVIDUAL FUNDS

As noted earlier, the State of Vermont uses fund accounting to account for its ongoing operations and to demonstrate compliance with finance-related legal requirements imposed by legislative mandates as well as externally imposed restrictions.

### Governmental Funds

The focus of the state's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the state's financing requirements. In particular, unrestricted (unassigned, assigned, and committed) fund balances may serve as a useful measure of a government's net resources available for spending. At the end of fiscal year 2019, the unrestricted fund balance is 43.3 percent of the total fund balance of governmental funds, which is available for spending on governmental programs at Vermont's discretion in the coming year. The remainder of this fund balance is restricted or non-spendable to indicate that it is not available for appropriation, such as the principal of Vermont's Permanent Funds, and other items that are non-spendable, such as advances and long-term receivables. At the end of fiscal year 2019, Vermont's governmental funds reported combined fund balances of \$1.057 billion, a decrease of \$13.7 million in comparison with the prior fiscal year.

The General Fund is the chief operating fund of Vermont. At the end of fiscal year 2019, the General Fund's total fund balance was \$212.8 million. The fund balance was made up of non-spendable amounts totaling \$60.7 million, and available amounts totaling \$152.1 million of which \$142.8 million is unassigned. During 2019, total revenues and other financing sources were greater than total expenditures and other financing uses by \$42.4 million.

General Fund revenues increased by \$81.2 million, or 5.23 percent, primarily due to a \$57.8 million increase in taxes and \$19.8 million increase in special assessments. Expenditures increased by \$96.7 million or 10.4 percent, primarily due to a \$38.5 million increase in general government, \$33.8 million increase in general education, \$11.7 million increase in protection to persons and property, and \$11.6 million increase in human services. The General Fund's statutory reserve for budgetary stabilization increased by \$1.2 million to \$78.2 million, the statutory maximum.

The Transportation Fund's total fund balance was \$33.5 million at June 30, 2019, an increase of \$6.9 million from the fiscal year 2018's ending total fund balance. Transportation Fund revenues decreased \$38.6 million or 6.35 percent, primarily due to a decrease in Federal grant funding for state highway projects (\$41.5 million) and decrease in expenditures of \$34.9 million for transportation related projects. The Transportation Fund's statutory reserve for budget stabilization increased by \$356.7 thousand to \$13.8 million, the statutory maximum.

The Education Fund at June 30, 2019 had a total fund balance of \$103.5 million, a minor increase of \$4 thousand from fiscal year 2018's ending balance. Education fund expenditures increased by \$32.6 million, primarily due to an increase in grants to school districts of \$44.8 million. The statewide education tax increased \$46.5 million, sales and use taxes increased \$254.5 million, meals and rooms taxes increased \$41.8 million, and purchase and use tax increased \$800 thousand. Transfers in from the General Fund decreased \$345 million. The Education Fund's statutory reserve for budget stabilization increased \$2.4 million to \$37 million, the statutory maximum.

The Special Fund's total fund balance at the end of fiscal year 2019 was \$180 million, an increase of 10 percent compared to 2018. The Special Fund's total fund balance is comprised of \$17.1 million as restricted, \$162.8 million as committed and assigned. Special Fund revenues decreased \$363.1 million or 55.87 percent, and expenditures decreased \$71.6 million or 22.3 percent. The decrease in expenditures was primarily in the protection to persons and property function (\$82.1 million), of which \$78 million was from the Energy Efficiency Utility program now being reported as a non-major enterprise fund; offset by an increase in human services function (\$12 million). This resulted in an increase in "excess of expenditures over revenues" of \$291.5 million from last fiscal year. Fiscal year 2019 transfers out to other funds exceeded transfers in from other funds by \$21.1 million. The Special Fund received transfers in of \$75.1 million, in part, consisting of Federal Revenue Fund monies for the earned income tax credit (\$19.2 million); earned federal receipts (\$15.4 million); matching funds for school-based Medicare services (\$28.9 million); the Next Generation Fund (\$3.5 million); and Federal Revenue Fund monies for Children's Health Insurance Claims fund (\$1.6 million). Transfers out of \$96.2 million consisted primarily of payments for \$36.7 million for Vermont's payment for Medicaid coverage under the Global Commitment to Health Medicaid waiver, as well as \$34.3 million for securities, insurance and captive funds to the general fund, \$4.5 million for Attorney General fees and reimbursements, and \$11.3 million Medicaid reimbursement to the education fund.

The Federal Revenue Fund accounts for all federal grants except those federal grants that are awarded to the Agency of Transportation (which are included in the Transportation Fund), the Global Commitment to Health Medicaid waiver (which are included in the Global Commitment Fund) and the Department of Fish and Wildlife (which are included in the Fish and Wildlife Fund, a non-major governmental fund). The Federal Revenue Fund's federal grant revenues for fiscal year 2019 were \$770.8 million, a decrease of \$13 million compared to fiscal year 2018's federal grant revenues. Expenditures were \$725.4 million in fiscal year 2019, an increase of \$5.7 million compared to 2018. The Federal Revenue Fund's total fund balance at the end of fiscal year 2019 (\$477.8 million) was an increase of \$18.4 million as compared to the total fund balance at the end of fiscal year 2018.

The fiscal year 2019 ending total fund balance for the Global Commitment Fund was \$26.3 million, a decrease of \$14.8 million. The expenditures of \$1,526.5 million exceeded revenues and net transfers of \$1,511.7 million by \$14.8 million.

See Note I, Section C for more information regarding these funds.

### Proprietary Funds

Vermont's *enterprise funds* provide the same type of information presented in the business-type activities in the government-wide financial statements, but in more detail. The Unemployment Compensation Trust Fund's total net position balance increased from \$459.6 million at June 30, 2018 to \$516.3 million at June 30, 2019, an increase of \$56.8 million in one year. Expenditures from the fund for unemployment benefits decreased by \$500 thousand from 2018.

Vermont's *internal service funds'* total net position at June 30, 2019 was \$41.1 million, a \$5.5 million increase from June 30, 2018. This change is primarily due to an increase in net position of \$10.4 million in the medical insurance fund, offset by a decrease in the workers compensation fund of \$5.9 million. It should be remembered that the internal service funds' activity has been combined with the governmental funds' activity in the government-wide financial statements.

### Fiduciary Funds

Vermont's fiduciary funds account for resources held for the benefit of parties outside state government. The Pension and Other Postemployment Benefit Trust Funds' net position increased by 5.23 percent to \$4.72 billion at

June 30, 2019. For more information regarding the Vermont’s retirement and other postemployment benefit plans, see Note IV. G. 4. to the financial statements. The Unclaimed Property Fund’s total assets balance at June 30, 2019 is \$15.5 million, and total liabilities balance is \$9.2 million, including the escheat property claims liability estimated at \$9.1 million, resulting in ending net position of \$6.3 million. Net position of all fiduciary funds is reported as restricted for particular purposes.

**GENERAL FUND BUDGET HIGHLIGHTS**

Vermont ended fiscal year 2019 with General Fund revenues of \$1.612 billion, expenditures of \$1.507 billion, and net transfers to other funds of \$2.4 million (non-GAAP budgetary basis). This was a \$53 million increase in revenues over the previous year. The fiscal year 2019 General Fund consensus revenue forecast initially approved by the Emergency Board in July 2018 was subsequently revised upward by the Emergency Board at their January 2019 and May 2019 meetings. Compared to target, the revenues were 3.3 percent above the July 2018 revenue forecast of \$1,560 million, and 2.17 percent over the May 2019 revised revenue forecast of \$1,578 million. Personal income tax receipts were \$50.5 million above target, corporate income tax receipts were \$11.7 million above target, and estate tax receipts were \$6.5 million below target. The General Fund results allowed for a fully funded General Fund Budget Stabilization Reserve of \$78.2 million, representing the statutory maximum of 5 percent of the prior year appropriations level.

**PRIMARY GOVERNMENT’S CAPITAL ASSETS AND DEBT ADMINISTRATION**

**Capital Assets**

Vermont’s investment in capital assets (net of accumulated depreciation) for its governmental and business-type activities as of June 30, 2019 was \$3.088 billion, a total increase of 2.7 percent (Table 7). This investment in capital assets includes land, buildings, improvements, equipment, infrastructure and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the state, such as roads, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items. Additional information on Vermont’s capital assets can be found in Note IV. E of the notes to the financial statements.

**TABLE 7**

Totals may not add due to rounding.

Many component unit, municipal and non-profit organizations’ capital construction projects and acquisitions are financed by Vermont, but the assets are actually owned by these other entities. Therefore, these capital assets are recorded on the financial statements of those entities and not on the books of the state; however, the general obligation bonds issued by Vermont to finance these capital assets are reported as a liability of the state’s governmental activities. At June 30, 2019, Vermont had \$198.4 million of general obligation bonds outstanding related to capital assets of these other entities.

**Debt Administration***Bonded Indebtedness*

Vermont has no constitutional or other limit on its power to issue obligations or to incur debt besides borrowing only for public purposes. In 1990, the General Assembly created the Capital Debt Affordability Advisory Committee and made it responsible for overseeing the long-term capital planning for the state. Annually, the General Assembly passes appropriations for capital purposes and authorizes the State Treasurer to issue general obligation bonds to provide the financing for all or a portion of the appropriations. Bonds are backed by the full faith and credit of the State of Vermont, including the state's power to levy additional taxes to ensure repayment of the debt.

During fiscal year 2019, the State of Vermont's outstanding general and special obligation bond debt decreased by approximately \$53.4 million. This decrease can be accounted for by redemption of general obligation bonds of \$51.8 million and \$1.6 million in special obligation bonds. Additional information on Vermont's bonded debt is contained in Note IV. G. 1. of the notes to the financial statements.

Vermont's general obligation bond ratings are as follows: Aa1 by Moody's Investor Service (since October 2018), AA+ by Standard & Poor's Ratings Services (since September 2000), and AA+ by Fitch Ratings (since July 2019). In July of 2019 Fitch Ratings downgraded Vermont's general obligation bond ratings from AAA to AA+.

**ECONOMIC OUTLOOK**

Vermont's economy reflects a general "steady-as-you-go" but still improving outlook. The state's various macro indicators and benchmarks lag the national average rates of change due the state's demographic challenges to labor market growth. As of March 2019, the U.S. economy had completed its 117th month of economic recovery/expansion, including more than 100 consecutive months of additions to U.S. (seasonally-adjusted) non-farm payroll jobs, an unemployment rate holding steady at the lowest levels in roughly three decades, wages that have been rising at a rate of 3.0 percent or higher for six straight months, and U.S. equity markets that have regained nearly all of the ground lost during the period of volatility during the fourth quarter of calendar year 2018. These economic indicators have continued through July 2019, making the current upturn the longest uninterrupted period of U.S. economic expansion in recorded U.S. economic history.

In comparison, Vermont's labor market continues to be strong; Vermont has the lowest monthly (seasonally adjusted) unemployment rate of 2.1 percent (May 2019) as compared to the seven northeastern states, and the U.S. rate of 3.6 percent. For calendar years 2019 through 2021, Vermont's inflation-adjusted output and non-farm payroll job growth are forecast to continue to increase, but at a level somewhat below the U.S. average. The State's unemployment rate is expected to continue to track at a level significantly below the U.S. average – as has been the case for Vermont labor markets dating back to the early 2000s. Vermont's comparative housing price performance is expected to continue to track below U.S. levels, largely due to the fact that the state's housing price decline during the Great Recession was not as pronounced as the U.S. average nor near the level of price declines experienced by most U.S. states during the housing market crash that occurred during this period.

Vermont, by statute, establishes a consensus revenue forecast each July and January. The July 2019 consensus revenue forecast for the General Fund calls for a \$281.1 million forecast upgrade for fiscal year 2020 in comparison to last January's revenue forecast for \$1,295.1 million. For fiscal year 2021, the General Fund forecast is for an upgrade to \$1,580.8 million. The Transportation Fund forecast is for a 1.2 percent increase over fiscal year 2020 forecasted revenue of \$284.6 million and the Education Fund calls for a 2.9 percent increase over fiscal year 2020 forecasted revenue of \$552.8 million. This forecast assumes likely prospects for the continuation of the U.S. economic expansion.

Near term, Vermont's three largest funds for revenue have improved. Both corporate and personal income tax receipts in Vermont were extremely strong in fiscal year 2019. Total fiscal year 2019 revenues across all three major funds ended the year about 2.5 percent above prior January forecasts, with the General Fund up about 4.5 percent, the Transportation Fund down about 1.2 percent and the Education Fund 0.4 percent below target. Much

of this strength is expected to continue into fiscal year 2020 and 2021, though at slower rates of growth. Allocative and other tax changes to the various funds enacted during the 2019 legislative session make comparisons to January projections difficult, but revenue impacts associated with macroeconomic changes will add about \$20-\$30 million per year (approximately 1 percent) across all three funds relative to prior estimates.

### REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Vermont's finances. Questions concerning any of the information provided in this report or requests for additional information should be addressed to:

State of Vermont  
Department of Finance and Management  
109 State Street, 5th Floor  
Pavilion Building  
Montpelier, Vermont 05609-0401

Component units of the State of Vermont issue their own financial statements. These statements may be obtained by directly contacting them at the addresses found in Note I to the financial statements.

**STATE OF VERMONT  
RECONCILIATION OF STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN  
FUND BALANCES - GOVERNMENTAL FUNDS TO THE  
STATEMENT OF ACTIVITIES - GOVERNMENTAL ACTIVITIES  
FOR THE FISCAL YEAR ENDED JUNE 30, 2019**

<b>Total net change in fund balances from the previous page.....</b>	<b>\$</b>	<b>(13,736,807)</b>
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period (net of internal service funds) <sup>(1)</sup> .....		77,157,260
Repayment of bond principal is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position <sup>(1)</sup> .....		53,395,000
Bond proceeds provide current financial resources to the governmental funds, but issuing debt increases long-term liabilities in the statement of net position <sup>(1)</sup> .....		6,143,155
Receivables in the governmental funds that are not available to provide current financial resources are not reported as revenues in the governmental funds .....		28,281,951
Estimated personal income tax refunds that are not due and payable are not reported as governmental fund liabilities .....		(4,792,810)
Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds <sup>(1)</sup> .....		(90,381,305)
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities .....		<u>5,526,561</u>
<b>Total changes in net position of governmental activities as reported on the statement of activities.....</b>	<b>\$</b>	<b><u>61,593,005</u></b>

<sup>(1)</sup> Additional information on these amounts can be found in Note II. B.

The accompanying notes are an integral part of these financial statements.

**STATE OF VERMONT  
NOTES TO BASIC FINANCIAL STATEMENTS  
JUNE 30, 2019**

**Note I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The accompanying basic financial statements of the State of Vermont (State) have been prepared in accordance with generally accepted accounting principles as applicable to governmental entities. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing accounting and financial reporting principles in the United States of America.

The basic financial statements present the financial position of the State, the results of operations of the State and the various funds and fund types, and the cash flows of the various proprietary funds. The basic financial statements are presented as of and for the period ended June 30, 2019.

The following is a summary of the more significant accounting policies employed in the preparation of these financial statements.

**A. Financial Reporting Entity**

The State of Vermont's Primary Government is comprised of three branches: the Executive Branch, with the Governor as the chief executive officer; the Legislative Branch, with a Senate of 30 members and a House of Representatives of 150 members; and the Judicial Branch, with Supreme and Superior Courts and the Judicial Bureau.

The basic financial statements include all funds, agencies, boards, commissions and organizations of the primary government (the State), as well as component units that have been determined to meet the requirements for inclusion in the State's financial reporting entity.

Component Units are entities that, although legally separate from the State, have been included because they are either financially accountable to the State, or have relationships with the State such that exclusion would cause the State's financial statements to be misleading or incomplete. These component units are financially accountable to the State if the State appoints a voting majority of the organization's governing body and it is able to impose its will on that organization, or if there is a potential for the organization to provide a financial benefit or financial burden to the State. Alternatively, for those organizations where the State does not appoint a voting majority, an organization is financially accountable to the State if the organization is fiscally dependent and the organization provides a financial benefit or financial burden to the State.

Component unit activity may be "blended" into the activity of the primary government or may be reported separately. Blended component units are, in substance, part of the primary government's operations, even though they are legally separate entities. Thus, blended component units are appropriately presented as funds of the primary government. If they are reported separately, they are called "discretely presented component units" and are reported in a separate column in the government-wide financial statements to emphasize that they are legally separate from the primary government. Each discretely presented component unit's designation as either "major" or "non-major" has been determined by the entity's relative significance to the State. Additional information as well as separately issued financial reports may be obtained by contacting the individual entity desired at the address given in the following text.

### **Discretely Presented Major Component Units**

The “Discretely Presented Component Units” contained in the government-wide financial statements report the financial results of the following entities:

*Vermont Student Assistance Corporation (VSAC)* – The VSAC was established by the Vermont Legislature to provide opportunities for persons who are residents of Vermont to attend colleges or other institutions of higher education by awarding grants and by making, financing, servicing, and guaranteeing loans to qualifying students. The Governor of the State appoints five of the eleven members of the Board of Directors and the State Legislature appoints two additional members. The State of Vermont has the ability to impose its will upon VSAC through its ability to change or alter the organization, structure or programs. For audited financial statements and further information, contact their administrative offices at 10 East Allen Street, P.O. Box 2000, Winooski, Vermont 05404.

*University of Vermont (UVM)* - The UVM’s financial report includes the University, the State Agricultural College, and UVM’s two discretely presented component units; the University of Vermont and State Agricultural College Foundation, Inc. (UVMF), and the University Medical Education Associates, Inc. (UMEA). The State appoints thirteen of the twenty-five voting members of the Board of trustees. The State has assumed an obligation to provide financial support through its annual appropriation and is obligated to maintain the University’s debt service reserves. Audited financial statements and additional information may be obtained by contacting the university’s administrative offices at 348 Waterman Building, Burlington, Vermont 05405.

*Vermont State College System (VSC)* – The Vermont State College System’s annual report includes the financial activity for the following organizations:

- System Offices and Services
- Community College of Vermont
- Castleton University
- Northern Vermont University
- Vermont Technical College
- Vermont Manufacturing Extension Center
- Small Business Development Center
- Vermont Tech Office of Continuing Education and Workforce Development

The Governor, with the advice and consent of the Senate, appoints nine of the fifteen members of the board of trustees, and the legislature appoints an additional four members. The State has assumed an obligation to provide financial support through its annual appropriations and has assumed an obligation to maintain VSC’s debt service reserves. Audited financial statements and additional information about the system itself or about any of the individual organizations included in the system may be obtained by contacting the Office of the Chancellor, Vermont State Colleges, P.O. Box 7, Montpelier VT 05601.

*Vermont Housing Finance Agency (VHFA)* – The VHFA was created in 1974 by an Act of the General Assembly of the State of Vermont for the purpose of financing and promoting affordable, safe and decent housing opportunities for low- and moderate-income Vermonters. The State appoints voting members of VHFA’s board of commissioners. The State is able to impose its will on the organization as the Governor can remove any member of the board at will. The State also has an obligation to maintain the organization’s debt reserves. Audited financial statements and additional information may be obtained by contacting the Agency’s administrative offices at 164 Saint Paul Street, Burlington, VT 05401.

### **Discretely Presented Non-major Component Units**

*Vermont Economic Development Authority (VEDA)* VEDA, a tax-exempt entity, was created by the Vermont Legislature for the purpose of promoting economic prosperity in the State by directly financing eligible businesses and projects including manufacturing, agricultural, and travel and tourism enterprises; and by operating programs which provide eligible borrowers with access to capital. The authority has 15 voting members consisting of the

Secretary of the Agency of Commerce and Community Development; the State Treasurer; the Secretary of Agriculture, Food and Markets; the Commissioner of Forest, Parks, & Recreation; and the Commissioner of Public Service; or a designee of any of the above; and ten members, who are residents of the State of Vermont and appointed by the Governor with the advice and consent of the senate. The State has the ability to impose its will on the entity as the Governor can remove members at will and the State can change the structure and activities of the organization at any time. The entity's services primarily benefit the Vermont citizenry.

VEDA also administers the State Infrastructure Bank (SIB), the Drinking Water State Revolving Loan Fund – Private Loans, the Brownfields Revitalization Fund, Clean Energy Development Fund, and the Windham County Economic Development Fund. These five funds are administered for the benefit of the State and are consolidated and reported in VEDA's agency fund. Audited financial statements and additional information may be obtained by contacting VEDA at 58 East State Street, Suite 5, Montpelier, Vermont 05602.

*Vermont Housing and Conservation Board (VHCB)* – The Legislature created and charged this organization with two goals: create affordable housing for Vermont residents; and conserve and protect Vermont's agricultural lands, historic properties, forestlands, important natural areas, and recreational lands. The VHCB's Board of Directors is appointed by the Governor of the State of Vermont and there is a material financial relationship. Funding for the organization is provided by the Legislature, comprised of 50% of the revenue from the property transfer tax, plus other monies appropriated from time to time. Audited financial statements and additional information may be obtained by contacting the VHCB at 58 East State Street, Suite 5 Montpelier, Vermont 05602.

*Vermont Municipal Bond Bank (VMBB)* – The Vermont Legislature established the VMBB for the express purpose of fostering and promoting adequate capital markets and facilities for borrowing money by governmental units of the State of Vermont for the financing of public improvements or other public purposes. The Governor appoints the four directors, and can remove members at will. VMBB is authorized, with written consent of the Governor and the State Treasurer, to carry out these charges by borrowing money or by issuing its own bonds and notes to obtain funds which are then utilized to purchase bonds and notes issued by local governmental entities. The State is obligated annually to appropriate any funds necessary to maintain required reserves of the bond bank. The VMBB has a December 31 (annual) year-end.

VMBB also administers the Special Environmental Revolving Fund in accordance with 24 V.S.A. 4753(b). This fund was created by the Vermont Legislature for the purpose of fostering and promoting timely expenditures by municipalities for water supply, water pollution control, and solid waste management. The fund has a June 30 year-end and publishes its own audited financial statements. For financial reporting purposes, its financial statements have been consolidated with the State's Federal Revenue Fund financial statements in this CAFR. VMBB audited financial statements and additional information regarding VMBB or the Special Environmental Revolving Fund may be obtained by contacting VMBB at 20 Winooski Falls Way, Winooski VT 05404.

*Vermont Educational and Health Buildings Financing Agency (VEHBFA)* – VEHBFA is a non-profit entity which finances or assists in the financing of projects for eligible Vermont educational institutions, health care related entities, and private libraries. The majority of the Board of VEHBFA is appointed by the Governor of the State. The Board may appoint officers, agents, consultants and employees. Their compensation is subject to approval of the Governor. It has a December 31 (annual) year-end. Audited financial statements and additional information may be obtained by contacting VEHBFA at 20 Winooski Falls Way, Winooski VT 05404.

*Vermont Veterans' Home* – The Vermont Veterans' Home was originally chartered in 1884 by the Vermont Legislature and incorporated on November 24, 1884. A Board of Trustees appointed by the Governor oversees the operations of the Vermont Veterans' Home. The State can impose its will on the entity as directors serve at the pleasure of the Governor. The Vermont Veterans' Home is financially accountable to the State as the State provides all funding and controls the finances of the Home. Audited financial statements and additional information may be obtained by contacting them at 325 North Street, Bennington, Vermont 05201.

*Vermont Transportation Authority (VTA)* – The Vermont Legislature specifically authorized the creation of VTA pursuant to the acquisition, operation, and support of an authorized transportation facility as defined in 29 V.S.A.

701. All members of the authority are appointed by the Governor, and all resources revert to the State on termination of the authority. The VTA, currently inactive, has remained in the State Statutes in case it becomes necessary to reactivate it in the future. Additional information may be obtained from the Agency of Transportation – Rail Division, National Life Building, Montpelier, Vermont 05633–5001.

### **Joint Ventures**

A joint venture is a legal entity or other contractual arrangement that is owned, operated or governed by two or more participants as a separate and specific activity subject to joint control, in which the participants retain an ongoing financial interest or responsibility. The Tri-State Lotto Commission (31 V.S.A. 673) is classified as a joint venture. The financial activities of this organization have not been included in the State's financial statements; however, see Note V. E. for additional information regarding the organization.

### **Jointly governed Organizations**

The following organizations are classified as jointly governed organizations, because they represent units over which control is exercised jointly by the State along with various other governmental agencies. There is no specific ongoing financial benefit or burden for the State associated with these organizations, which distinguishes these arrangements from those classified as joint ventures. The financial activities of these organizations are not included in the State's financial statements.

- Connecticut River Valley Flood Control Commission (10 V.S.A. 1153)
- New England Board of Higher Education (16 V.S.A. 2692)
- New England Interstate Water Pollution Control Commission (10 V.S.A. 1333)
- Northeastern Forest Fire Protection Commission (10 V.S.A. 2503)

### **Related Organizations**

Related organizations are separate legal entities for which the primary government appoints a voting majority of the board members, but does not have either (a) the ability to impose its will on the organization or (b) a relationship of financial benefit or burden with the organization. The Vermont State Housing Authority (24 V.S.A. 4005) has been classified as a related organization, and thus their financial activity has not been included in the State's financial statements.

### **Excluded Organizations**

The following entities have been determined not to be part of the reporting entity after applying the criteria of GASB Statement No. 14 "The Financial Reporting Entity", as amended by GASB Statements No. 61.

- Vermont Sustainable Jobs Fund, Inc.
- Vermont Information Technology Leaders (VITL)
- Vermont Council on the Humanities
- Vermont Council on the Arts
- Vermont Historical Society
- Vermont Public Power Supply Authority
- Connecticut River Atlantic Salmon Commission (10 V.S.A. 4654)
- Texas Low Level Radioactive Waste Disposal Compact (10 V.S.A. 7013)

These organizations have not been included in the reporting entity because they are legally separate entities and the voting majority of their governing boards are not appointed by the State. They are not fiscally dependent on the State's primary government and exclusion from the reporting entity would not render Vermont's financial statements incomplete or misleading.

**B. Basis of Presentation—Government-wide Financial Statements**

The basic financial statements of the State of Vermont include both *government-wide statements* and *fund financial statements*. The focus of the government-wide statements is on reporting the operating results and financial position of the State as a whole and present a longer-term view of the State's finances. The focus of the fund financial statements is on reporting on the operating results and financial position of the most significant funds of the State and present a shorter-term view of how operations were financed and what remains available for future spending.

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, although the latter are excluded from the government-wide financial statements.

The State of Vermont's Government-wide Financial Statements (the Statement of Net Position and the Statement of Activities) report information on all of the financial activities of both the primary government and its component units, except fiduciary activity. Fiduciary fund activity has not been included in these entity-wide statements in accordance with the requirements of GASB Statement No. 34. For the most part, the effect of interfund activity has also been removed from these government-wide statements. However, Interfund services provided and used are not eliminated in the process of consolidation. Primary government activities are segregated between governmental activities and business-type activities. Governmental activities' sources of revenues are normally taxes and inter-governmental revenues. Business-type activities rely, to a significant extent, on fees and charges for support. Further, the primary government is reported separately from its legally separate discretely presented component units.

The Statement of Activities demonstrates the degree to which direct expenses of a given function, segment, or component unit are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function, segment, or component unit. Program revenues include charges to customers who purchase, use, or directly benefit from goods or services provided by a given function, segment, or component unit. Program revenues also include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function, segment, or component unit. Items not properly included among program revenues are reported instead as general revenues. Taxes and other resources that are dedicated internally are reported as general revenues rather than as program revenues. The State does not allocate general government (indirect) expenses to other functions.

Net position (the amount by which assets and deferred outflows exceed liabilities and deferred inflows) are reported on the Statement of Net Position in three components:

- (1) Net investment in capital assets— total amount of capital assets, net of accumulated depreciation and reduced by outstanding balances of bonds and other debt that are related to the acquisition or construction of those assets, including related deferred outflows of resources and deferred inflows of resources.
- (2) Restricted – for amounts when constraints placed on the net position are either externally imposed, or are imposed by constitutional provisions or enabling legislation.
- (3) Unrestricted – the total net position which do not fit the two preceding categories.

When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted assets first with unrestricted resources utilized as needed.

**C. Basis of Presentation—Fund Financial Statements**

The financial activities of the State are recorded in individual funds, each of which is deemed to be a separate accounting entity. A fund is defined as a separate accounting entity with a self-balancing set of accounts. The

State uses fund accounting to report on its financial position and results of operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

Separate financial statements are provided for governmental funds, proprietary funds, fiduciary funds, and discretely presented component units. Major governmental funds, major proprietary funds, and major component units are reported in individual columns in their respective fund financial statements. Non-major funds and component units are combined and reported in a single column. The single test for classifying a fund as either major or non-major consists of applying the following two steps:

- a. Total assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures/expenses of that individual governmental or enterprise fund are at least 10 percent of the corresponding element total (assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, etc.) for all funds in that category or type (that is total governmental or total enterprise), **and**
- b. The same element that met the 10 percent criterion in (a) is at least 5 percent of the corresponding element total for all governmental and enterprise funds combined.

In addition to the above major fund criteria, any other governmental or enterprise fund that government officials believe is particularly important to financial statement users (i.e. because of public interest or for consistency) may be reported as a major fund.

The financial activities of the State reported in the accompanying financial statements have been classified into the following governmental, proprietary and fiduciary funds:

### **Governmental Funds**

*General Fund* – The Vermont Legislature has established the General Fund as the basic operating fund of the State. As such, the General Fund is used to finance and to account for all expenditures for which no special revenues have otherwise been provided by law. All revenues received by the State and not otherwise required by law to be deposited in any other designated fund or used for any designated purpose are deposited in the General Fund. Unexpended and/or unencumbered appropriation balances will, unless otherwise directed by law, revert to fund balance at the end of the fiscal year to be re-appropriated in the future.

*Special Revenue Funds* - These funds are used to account for and report the proceeds of specific revenue sources that are restricted, committed or assigned to expenditures for specified purposes other than debt service or capital projects, and include the following:

*Transportation Fund* – This fund is a major special revenue fund. It is used primarily for preservation, maintenance, and improvements to the State's transportation infrastructure. This infrastructure includes highways, bridges, railroads, airports, public transportation, and other related activities. The fund is also used for construction of transportation capital facilities. The primary sources of revenue in this fund are motor fuel taxes, motor vehicle purchase and use tax, motor vehicle license and registration fees, traffic ticket revenue, other statutorily specified revenues, as well as reimbursements from the federal government for transportation projects.

*Education Fund* – This fund is a major special revenue fund. It was established by the Vermont Legislature to equalize statewide education funding requirements. Sources of funding and allowable expenditures are codified in 16 V.S.A. 4025. These allowable expenditures include payments to school districts and supervisory unions for the support of education, the costs of short-term borrowing, and statewide education tax income sensitivity adjustments. Funding includes the statewide education tax, allocations of other taxes, State lottery profits, Medicaid reimbursements, and appropriated transfers from the General Fund.

*Special Fund* – This fund is a major special revenue fund. It combines many individual special revenue funds that account for proceeds or specific revenues not categorized above that are limited to expenditures for specific purposes. These purposes cross the entire range of State government activities.

*Federal Revenue Fund* – This fund is a major special revenue fund. All federal grant receipts are recorded in this fund except for those federal funds specifically designated for human services as part of the global commitment to health Medicaid waiver, transportation or fish and wildlife purposes (which are recorded in the State's Global Commitment Fund, Transportation Fund or Fish and Wildlife Fund respectively).

*Global Commitment (to Health) Fund* – This fund is a major special revenue fund created in accordance with Section 16c of 33 V.S.A. 1901(e). It is the result of Vermont entering into a Medicaid demonstration waiver agreement with the Federal Government. This agreement caps Federal expenditures in Medicaid services, but gives Vermont great latitude in promoting universal access to health care, cost containment, and effective administration. The State will be financially at risk for managing costs within the capped limits but stands to benefit from any savings realized from program efficiencies. As part of the agreement, the Agency of Human Services (AHS) has contracted with the Department of Vermont Health Access (DVHA), which serves as a publicly sponsored managed care organization, and adheres to all Federal managed care organization regulations.

In addition to the grant received from the Federal Government, General and Special Fund resources are used to fund payments from the Agency of Human Services to the DVHA for the purpose of providing services under the global commitment to health care waiver approved by the Federal Centers for Medicare and Medicaid Services under Section 1115 of the Social Security Act. These payments are reported as transfers out of the General and Special Funds and as transfers into the Global Commitment Fund. These funds will be expended as appropriated by the general assembly, authorized by the Director of the DVHA, and approved by the Commissioner of Finance and Management consistent with agreements between the DVHA and departments delivering eligible services under the waiver. These resources paid to the Global Commitment Fund are adjusted by the AHS each quarter to the actual expenditures paid.

Non-major governmental funds column includes the balances and activities of the following:

*Fish and Wildlife Fund* – This fund is a non-major special revenue fund. The fund's revenue is committed by statute and can only be utilized for fish and wildlife purposes. Principal sources of revenue include license fees and federal grants.

*Capital Projects Funds* – These funds, consisting of the General Obligation Bond Projects Fund and the Transportation Infrastructure Bond Projects Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets. These capital expenditures may be for the State directly or for outside organizations such as the Vermont State College System, municipalities, etc.

*Debt Service Funds*—These funds, consisting of the General Obligation Debt Service Fund and the Transportation Infrastructure Debt Service Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for bond principal and interest.

*Permanent Funds* – These are non-major governmental funds that report resources that are legally restricted to the extent that only earnings, not principal, may be expended for purposes that benefit the government or citizenry, such as higher education, cemetery care, and monument preservation.

### **Proprietary Funds**

These funds account for those activities for which the intent of management is to recover the cost of providing goods or services to the general public or other departments of government primarily through user charges; or where prudent financial management dictates that periodic determinations of results of operations are appropriate. These funds include the following types:

*Enterprise Funds* – These nine funds are used to account for operations that are financed and operated in a manner similar to private business enterprises. The State's intent in these funds is to recover the costs including depreciation expense associated with providing the goods and services to the public primarily through user charges. Three of these enterprise funds, reporting the activities of the State's unemployment compensation program, the Division of Liquor Control, and the State's lottery program, are reported as "major funds" while the remaining six are reported as non-major funds.

*Unemployment Compensation Trust Fund* – accounts for federal monies and unemployment taxes collected from employers to provide payment of benefits to the unemployed (21 V.S.A. Chapter 17).

*Liquor Control Fund* – accounts for the operations of the Division of Liquor Control which purchases, distributes, and sells distilled spirits through its agency stores (7 V.S.A. Chapter 5).

*State Lottery Fund* – accounts for the operations of the Vermont Lottery (31 V.S.A. Chapter 14). The net profits of the State Lottery Fund are used to support public education and are transferred monthly to the Education Fund.

*Internal Service Funds* – These twenty-four separate funds are used to account for the financing of goods and services provided by one State department to other State agencies, departments, or intergovernmental units. Their objective is not to make a profit but rather to recover the total cost of providing these goods and services by charging users of their services and products. Activities accounted for in the State's internal service funds include risk management; employee group insurance programs; equipment acquisition and maintenance; rental and maintenance of facilities; financial, human resource, audit, and information technology services; postage, copying and supply procurement services; and State vehicle fleet management. In the government-wide financial statements, Internal Service Funds are reported within the governmental activities.

### **Fiduciary Funds**

These funds are used to account for assets held in a trustee capacity or as an agent for individuals, private organizations, or other governmental units. These funds include the following:

*Pension and Other Postemployment Benefit Trust Funds* – These funds are used to report assets and associated financial activity that are held in trust for the members and beneficiaries of the Vermont State Retirement (defined benefit) System, the Vermont State Defined Contribution Retirement System, the State Teachers' Retirement (defined benefit) System, the Vermont Municipal Employees' (defined benefit) Retirement System, the Vermont Municipal Employees' Defined Contribution Plan, the State's Single Deposit Investment Account, the State Employees' Postemployment Benefit Trust Fund, the Retired Teachers' Health and Medical Benefit Fund and the Vermont Municipal Employees' Health Benefit Fund.

*Private Purpose Trust Fund* – The State's only fund in this category is the *Unclaimed Property Fund*, which accounts for all abandoned property that is required to be remitted to the State. The Unclaimed Property Division in the State Treasurer's Office administers procedures for returning this property to its rightful owner if they can be located. In addition to monetary assets, from time to time, the Unclaimed Property Division may have custody of tangible property that has not been valued and therefore is not reported in the financial statements.

*Agency Funds* – These funds report assets and liabilities for deposits and investments entrusted to the State as an agent for others. They have no net position and report items such as Federal income tax withholding, social

security tax withholding, etc.

#### **D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation**

The accounting and financial reporting treatment is determined by the applicable measurement focus and basis of accounting. Measurement focus indicates the type of resources being measured, such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

*Government-wide Financial Statements* – The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements have been met. Statewide education property taxes are recognized as revenues in the year for which the taxes are levied. This property tax is levied by the State on July 1, is included in the property tax bills levied by municipalities, and is collected by municipalities. The municipalities, by December 1 and June 1, must make payment to the State Treasurer in the amount specified by the Commissioner of Taxes.

*Governmental Fund Financial Statements* – The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. The State uses a 60-day availability period for revenue recognition. Major revenue sources considered susceptible to accrual include federal grants, interest on investments, and sales and income taxes. Expenditures generally are recorded when a liability is due and payable, with the following exceptions:

- a. Employees' vested annual, personal, and compensatory leave time are recorded as expenditures when utilized. The amount of accumulated leave unpaid at the end of the fiscal year has been reported only in the accrual-basis financial statements and does not include any accruals for the State's share of any payroll taxes that will be due when the expenditures are actually paid. See the "Compensated Absences" section of this footnote for additional information.
- b. Interest on general long-term debt is recognized when due to be paid.
- c. Debt service expenditures and claims and judgments are recorded only when payment is due to be paid.

*Proprietary Funds, Fiduciary Funds, and Discretely Presented Proprietary Fund Type Component Units* – The financial statements presented for these types of funds use the economic resources measurement focus and the accrual basis of accounting. Revenues are recognized when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services, and producing and delivering goods in connection with the proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition are categorized as non-operating revenues and expenses.

#### **E. Assets, Liabilities, Deferred Outflows/Inflows, and Net Position/Fund Balance**

##### **Cash and Cash Equivalents**

Cash balances for most funds are deposited with the State Treasurer. Except for the Pension and Other Post Employment Benefit Funds, and bond proceeds in the Capital Projects Funds, cash balances deposited with the State Treasurer are pooled together and amounts that are not immediately required are invested in short-term investments.

Income earned by these short-term investments is allocated based on average daily balances to those funds authorized to receive it while any remaining earnings are deposited in the General Fund.

Cash and cash equivalents as reported in the financial statements include bank accounts, imprest cash, short-term investments with an original maturity of three months or less such as certificates of deposit, commercial paper, federal government agencies' discount notes, money market accounts, and repurchase agreements.

### **Investments**

The investments are categorized at their fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The fair value hierarchy is based on the valuation inputs used to measure fair value of the asset that prioritizes inputs into three levels: Level 1 - quoted prices for identical instruments in active markets; Level 2 - significant inputs that are observable; Level 3 - significant inputs that are unobservable.

Also, certain investments that are measured at net asset value per share (or its equivalent) as a practical expedient are not classified in the fair value hierarchy. For additional information regarding types of investments and basis of valuation, see Note IV.B. - Investments.

### **Receivables**

Receivables in the government-wide financial statements represent amounts due to the State at June 30 that will be collected at some time in the future. They consist primarily of accrued taxes and federal grants and are reported net of allowance for uncollectible accounts. See Note IV.C. - Receivables for further information. Receivables reported in the governmental funds financial statements consist primarily of accrued taxes, federal grants receivable, and notes receivable from drinking water and clean water special environmental loans. Other receivables include primarily fees, fines, and drug expenditure reimbursements due to the Medicaid program from drug companies and third-party insurance companies. Revenues accrued in the governmental funds' financial statements consist primarily of accrued taxes, and other receivables that will be collected by the State within 60 days after year-end. Amounts estimated to be collected after the 60-day revenue recognition period are recorded as unavailable revenues. Federal receivables are amounts due from the federal government to reimburse the State's expenditures incurred pursuant to federally funded programs. Federal grant revenues are accrued when the qualifying expenditure is incurred. Notes and loans receivable in the General Fund consist primarily of loans to various non-profit organizations and a Vermont Economic Development Authority note held by the State. No allowances for uncollectible amounts have been recognized in these notes receivable. See Note V.C. - Contingent Liabilities for further information.

### **Inventories**

Inventories of materials and supplies in governmental funds are recorded as expenditures when purchased. Inventories reported in the proprietary funds are valued at the lower of cost or market. Cost valuation methods used in the proprietary funds are weighted average method (enterprise funds - Liquor Control Fund and Vermont Life Magazine Fund, and internal service funds - Highway Garage Fund and Offender Work Programs Fund); specific identification method (enterprise funds - State Lottery Fund, Federal Surplus Property Fund, and internal service funds - Communication & Information Technology Fund, and State Surplus Property Fund); and first-in, first-out method (internal service fund - Postage Fund).

### **Prepaid Expenses**

In the governmental funds, all purchases are recorded as expenditures when the invoice is entered for payment. In the proprietary and fiduciary funds, certain payments reflect costs applicable to future accounting periods and as such, are recorded as prepaid expenses. These prepaid items will be expensed as they are liquidated.

**Capital Assets and Depreciation**

Capital assets, which include property, plant, equipment, art and historical treasures, and infrastructure assets, are reported in the applicable governmental or business-type activities columns in the government-wide Statements of Net Position, and in the fund financial statements for the proprietary and fiduciary funds. All purchased capital assets are valued at historical cost or estimated historical cost, if actual historical cost is not available. Donated assets are valued at the price that would be paid to acquire an asset with equivalent service potential in an orderly market transaction at the acquisition date, or the amount at which a liability could be liquidated with the counterparty at the acquisition date.

Capital assets, except as stated below, have an initial cost of at least \$5,000, and provide a future economic benefit for a minimum of 2 years. This includes buildings that are not considered to be part of an infrastructure asset. All land and land use rights, regardless of cost, are capitalized and are not depreciated. Infrastructure assets are defined as long-lived economic resources that are normally stationary in nature, utilized primarily by the general public as opposed to State employees, cost at least \$250,000 and provide future economic benefit for a minimum of 3 years. Commercial Off-The-Shelf Software with a cost of at least \$50,000, internally generated software and websites with a cost of at least \$500,000, internally generated intellectual property with a cost of at least \$150,000, and a useful life of 2 or more years are capitalized.

Capital assets are depreciated over their useful lives using the straight-line mid-month depreciation method. Useful lives for buildings and building improvements are 5 to 50 years, machinery and equipment is 3 to 20 years, and infrastructure assets are 7 to 80 years. Additional disclosures related to capital assets and assets acquired through capital leases are found in Notes IV. E. - Capital Assets, and IV. G. 3. - Lease Commitments, respectively.

When a capital asset is disposed of, its cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in income for the period. Repairs and maintenance are recorded as expenses. Significant replacements and improvements that increases the useful life, increases the asset ability to provide service, increases effectiveness or efficiency of the asset are capitalized and deductions are made for retirements resulting from the replacements or improvements. Interest incurred on debt issued for construction of governmental activities capital assets is not capitalized.

The majority of the historic artifacts and collections that are maintained by the various State agencies and departments are not included in the capital asset reporting. The items not reported are protected and preserved, held for public exhibition and educational purposes and the proceeds from any sales of such items are used to acquire new items for the collection.

**Deferred Outflows/Inflows of Resources**

In addition to assets, the Statement of Net Position reports a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to future periods and so will not be recognized as an outflow of resources (expense/expenditure) until then. The Primary Government has six items that qualify for reporting in this category, five of which are related to pensions and other postemployment benefits, the changes in proportional share, differences between projected and actual earnings on plan investments, changes of assumptions, differences between expected and actual experience, contributions made subsequent to the measurement date, and the unamortized balance of losses on bond refunding, are all reported in the government-wide Statement of Net Position. A loss on a bond refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt. Changes in proportional share, changes of assumptions, and differences between expected and actual experience are capitalized and recognized over a period equal to the expected remaining service lives of all employees. Net differences between projected and actual earnings on plan investments is capitalized and recognized over a five-year period. Pension and other postemployment benefits contributions made subsequent to the measurement date will be recognized as a reduction of the net pension and other postemployment benefits

liability after the next measurement date.

In addition to liabilities, the Statement of Net Position reports a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to future periods and so will not be recognized as an inflow of resources (revenue) until that time. The Primary Government has one type of item, which only arises under the modified accrual basis of accounting, that qualifies for reporting in this category, and that is unavailable revenue. Governmental funds report unavailable revenue in the balance sheet for revenue that is not available under the modified accrual basis. The amount is capitalized and recognized as revenue in the period that it becomes available. The Primary Government has three items that qualify for reporting in this category in the government-wide financial statements, that are related to pensions and other postemployment benefits. Net differences between projected and actual earnings on plan investments is capitalized and recognized over a five-year period. Changes in assumptions and changes in proportional share related amounts are capitalized and recognized over a period equal to the expected remaining service lives of all employees.

Additional disclosures related to deferred outflows and inflows of resources are included in Notes IV. F. - Deferred Outflows and Deferred Inflows and IV. G. 4. - Retirement Plans and Other Postemployment Benefits.

### **Tax Refunds Payable**

Tax refunds payable primarily represent amounts owed by the State to taxpayers because of overpayment of their income tax liabilities. Tax refunds payable, which reduce respective tax revenues, are accrued to the extent they are measurable based on payments and estimates. The amount reported as tax refunds payable at June 30, 2019 in the governmental funds statements is comprised of tax refunds for filed tax returns due and payable at June 30, 2019. The amount reported as tax refunds payable at June 30, 2019 in the government-wide financial statements is comprised of estimated tax liability overpayments for the first and second calendar quarters of year 2019's tax liability that will be paid out in calendar year 2020.

### **Arbitrage Rebate Obligations**

In accordance with Section 148(f) of the U.S. Internal Revenue Code, the State must rebate to the U.S. Government the excess of interest earned from the investment of certain debt proceeds over the yield rate of the applicable debt. Arbitrage rebate, if any, is due and payable on each five-year anniversary of the respective debt issue. As of June 30, 2019, the primary government had no outstanding arbitrage rebate obligation. The arbitrage rebate liabilities reported by the discretely presented component units are included in "Other Long-term Liabilities" in the government-wide statement of net position.

### **Compensated Absences**

Compensated absences' liabilities include amounts for accumulated unpaid vacation, compensatory time, and personal leave credits. Classified State employees accrue vacation leave based on the number of years employed up to a maximum rate of 24 days annually and may not accumulate more than a maximum of 45 days (360 hours) at any one time. This liability is expected to be liquidated in future periods as either salary payments or cash payments upon termination of employment. Compensatory time and personal leave time accumulates as earned by the employees but must be taken within the subsequent year or be forfeited.

Liabilities for compensated absences are recorded in the government-wide Statement of Activities where the employees are assigned, and in the funds, where applicable. The amounts are calculated based on an employee's pay rate in effect as of year-end. Additional information including changes in balances may be found in Note IV. G. 5. - Other Long-term Liabilities.

Employees earn sick leave credits based on the number of years employed with a maximum accrual rate of 21 days per fiscal year. Sick leave may only be liquidated if and when sickness or injury is incurred. Additionally, if employment is terminated, any sick leave that the individual may have accrued is forfeited without any payout;

therefore, it is not an accruable liability to the State. There is no limit on the amount of sick leave an employee may accumulate.

### **Encumbrances**

Contracts and purchasing commitments are recorded as encumbrances when the contract or purchase order is executed. When the terms of the purchase order or contract have been fulfilled and payment to the contracting party is due, the encumbrance is liquidated, and the liability and expenditure are recorded. Encumbrances remaining at fiscal year-end in the governmental funds are as follows:

<b><u>Governmental Funds</u></b>	<b><u>Encumbrances</u></b>
General Fund	\$ 9,302,663
Transportation Fund	242,465
Education Fund	123,800
Special Fund	20,372,798
Federal Revenue Fund	28,847,269
Global Commitment Fund	250,180
Non-major Governmental Funds	14,081,276
Total	<u>\$ 73,220,451</u>

### **Fund Balances**

The fund balance amounts for governmental funds have been classified in accordance with GASB Statement No. 54 - *Fund Balance Reporting and Government Fund Type Definitions*. Fund balances are reported in classifications that comprise a hierarchy based primarily on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. As a result, amounts previously reported as reserved and unreserved are now reported as nonspendable, restricted, committed, assigned, or unassigned.

- Nonspendable fund balance includes items that cannot be spent. This includes activity that is not in a spendable form (inventories, prepaid amounts, long-term portions of loans or notes receivable, or property held for resale unless the use of the proceeds are restricted, committed or assigned) and activity that is legally or contractually required to remain intact, such as a principal balance in a permanent fund.
- Restricted fund balances have constraints placed upon the use of the resources either by an external party or imposed by law through a constitutional provision or enabling legislation.
- Committed fund balances can be used only for specific purposes pursuant to constraints imposed by a formal action of the Vermont Legislature, the State's highest level of decision-making authority. This formal action is the passage of a law by the legislature specifying the purposes for which amounts can be used. The same type of formal action is necessary to remove or change the specified use.
- Assigned fund balance includes amounts that are constrained by the State's intent to be used for a specific purpose, but are neither restricted nor committed. For governmental fund types other than the General Fund, this is the residual amount within the fund that is not restricted or committed. In the General Fund, amounts are assigned by the Agency of Administration under authorization by the Legislature in the annual Budget Adjustment Act.
- Unassigned fund balance is the residual amount of the General Fund not included in the four categories above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

When both restricted and unrestricted amounts are available for use, generally it is the State's policy to use restricted amounts first, with unrestricted resources utilized as needed. In the case of unrestricted resources, it is generally the State's policy to use committed amounts first, followed by assigned amounts, then unassigned amounts as needed. Additional information may be found in Note IV. H. - Fund Balance/Net Position.

### **Bond Discounts, Premiums and Issuance Costs**

In the government-wide financial statements, bond discounts or premiums are capitalized and amortized over the term of the bonds using the effective interest rate method. Bonds payable are reported net of the applicable bond premium or discount. Bond issue costs other than prepaid insurance are reported as expenses. In the fund financial statements, governmental fund types recognize bond discounts, premiums and issuance costs in the period the bond proceeds are received. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issued are reported as other financing sources while discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds, are reported as expenditures.

### **Interfund Transactions**

*Interfund Loans* – Short-term loans between funds outstanding at year-end for such things as cash overdrafts are recorded as Interfund Receivables/Payables. Advances To/From Other Funds represent long-term interfund loans receivable and payable.

*Reimbursements* – Reimbursements result when one fund makes an expenditure for a second fund when that expenditure or expense is properly applicable to the second fund. Reimbursement transactions reduce expenditures in the reimbursed fund and increase expenditures/expenses in the reimbursing fund.

*Interfund Services Provided and Used* – These transactions occur between two government funds that would be accounted for as revenue and expenditures if they occurred between a government entity and a private sector entity.

*Transfers* – These transfers encompass all types of transfers, except for the residual equity transfers, and are primarily routine transfers of appropriation resources between funds. Transfers are not revenue, expenditures, or expenses, and are classified as "Other Financing Sources (Uses)" in the operating statements of the governmental funds and in a separate subsection before net income in the proprietary funds.

### **Use of Estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities that affect the disclosure of contingent assets and liabilities as of the date of the financial statements, and that affect the reported amounts of revenues and expenses for the reporting period. Actual results could differ from these estimates.

## **F. Accounting and Reporting Changes**

Effective for fiscal year 2019 reporting, the State adopted the following new standards issued by the Governmental Accounting Standards Board (GASB):

Statement No. 83 *Certain Asset Retirement Obligations* establishes accounting and financial reporting for recording long-term asset retirement obligations that are required by contract or government mandate to retire long-lived assets. This statement did not have an impact on the financial statements.

Statement No. 88 *Certain Disclosures Related to Debt, Including Direct Borrowings and Direct Placement* establishes accounting and financial reporting for certain disclosures for direct borrowings/placements, and

additional disclosures for all debt, including unused lines of credit, assets pledged as collateral for debt and default terms or termination events included in debt covenants. This statement did not have an impact on the financial statements.

## Note II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

The governmental fund financial statements each include a schedule that reconciles the fund balance and net changes in fund balance in the fund financial statements to the net position and changes in net position in the government-wide financial statements. Differences between the two occur because the current financial resources measurement focus and modified accrual basis of accounting that is used in governmental funds must be converted to the economic resources measurement focus and accrual basis of accounting that is used in government-wide reporting. In addition, differences will occur because balances and transactions associated with interfund activity must be eliminated in the process of preparing the government-wide financial statements, including consolidation of internal service fund data into the governmental activities in the government-wide financial statements.

### A. Explanation of Certain Differences Between the Governmental Fund Balance Sheet and the Government-wide Statement of Net Position

The governmental fund balance sheet includes a reconciliation between *fund balance—total governmental funds* and *net position—governmental activities* as reported in the government-wide statement of net position.

One element of that reconciliation explains that “capital assets used in governmental activities (net of internal service funds’ capital assets) are not considered financial resources for fund perspective reporting and, therefore, are not reported in the funds.” The details of this are as follows:

Land	\$ 155,683,371
Works of art	127,803
Construction in progress	661,882,613
Depreciable capital assets and infrastructure, net of \$1,761,150,963 of accumulated depreciation	<u>2,207,714,865</u>
Net adjustment to increase <i>fund balances - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	<u>\$ 3,025,408,652</u>

Another element of that reconciliation explains that “amounts are presented in the Statement of Net Position but are not presented in fund balances due to a different basis of accounting.” The details of this are as follows:

Long-term assets are not available to pay for current period expenditures and therefore are reported as unavailable revenues in the governmental funds	\$ 208,537,962
Deferred outflow for unamortized loss on sale of refunding bonds	6,298,325
Deferred outflow for pension related items	562,478,295
Deferred inflow for pension related items	(37,790,690)
Deferred outflow for OPEB related items	159,043,554
Deferred inflow for OPEB related items	<u>(454,189,903)</u>
Net adjustment to increase <i>fund balance - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	<u>\$ 444,377,543</u>

The final element of that reconciliation explains that “long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not considered financial liabilities for fund perspective reporting, and therefore, are not reported in the funds.” The details of this are as follows:

Bonded debt	\$ (638,531,047)
Accrued interest payable on bonds	(8,578,684)
Compensated absences (net of internal service funds' liability)	(32,801,038)
Tax refunds payable	(67,926,910)
Net pension liabilities	(2,258,521,410)
Net other postemployment benefits liabilities	(2,142,389,979)
Other long-term liabilities	<u>(17,148,534)</u>
Net adjustment to reduce <i>fund balance - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	<u>\$ (5,165,897,602)</u>

### **B. Explanation of Certain Differences Between the Governmental Fund Statement of Revenues, Expenditures, and Changes in Fund Balances and the Government-wide Statement of Activities**

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances—total governmental funds* and *changes in net position of governmental activities* as reported in the government-wide statement of activities.

One element of that reconciliation explains that “governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation expense in the current period, net of internal service funds.” The details of this difference are as follows:

Capital outlay/functional expenditures	\$ 493,374,579
Expensed net book value of disposed assets	(218,550,185)
Depreciation expense	<u>(197,667,134)</u>
Net adjustment to increase <i>net changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	<u>\$ 77,157,260</u>

A second element of the reconciliation states that repayment of bond principal is reported as an expenditure in governmental funds. However, in the government wide statements, repayment of bond principal reduces long-term liabilities. The details of this difference are as follows:

Principal repayment	<u>53,395,000</u>
Net adjustment to increase <i>net changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	<u>\$ 53,395,000</u>

Another element of that reconciliation states that the issuance of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items. The details of this difference are as follows:

Bond premium is amortized over the life of the bonds in the statement of activities	\$ 7,302,969
Refunding bonds deferred outflow amortized to interest expense over life of refunded bonds	(1,141,645)
Bond discount is amortized over the life of the bond in the statement of activities	<u>(18,169)</u>

Net adjustment to decrease <i>changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	<u>\$ 6,143,155</u>
--	---------------------

The final element of that reconciliation states that "some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds." The details of this difference are as follows:

Decrease in accrued interest payable	\$ 735,126
Increase in compensated absences	(696,207)
Increase in employer pension and other postemployment benefit related costs	(89,693,966)
Increase in pollution remediation related costs	<u>(726,258)</u>

Net adjustment to decrease <i>net changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	<u>\$ (90,381,305)</u>
--	------------------------

### Note III. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

#### A. Budgetary Information

Vermont statutes require the head of every State department, board and commission, and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years, in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of appropriations made under any appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts, including federal receipts, exceed the appropriated

amounts, the receipts may be allocated and expended, subject to the approval of the Secretary of Administration. If, however, the expenditure of those receipts will establish or increase the scope of the program, which establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature.

## B. Deficit Fund Balances/Net Position

The following funds had a deficit net position at June 30, 2019:

### Governmental Funds

Non-major Governmental Funds:

General Obligation Bond Projects Fund.....	\$	(27,780,792)
--	----	--------------

### Proprietary Funds

Non-major Enterprise Funds:

Federal Surplus Property Fund.....		(183,141)
------------------------------------	--	-----------

Internal Service Funds:

Communications & Information Technology Fund.....		(5,563,986)
---	--	-------------

Copy Center Fund.....		(1,276,200)
-----------------------	--	-------------

Postage Fund.....		(3,605,954)
-------------------	--	-------------

Facilities Operations.....		(572,415)
----------------------------	--	-----------

Property Management.....		(23,493,409)
--------------------------	--	--------------

State Liability Insurance.....		(4,128,222)
--------------------------------	--	-------------

Workers' Compensation.....		(2,905,670)
----------------------------	--	-------------

### Non-major Governmental Funds

The deficit in the General Obligation Bonds Project Fund is attributed to capital spending in anticipation of general obligation bonds in fiscal year 2020. See footnote V. H. – Subsequent Events.

### Non-major Enterprise Funds

The deficit in the Federal Surplus Property Fund is due mainly to the lack of inventory available for sale from the federal government that could in turn be retrieved for sale by the State. Program management will continue to evaluate administrative expenses, making reductions where appropriate and ensuring proper allocation of costs between the State and Federal surplus property programs. Management will also continue to pursue increasing revenue by actively retrieving goods for sale. The program is popular with local governments, therefore further recapitalization from the general fund would be required if sales continue to be too low to eliminate the deficit.

### Internal Service Funds

The operations of the Agency of Digital Services (ADS) is accounted for in the Communications & Technology (CIT) Fund. The deficit in the CIT Fund improved this year due to improved timesheet billing methods to Agencies for IT services based on the federally approved rate, as well as recouping prior fiscal year the cost for the Voice Over IP phone services through a bill back method to consuming agencies users. However, the CIT fund still ended the year in a deficit that has been caused by a combination of billing practices and financing strategies of the State prior to FY19. To address this deficit, ADS is implementing a reporting system to better identify operating costs as compared to billing practices and budgeted rates for ADS services. This realignment will enable ADS to cumulatively decrease the deficit fund balance and provide practical solutions for utilizing technology across all government.

The Copy Center Fund's deficit net position is the result of a decline in usage, driven by technology replacements of printed materials which limits the fund's revenue potential. To eliminate the deficit, Copy Center management will continue to implement modest rate increases, while continuing to aggressively pursue additional business

opportunities including synergistic partnership with the Postal Center. Fiscal year 2019 was the third year out of the past four years to end with an operating surplus.

The deficit net position in the Postage Fund is due to the marginal rate (percentage points saved off from the federal postal rates) used to operate the program has not been sufficient to cover the actual operating costs despite management's efforts to initiate efficiencies. In addition, unbilled services (bomb screening and inter-office mail) have not been fully funded in recent years. Management will attempt to address the fund deficit through improved business operations, while continuing to explore efficiencies gained through partnering with and co-location with the Copy Center. A modest marginal rate increase will be implemented in fiscal year 2020, but capitalization or additional structural changes may be required if management cannot fully address the fund deficit.

The Facilities Operations Fund can experience major fluctuations in the cost of providing services due to many unpredictable factors (weather, building damage, equipment failure) and some predictable factors (employee advancements like pay act & reclassifications) during the year. These factors which can increase the cost of operations are not included in the current year billing rate and the cost will therefore need to be recovered in fiscal year 2020. Continued investments in energy efficiency programs, strategic maintenance management, and regular review of all operations should help with eliminating the fund's deficit balance.

Much of the Property Management Fund's deficit is due to two buildings that have been financed over a twenty-year period but whose recovery of costs is fifty years. This part of the deficit should be eliminated gradually over the next twenty to thirty years. Additionally, the fund initially operated with staff and operating costs for lease management work that was not being recovered through billed revenue. The management has added a surcharge to the existing leases to cover the operating expenses and deficit. Program management has also addressed, via corrective agreements and billings, a few instances of tenant subsidization where invoicing did not recover the full cost of the leased space.

The State Liability Insurance Fund's deficit is due to consecutive years of revenues being outpaced by expenses. Program management has identified deficiencies in the rate setting model which have been corrected for fiscal year 2021. Operating expenses have remained relatively level except for two consecutive years of larger than expected incurred but not reported (IBNR) ultimate loss calculations provided by an independent actuary consultant. Program management will work closely with the State administrators to identify opportunities for risk mitigation and operating expense savings.

The Workers Compensation Insurance Fund ended fiscal year 2019 in a deficit position for the first time since fiscal year 2016. Due to an excess fund surplus in fiscal year 2017, discounted premiums were charged to customers in the following years through fiscal year 2020 which reduce the fund balance. The fund balance was further reduced by larger than expected incurred but not reported (IBNR) ultimate loss calculations provided by an independent actuary consultant in both fiscal years 2018 and 2019. Program management has removed the premium discount and returned rates to a break-even level starting in fiscal year 2021. Program management will work closely with State administrators to identify opportunities to increase workplace safety and create additional operating savings.

#### **NOTE IV. DETAIL NOTES ON ALL ACTIVITIES AND FUNDS**

##### **A. Cash and Cash Equivalents**

Deposits for the primary government are governed by State statutes. When depositing public monies, the State Treasurer must act in accordance with 32 V.S.A. Chapter 431. Although the statute provides requirements for the collateralization of deposits, it does not establish limits. These limits are set by published formal guidelines issued by the State Treasurer.

The custodial credit risk for deposits is the risk that in the event of a depository financial institution failure, the government will not be able to recover funds deposited in the failed institution or will not be able to recover

collateral securities that are in the possession of an outside party. Deposits are exposed to custodial credit risk if they are not covered by the Federal Deposit Insurance Corporation (FDIC) insurance and are uncollateralized; or collateralized with securities held by the pledging financial institution's trust department or agent, that are not registered in the depositor – government's name. Although State statute does not require deposits to be collateralized, the Treasurer requires the State's cash deposits held in its primary bank to be collateralized with either United States Treasury securities or Vermont municipal securities or other approved money market instruments, or other collateral acceptable to the Treasurer. Certificates of deposit are collateralized, in whole or in part, on the basis of agreements with the bank, a protocol requiring periodic due diligence and review of bank capitalization and assets. Bank deposits in excess of the FDIC amounts and collateral agreements are uninsured and uncollateralized. Bank balances of deposits for the primary government, excluding pension, and other post-employment benefits funds, at June 30, 2019, were \$571,164,620. Of these, \$20,683,972 were exposed to custodial credit risk as uninsured and collateralized with securities held in the name of pledging financial institutions.

The Unemployment Compensation Trust Fund had \$493,922,931 on deposit with the U.S. Treasury at June 30, 2019. This amount is presented as cash and cash equivalents and is not included in the carrying amount of deposits, nor is it categorized according to risk, because it is neither a deposit with a financial institution nor an investment.

The pension, other postemployment benefits, and investment trust funds' cash deposits, outside of the pension trust funds' custodian bank at June 30, 2019, totaled \$12,529,812 none of which was exposed to custodial credit risk.

## **B. Investments**

### **Primary Government—Excluding All Pension, and Other Postemployment Benefits Trust Funds**

Investments for the primary government are governed by State statutes. The State has an investment policy with an overriding goal of minimizing exposure to risk and maintaining liquidity necessary for future cash needs while maximizing the return on investments. Two sections of State statute govern the investment of the State's operating and restricted cash (i.e., non-pension funds).

When investing public monies, the State Treasurer must act in accordance with 32 V.S.A. 433. Types of investments allowed include obligations of the United States, its agencies and instrumentalities, and any repurchase agreements whose underlying collateral consists of such obligations or other approved money market instruments; certificates of deposit issued by banks and savings and loan associations approved by the State Treasurer; prime bankers' acceptances; prime commercial paper; tax exempt securities; and domestic money market funds. Also, the State Treasurer's Office issues additional formal guidance that is reviewed periodically, to assure that the three investment objectives -- safety, liquidity, and yield -- are met.

The statutory guidelines for certain trust funds are contained in 32 V.S.A. 434, referred collectively as the Trust Investment Account. These include the Tobacco Trust Fund, the Higher Education Trust Fund, the Agency of Natural Resources Stewardship Fund, two Veterans' Home trusts, the Fish and Wildlife Trust, Vermont State Retirement OPEB Fund, and various small trusts.

The State Treasurer may invest funds in accordance with the standard of care established by the prudent investor rule and apply the same investment objectives and policies adopted by the Vermont State Employees' Retirement System, where appropriate, to the investment of funds in the Trust Investment Account.

Investments are stated at fair value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at fair value when published market prices and quotations are available, or for certain securities at amortized cost. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the

reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

*(a) Fair Value Measurements*

The State categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset as follows:

- Level 1: Inputs are quoted prices for identical investments in active markets.
- Level 2: Observable inputs other than quoted market prices.
- Level 3: Unobservable inputs.

The fair value measurement at June 30, 2019 for the primary government, with the exception of the Pension and OPEB trust funds is as follows:

**Primary Government Investments - Excluding  
Pension and Other Postemployment Benefits Trust Funds**  
*(Expressed in Thousands)*

<u>Investments by fair value level</u>	<u>Fair Value Measurement Level</u>			
	<u>Fair Value</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>
<b>Debt investments:</b>				
US Agencies/Treasuries.....	\$ 126,964	\$ 126,964	\$ -	\$ -
Commercial Paper.....	6,438	6,438	-	-
Total debt investments.....	<u>133,402</u>	<u>133,402</u>	-	-
<b>Equities:</b>				
Equity Securities.....	2,539	2,539	-	-
Total investments by fair value level.....	<u>135,941</u>	<u>\$ 135,941</u>	<u>\$ -</u>	<u>\$ -</u>
<u>Investments measured by net asset value (NAV)</u>		<u>Unfunded Commitments</u>	<u>Redemption Frequency</u>	<u>Redemption Notice Period</u>
Money Market Mutual Funds.....	200,482	-	Daily	-
Fixed Income Mutual Funds.....	26,665	-	Daily, monthly	1-30 days
Equity Mutual Funds.....	18,236	-	Daily, monthly	1-60 days
Total investments by NAV.....	<u>245,383</u>			
<b>Total investments.....</b>	<u>\$ 381,324</u>			

\$200,478 (In thousands) of the above money market mutual funds are classified as cash and short-term investments on the financial statements.

*(b) Interest Rate Risk*

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The primary government does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates for investments, other than pension and investment trust funds' investments. The primary government's investments, other than pension and investment trust funds' investments, at June 30, 2019 are presented as follows:

**Primary Government Investments - Excluding  
Pension and Other Postemployment Benefits Trust Funds**

*(Expressed in Thousands)*

Investment Type	Fair Value	Investment Maturities (in years)			
		Less Than 1	1 to <6	6 to 10	More Than 10
<b>Debt Investments:</b>					
US Agencies/Treasuries.....	\$ 126,964	\$ 126,239	\$ 399	\$ 181	\$ 145
Money Market Mutual Funds.....	200,482	200,482	-	-	-
Fixed Income Mutual Funds.....	26,665	26,665	-	-	-
Commercial Paper.....	6,438	6,438	-	-	-
Total Debt Investments.....	360,549	\$ 359,824	\$ 399	\$ 181	\$ 145
<b>Other Investments:</b>					
Equity Securities.....	2,539				
Equity Mutual Funds.....	18,236				
Total Investments.....	\$ 381,324				

*(c) Concentration of Credit Risk*

Concentration of credit risk is the risk of loss attributable to the monetary magnitude of the State's investment in a single issuer. While State statute does not establish ceilings, formal investment guidelines for operating funds limit the amount invested to 10% in any one issuer of commercial paper, corporate securities, or bankers' acceptances. There are no limitations for U.S. Government and Federal Agencies. Money market funds utilized by the State Treasurer's Office are highly rated and incorporate the requisite diversification. As of June 30, 2019, no single issuer exceeded 5% for the primary government portfolios.

*(d) Custodial Credit Risk*

For investments, custodial credit risk is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The State has no formal policy on custodial credit risk but maintains contractual relationships with custodian banks that provide coverage and define the procedures. As of June 30, 2019, all securities were registered in the name of the State at its custodian bank. Investments in open-end mutual funds are not exposed to custodial risk because their existence is not evidenced by specific securities.

*(e) Credit Risk*

Credit risk is the possibility that the issuer or other counterparty to an investment may default on their obligations. In non-pension funds this risk has been mitigated by implementing statutory guidelines on credit quality and further restricted by formal investment guidelines and the use of low-risk money market instruments. The credit risk associated with the State's debt securities, money market funds, bond mutual funds, and other pools of fixed income securities, exclusive of pension fund investments, as of June 30, 2019, is presented as follows using the Moody's rating scale:

*(Table on next page.)*

**Primary Government Rated Debt Instruments**  
**Excluding Pension and Other Postemployment Benefits Trust Funds**

*(Expressed in Thousands)*

<u>Debt Investments</u>	<u>Fair Value</u>	<u>Quality Ratings</u>		
		<u>Aaa</u>	<u>Aa3</u>	<u>Unrated</u>
Money Market Mutual Funds.....	\$ 200,482	\$ 200,482	\$ -	\$ -
Fixed Income Mutual Funds.....	26,665	-	-	26,665
Commercial Paper.....	6,438	-	6,438	-
Totals.....	<u>\$ 233,585</u>	<u>\$ 200,482</u>	<u>\$ 6,438</u>	<u>\$ 26,665</u>

**Currency Risk**

Foreign currency risk is the extent to which changes in exchange rates affect the value of an investment. Vermont's operating funds are restricted, through statute and formal guidelines, to specific money market instruments and money market funds who only invest in domestic instruments. In the Trust Investment Account portfolio, total exposure to foreign currency risk as of June 30, 2019, was \$0.

**Primary Government—Pension, and Other Postemployment Benefits Trust Funds**

The State has three defined benefit plans (Vermont State Retirement System (VSRS), State Teachers Retirement System (STRS), and Vermont Municipal Employees' Retirement System (MERS); three defined contribution plans (VSRS, MERS, and Single Deposit Investment Account); and three other postemployment benefit funds. Additional information on these plan benefit and actuarial valuations may be found in Note IV.G.4. - Pension and Other Postemployment Benefits.

By statute, the assets of the three defined benefit plans are invested on behalf of each plan's Trustees through the Vermont Pension Investment Committee (VPIC), which was established by the Vermont Legislature (Title 3 V.S.A. Chapter 17), effective July 1, 2005, to combine the assets of the VSRS, STRS and MERS defined benefit plans for the purpose of (i) investment in a manner that is more cost and resource-efficient; (ii) improving the effectiveness of the oversight and management of the assets of the Retirement Systems; and (iii) maintaining the actuarial, accounting, and asset allocation integrity of the Retirement Systems. The majority of these assets have been pooled for investment purposes.

All three defined benefit plans managed by the State have adopted a common asset allocation as determined by the VPIC. As of October 29, 2009, the VPIC adopted a set of investment policies and guidelines common to all three defined benefit plans, most recently amended on June 25, 2019. These are used by VPIC with the objective of maximizing returns within acceptable risk parameters.

The State's Single Deposit Investment Account (SDIA), a non-contributory defined contribution plan, is invested in a commingled stable value fund. The investment policy governing the SDIA portfolios includes a minimum average credit quality of double-A, no bonds rated below investment grade, and limitations on asset-backed, mortgage-backed, collateralized mortgage obligations, corporate bonds, and single issuers of non-treasury/government agency backed bonds.

The Vermont State Retirement's defined contribution plan's trustee is the State Treasurer. The Vermont Municipal Employees' Retirement System Board of Trustees is the trustee for the Vermont Municipal Employees' defined contribution plan. Both plans are administered by Prudential Financial, Inc. Investment choices are made by participants from a fund specific lineup approved by the trustees' for the plans. Investment options are actively

managed and indexed mutual funds including large and small market capitalization equities, international equities, fixed income securities, balanced funds, target retirement date age-based funds, and a stable value fund. Funds included in the plans were selected based on consideration of fund performance for one and multi-year periods, performance ranked against peer group funds in asset class, management fee expense ratios, fund asset class and investment objectives, historical annual returns, Morningstar ratings, performance in various stages of the capital market cycle, and consultant recommendations as to the optimal number of funds and appropriate asset classes. Prudential provides quarterly investment reports and analysis that are reviewed by Treasury staff, the State Treasurer and Vermont Municipal Employees' Retirement Board.

The State has two other postemployment benefit funds, the Vermont State Postemployment Benefits Trust Fund (State OPEB), the Retired Teachers' Health and Medical Benefit Fund (RTHMB). Additionally, the State has an employer-sponsored health benefit savings plan available to MERS members, the Vermont Municipal Employees Health Benefit Fund (Muni Health). The State OPEB is invested in the Trust Investment Account utilized as an investment vehicle by many of the State's primary funds. The RTHMB has no investments. The Muni Health is invested under the authority of the Municipal Retirement Board of Trustees and utilizes an outside administrator, Prudential invested in American Funds.

Investments are stated at fair value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at fair value when published market prices and quotations are available, or for certain securities at amortized cost. Real estate is carried at the net asset value of each retirement system's real estate fund investments, which net asset value is further based on the fair market value of the real properties. Properties' fair market values in each of the retirement systems' fund investments are established quarterly by real estate fund manager appraisals and are validated at least yearly by third-party property appraisals. Nonmarketable securities include alternative investments such as private equity and private partnerships, which are valued using current estimates of fair value obtained from the Investment Manager (Manager) in the absence of readily determinable public market values. Such valuations generally consider variables such as the high, medium, and low values for portfolio investments; the investments' exit timetables, and the status of any proceedings leading to a liquidity event; the financial performance of investments, including comparison of comparable companies' earnings multiples; cash flow analysis; and recent sales prices of investments. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

*(a) Fair Value Measurements*

The Pension and OPEB Trust Funds categorize the fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset that prioritizes inputs into three levels. The level is determined based on the lowest level of input significant to the measurement in its entirety.

- Level 1: Securities traded in an active market, on an exchange that have quoted unadjusted prices such as Exchange-traded equities, and exchange-traded derivatives.
- Level 2: Inputs other than quoted prices that are observable. These inputs are derived from market data through correlation or by other means, e.g., "market corroborated". These are primarily fixed income prices using an evaluated price provided by an independent pricing vendor or broker/dealer.
- Level 3: Inputs to the valuation methodology that are unobservable and significant to the fair value measurement. Instruments are often based on internally developed models in which there are few, if any, external observation.

Below is the fair value measurement table at June 30, 2019, for the Pension and OPEB trust funds.

**Pension and Other Postemployment Benefits**

**Trust Funds' Investments**

(Expressed in Thousands)

<u>Investments by fair value level</u>	<u>Fair Value</u>	<u>Fair Value Measurement Level</u>

<b>Total investments.....</b>	<b><u>\$4,655,375</u></b>			

**(b) Interest Rate Risk**

As pension trust funds have a different investment term horizon based on a long average liability term, the VPIC manages exposure to fair value loss arising from movements in interest rates by establishing duration guidelines with its debt securities with Core, Core Plus and Global Fixed Income Managers, requiring that the duration be within a specified percentage of the duration band of the appropriate benchmark index. The Core Plus portfolio restriction is +/- 40% around the passive benchmark duration. The calculation of the duration of mortgage backed

securities involves assumptions as to the expected future prepayment rate for the security. The Managers are required to calculate duration at the time of initial purchase and on a routine basis to maintain compliance with these guidelines. Fixed income Managers are required to report portfolio characteristics quarterly inclusive of portfolio duration as a measure of portfolio interest rate sensitivity.

The above money market mutual funds of \$15,731 (In thousands) is classified as cash and short-term investments on the financial statements.

*(c) Concentration of Credit Risk*

Formal guidelines for pension funds state that no more than 5% of the fair value of a portfolio's domestic fixed income assets may be invested in the debt securities of any one issuer. No limitations on issues and issuers shall apply to obligations of U.S. Government and Federal Agencies. As of June 30, 2019, no issuer exceeded 5%.

*(d) Custodial Credit Risk*

Custodial credit risk for investments is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The VPIC manages exposure to custodial credit risk by requiring all relevant Managers to hold investments in separate accounts with VPIC's custodian. VPIC guidelines specify the custodial requirements for these accounts and the duties of the Managers and the custodian. As of June 30, 2019, all securities were registered in the name of the State at its custodian bank. Investments in pools, open-end mutual funds, and other investments not evidenced by specific securities are not categorized.

*(e) Credit Risk*

Detailed pension guidelines by asset class and supplemental requirements by Manager are used to set risk parameters and are stated in written contracts. These guidelines are reviewed and adopted by VPIC. Treasury staff and independent investment consultants are utilized to assure compliance. The credit risks associated with these securities are as follows:

**Pension and Other Postemployment Benefits****Trust Funds' Investments***(Expressed in Thousands)*

*(f) Foreign Currency Risk*

Unless VPIC stipulates specific exceptions to the guidelines, the non-US dollar denominated debt of non-US issuers are limited to 15% of the Core Plus portfolio and no more than 5% of the portfolio may be invested in non-US currencies. In the case of equities, the Manager is afforded flexibility in the number of issues held and their geographic or industry distribution, provided that equity holdings are within the lesser of established percentage ranges in relation to single holding limitations and a stock's weighting in the style benchmark against which the Manager is measured. Most foreign currency exposure is in the pension and investment trust funds' portfolios. The value in US dollars by foreign currency denomination and type of investment is as follows:

**Pension and Other Postemployment Benefits**  
**Trust Funds' Investments**  
**Foreign Currency Risk - International Securities at Fair Value**

Formal investment policy guidelines adopted by the VPIC state that international equity Managers may enter into forward exchange contracts on currency provided that use of such contracts is designed to dampen portfolio volatility and facilitate securities transaction settlements rather than leverage portfolio risk exposure.

**Derivative Financial Instruments**

Vermont Pension Investment Committee (VPIC) policy authorizes certain Managers to invest in derivative financial investments. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed upon benchmark. Disclosures related to derivatives positions required under Governmental Accounting Standards Board Statement No. 53 – *Accounting and Financial Reporting for Derivative Instruments* (GASB No. 53) apply only to those derivative instruments held directly by the VPIC on behalf of the defined benefit plans and the external investment trust and not those held within commingled fund investment vehicles. The Pension and Other Postemployment Benefit Trust Funds do not have hedgeable assets or liabilities, and all derivative instruments are considered investment derivatives, with corresponding changes in fair value reported in investment income. The fair value of all derivative financial instruments are reported in the Statement of Fiduciary Net Position. All of the derivatives reported at June 30, 2019, are at fair value.

Derivative instruments may be used for any of the following purposes:

- To gain market exposure.
- To convert financial exposure in a given currency to that of another currency (e.g., to hedge Japanese Yen exposure back to the U.S. dollar). Any and all international Managers may enter into foreign exchange contracts on currency provided that: a) such contracts are one year or less, and b) use of such contracts is limited solely and exclusively to hedging currency exposure existing within the Manager's portfolio. There shall be no foreign currency speculation or any related investment activity, with the exception of currency hedging Managers who enter into currency hedging will be guided by specific risk parameters in their contracts.
- To adjust the duration of a bond portfolio in a manner that is consistent with the accepted approach of the Manager and other contract terms applicable to the Manager.
- To make portfolio adjustments that are consistent with other elements of the VPIC's investment policies and that do not systematically increase risk or expected volatility of the rate-of-return of the total portfolio.
- For trading purposes which are intended to enhance investment returns. This purpose is subject to the requirement that it be consistent with other elements of the VPIC's investment policies and that it does not systematically increase the risk or expected volatility of the rate of return of the total portfolio.

All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC Portfolio. Separately managed funds include the following reporting requirements: a list of all derivative positions as of quarter-end; an assessment of how the derivative positions affect the risk exposures of the total portfolio; an explanation of any significant pricing discrepancies between the Manager and custodian bank; an explanation of any non-compliance. Commingled funds provide the VPIC with a quarterly list of derivative positions and assessment of the effect on the risk exposure of the portfolio.

For derivative securities, the Custodian Bank is required to obtain two independent prices, or to notify the VPIC that two independent prices are not available. Managers are required to reconcile the valuations of all derivatives positions on a monthly basis with the Custodian Bank. Derivatives, which are futures contracts, are Commodity Futures Trading Commission approved and exchange traded. Options may either be exchange-traded or traded over the counter (OTC). The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2019, classified by type, and the changes in fair value of such derivative instruments for the year then ended are as follows (in thousands):

	Changes in Fair Value		Fair Value at June 30, 2019

	Investment revenue	(5)	Investment	-	(274) New Zealand Dollar

*Futures* represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the VPIC's credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains (losses) in the Statement of Changes in Fiduciary Net Position.

*Options* represent or give buyers the right, but not the obligation, to buy or sell an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the VPIC receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the VPIC pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option.

*Swaps* represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. At June 30, 2019, the VPIC had three different types of swap arrangements; interest rate swaps, inflation linked swaps, and credit default swaps. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty who, in turn, agrees to make return interest payments that float with some reference rate. The interest rate swaps allowed the VPIC to effectively convert long term variable interest investments into fixed interest rate investments. Credit default swaps are used to manage credit exposure without buying securities outright. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Fiduciary Net Position.

*Currency forwards* represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rate on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in the net realized gains or losses on foreign currency related transactions in the Statement of Changes in Fiduciary Net Position. Only forward currency contracts are defined as derivatives per GASB No. 53 are reported above; currency spot contracts are not included. Risk of loss arises from changes in currency exchange rates. At June 30, 2019, currency forward positions consisted of unrealized loss on pending foreign exchange sales of \$179,267.

Counter-party creditworthiness, for non-exchange traded derivatives, shall be at a minimum of "A3" as defined by Moody's Investor Service, "A-" by Standard & Poor's, and "A-" by Fitch. The use of counterparties holding a split rating with one of the ratings below A3/A- is prohibited. The use of unrated counterparties is prohibited. Individual counter-party exposure, for non-exchange traded commodity derivatives, is limited to 50% of the notional amount of the VPIC Portfolio commodity derived exposure. An exception is allowed if the total commodity derivative exposure is less than \$3 million. Any entity acting as counterparty must be regulated in either the United States or the United Kingdom. All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC portfolio. For fiscal year 2019 all derivatives are centrally cleared through an exchange, where the exchange guarantees the settlement of the contract.

In addition, Manager credit research teams are tasked with evaluating potential counterparties for their creditworthiness as counterparties, not relying on ratings agencies alone. Managers evaluate individual counterparties using various methods of credit analysis: company visits, reports, earnings updates and take into account other factors, including the broker's/dealer's reputation for sound management, the past experience of the Manager with the broker/dealer, market levels for its debt and equity, its quality of liquidity provided and its share of market participation.

VPIC's Managers use master agreements and may receive additional protection through the collateralization requirements, which helps to mitigate a party's exposure to another party in the event of a default or termination event by requiring the pledging/posting of assets to the other party to secure any outstanding obligations under

certain transactions. By regular, generally daily, movement of collateral on forward settling trades, VPIC's exposure to any particular counterparty can be reduced. Collateral movement threshold for securities under the master forward agreements typically ranges from \$0 to \$250,000 per account, depending on the particular counterparty. Managers require daily posting of collateral with many of our counterparties.

VPIC does not have a formal policy regarding master netting arrangements. As a general practice, Managers use industry standardized contracts, generally known as "master agreements" or "netting agreements," counterparty risk is reduced by providing parties to a transaction the ability to close out and net its total exposure to a counterparty in event of a default with respect to all transactions governed under that particular agreement. These agreements (International Swaps and Derivatives Association (ISDA) Master Agreement and Credit Support Annex, Master OTC Options Agreement, Master Securities Forward Transaction Agreement, Global/Master Repurchase Agreement) allow parties to a transaction to know their legal rights and obligations, in addition to an ability to net. Managers generally put master agreements in place on behalf of each account it manages and each separate counterparty legal entity with which it transacts. The maximum amount of loss VPIC would face in case of default of all counterparties as of June 30, 2019, consists of the aggregated fair value of OTC positions in the amount of \$0.

Derivative instruments often contain credit-risk-related contingent features that could result in an immediate payment to the counterparty. For example, a material adverse change clause could provide the counterparty with the right to early terminate the derivative agreement. Alternatively, it could provide a basis for renegotiating the agreement if specific events occur, such as a downgrade of the entity's credit rating below investment grade. These provisions may include an obligation to post additional collateral in instances where the credit-risk contingent feature is triggered, or the counterparty is provided the right to terminate the agreement early.

The VPIC funds hold mortgage-backed securities including collateralized mortgage obligations (CMOs) at fair value. Mortgage-backed securities represent a direct interest in a pool of mortgage loans. CMOs are bonds that are collateralized by whole loan mortgages, mortgages pass-through securities, or stripped mortgage-backed securities. Income is derived from payments and pre-payments of principal and interest generated from collateral mortgages. Cash flows are distributed to different investment tranches in accordance with the payment order established for the CMO instrument. Cash flows associated with these tranches may demonstrate varying degrees of sensitivity to interest rate fluctuations. A reduction in interest rates may cause some of the tranches to experience a reduction in fair value as prepayments reduce the interest payments, causing a decline in total cash flows. In a rising interest rate environment, an increase in interest payment and cash flows may cause an increase in fair value.

Risk is minimized through the purchase of high-quality instruments with limited default or prepayment risk. Agency fixed and floating rate pass-through, U.S. Treasury securities and cash equivalents can be held without limitation. Securities designed to provide more precisely targeted maturities (Sequential Collateralized Mortgage Obligations) and those that create tranches, or Planned Amortization Classes (PAC I and PAC II), with cash flows that are protected from prepayment changes within certain limits, may also be purchased without limitation. Policy restrictions and portfolio percentage limitations are established for the purchase of more interest rate sensitive instruments and certain interest rate and price stress tests are required.

Asset-backed securities are collateralized by a loan, lease, or receivable other than real estate. Payments are collected by a servicer through a "pass-through" arrangement. As monthly payments of principal and interest are made, the pass-through security holder is entitled to a pro rata portion of the payments received. Risk of prepayment varies with the underlying assets. Risk is minimized through the purchase of high-quality instruments with limited default or prepayment risk.

**C. Receivables**

Internal Service Funds	180,510	6,132	18	39,300	23,042,923
<b>Total</b>	<b>\$ 187,964</b>	<b>\$ 6,132</b>	<b>\$ 334,808</b>	<b>\$ 39,300</b>	<b>\$ 98,741,906</b>

## 2. Advances To/From Other Funds

The General Fund has made cash advances to certain proprietary funds for imprest petty cash disbursements needs. The General Fund advances to other funds at June 30, 2019, are summarized below:

Proprietary Funds	
State Lottery Fund	\$ 300,000
Liquor Control Fund	75
<b>Total</b>	<b>\$ 300,075</b>

## 3. Interfund Receivables/Payables

The primary government cash in most funds is pooled in the State Treasurer's accounts. When a fund has a deficit cash balance, this amount is reclassified to a liability account - interfund payable. The Transportation Fund reports the corresponding interfund receivable for the cash borrowed from the Highway Garage (Internal Service) Fund. The General Fund reports the corresponding interfund receivable for the cash borrowed from the rest of the pool. The following funds at June 30, 2019, reported interfund payables. It is expected that certain amounts due the General Fund and Transportation Fund from the Internal Service Funds will not be repaid within one year. It is expected that these interfund payable amounts will be reduced in future years through changes to billing rates and management of operations.

	General Fund	Transportation Fund	Totals
<b>Governmental Funds</b>			
Non-major Governmental Funds	\$ 13,795,771	\$ -	\$ 13,795,771
<b>Proprietary Funds</b>			
Non-major Enterprise Funds	369,254	-	369,254
Internal Service Funds	65,691,955	1,637,440	67,329,395
<b>Fiduciary Funds</b>			
Pension and OPEB Trust Funds	190,108	-	190,108
Agency Funds	67,256	-	67,256
<b>Total</b>	<b>\$ 80,114,344</b>	<b>\$ 1,637,440</b>	<b>\$ 81,751,784</b>

#### 4. Inter - Primary Government/Component Unit Balances

Advances to component units consist of the amounts advanced under various agreements with the Vermont Economic Development Authority (VEDA) for specific programs. At June 30, 2019, the advances to component units reported in the General Fund (\$5,500,000) are advances to Vermont Economic Development Authority. The advance funded a loan for a portion of a project to build a State office building. The terms of the agreement require the principal repayments on the loan be held by VEDA until the funds are requested by the State.

Due from component units/Due to primary government consist of the amounts owed to the primary government for programs administered by component units, in accordance with memoranda of understanding with State departments, and for the elimination of negative balances in the State Treasurer's pooled cash. Due from primary government/Due to component units consist of amounts appropriated from the primary government's funds to the component units that had not been disbursed by fiscal year end.

At June 30, 2019, these account balances are as follows:

	<u>Vermont Housing &amp; Conservation Board</u>
<b>Due from Component Units</b>	
General Fund	\$ 1,685,909
<b>Due to Component Units</b>	
Non-major Governmental Funds	<u>(3,034,954)</u>
<b>Total</b>	<u>\$ (1,349,045)</u>

#### 5. Interfund Transfers

Transfers between funds occur when one fund collects revenues and transfers the assets to another for expenditure or when one fund provides working capital to another fund. All transfers are legally authorized by the Legislature through either statute or Appropriation Acts.

The Global Commitment Fund received transfers from the General and Special Funds for Medicaid related services provided under the Vermont Global Commitment to Health Medicaid waiver. The General Fund received transfers from the Global Commitment fund to maintain reserves related to Medicaid costs and the Special Fund for various purposes including transfer of ending balances of the Securities, Insurance and Captive Funds. The Non-Major Governmental Funds received a transfer from General fund for debt service payments. The Special Fund received transfers from the General Fund for the Next Generation Fund and Emergency Relief and Assistance Fund and for insurance settlements, from the Federal Revenue Fund for the earned income tax credit for the year, and for Global Commitment costs and from the Global Commitment Fund for special education school-based Medicaid services. The Education Fund received transfers from the State Lottery Fund to support the general State grant for local education.

Interfund transfers for the fiscal year ended June 30, 2019, are as follows:

*(Table on next page.)*

<b>Transfers Out</b>				
<b>Governmental Funds</b>

<b>Total</b>	<u>\$ 209,073,112</u>	<b>Total</b>	<u>\$ 814,428</u>

#### F. Deferred Outflows and Deferred Inflows

Deferred outflows in the government-wide Statement of Net Position governmental activities consist of the unamortized balance of losses related to refunding of debt. The difference between the reacquisition price (the amount placed in escrow to pay for advance refunding) and the net carrying amount of the old debt, is reported as a deferred outflow and recognized as a component of interest over the remaining life of the old debt or the life of the new debt, whichever is shorter.

The change in deferred outflows of resources for the loss on refunding of bonds payable is as follows:

Balance, July 1, 2018	\$ 7,439,970
Current year amortization	<u>(1,141,645)</u>
Balance, June 30, 2019	<u>\$ 6,298,325</u>

Additional information regarding governmental and business-type activities' deferred outflows of resources and deferred inflows of resources related to pension and OPEB liabilities can be found in Note IV. G. 4.

Deferred inflows in the governmental funds Balance Sheet consist of unavailable amounts related to revenue recognition. Revenues and other governmental fund financial resources are recognized in the accounting period in which they become both available and measurable. When an asset is recorded in governmental fund financial statements, but the revenue is not available, a deferred inflow of resources is reported until such time as the revenue becomes available.

## G. Long-term Liabilities

### 1. General Obligation & Special Obligation Bonds Payable

General obligation bonds payable have been authorized and issued primarily to provide funds for acquisition and construction of capital facilities for higher education, public and mental health, correctional facilities, environmental conservation purposes, maintenance and construction of highways, assistance to municipalities for construction of water and sewage systems, and local schools.

Once authorized by the Legislature, the State Treasurer, with the approval of the Governor, may issue general obligation bonds. The bonds are to be payable in substantially equal or diminishing amounts, the first such payment to be payable not later than five years after the date of the bonds, and the last such payment to be made no later than twenty years after the date of the bonds.

Special obligation transportation infrastructure bonds are limited obligations of the State of Vermont payable from and secured solely by a pledge of funds held in trust by the Peoples United Bank in accordance with the terms of a Trust Agreement. Funding sources for the pledged funds are funds to be received from the Motor Fuel Infrastructure Assessments as authorized by Act 50 of the 2009 legislative session. The proceeds from this issue are expected to be expended for transportation infrastructure purposes, namely the rehabilitation or replacement of State bridges, and construction of roadway capacity projects.

The changes in bonds principal payable for fiscal year 2019 are summarized in the following schedule:

	General Obligation Bonds	Special Obligation Bonds	Total Obligation Bonds
Balance, July 1, 2018	\$ 635,810,000	\$ 26,750,000	\$ 662,560,000
Additions:			
Issuances	-	-	-
Total	-	-	-
Deductions:			
Redemptions	(51,760,000)	(1,635,000)	(53,395,000)
Total	(51,760,000)	(1,635,000)	(53,395,000)
Balance, June 30, 2019	<u>\$ 584,050,000</u>	<u>\$ 25,115,000</u>	<u>\$ 609,165,000</u>

General obligation and special obligation transportation infrastructure bonds outstanding at June 30, 2019, are shown on the following page:

## General Obligation and Special Obligation Transportation Infrastructure Bonds Outstanding at June 30, 2019

Date Issued	Date Series Matures	Interest Rates %	Amount of Original Issue	Maturity Value Sources of Payments		Maturity Value of Bonds Outstanding
				General Fund	Transportation Fund	Total

2035-2039	33,870,000	1,780,171	-	-	35,650,171
Totals	<u>\$ 584,050,000</u>	<u>\$ 152,738,495</u>	<u>\$ 25,115,000</u>	<u>\$ 6,232,738</u>	<u>\$ 768,136,233</u>

## 2. Bond Refundings

During fiscal year 2016, the State defeased "in-substance" certain general obligation bonds by issuing new bonds and by placing the proceeds of these new bonds in an irrevocable trust. These trust assets are utilized to make all debt service payments on the defeased bonds. Accordingly, these trust assets and the liability for the defeased bonds are not included in the State's financial statements.

The total amount of defeased bonds remaining outstanding at June 30, 2019, is \$0.

## 3. Lease Commitments

### A. Operating Leases

The State is committed under various operating leases covering real property (land and buildings) and equipment. Although lease terms vary, certain leases continue subject to appropriation by the General Assembly. If continuation is reasonably assured, leases requiring appropriation by the General Assembly are considered non-cancelable leases for financial reporting purposes. It should also be noted that the State is currently negotiating a small number of operating leases on which rent is being paid on a month-by-month basis and for which there is no signed agreement. These leases have not been included in the following table.

Total lease payments paid by the primary government in fiscal year 2019 was \$14,093,353 for operating leases of which \$13,927,966 was paid for property leases, \$123,053 for equipment leases, \$39,099 for non-cancellable land leases and \$3,235 for cancellable land rentals.

The following is a summary of the estimated future minimum rental commitments under operating leases for real property and equipment at June 30, 2019:

(Table on next page.)

<u>Fiscal Year</u>	<u>Primary Government</u>		
	<u>Non-Cancelable Leases</u>	<u>Cancelable Leases</u>	<u>Total</u>
2020.....	\$ 13,211,528	\$ 21,715	\$ 13,233,243
2021.....	11,712,270	2,235	11,714,505
2022.....	10,253,945	494	10,254,439
2023.....	8,921,643	494	8,922,137
2024.....	7,464,472	494	7,464,966
2025 - 2029....	21,766,811	2,470	21,769,281
2030 - 2034....	6,626,425	2,470	6,628,895
2035 - 2039....	<u>3,000</u>	<u>2,470</u>	<u>5,470</u>
Totals	<u>\$ 79,960,094</u>	<u>\$ 32,842</u>	<u>\$ 79,992,936</u>

**B. Capital Leases**

Capital lease payments for the primary government in 2019 totaled \$885,416 with \$70,225 for building improvements, and \$815,191 for a building lease which under this agreement is one piece of a multi-part downtown redevelopment strategy for the City of Saint Albans. The equipment lease expires in 2019 whereas the building lease assumes a 20-year term, as reflected in the table below.

As of June 30, 2019, the historical cost of the primary government's assets acquired through capital leases was \$13,028,832 for buildings and improvements, less accumulated depreciation of \$5,096,553 results in a net amount of \$7,932,279 for primary government's assets acquired through capital leases.

The future minimum lease obligation and the net present value of the minimum lease payments at June 30, 2019 are as follows:

<u>Fiscal Year</u>	<u>Primary Government</u>
2020.....	\$ 835,079
2021.....	853,868
2022 .....	873,080
2023 .....	892,724
2024 .....	912,810
2025 - 2029 .....	4,881,526
2030 - 2034 .....	5,455,972
2035 - 2039 .....	<u>479,516</u>
Total minimum lease payments.....	15,184,575
Less interest.....	<u>(5,766,550)</u>
Present value of minimum lease payments....	<u>\$ 9,418,025</u>

#### **4. Retirement Plans and Other Postemployment Benefits**

In accordance with State statutes, the State Treasurer and the individual retirement systems' Board of Trustees administer the State's three defined benefit pension plans and three defined contribution plans. In addition to providing pension benefits, the State also offers other postemployment medical insurance benefit plans to retirees of the Vermont State Retirement System and State Teachers' Retirement System. Disclosures relating to defined benefit pension plans are included in 4. A. below, those relating to defined contribution pension plans are included in 4. B. below, and those relating to other postemployment benefits (OPEB) are included in 4. C. below.

These systems are considered part of the State's reporting entity and are included in the accompanying financial statements as pension and other postemployment benefit trust funds in the fiduciary fund type. There are no separate stand-alone financial statements issued for these plans.

##### Summary of significant accounting policies – basis of accounting and valuation of investments

The financial statements for the pension and other postemployment benefit trust funds are prepared using the accrual basis of accounting. Plan members' contributions are recognized in the period in which the contributions are due. The employers' contributions are recognized when legally due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. For purposes of measuring the net pension and OPEB liability, deferred outflows of resources and deferred inflows of resources related to pensions and OPEB, and pension and OPEB expense, information about the fiduciary net position of the pension and OPEB plans and additions to/deductions from the plans' net position have been determined on the same basis as they are reported by the pension and OPEB plans. All investments are reported at fair value. Securities traded on a national exchange are valued at the last reported sales price on June 30, 2019. Securities without an established market are reported at estimated fair value. Additional information on the plans' investments may be found in Note IV. B. - Investments.

The State annually establishes a state defined benefit retirement contribution rate. The fiscal year 2019 employer contribution rate was 18.71% of payroll and consists of the following two components: 12.31% for Vermont State Retirement System defined benefit pension plan (VSRS) and 6.40% for the Vermont State Postemployment Benefits Trust Fund defined benefit OPEB plan (VSPB). The rates reflect estimates to fund the VSRS actuarially determined contribution and the VSPB pay-as-you-go amounts. These amounts are estimates and may differ from the funding required to meet VSPB pay-as-you-go amounts. Currently, contributions in excess of VSPB pay-as-you-go amounts are deposited directly to VSRS. Contributions to VSRS and VSPB totaled \$66.6 million and \$63.7 million, respectively, for the fiscal year ended June 30, 2019. In fiscal year 2019, pay-as-you-go contributions to the VSPB were \$38.1 million. An additional contribution of \$25.6 million was also made to the VSPB during the year.

#### **A. Defined Benefit Retirement Plans**

In order to provide the necessary disclosures that are required under the various GASB Statements, the disclosures below are separated into three sections. The first section (Disclosures about the Defined Benefit Retirement Plans) offers disclosures about the plans themselves - descriptions of the plans and who is covered; an analysis of the membership of the various groups of the various plans as of the end of the fiscal year; a discussion of benefits provided by each of the plans, and the financial statements of each of the three defined benefit plans.

The second section (Financial Reporting of Net Pension Liability and Pension Expense by the Employer as required by GASB Statement No. 68) provides funding information regarding the pension plans that are required by GASB Statement No. 68 - changes in net pension liability (NPL), balances of deferred pension outflows of resources and deferred pension inflows of resources (including prospective schedules of amortization of the deferred outflows and inflows), and the calculation of pension expense for the year.

The third section (Net Pension Liability and Disclosures required by GASB Statement No. 67) provides the information that is required by GASB Statement No. 67 - the calculation of the net pension liability; the actuarial

assumptions and census data that were used in calculating that NPL; the discount rate that was used in the calculations; and the sensitivity of the NPL to changes in the discount rate. The Statement of Plan Net Position and the Statement of Changes in Plan Net Position for the fiscal year ended June 30, 2019 are included at the end of this section.

## 1. Disclosures about the Defined Benefit Retirement Plans

This first section provides the disclosures about the defined benefit retirement plans required by GASB Statement No. 67, including the plan descriptions, benefits and membership at June 30, 2019.

### Plan Descriptions

The Vermont State Retirement System (VSRS) (3 V.S.A. Chapter 16) is a single employer defined benefit pension plan which covers substantially all general State employees and State Police, except employees hired in a temporary capacity. Membership in the system is a condition of employment.

Management of the plan is vested in the VSRS Retirement Board, which consists of an appointee of the Governor; State Treasurer; Commissioner of Human Resources; Commissioner of Finance and Management; three members of the Vermont State Employees' Association who are active members of the system (each chosen by such association in accordance with its articles of association) and one retired state employee who is a beneficiary of the system (to be elected by the Vermont Retired State Employees' Association).

The Vermont State Teachers' Retirement System (STRS) (16 V.S.A. Chapter 55) is a cost-sharing multiple-employer defined benefit pension plan with a special funding situation. It covers nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State that are controlled by the State Board of Education. Membership in the system for those covered classes is a condition of employment. During the year ended June 30, 2019, the retirement system consisted of 184 participating employers.

Management of the plan is vested in the STRS Board of Trustees, which consists of the Secretary of Education (ex-officio); the State Treasurer (ex-officio); the Commissioner of Financial Regulation (ex-officio); two trustees and one alternate who are members of the system (each elected by the members of the system under rules adopted by the board) and one trustee and one alternate who are retired members of the system receiving retirement benefits (who are elected by the Association of Retired Teachers of Vermont).

The Vermont Municipal Employees' Retirement System (MERS) (24 V.S.A., Chapter 125) is a cost-sharing, multiple-employer defined benefit pension plan designed for school districts and other municipal employees that work on a regular basis and also includes employees of museums and libraries if at least half of that institution's operating expenses are met by municipal funds. An employee of any employer that becomes affiliated with the system may join at that time or at any time thereafter. Any employee hired subsequent to the effective participation date of their employer who meets the minimum hourly requirement is required to join the system. During the year ended June 30, 2019, the retirement system consisted of 379 participating employers.

Management of the plan is vested in the MERS Retirement Board of Trustees, which consists of the State Treasurer; two employee representatives who at all times during their term of office are contributing members and have completed five years of creditable service (each elected by the membership of the system); one employer representative who shall at all times during their term of office be a member of the governing body, chief executive officer or supervisor of a participating employer (elected by the membership of the system) and one employer representative who shall at all times during their term of office be a member of the governing body, chief executive officer or supervisor of a participating employer (appointed by the Governor from candidates jointly submitted by the Vermont League of Cities and Towns and the Vermont School Boards Association).

Copies of each individual defined benefit retirement plan's annual actuarial valuation report, and information describing each defined benefit plan's provisions in greater detail, are available for inspection at the Retirement

Division, Office of the State Treasurer, 109 State Street, Montpelier, Vermont 05609-6901.

Membership of the Vermont State Retirement System is made up of the following:

- General employees who did not join the non-contributory system on July 1, 1981 (Group A);
- State police, law enforcement positions, and airport firefighters (Group C);
- Judges (Group D); and
- Terminated vested members of the non-contributory system and all other general employees (Group F).

Membership of the State Teachers' Retirement System is made up of the following:

- General teachers who did not join the non-contributory system on July 1, 1981 (Group A); and
- Terminated vested members of the non-contributory system and all other general teachers (Group C).

Membership of the Vermont Municipal Employees' Retirement System is made up of the following:

- General employees whose legislative bodies have not elected to become a member of Group B or Group C (Group A);
- General employees whose legislative bodies have elected to become members of Group B or Group C (Group B & C); and
- Sworn police officers, firefighters and emergency medical personnel (Group D)

At June 30, 2019, the State Treasurer's Office reports the following membership of each of the defined benefit plans by status and group:

	<b>Vermont State Retirement System</b>	<b>Vermont State Teachers Retirement System</b>	<b>Vermont Municipal Employees Retirement System</b>
Total Active Members	8,443	9,862	7,630
Retirees and beneficiaries currently receiving benefits	7,268	9,514	3,415
Terminated employees entitled to benefits but not yet receiving them (vested)	747	819	896
Inactive members	1,443	2,756	2,814
Total Members	<u>17,901</u>	<u>22,951</u>	<u>14,755</u>

### Contributions

Vermont State Retirement System. Title 3 VSA Chapter 16 of Vermont Statutes grant the authority to the retirement board to review annually the amount of state contribution recommended by the actuary of the retirement system as necessary to achieve and preserve the financial integrity of the fund, and submit this recommendation to the Governor and both houses of the Legislature. Employee contributions are established in Chapter 16. Contribution rates for the fiscal year ended June 30, 2019 for the various groups are as follows:

Vermont State Retirement System	Group A	Group C	Group D	Group F
Employee Contributions	6.65% of gross payroll	8.53% of gross payroll	6.65% of gross payroll	6.65% of gross payroll
Employer Contributions	12.31% of gross payroll	12.31% of gross payroll	12.31% of gross payroll	12.31% of gross payroll

State Teachers' Retirement System. Title 16 VSA Chapter 55 of Vermont Statutes grant the authority to the board of trustees of the system to annually review the amount of State contribution recommended by the actuary of the retirement system to achieve and preserve the financial integrity of the fund, and submit this recommendation to the Governor and both houses of the Legislature. The board of trustees also certifies the rates of contribution payable by employees. Contribution rates for the fiscal year ended June 30, 2019 for the various groups are as follows:

Vermont State Teachers Retirement System	Group A	Group C - Group #1	Group C - Group #2
Employee Contributions	5.50% of gross salary	5.00% of gross salary	5.00% of gross salary for members with at least 5 years of service as of 7/1/2014, and 6.00% of gross salary for members with less than 5 years of service as of 7/1/2014
Non-employer Contributions	Appropriation based on June 2017 actuarial recommendation of amount needed to fund benefits earned during the year (1.23% of projected payroll), plus amount needed to liquidate the accrued liability over the remaining amortization period (\$97,559,009).		

Vermont Municipal Employees Retirement System. Title 24 VSA Chapter 125 of Vermont Statutes grant the authority to the retirement board to annually review the amount of municipalities contribution recommended by the actuary of the retirement system to achieve and preserve the financial integrity of the fund, and certify the rates of contributions payable by employers. The board of trustees also certifies the rates of contribution payable by employees. Contribution rates for the fiscal year ended June 30, 2019, for the various groups are as follows:

Vermont Municipal Employees Retirement System	Group A	Group B	Group C	Group D
Employee Contributions	2.625% of gross salary	5.00% of gross salary	10.125% of gross salary	11.475% of gross salary
Employer Contributions	4.125% of gross salary	5.625% of gross salary	7.375% of gross salary	9.975% of gross salary

### Benefits provided

Benefit terms are established or amended in accordance with 3 V.S.A. Chapter 16 for the Vermont State Retirement System, in accordance with 16 V.S.A. Chapter 55 for the Vermont State Teachers Retirement System, and in accordance with 24 V.S.A Chapter 125 for the Vermont Municipal Employees Retirement System.

Details of the pension benefits provided by each of the retirement plans are included on the next 3 pages:

*(Notes continue on next page.)*

Vermont State Retirement System	Group A	Group C	Group D	Group F Hired Before 7/1/08	Group F Hired On or After 7/1/08
Average Final Compensation (AFC)	Highest 3 consecutive years, including unused annual leave payoff	Highest 2 consecutive years, including unused annual leave payoff	Final salary at retirement	Highest 3 consecutive years, excluding unused annual leave payoff	Same
Benefit Formula	1.67% X AFC x creditable service	2.5% X AFC x creditable service up to 20 years	3.33% X AFC x creditable service (after 12 years in Group D)	1.25% X AFC x service prior to 12/31/90 + 1.67% X AFC x service after 1/1/91	Same
Maximum Benefit Payable	100% of AFC	50% of AFC	100% of Final Salary	50% of AFC	60% of AFC
Normal Retirement (no reduction)	Age 65 with 5 years of service or 62 with 20 years of service	Age 55 (mandatory) with 5 years of service	Age 62 with 5 years of service	Age 62 or with 30 years of service	Age 65 or a combination of age & service credit that equals 87
Early Retirement Eligibility	Age 55 with 5 years of service or 30 years of service (any age)	Age 50 with 20 years of service	Age 55 with 5 years of service or 30 years of service (any age)	Age 55 with 5 years of service	Same
Early Retirement Reduction	Actuarially reduced benefit if under 30 years of service	No reduction	3% per year from age 62	No reduction if 30 years of service; otherwise, 6% per year preceding age 62	No reduction if age 65 with 5 years of service, or if combination of age and service equal to 87; otherwise, monthly reduction preceding age 65 based on years of service: 35+ years - 1/8th of 1%; 30-34 years - 1/4th of 1%; 25-29 years - 1/3rd of 1%; 20-24 years - 5/12th of 1%; less than 20 years - 5/9th of 1%
Post-Retirement COLA*	Full CPI, from a minimum of 1% up to a maximum of 5%, after 12 months of retirement	Full CPI, from a minimum of 1% up to a maximum of 5%, after 12 months of retirement	Full CPI, from a minimum of 1% up to a maximum of 5%, after 12 months of retirement	For members retiring on or after 07/01/2008, 100% of a fiscal year CPI increase. For members who retired before 07/01/2008, 50% of a fiscal year CPI increase. Annual COLA adjustments have a minimum of 1% and maximum of 5%	Annual COLA adjustments are 100% of a fiscal year CPI increase, with a minimum of 1% and maximum of 5%
Disability Benefit	Unreduced, accrued benefit with minimum of 25% of AFC	Unreduced, accrued benefit with minimum of 25% of AFC, with children's benefit of 10% of AFC to maximum of three concurrently	Unreduced, accrued benefit with minimum of 25% of AFC	Unreduced, accrued benefit with minimum of 25% of AFC	Same
Death-in-Service Benefit	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefits up to maximum of three concurrently	70% of accrued benefit with no actuarial reduction applied, plus children's benefit	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefits up to maximum of three concurrently	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefits up to maximum of three concurrently	Same

\* Note: Annual post-retirement Cost of Living Adjustment (COLA) applies beginning the first January after receiving at least 12 pension payments and reaching normal retirement age.

(Notes continue on next page.)

<b>Vermont State Teachers Retirement System</b>	<b>Group A</b>	<b>Group C - Group #1 *</b>	<b>Group C - Group #2 ++</b>
Average Final Compensation (AFC)	Highest 3 consecutive years, including unused annual leave, sick leave, and bonus/incentives	Highest 3 consecutive years, excluding all payments for anything other than service actually performed	Highest 3 consecutive years, excluding all payments for anything other than service actually performed
Benefit Formula	1.67% X creditable service X AFC	1.25% X service prior to 6/30/90 X AFC + 1.67% X service after 7/1/90 X AFC	1.25% X service prior to 6/30/90 X AFC + 1.67% X service after 7/1/90 X AFC, 2% X AFC after attaining 20.0 years
Maximum Benefit Payable	100% of AFC	53.34% of AFC	60% of AFC
Normal Retirement (no reduction)	Age 60 or with 30 years of service	Age 62 or with 30 years of service	Age 65 or when the sum of age and service credit equals 90
Early Retirement Eligibility	Age 55 with 5 years of service	Age 55 with 5 years of service	Age 55 with 5 years of service
Early Retirement Reduction	Actuarial reduction	6% per year from age 62	Actuarial reduction
Post-Retirement COLA	Full CPI, up to a maximum of 5%, after 12 months of retirement; minimum of 1%	50% CPI, up to a maximum of 5% after 12 months of retirement or with 30 years; minimum of 1%	50% CPI, up to a maximum of 5% minimum of 1% after 12 months of normal retirement or age 65
Disability Benefit	Unreduced, accrued benefit with minimum of 25% of AFC	Unreduced, accrued benefit with minimum of 25% of AFC	Unreduced, accrued benefit with minimum of 25% of AFC
Death-in-Service Benefit	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefits up to maximum of three concurrently	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefit up to maximum of three concurrently	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied plus children's benefits up to maximum of three concurrently

\* Group #1 are members who were within 5 years of normal retirement (age 62 or 30 years of service) on June 30, 2010.

++ Group #2 members who were under 57 years of age or had less than 25 years of service on June 30, 2010.

*(Notes continue on next page.)*

Vermont Municipal Employees Retirement System	Group A	Group B	Group C	Group D
Average Final Compensation (AFC)	Highest 5 consecutive years	Highest 3 consecutive years	Highest 3 consecutive years	Highest 2 consecutive years
Benefit Formula	1.4% X creditable service X AFC	1.7% X creditable service X AFC + previous service: 1.4% X Group A X AFC	2.5% X creditable service X AFC + previous service: 1.4% X Group A X AFC; 1.7% X Group B X AFC	2.5% X creditable service X AFC + previous service: 1.4% X Group A X AFC; 1.7% X Group B X AFC; 2.5% X Group C X AFC

Early Retirement Eligibility	Age 55 with 5 years of service	Age 55 with 5 years of service	N/A	Age 50 with 20 years of service
Early Retirement Reduction	6% per year from age 65 **	6% per year from age 62 **	N/A	No reduction
Post-Retirement COLA	50 % of CPI, up to 2% per year	50 % of CPI, up to 3% per year	50 % of CPI, up to 3% per year	50 % of CPI, up to 3% per year
Disability Benefit	Unreduced, accrued benefit	Unreduced, accrued benefit	Unreduced, accrued benefit	Unreduced, accrued benefit plus children's benefit representing 10% of AFC to maximum of three concurrently
Death-in-Service Benefit	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied	Disability benefit or early retirement benefit, whichever is greater, with 100% survivorship factor applied	70% of accrued benefit with no actuarial reduction applied, plus children's benefit

\*\* A special early retirement factor of 3% per year only for municipal police officers who have attained age 60.

## 2. Employer Reporting of Pension Liabilities, Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources Related to Pension Plans as required by GASB Statement No. 68

This section includes the information that is required to be reported by employers per GASB Statement No. 68. It reports information regarding the calculation of the State's net pension liability, including changes during the measurement period in both total pension liability and plan net position; balances in the various components of deferred pension outflows of resources and deferred pension inflows of resources and the amounts to be recognized in pension expense in future periods; and the calculation of pension expense. In addition to presenting the NPL, this section also includes information on the actuarial assumptions and census data used in the valuation, the discount rate that was used to calculate the NPL, and disclosures as to the sensitivity of the NPL to changes in the discount rate.

The State is responsible for 98.2187% of the VSRS net pension liability. The Vermont Veterans' Home (a discrete component unit) is responsible for 1.7813% of the VSRS net pension liability. The State is responsible for 100% of the STRS net pension liability as a non-employer contributing entity. The information is presented in this section is for those two plans. The State does not participate in the MERS plan, so no employer information is presented for that plan.

### Reporting Date, Measurement Date, and Valuation Date (Employer Reporting)

Net pension liabilities, deferred pension outflows of resources, deferred pension inflows of resources, and pension expense are all presented as of the State's reporting date (June 30, 2019) and for the State's reporting period (the

year ended June 30, 2019). These amounts are measured as of the measurement date and for the measurement period (the period between the prior and current measurement dates). GASB Statement No. 68 requires that the current measurement date be no earlier than the end of the employer's prior fiscal year. For the reporting date of June 30, 2019, the State has chosen to use the end of the prior fiscal year (June 30, 2018) as the measurement date, and the year ended June 30, 2018 as the measurement period.

The total pension liability is determined by an actuarial valuation performed as of the measurement date, or by the use of update procedures to roll forward to the measurement date amounts from an actuarial valuation as of a date no more than 30 months and 1 day earlier than the employer's most recent fiscal year-end. The State has elected to apply update procedures to roll forward amounts from an actuarial valuation performed as of June 30, 2017, to the measurement date of June 30, 2018. There were no material changes in assumptions or benefit terms that occurred between the actuarial valuation date and the measurement date.

### Net Pension Liabilities (Employer Reporting)

The net pension liability (NPL) is measured as the portion of the actuarial present value of projected benefit payments that is attributable to past periods of employee service, net of the pension plan's fiduciary net position. The changes in the components for the measurement period are as follows (amounts are in thousands):

	Vermont State Retirement System			State Teachers' Retirement System		
	Increase (Decrease)			Increase (Decrease)		
	Total Pension Liability (a)	Plan Net Position (b)	Net Pension Liability (a-b)	Total Pension Liability (a)	Plan Net Position (b)	Net Pension Liability (a-b)
<b>Balances - June 30, 2017</b>	\$ 2,428,779	\$ 1,748,442	\$ 680,337	\$ 3,220,961	\$ 1,738,558	\$ 1,482,403

		2018	2017	Change
Governmental activities	\$ 747,816	97.4913%	97.5593%	-0.0680%
Business type activities	5,579	0.7274%	0.7257%	0.0017%
Discrete component unit	<u>13,664</u>	<u>1.7813%</u>	<u>1.7150%</u>	0.0663%
Total net pension liability	<u>\$ 767,059</u>	<u>100.0000%</u>	<u>100.0000%</u>	

Additional information regarding the changes in the net pension liability for the year ended June 30, 2019 can be found in the Required Supplementary information immediately following these notes to the financial statements.

### Deferred Pension Outflows of Resources and Deferred Pension Inflows of Resources (Employer Reporting)

Most changes in the net pension liability are included in pension expense during the year of change. Changes resulting from current-period service cost, interest on the total pension liability, and changes in benefit terms are required to be included in pension expense immediately. Similarly, projected earnings on the pension plan's investments are also required to be included in the determination of pension expense immediately.

The effects of certain other changes in the net pension liability are required to be included in pension expense over the current and future periods, depending on the nature of the change.

The effect on the net pension liability of differences between the projected earnings on pension plan investments and actual experience with regard to those earnings is required to be included in pension expense in a systematic and rational manner over a closed period of five years, beginning with the current period. Changes in the net pension liability not included in pension expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to pensions. This treatment arises from the concept that these changes result from the use of estimates, where probabilities of events range from 0 to 100 percent, while actual events either occur or do not occur. Therefore, differences between some estimates and actual experience will occur with every measurement that incorporates future events.

The effects on the total pension liability of (1) changes of economic and demographic assumptions or of other inputs and (2) differences between expected and actual experience are required to be included in pension expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of all employees that are provided with benefits through the pension plan (active employees and inactive employees), beginning with the current period. Changes in the net pension liability not included in pension expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to pensions. This treatment arises from the concept that pensions arise from an exchange between employer and employee of salaries and benefits for employee service each period and that these transactions and related pension measurements are viewed in the context of ongoing, career-long employment relationships.

Employer contributions subsequent to the measurement date of the net pension liability are required to be reported as deferred outflows of resources, and will be recognized as a reduction of the net pension liability at June 30, 2020. As of June 30, 2019, the State reported the following deferred pension outflows of resources and deferred pension inflows of resources (amounts are in thousands):

*(Table on next page.)*

Source	Vermont State Retirement System			
	Primary Government		Discrete Component Units	
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 94,384	\$ -	\$ 1,712	\$ -
Changes of assumptions	48,355	10,732	877	195
Net differences between projected and actual earnings on plan investments	49,822	-	903	-
Change in proportion and the effect of certain employer contributions on the employer's net pension liability	526	784	545	287
Employer contributions made subsequent to the measurement date	65,495	-	1,123	-
<b>Total</b>	<u>\$ 258,582</u>	<u>\$ 11,516</u>	<u>\$ 5,160</u>	<u>\$ 482</u>

Source	State Teachers' Retirement System	
	Primary Government	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 51,766	\$ -
Changes of assumptions	92,925	26,523
Net differences between projected and actual earnings on plan investments	47,407	-
Employer contributions made subsequent to the measurement date	113,748	-
<b>Total</b>	<u>\$ 305,846</u>	<u>\$ 26,523</u>

Source	Primary Government	
	Total	
	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 146,150	\$ -
Changes of assumptions	141,280	37,255
Net differences between projected and actual earnings on plan investments	97,229	-
Change in proportion and the effect of certain employer contributions on the employer's net pension liability	526	784
Employer contributions made subsequent to the measurement date	179,243	-
<b>Total</b>	<u>\$ 564,428</u>	<u>\$ 38,039</u>

The amounts reported as deferred pension outflows of resources resulting from employer contributions made subsequent to the measurement date (VSRS - \$65.495 million Primary Government and \$1.123 million Component Units; and STRS - \$113.748 million Primary Government), will be recognized as a reduction of the net pension liability at June 30, 2020. The other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions, will be recognized in pension expense as follows (amounts are in thousands):

Year Ended June 30	State Teachers' Retirement System	Vermont State Retirement System	Total	Vermont State Retirement System
	Primary Government	Primary Government	Primary Government	Discrete Component Units
2020	\$ 97,246	\$ 76,817	\$ 174,063	\$ 1,353
2021	69,549	49,381	118,930	928
2022	(1,947)	16,893	14,946	394
2023	727	24,908	25,635	576
2024	-	13,572	13,572	304
Total	<u>\$ 165,575</u>	<u>\$ 181,571</u>	<u>\$ 347,146</u>	<u>\$ 3,555</u>

#### Pension Expense (Employer Reporting)

As discussed above, most changes in the net pension liability are included in pension expense in the year of change, including changes resulting from current-period service cost, interest on the total pension liability, changes in benefit terms, and projected earnings on the pension plan's investments. Other changes in net pension liability are recorded as deferred pension outflows of resources and deferred pension inflows of resources, and included in pension expense on a systematic and rational manner over current and future periods.

Pension expense for the year ended June 30, 2019, is as follows (amounts are in thousands):

*(Table on next page.)*

	<u>State Teachers'</u> <u>Retirement System</u>	<u>Vermont State</u> <u>Retirement System</u>	<u>Total</u>	<u>Vermont State</u> <u>Retirement System</u>

### Actuarial Methods and Assumptions (Employer Reporting)

Methods and assumptions used to determine pension expense and total pension liability are based on a valuation date of June 30, 2017 for VSRS and STRS.

(Table on next page.)

	VRSRS	STRS
Valuation date	6/30/2017	6/30/2017
Inflation assumptions	2.50%	2.50%
Investment rate of return	7.50%	7.50%
Projected salary increases	3.50% - 7.04%	3.75% - 9.09%
Cost of living adjustments	Groups A, C & D: 2.55%; Group F: 1.4% and Group F retiring after 7/1/08: 2.55%	Group A: 2.55%; Group C: 1.4%
<u>Post Retirement Adjustments</u>		
Allowances in payment for at least one year adjusted for cost of living based on CPI but not in excess of percentage indicated	Groups A, C, D - 5%	Group A - 5%
Allowances in payment for at least one year increased on January 1 by one-half of the percentage increase in the CPI but not in excess of percentage indicated	Group F - 5%	Group C - 5%
Assumed annual rate of cost-of-living increases	For those eligible for increases of 100% of CPI change - 2.55%	For those eligible for increases of 100% of CPI change - 2.55%
	For those eligible for increases of 50% of CPI change - 1.4%	For those eligible for increases of 50% of CPI change - 1.4%
<u>Census Data for 2017 Valuation</u>		
Retired members or beneficiaries currently receiving benefits	6,727	9,021
Inactive members	1,098	2,381
Active members	8,620	10,028
Terminated vested members	742	763

Mortality rates are based as follows for the various retirement systems:

#### Vermont State Retirement System

- *Pre-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Employee, 70% Healthy Employee with generational projection using Scale SSA-2017. Mortality rates for active employees in Group C were based on RP-2006 Blue Collar Employee with generational projection using Scale SSA-2017. Mortality rates for active employees in Group D were based on RP-2006 Healthy Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Annuitant, 70% Healthy Annuitant with generational projection using Scale SSA-2017. Mortality rates for retirees and beneficiaries in Group C were based on RP-2006 Blue Collar Annuitant with generational projection using Scale SSA-2017. Mortality rates for retirees and beneficiaries in Group D were based on RP-2006 Healthy Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* Groups A, C, D, and F were based on RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

#### Vermont State Teachers' Retirement System

- *Pre-retirement Mortality:* All Groups were based on 98% of RP-2006 White Collar Employee with generational

projection using Scale SSA-2017.

- *Post-retirement Mortality:* All Groups were based on 98% of RP-2006 White Collar Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* All Groups were based on the RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

The actuarial assumptions used in the June 30, 2017 valuation were based on the results of an actuarial experience study for the five-year period ended June 30, 2014. Actuarial valuations attempt to estimate costs associated with the pension system based on a number of demographic, economic, and retirement experience assumptions. To the extent assumptions are at variance to experience, this can result in actuarial gains and losses ultimately impacting contribution rates and the development of the actuarially required contribution. Experience studies are required by statute to be conducted every five years to review actual experience in comparison to these assumptions and to provide recommended changes to assumptions.

The long-term expected rate of return on pension plan investments was determined using best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) developed for each major asset class using an econometric model that forecasts a variety of economic environments and then calculates asset class returns based on functional relationships between the economic variables and the asset classes. Best estimates of arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2018 are summarized in the following table:

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
US Equity	18.00%	6.10%
Non-US Equity	16.00%	7.45%
Global Equity	9.00%	6.74%
Fixed Income	26.00%	2.25%
Real Estate	8.00%	5.11%
Private Markets	15.00%	7.60%
Hedge Funds	8.00%	3.86%
Total	<u>100.00%</u>	

Nominal long-term expected rates of return for these asset classes are equal to the sum of the above expected long-term real rates and the expected long-term inflation rate of 2.5%.

#### **Discount Rate (Employer Reporting)**

The discount rate used to measure the total pension liability as of June 30, 2018 was 7.50% for the VSRS and STRS. The discount rate used for the prior year was 7.50% for the VSRS and STRS. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current System members. The assumed discount rate has been determined in accordance with the method prescribed by GASB Statement No. 68.

The annual money-weighted rate of return on pension plan investments calculated as the internal rate of return on pension plan investments, net of pension plan investment expenses for the year ended June 30, 2018 was 6.73% for VSRS, and 6.99% for STRS. Amounts for the prior year were 10.33%, and 10.17% respectively. A money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

### Sensitivity of the Net Pension Liability to Changes in the Discount Rate (Employer Reporting)

The following presents the net pension liability of the various retirement systems (at the June 30, 2018 measurement date), calculated using the discount rates determined above, as well as what the systems' net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate (amounts are in thousands):

	<u>VSRS</u>	<u>STRS</u>
One-percent decrease		
Discount rate	6.50%	6.50%
Net pension liability	\$ 1,068,903	\$ 1,824,257
Net pension liability, as reported		
Discount rate	7.50%	7.50%
Net pension liability	\$ 767,059	\$ 1,510,705
One-percent increase		
Discount rate	8.50%	8.50%
Net pension liability	\$ 521,239	\$ 1,196,832

### Payable to the Defined Benefit Pension Plan (Employer Reporting)

At June 30, 2019, the State reported a payable of \$6,153,815 for the outstanding amount of contributions to the VSRS pension plan required for the year ended June 30, 2019.

### 3. Net Pension Liability and Disclosures required by GASB Statement No. 67 (Plan Reporting)

This section includes the information that is required to be presented by GASB Statement No. 67, reporting on the financial statements for the defined benefit plans for the year ended June 30, 2019. Separate valuations were performed by the State's actuary to calculate the total pension liability in accordance with this standard for financial reporting by pension plans and calculates the net pension liability (NPL). The plans elected to base the valuations on plan data as of June 30, 2018 and used update procedures to roll forward the total pension liability to the pension plan's fiscal year end of June 30, 2019. In addition to presenting the NPL, this section also includes information on the actuarial assumptions used in the valuation, the discount rate that was used to calculate the NPL, and disclosures as to the sensitivity of the NPL to changes in the discount rate.

#### Net Pension Liabilities (Plan Reporting)

The components of the net pension liabilities of the defined benefit retirement plans at June 30, 2019, are shown as follows with amounts in thousands:

*(Table on next page.)*

	<b>Vermont State Retirement System</b>	<b>Vermont State Teachers' Retirement System</b>	<b>Vermont Municipal Employees Retirement System</b>
Total pension liability	\$ 2,750,811	\$ 3,465,113	\$ 882,958
Plan fiduciary net position	<u>(1,909,470)</u>	<u>(1,904,488)</u>	<u>(709,466)</u>
Net pension liability	<u>\$ 841,341</u>	<u>\$ 1,560,625</u>	<u>\$ 173,492</u>
Plan fiduciary net position as a percentage of total pension liability	69.41%	54.96%	80.35%

Additional information regarding changes in the net pension liability for the year ended June 30, 2019 can be found in the Required Supplementary Information section immediately following these notes to the financial statements.

#### **Actuarial Assumptions (Plan Reporting)**

The June 30, 2019 total pension liability was determined by rolling forward the total pension liability as of June 30, 2018 to June 30, 2019, using the actuarial assumptions and methods used in the June 30, 2018 actuarial valuation of the plans. There were no material changes in assumptions or benefit terms that occurred between the actuarial valuation date and the measurement date.

*(Table on next page.)*

	<b>VSRS</b>	<b>STRS</b>	<b>MERS</b>
Valuation date	6/30/2018	6/30/2018	6/30/2018
Inflation assumptions	2.50%	2.50%	2.50%
Investment rate of return	7.50%	7.50%	7.50%
Projected salary increases	3.50% - 7.04%	3.75% - 9.09%	5%
Cost of living adjustments	Groups A, C & D and F (retiring on or after 7/1/2008): 2.55%; Group F (retiring before 7/1/2008) : 1.4%	Group A: 2.55%; Group C: 1.4%	Group A: 1.15%; Groups B, C, & D: 1.3%
<u>Post Retirement Adjustments</u>			
Allowances in payment for at least one year adjusted for cost of living based on CPI but not in excess of percentage indicated	Groups A, C, D, F (retired on or after 7/1/2008) - 5%	Group A - 5%	N/A
Allowances in payment for at least one year increased on January 1 by one-half of the percentage increase in the CPI but not in excess of percentage indicated	Group F (retired before 7/1/2008) - 5%	Group C - 5%	Group A - 2%, Groups B, C & D - 3%
Assumed annual rate of cost-of-living increases	For those eligible for increases of 100% of CPI change - 2.55%	For those eligible for increases of 100% of CPI change - 2.55%	
	For those eligible for increases of 50% of CPI change - 1.4%	For those eligible for increases of 50% of CPI change - 1.4%	
<u>Census Data for 2018 Valuation</u>			
Retired members or beneficiaries currently receiving benefits	6,974	9,269	3,189
Inactive members	1,266	2,613	2,516
Active members	8,530	9,892	7,452
Terminated vested members	753	787	798

Mortality rates are based as follows for the various retirement systems:

#### Vermont State Retirement System

- *Pre-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Employee, 70% Healthy Employee with generational projection using Scale SSA-2017. Mortality rates for active employees in Group C were based on RP-2006 Blue Collar Employee with generational projection using Scale SSA-2017. Mortality rates for active employees in Group D were based on RP-2006 Healthy Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Annuitant, 70% Healthy Annuitant with generational projection using Scale SSA-2017. Mortality rates for retirees and beneficiaries in Group C were based on RP-2006 Blue Collar Annuitant with generational projection using Scale SSA-2017. Mortality rates for retirees and beneficiaries in Group D were based on RP-2006 Healthy Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* Groups A, C, D, and F were based on RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

#### Vermont State Teachers' Retirement System

- *Pre-retirement Mortality:* All Groups were based on 98% of RP-2006 White Collar Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* All Groups based on 98% of RP-2006 White Collar Annuitant with generational

projection using Scale SSA-2017.

- *Disabled Mortality:* All Groups were based on the RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

Vermont Municipal Employees Retirement System

- *Pre-retirement Mortality:* Groups A, B, and C were based on 98% of RP-2006 blended 60% Blue Collar Employee, 40% Healthy Employee with generational projection using Scale SSA-2017. Mortality rates for active employees in Group D were based on 100% of RP-2006 Blue Collar Employee with generational projection using Scale SSA-2017.

- *Post-retirement Mortality:* Groups A, B, and C were based on 98% of RP-2006 blended 60% Blue Collar Annuitant, 40% Healthy Annuitant with generational projection using Scale SSA-2017. Mortality rates for retirees and beneficiaries in Group D were based on of RP-2006 Blue Collar Annuitant with generational projection using Scale SSA-2017.

- *Disabled Mortality:* Groups A, B, C, and D were based on RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of an actuarial experience study for the five-year period ended June 30, 2014.

The long-term expected rate of return on pension plan investments was determined using best-estimate ranges of expected future real rates of return (expected returns, net of investment expense and inflation) developed for each major asset class using an econometric model that forecasts a variety of economic environments and then calculates asset class returns based on functional relationships between the economic variables and the asset classes. Best estimates of arithmetic real rates of return for each major asset class included in the target asset allocation as of June 30, 2019 are summarized in the following table:

*(Table on next page.)*

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
Global Equity	29.00%	6.90%
US Equity – Large Cap	4.00%	5.94%
US Equity – Small/Mid Cap	3.00%	6.72%
Non-US Equity – Large Cap	5.00%	6.81%
Non-US Equity – Small Cap	2.00%	7.31%
Emerging Markets Debt	4.00%	4.26%
Core Bond	14.00%	1.79%
Non-Core Bonds	6.00%	3.22%
Short Quality Credit	5.00%	1.81%
Private Credit	5.00%	6.00%
US TIPS	3.00%	1.45%
Core Real Estate	5.00%	4.26%
Non-Core Real Estate	3.00%	5.76%
Private Equity	10.00%	10.81%
Infrastructure/Farmland	2.00%	4.89%
Total	<u>100.00%</u>	

Nominal long-term expected rates of return for these asset classes are equal to the sum of the above expected long-term real rates and the expected long-term inflation rate of 2.50%.

### Discount Rate (Plan Reporting)

The discount rate used to measure the total pension liability was 7.50% for the VSRS, STRS, and MERS. The projection of cash flows used to determine the discount rate assumed that contributions will continue to be made in accordance with the current funding policy. Based on these assumptions, the fiduciary net position was projected to be available to make all projected future benefit payments to current System members. The assumed discount rate has been determined in accordance with the method prescribed by GASB Statement No. 67.

The annual money-weighted rate of return on pension plan investments calculated as the internal rate of return on pension plan investments, net of pension plan investment expenses for the year ended June 30, 2019 was 5.90% for VSRS, 6.10% for STRS, and 5.80% for MERS. Amounts for the prior year were 6.73%, 6.99% and 6.75% respectively. A money-weighted rate of return expresses investment performance, net of pension plan investment expense, adjusted for the changing amounts actually invested.

### Sensitivity of the Net Pension Liability to Changes in the Discount Rate (Plan Reporting)

The following presents the net pension liability of the various retirement systems, calculated using the discount rates determined above, as well as what the systems' net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current rate (amounts are in thousands):

*(Table on next page.)*

	<u>VSRS</u>	<u>STRS</u>	<u>MERS</u>
One-percent decrease			
Discount rate	6.50%	6.50%	6.50%
Net pension liability	\$ 1,176,832	\$ 1,938,120	\$ 284,500
Net pension liability, as reported			
Discount rate	7.50%	7.50%	7.50%
Net pension liability	\$ 841,341	\$ 1,560,625	\$ 173,492
One-percent increase			
Discount rate	8.50%	8.50%	8.50%
Net pension liability	\$ 563,638	\$ 1,242,124	\$ 81,597

**B. Defined Contribution Retirement Plans**

## Retirement Plan Descriptions

In accordance with Title 3 of the Vermont Statutes Annotated, Chapter 16A, the State established an optional single employer defined contribution pension plan for exempt State employees effective January 1, 1999. The Vermont State Defined Contribution Plan is reported in the Pension Trust Funds. Exempt employees hired after January 1, 1999, have a one-time opportunity to elect either the defined benefit or defined contribution plan. Employees are required to contribute at the rate of 2.85%. The State is required to contribute to each employee's account at the rate of 7% of the employee's compensation for each payroll period. An employee becomes vested in the plan after completion of 23 months of creditable service as a State employee. During the fiscal year ended June 30, 2019, member contributions totaled \$747,936 with State employer contributions at \$1,837,034. As of June 30, 2019, the Vermont State Defined Contribution Plan's net position totaled \$69,553,012 and there were 571 participants.

The Vermont Municipal Employees' Defined Contribution Plan (24 V.S.A. 5070), a multiple employer defined contribution pension plan, was implemented by the Vermont Municipal Employees' Retirement System's Board of Trustees on July 1, 2000, and is reported as a pension trust fund. The defined contribution plan was offered by municipal employers to one or more groups of their eligible employees. Once offered by the employer, each eligible employee was required to make an election to participate. Employees participating in one of the municipal defined benefit plans who elected to participate in the defined contribution plan had the July 1, 2001, actuarial value of their accrued defined benefit plan transferred to the defined contribution plan. Employers that did not offer the defined contribution plan to their employees as of December 31, 1999, have an opportunity to do so no later than December 31 of any subsequent year with the transfer effective July 1 of the following year.

Participating municipal employees are required to contribute at the rate of 5% of earnable compensation. Employers are required to contribute at the rate of 5.125%. Employees become vested in the plan after 12 months of service. During the fiscal year ended June 30, 2019, member contributions totaled \$500,323 and employer contributions at \$508,187. As of June 30, 2019, the Municipal Employees' Defined Contribution Plan's net position totaled \$24,063,861 and there were 457 participants.

The Single Deposit Investment Account (SDIA), a non-contributory multiple employer defined contribution pension plan reported as a Pension Trust Fund, was established according to the provisions of Public Act 41 of the 1981 Session. The Act authorized a new Group B non-contributory plan within the State Teachers Retirement System (STRS) and a new Group E non-contributory plan within the Vermont State Retirement System (VSRS).

The STRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group B non-contributory plan. Group A members electing to transfer to the Group B plan had their choice between the following three options:

- Have both their accumulated employee contributions and accumulated interest returned to them; or
- Have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- Have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

The VSRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group E non-contributory plan. Group A members electing to transfer to the Group E plan had their choice between the following three options:

- Have both their accumulated employee contributions and accumulated interest returned to them; or
- Have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- Have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

No additional contributions could be made to the SDIA beyond those described above. The SDIA funds are not available to the members until they retire or terminate employment. At June 30, 2019 there were 1,021 members, with net position of \$36,945,478 in the Single Deposit Investment Account.

The defined contribution plans' financial statements are as follows:

**C. Other Postemployment Benefits (OPEB)**

In addition to providing pension benefits, the State offers postemployment medical insurance, dental insurance, and life insurance benefits to retirees of the VSRS and STRS. Component units and authorities of the State will perform their own valuation as the State does not assume the risk or financial burden for their health care costs.

The State reports under GASB Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. GASB Statement No. 75 requires employers and nonemployer contributing entities to report their net OPEB liability on their financial statements.

**Defined Benefit OPEB Plans**

In order to provide the necessary disclosures that are required under the various GASB Statements, the disclosures below are separated into three sections. The first section (Disclosures about the Defined Benefit OPEB Plans) offers disclosures about the plans themselves - descriptions of the plans and who is covered; a discussion of benefits provided by each of the plans.

The second section (Financial Reporting of Net OPEB Liability and OPEB Expense by the Employer as required by GASB Statement No. 75) provides funding information regarding the OPEB plans that are required by GASB Statement No. 75 - changes in net OPEB liability, balances of deferred OPEB outflows of resources and deferred OPEB inflows of resources (including prospective schedules of amortization of the deferred outflows and inflows), and the calculation of OPEB expense for the year.

The third section (Net OPEB Liability and Disclosures required by GASB Statement No. 74) provides the information that is required by GASB Statement No. 74 - the calculation of the net OPEB liability (NOL); the actuarial assumptions and census data that were used in calculating that NOL; the discount rate that was used in the calculations; and the sensitivity of the NOL to changes in the discount rate.

**1. Disclosures about the Defined OPEB Plans**

This first section provides the disclosures about the defined benefit retirement plans required by GASB Statement No. 74, including the plan descriptions, contribution information, benefits and membership at June 30, 2019.

**Plan Descriptions and Contribution Information****Vermont State Postemployment Benefits Trust Fund**

The Vermont State Postemployment Benefits Trust Fund (VSPB) (3 V.S.A. 479a), a single employer defined benefit OPEB plan, was established in fiscal year 2007 as an irrevocable trust fund for the purpose of accumulating and providing reserves to support retiree postemployment benefits other than pension benefits for members of the Vermont State Retirement System (VSRS).

The VSPB is managed by the VSRS Retirement Board (see VSRS in 4.A.1 above). Title 3 V.S.A. Chapters 16 and 21 provides the authority to establish and amend the benefit provisions of the plan, and to establish and amend contribution requirements. Contributions are actuarially determined; however, the State has elected to pay State contributions to fund current year retiree health care expenses on a pay-as-you-go basis. State contributions for the fiscal year ended June 30, 2019, were \$63,749,803, which is 11.62% of covered payroll. Employees are not required to contribute to the OPEB plan. In fiscal year 2019, pay-as-you-go contributions to the VSPB were \$38,114,156. An additional contribution of \$25,635,647 was also made to the VSPB during the year.

Benefits are provided through the State's self-insured Medical Insurance Fund (an internal service fund). VSPB plan members have access to the same benefit plans as active employees.

State employees hired prior to July 1, 2008, and retiring directly from active State service for any reason (disability, early, or normal) may elect to carry whatever medical coverage is in effect at that time into retirement

for themselves and their dependents. During their lifetime the retiree will pay 20% of the cost of the premium, except in the case where retirees select joint or survivorship options. If the retiree chooses the joint or survivor pension options and predeceases his or her spouse, the medical benefits along with the pension benefit will continue for the spouse. However, generally, the surviving spouse must pay 100% of the cost of the premium.

In addition, once a retiree or surviving spouse becomes eligible for Medicare coverage (at age 65); it is mandatory that they enroll in both Medicare Part A and Part B as soon as possible. Medicare thus becomes the primary insurer with the State plan becoming the secondary insurer. The insured's State insurance premium costs will then decrease in recognition of this change.

Vermont State Retirement System's defined benefit plan Group C members who terminate with 20 or more years of service, but are not yet 50 years old, may elect to receive medical coverage at the time they begin receiving their retirement benefits. For all other Vermont State Retirement System's active employees, if the employee does not retire directly from State service (inactive members), they are not eligible to participate in the State's medical insurance plan. If the insurance is terminated at any time after retirement benefits have been received, coverage will not be able to be obtained again at a later date.

Based on legislation enacted during fiscal year 2008, Vermont State Retirement System's defined benefit plan Group F employees hired after June 30, 2008 will pay, upon retirement, a tiered retiree health care premium amount based on completed years of service. The tiered rate paid will range from 100% of the premium cost for retirees with less than 10 years of service to 20% of the premium cost for retirees with 20 or more years of service. Additionally, as part of the enacted legislation, Group F employees hired after June 30, 2008 will also have the ability to elect health care insurance at the 20% premium cost level when they begin to receive retirement benefits in a manner comparable to regular retirements even if the employee terminated prior to their early retirement date, provided the member had 20 years of service upon termination of employment.

#### Retired Teachers' Health and Medical Benefit Fund

The Retired Teachers' Health and Medical Benefit Fund (RTHMB) (16 V.S.A. 1944b), a cost-sharing multiple employer defined benefit OPEB plan with a special funding situation, was created by the legislature on July 1, 2014, to explicitly appropriate State contributions to the fund for health care expenses separate from the State's contribution to the State Teachers' Retirement System (STRS) pension trust fund. Prior to fiscal year 2015, the health care expenses for the STRS's retirees were paid through a sub-fund of the defined benefit pension trust fund and no State contribution was explicitly budgeted or funded.

The RTHMB is managed by the STRS Retirement Board (see STRS in 4.A.1 above). Title 16 V.S.A. Chapter 55 provides the authority to establish and amend the benefit provisions of the plan, and to establish and amend contribution requirements. Contributions are actuarially determined; however, the State has elected to appropriate State contributions to fund current year retiree health care expenses on a pay-as-you-go basis. State contributions for the fiscal year ended June 30, 2019, were \$56,594,299, which is 9.23% of covered payroll. Employees are not required to contribute to the OPEB plan.

Retirees of the STRS participate in multi-employer health coverage plans operated by the Vermont Education Health Initiative (VEHI) which is managed jointly by the Vermont School Boards Insurance Trust and the Vermont National Education Association. VEHI partners with Blue Cross Blue Shield to provide health insurance to retired and active teachers. VEHI issues its own audited financial statements. These and plan information are available the VEHI Offices, 2 Prospect Street, Suite 5, Montpelier, VT 05602.

STRS's members have access to medical benefit plans in retirement as offered by VEHI. The plans are identical to those offered to active teachers in public school systems in Vermont. Members may pick up medical coverage under one of the plans offered for themselves and all eligible dependents at the time of retirement, or anytime thereafter during one of the semi-annual open enrollment periods. If the member has a minimum of 10 years of creditable service at the time of retirement, the system picks up 80% of the retiree's premium only, based on the cost of the "standard plan" as defined by statute. The retiree must pick up the full cost of the premium for all covered dependents. Once a retiree becomes eligible for Medicare coverage (at age 65), it is mandatory that

they enroll in both Medicare Part A and Part B. Medicare becomes the primary insurer and the Teacher's medical plans become the secondary insurer. Two of the plans offered become "carve-out" plans to coordinate with Medicare, and one of the plans is replaced with a true Medicare supplemental plan. The premiums for all plans are reduced in accordance with the decrease in liability once Medicare becomes the primary insurer.

During fiscal year 2019 there were 184 participating employers in the STRS - RTHMB plan.

Membership in the plans consisted of the following at June 30, 2019:

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
Retired members or beneficiaries currently receiving benefits	5,113	6,734
Retired members or beneficiaries not receiving benefits	-	2,668
Vested terminated members entitled to but not yet receiving benefits	-	1,957
Active members	<u>8,792</u>	<u>9,862</u>
Total	<u>13,905</u>	<u>21,221</u>

## **2. Employer Reporting of OPEB Liabilities, OPEB Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources Related to OPEB Plans as required by GASB Statement No. 75**

This section includes the information that is required to be reported by employers per GASB Statement No. 75. It reports information regarding the calculation of the State's net OPEB liability, including changes during the measurement period in both total OPEB liability and plan net position; balances in the various components of deferred OPEB outflows of resources and deferred OPEB inflows of resources and the amounts to be recognized in OPEB expense in future periods; and the calculation of OPEB expense. In addition to presenting the NOL, this section also includes information on the actuarial assumptions and census data used in the valuation, the discount rate that was used to calculate the NOL, and disclosures as to the sensitivity of the NOL to changes in the discount rate.

The State is responsible for 98.2292% of the VSPB net OPEB liability. The Vermont Veterans' Home (a discrete component unit) is responsible for 1.7708% of the VSPB net OPEB liability. The State is responsible for 100% of the RTHMB net OPEB liability as a non-employer contributing entity. The information is presented in this section is for those two plans.

### **Reporting Date, Measurement Date, and Valuation Date (Employer Reporting)**

Net OPEB liabilities, deferred OPEB outflows of resources, deferred OPEB inflows of resources, and OPEB expense are all presented as of the State's reporting date (June 30, 2019) and for the State's reporting period (the year ended June 30, 2019). These amounts are measured as of the measurement date and for the measurement period (the period between the prior and current measurement dates). GASB Statement No. 75 requires that the current measurement date be no earlier than the end of the employer's prior fiscal year. For the reporting date of June 30, 2019, the State has chosen to use the end of the prior fiscal year (June 30, 2018) as the measurement date, and the year ended June 30, 2018 as the measurement period.

The total OPEB liability is determined by an actuarial valuation performed as of the measurement date, or by the use of update procedures to roll forward to the measurement date amounts from an actuarial valuation as of a date no more than 30 months and 1 day earlier than the employer's most recent fiscal year-end. The State has elected to apply update procedures to roll forward amounts from an actuarial valuation performed as of June 30, 2017, to the measurement date of June 30, 2018. There were no material changes in assumptions or benefit terms that occurred between the actuarial valuation date and the measurement date.

**Net OPEB Liabilities (Employer Reporting)**

The net OPEB liability (NOL) is measured as the portion of the actuarial present value of projected benefit payments that is attributable to past periods of employee service, net of the OPEB plan's fiduciary net position. The changes in the components for the measurement period are as follows (amounts are in thousands):

	<u>VRSR - VSPB</u>			<u>STRS - RTHMB</u>		
	<u>Increase (Decrease)</u>			<u>Increase (Decrease)</u>		
	<u>Total OPEB Liability (a)</u>	<u>Plan Net Position (b)</u>	<u>Net OPEB Liability (a-b)</u>	<u>Total OPEB Liability (a)</u>	<u>Plan Net Position (b)</u>	<u>Net OPEB Liability (a-b)</u>
<b>Balances - June 30, 2017</b>	\$ 1,484,522	\$ 22,502	\$ 1,462,020	\$ 905,632	\$ (26,658)	\$ 932,290

Additional information regarding the changes in the net OPEB liability for the year ended June 30, 2019 can be found in the Required Supplementary information immediately following these notes to the financial statements.

**Deferred OPEB Outflows of Resources and Deferred OPEB Inflows of Resources (Employer Reporting)**

Most changes in the net OPEB liability are included in OPEB expense during the year of change. Changes resulting from current-period service cost, interest on the total OPEB liability, and changes in benefit terms are required to be included in OPEB expense immediately. Similarly, projected earnings on the OPEB plan's investments are also required to be included in the determination of OPEB expense immediately.

The effects of certain other changes in the net OPEB liability are required to be included in OPEB expense over the current and future periods, depending on the nature of the change. The effect on the net OPEB liability of differences between the projected earnings on OPEB plan investments and actual experience with regard to those earnings is required to be included in OPEB expense in a systematic and rational manner over a closed period of five years, beginning with the current period. Changes in the net OPEB liability not included in OPEB expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to OPEBs. This treatment arises from the concept that these changes result from the use of estimates, where probabilities of events range from 0 to 100 percent, while actual events either occur or do not occur. Therefore, differences between some estimates and actual experience will occur with every measurement that incorporates future events.

The effects on the total OPEB liability of (1) changes of economic and demographic assumptions or of other inputs and (2) differences between expected and actual experience are required to be included in OPEB expense in a systematic and rational manner over a closed period equal to the average of the expected remaining service lives of all employees that are provided with benefits through the OPEB plan (active employees and inactive employees), beginning with the current period. Changes in the net OPEB liability not included in OPEB expense are required to be reported as deferred outflows of resources or deferred inflows of resources related to OPEBs. This treatment arises from the concept that OPEBs arise from an exchange between employer and employee of salaries and benefits for employee service each period and that these transactions and related OPEB measurements are viewed in the context of ongoing, career-long employment relationships.

Employer contributions subsequent to the measurement date of the net OPEB liability are required to be reported as deferred outflows of resources, and will be recognized as a reduction of the net OPEB liability at June 30, 2020.

As of June 30, 2019, the State reported the following deferred OPEB outflows of resources and deferred OPEB inflows of resources (amounts are in thousands):

Source	VSRS - VSPB		VSRS - VSPB	
	Primary Government		Discrete Component Units	
	Deferred Outflows of Resources	Deferred Inflows of Resources	Deferred Outflows of Resources	Deferred Inflows of Resources
Differences between expected and actual experience	\$ 6,094	\$ -	\$ 110	\$ -
Changes of assumptions	-	396,608	-	7,150
Net differences between projected and actual earnings on plan investments	723	-	13	-
Change in proportion and the effect of certain employer contributions on the employer's net OPEB liability	339	1,388	1,049	-
Employer contributions made subsequent to the measurement date	63,108	-	642	-
<b>Total</b>	<b>\$ 70,264</b>	<b>\$ 397,996</b>	<b>\$ 1,814</b>	<b>\$ 7,150</b>

<b>Total</b>	<b>\$ (26,433)</b>	<b>\$ (390,840)</b>	<b>\$ (417,273)</b>	<b>\$ (5,978)</b>

**OPEB Expense (Employer Reporting)**

As discussed above, most changes in the net OPEB liability are included in OPEB expense in the year of change, including changes resulting from current-period service cost, interest on the total OPEB liability, changes in benefit terms, and projected earnings on the OPEB plan's investments. Other changes in net OPEB liability are recorded as deferred OPEB outflows of resources and deferred OPEB inflows of resources, and included in OPEB expense on a systematic and rational manner over current and future periods. OPEB expense for the year ended June 30, 2019, is as follows (amounts are in thousands):

	Primary Government		Primary Government	Component Units
	STRS - RTHMB	VSRS - VSPB	TOTAL	VSRS - VSPB
Service cost	\$ 26,273	\$ 51,399	\$ 77,672	\$ 927
Interest on total OPEB liability	32,838	53,438	86,276	963
Changes in benefit terms	-	(19,875)	(19,875)	(358)
Plan administrative costs	279	1	280	-
Projected earnings on plan investments	1,992	(1,598)	394	(29)
Recognition (amortization) of deferred OPEB outflows of resources:

**Actuarial Methods and Assumptions (Employer Reporting)****Actuarial Assumptions (Employer Reporting)**

Total OPEB liability at the June 30, 2018 measurement date was determined using the June 30, 2017 actuarial valuation and applying roll forward procedures. The actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified were as follows:

*(Notes continue on next page.)*

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
Inflation	2.75%	2.75%
Investment rate of return	7.50%, net of OPEB plan investment expense, including inflation	7.50%, net of OPEB plan investment expense, including inflation
Discount rate	3.87%	3.87%
Salary increase rate	Varies by age from age 25 - 6.21%, to age 60 - 3.50%.	Varies by age from age 25 - 7.78%, to age 60 - 3.75%.
Health care cost trend rate		
Non-Medicare	7.15% graded to 4.50% over 12 years	7.15% graded to 4.50% over 12 years
Medicare	7.30% graded to 4.50% over 13 years	7.15% graded to 4.50% over 12 years
Retiree contributions	Equal to health trend	Equal to health trend
<u>Plan membership - 6/30/2017</u>		
Retired members or beneficiaries currently receiving benefits	4,878	6,543
Retired members or beneficiaries not receiving benefits	-	2,351
Vested terminated members entitled to but not yet receiving benefits	-	1,764
Active members	<u>8,941</u>	<u>10,028</u>
Total	<u>13,819</u>	<u>20,686</u>

The actuarial assumptions used in the June 30, 2017 valuation were based on the results of the following actuarial experience studies:

Vermont State Retirement System

Experience Study: July 1, 2010 – June 30, 2014, dated October 29, 2015 completed by Buck Consultants

Vermont State Teachers' Retirement System

Experience Study: July 1, 2010 – June 30, 2014, dated March 2, 2016 completed by Buck Consultants

Mortality rates are based on the following:

Vermont State Retirement System

- *Pre-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Employee, 70% Healthy Employee with generational projection using Scale SSA-2017. Group C were based on RP-2006 Blue Collar Employee with generational projection using Scale SSA-2017. Group D were based on RP-2006 Healthy Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Annuitant, 70% Healthy Annuitant with generational projection using Scale SSA-2017. Group C were based on RP-2006 Blue Collar Annuitant with generational projection using Scale SSA-2017. Group D were based on RP-2006 Healthy Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* A, C, D, and F were based on RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

Vermont State Teachers' Retirement System

- *Pre-retirement Mortality:* 98% of RP-2006 White Collar Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* 98% of RP-2006 White Collar Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* RP-2006 Disabled Mortality Table with generational projections using Scale SSA-2017.

The long-term expected rate of return on OPEB plan investments was determined using a building block method in which best estimate ranges of expected future rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding the expected inflation. The following table contains the target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate or return assumption:

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
Large cap equity	20.00%	7.50%
International equity	15.00%	7.75%
Emerging international equity	5.00%	9.25%
Core bonds	60.00%	3.75%
Total	<u>100.00%</u>	

**Discount Rate (Employer Reporting)**

The projection of cash flow used to determine the discount rate assumed that the plans' contributions would be made at rates equal to the projected benefit payments for the upcoming year. Based on these assumptions, the OPEB plans' fiduciary net position was projected to be exhausted within the first year. Therefore, the long-term bond rate expected rate of return of 3.87% on plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability. The 3.87% is based on the 20-year Bond Buyer GO index at June 30, 2018. The discount rate used in the prior year was 3.58%

**Sensitivity of the Net OPEB Liability to Changes in the Discount Rate (Employer Reporting)**

The following presents the NOL of the plans, as well as what the plans' NOL would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate (amounts in thousands):

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
One-percent decrease		
Discount rate	2.87%	2.87%
Net OPEB liability	\$ 1,416,159	\$ 1,106,574
Net OPEB liability, as reported		
Discount rate	3.87%	3.87%
Net OPEB liability	\$ 1,218,504	\$ 954,286
One-percent increase		
Discount rate	4.87%	4.87%
Net OPEB liability	\$ 1,058,595	\$ 830,493

### Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate (Employer Reporting)

The following presents the NOL of the plans, as well as what the plans' NOL would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rates (amounts in thousands):

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
One-percent decrease		
Healthcare cost trend rate		
Non-medicare	6.15% decreasing to 3.5%	6.15% decreasing to 3.5%
Medicare	6.30% decreasing to 3.5%	6.15% decreasing to 3.5%
Net OPEB liability	\$ 1,044,626	\$ 811,075
Net OPEB liability, as reported		
Healthcare cost trend rate		
Non-medicare	7.15% decreasing to 4.5%	7.15% decreasing to 4.5%
Medicare	7.30% decreasing to 4.5%	7.15% decreasing to 4.5%
Net OPEB liability	\$ 1,218,504	\$ 954,286
One-percent increase		
Healthcare cost trend rate		
Non-medicare	8.15% decreasing to 5.5%	8.15% decreasing to 5.5%
Medicare	8.30% decreasing to 5.5%	8.15% decreasing to 5.5%
Net OPEB liability	\$ 1,440,292	\$ 1,136,993

### Payable to the OPEB Plans (Employer Reporting)

At June 30, 2019, the State reported a payable of \$25,701,796 for the outstanding amount of contributions to the VSPB plan required for the year ended June 30, 2019.

### 3. Net OPEB Liability and Disclosures required by GASB Statement No. 74 (Plan Reporting)

This section includes information that is required to be presented by GASB Statement No. 74. The plans elected to base the valuations on plan data as of June 30, 2017 and used update procedures to roll forward the total OPEB liability to the OPEB plans' fiscal year end. In addition to presenting the NOL, this section also includes information on the actuarial assumptions and census data used in the valuation, the discount rate that was used to calculate the NOL, and disclosures as to the sensitivity of the NOL to changes in the discount rate.

GASB Statement No. 74 requires that OPEB plans disclose the NOL and other related disclosures.

### Net OPEB Liabilities (Plan Reporting)

The components of the net OPEB liabilities at June 30, 2019, were as follows (amounts in thousands):

*(Table on next page.)*

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
Total OPEB liability.....	\$ 1,279,299	\$ 1,041,065
Plan fiduciary net position (deficit).....	<u>51,733</u>	<u>312</u>
Net OPEB liability.....	<u>\$ 1,227,566</u>	<u>\$ 1,040,753</u>
 Plan fiduciary net position as a percentage of total OPEB liability	 4.04%	 0.03%

Additional information regarding changes in net OPEB liability for the year ended June 30, 2019 can be found in the Required Supplementary Information section of these financial statements.

### Actuarial Assumptions (Plan Reporting)

The total OPEB liability at June 30, 2019 was determined using the June 30, 2018 actuarial valuation and applying roll forward procedures. The actuarial assumptions, applied to all periods included in the measurement, unless otherwise specified were as follows:

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
Inflation	2.75%	2.75%
Investment rate of return	7.50%, net of OPEB plan investment expense, including inflation	7.50%, net of OPEB plan investment expense, including inflation
Discount rate	3.50%	3.50%
Salary increase rate	Varies by age from age 20 - 7.04%, to age 60 - 3.50%.	Varies by age from age 20 - 9.09%, to age 60 - 3.75%.
Health care cost trend rate		
Non-Medicare	7.15% graded to 4.50% over 12 years	7.15% graded to 4.50% over 12 years
Medicare	7.30% graded to 4.50% over 13 years	7.15% graded to 4.50% over 12 years
Retiree contributions	Equal to health trend	Equal to health trend
<u>Plan membership - 6/30/2018</u>		
Retired members or beneficiaries currently receiving benefits	5,040	6,713
Retired members or beneficiaries not receiving benefits	-	2,416
Vested terminated members entitled to but not yet receiving benefits	-	1,949
Active members	<u>8,798</u>	<u>9,892</u>
Total	<u>13,838</u>	<u>20,970</u>

The actuarial assumptions used in the June 30, 2018 valuation were based on the results of the following actuarial experience studies:

#### Vermont State Retirement System

Experience Study: July 1, 2010 – June 30, 2014, dated October 29, 2015 was completed by Buck Consultants

Vermont State Teachers' Retirement System

Experience Study: July 1, 2010 – June 30, 2014, dated March 2, 2016 was completed by Buck Consultants

Mortality rates are based on the following:

Vermont State Retirement System

- *Pre-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Employee, 70% Healthy Employee with generational projection using Scale SSA-2017. Group C were based on RP-2006 Blue Collar Employee with generational projection using Scale SSA-2017. Group D were based on RP-2006 Healthy Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* Groups A and F were based on 101% of RP-2006 blended 30% Blue Collar Annuitant, 70% Healthy Annuitant with generational projection using Scale SSA-2017. Group C were based on RP-2006 Blue Collar Annuitant with generational projection using Scale SSA-2017. Group D were based on RP-2006 Healthy Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* A, C, D, and F were based on RP-2006 Disabled Mortality Table with generational projection using Scale SSA-2017.

Vermont State Teachers' Retirement System

- *Pre-retirement Mortality:* 98% of RP-2006 White Collar Employee with generational projection using Scale SSA-2017.
- *Post-retirement Mortality:* 98% of RP-2006 White Collar Annuitant with generational projection using Scale SSA-2017.
- *Disabled Mortality:* RP-2006 Disabled Mortality Table with generational projections using Scale SSA-2017.

The long-term expected rate of return on OPEB plan investments was determined using a building block method in which best estimate ranges of expected future rates of return (expected returns, net of investment expense and inflation) are developed for each major asset class. These returns are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding the expected inflation.

The following table contains the target allocation and projected arithmetic real rates of return for each major asset class, after deducting inflation, but before investment expenses, used in the derivation of the long-term expected investment rate or return assumption:

<u>Asset Class</u>	<u>Target Asset Allocation</u>	<u>Long-term Expected Real Rate of Return</u>
Large cap equity	20.00%	7.50%
International equity	15.00%	7.75%
Emerging international equity	5.00%	9.25%
Core bonds	60.00%	4.37%
Total	<u>100.00%</u>	

**Discount Rate (Plan Reporting)**

The projection of cash flow used to determine the discount rate assumed that the plans' contributions would be made at rates equal to the projected benefit payments for the upcoming year. Based on these assumptions, the OPEB plans' fiduciary net position was projected to be exhausted within the first year. Therefore, the long-term

bond rate expected rate of return of 3.50% on plan investments was applied to all periods of projected benefit payments to determine the total OPEB liability. The 3.50% is based on the 20-year Bond Buyer GO index at June 30, 2019. The discount rate used in the prior year was 3.87%. For the year ended June 30, 2019, the VSPB annual money-weighted rate return of investments, net of investment expense, was 6.90%. The money-weighted rate of return expresses investment performance, net of investment expense, adjusted for the changing amounts actually invested.

#### **Sensitivity of the Net OPEB Liability to Changes in the Discount Rate (Plan Reporting)**

The following presents the NOL of the plans, as well as what the plans' NOL would be if it were calculated using a discount rate that is 1-percentage-point lower or 1-percentage-point higher than the current rate (amounts in thousands):

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>
One-percent decrease		
Discount rate	2.50%	2.50%
Net OPEB liability	\$ 1,433,890	\$ 1,217,020
Net OPEB liability, as reported		
Discount rate	3.50%	3.50%
Net OPEB liability	\$ 1,227,566	\$ 1,040,753
One-percent increase		
Discount rate	4.50%	4.50%
Net OPEB liability	\$ 1,061,071	\$ 897,088

#### **Sensitivity of the Net OPEB Liability to Changes in the Healthcare Cost Trend Rate (Plan Reporting)**

The following presents the NOL of the plans, as well as what the plans' NOL would be if it were calculated using healthcare cost trend rates that are 1-percentage-point lower or 1-percentage-point higher than the current healthcare cost trend rates (amounts in thousands):

*(Table on next page.)*

	<u>VSRS - VSPB</u>	<u>STRS - RTHMB</u>

One-percent increase		
Healthcare cost trend rate		
Non-medicare	8.15% decreasing to 5.5%	8.15% decreasing to 5.5%
Medicare	8.30% decreasing to 5.5%	8.15% decreasing to 5.5%
Net OPEB liability	\$ 1,459,488	\$ 1,251,944

### Dental Insurance

Dental plans are available to retired State employees, retired teachers, retired municipal employees and their eligible dependents. The dental plan must be elected at the time of retirement. The retiree pays the full premium for all covered lives. There is no cost to the State.

### Life Insurance

In the case of life insurance, if a State employee retires with 20 or more years of service and was participating in the life insurance program, a \$10,000 benefit will continue into retirement. If a State employee retires due to disability prior to age 60, and if proper documentation is approved by the life insurance company, full life insurance coverage will continue at the State's expense up to age 65. When the retiree reaches the age of 65 and if they have a total of 20 years or more of active and retired (while receiving disability) service, life insurance coverage will automatically change to the \$10,000 level with 100% of the premium being paid by the State. In addition, a retiree may convert their insurance coverage in effect at their time of retirement to an individual policy within 30 days of their retirement date without a physical exam.

### Vermont Municipal Employees Health Benefit Fund

The Vermont Municipal Employees Retirement System (MERS), a cost-sharing, multiple-employer public employees' retirement system, is administered by the State but has no associated State health care benefit or liability. While the Vermont Municipal Employees Health Benefit Fund is classified as a postemployment benefit fund, there is no accrued liability in excess of the assets of the fund. There is no annual required contribution and unfunded actuarial accrued liability.

The MERS Retirement Health Savings Plan (RHS) established on July 1, 2007, is a tax-advantaged savings plan that assists retirees in paying for healthcare costs after retirement. Contributions to this fund are deposited into the RHS Plan member accounts on a tax-free basis, accumulate interest on a tax-free basis, and are drawn out during retirement on a tax-free basis to reimburse health care expenses, including out-of-pocket expenses, deductibles and premiums.

The MERS Board deposited an initial amount of \$5.1 million into the RHS accounts on July 2, 2007. Additional

employer contributions totaling approximately \$6 million were collected during the course of the fiscal years 2008 and 2009 that were deposited in member accounts during fiscal year 2009. No such contributions have been made since fiscal year 2009. Future contributions and subsequent transfers to member accounts will be made as directed by the MERS Board of Trustees. There is no guarantee that the RHS member accounts will receive any additional funding. While classified as a postemployment benefit fund, there is no accrued liability in excess of the asset of the fund. There is no annual required contribution and unfunded actuarial accrued liability.

All MERS defined benefit pension plan members and retirees who have a minimum of 5 years of contributory service are eligible to participate in the RHS plan. The amount each member will receive is determined by the total number of contributory years of service in the system. Each year of service is equal to one share. The share value is determined based on the total eligible population, the total number of years of contributory service represented, and the amount of the distribution. The share value will change when future deposits are made. All eligible members receive the first five shares in their medical reimbursement account, which may be used for any medical expense, including premium reimbursement. The additional shares, representing service credit above five years, are deposited into the premium reimbursement account, which may only be used for medical, dental, vision or long-term health care premium reimbursements.

The money may be accessed by members only after separation from service and the achievement of retiree status from the MERS plan. For members who were already receiving retirement benefits from the MERS, the funds in their RHS account could be accessed after July 2, 2007 to reimbursement expenses incurred after July 1, 2007. Members who are still actively employed, and members in a vested-terminated status, may access the funds once they retire and begin receiving monthly pension payments. Funds in the RHS accounts are invested in the appropriate age-related Milestone Fund through a third-party record keeper.

At June 30, 2019, there were 4,105 active and retired members participating in the MERS RHS plan. The net position of the MERS RHS plan at June 30, 2019 was \$13,757,917.

### 5. Other Long-term Liabilities

Governmental activities long-term liabilities are generally liquidated by payments from the governmental and internal service funds' programs, including all major governmental fund types except for the Education Fund. Bonds payable are liquidated by transfers of resources from the General, Transportation, Special and Federal Funds. During the year ended June 30, 2019, the following changes occurred in the governmental activities long-term liabilities:

	Total Liability July 1, 2018	Additions	Reductions	Total Liability June 30, 2019	Amounts due within one year
<b>Governmental activities</b>					
Bonds payable					
Bonds	\$ 662,560,000	\$ -	\$ 53,395,000	\$ 609,165,000	\$ 51,720,000
Bond premium	36,773,852	-	7,302,969	29,470,883	6,222,464
Bond discount	(123,005)	-	(18,169)	(104,836)	(20,917)
	<u>699,210,847</u>	<u>-</u>	<u>60,679,800</u>	<u>638,531,047</u>	<u>57,921,547</u>
Capital leases payable	9,751,210	-	333,185	9,418,025	260,694
Compensated absences	35,454,244	43,865,501	43,325,170	35,994,575	34,788,005
Claims and judgments	51,079,686	198,599,342	188,706,598	60,972,430	23,972,916
Contingent liabilities	7,000,000	-	-	7,000,000	-
Net pension liabilities	2,146,135,825	647,089,210	534,703,625	2,258,521,410	-
Net other postemployment liabilities	2,358,893,830	213,037,760	429,541,611	2,142,389,979	29,294,775
Other liabilities	-	-	-	-	-
Pollution remediation obligations	9,422,276	2,719,000	1,992,742	10,148,534	4,361,000
	<u>9,422,276</u>	<u>2,719,000</u>	<u>1,992,742</u>	<u>10,148,534</u>	<u>4,361,000</u>
Total governmental activities long-term liabilities	<u>\$ 5,316,947,918</u>	<u>\$ 1,105,310,813</u>	<u>\$ 1,259,282,731</u>	<u>\$ 5,162,976,000</u>	<u>\$ 150,598,937</u>

The Pollution Remediation Obligation (PRO) liabilities were measured using the actual contract cost when no changes in cost are expected, or a method that is materially close to the expected cash flow technique. Liability estimates are subject to change due to cost increases or reductions, or changes in technology or applicable laws or regulations governing the remediation efforts. Overall, the state has recorded a pollution remediation liability of \$10,148,534 of which \$4,361,000 is due within one year.

Pollution remediation liability activity in fiscal year 2019 are as follows:

#### Superfund Sites

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the United States Environmental Protection Agency (USEPA) expends resources from the superfund trust for cleanup. Currently, there are eight sites where the state has referred the matter to federal Superfund jurisdiction, and has executed a contract, or legal obligation, to share in the cost for cleanup and long-term operations and maintenance. These obligations are reflected in a State Superfund Contract:

- There are two superfund sites where no liability has been reported because obligations are not yet reasonably estimable. The sites include an abandoned copper mine requiring cleanup of acid mine drainage and hazardous waste groundwater cleanup from a former manufacturing facility of capacitors, transformers, and motors used in household appliances.
- The remaining six Superfund sites in Vermont are in various stages of cleanup, from initial assessment to cleanup activities and required monitoring of the remediation effort. There are no viable Potentially Responsible Parties (PRP) or insurance available to reduce the remediation costs for the superfund sites

listed below. The PRO as of June 30, 2019 is \$4,758,500, and the estimated amount to be paid for remediation activities in 2020 is \$2,045,000.

#### Department of Environmental Conservation

The Vermont Agency of Natural Resources through the Department of Environmental Conservation (DEC) administers the Environmental Contingency Fund, authorized under 10 V.S.A. §1283, to pay for the investigation and cleanup of contaminated sites where there is no PRP or the PRP is recalcitrant, and the state considers it necessary to investigate and/or mitigate the effects of hazardous material releases to the environment. In the latter case, the state has the right to recover costs from the PRP, but in the former case, there is often no viable PRP to pursue and, if the pollution is significant, the state is left with little or no discretion to avoid fixing the problem.

The DEC has undertaken a proactive role in investigating the most likely sources of per- and polyfluoroalkyl substances (PFAS) contamination found in public drinking water and in directing public water systems to implement treatment or other remedy to reduce the levels of regulated PFAS contaminants in the water. This effort has been expanded with the passage of Act S.49 during the 2019 legislative session. The State is pursuing recoveries and/or cost sharing by participants named in the lawsuits as a PRP in the public water sites impacted by PFAS. The estimated amount due in 2020 which is primarily for the cost of sampling and mitigation design is \$786,000. The PRO as of June 30, 2019 is \$1,090,000.

The State is also responsible for the monitoring and treatment performance evaluations for the cleanup of ground water contamination resulting from a chemical spill at a former dry cleaner facility. The total PRO reported at June 30, 2019 of \$677,000 for source removal of contamination, if dictated by annual monitoring. The amount due in 2019 for operation and maintenance is \$10,000.

Lastly, the largest potential obligations for cleanup under the DEC's supervisions includes a former mining facility with large eroding mining tailings and waste rock piles that are discharging asbestos into downstream waters. Currently, one of the PRP performs the annual operation and maintenance of the erosion control features. The erosion control measures at the site will ultimately need to be replaced. The PRO for the mining site is \$2,000,000 for the estimated cost of reconstruction measures not yet scheduled but likely to occur within the next five years.

#### Other State Agencies and Departments

Agencies and departments are working with regulators, including the USEPA, to ensure remediation of contaminate sites which are often detected during construction projects including renovation of historic buildings, excavation of land, and infrastructure improvements.

The liabilities are being reported because the agency or department was named as a PRP, or legally obligates itself to commence pollution remediation required for permitting or other regulatory restrictions. There are no viable PRP or insurance available to reduce the remediation costs for these sites.

In fiscal year 2019, The Vermont Agency of Transportation detected contaminated soil at the construction site of the replacement drawbridge between Grand Isle and North Hero. The Agency suspected the presence of lead around the bridge from previous paint systems, and testing yielded positive results for some lead as well as polychlorinated biphenyls (PCBs). Subsequent testing revealed a larger more complex contamination profile including hexavalent chromium and lead in soil and sediment underlying the bridge site and into Lake Champlain. The investigation of the degree and extent of contamination and remedy to support the ongoing constructions is estimated to be \$1,000,000 as of June 30, 2019 and fully expended in 2020.

The other four sites represent a wide array of remediation activities ranging from onetime events to longer-term sustained monitoring activity for pollution cleanup. The PRO as of June 30, 2019 is \$623,034 with an estimated \$520,000 to be expended in the current fiscal year.

During the year ended June 30, 2019, the changes occurred in the business-type activities and fiduciary funds long-term liabilities are as follows:

	<u>Total Liability</u> <u>July 1, 2018 Restated</u>	<u>Additions</u>	<u>Reductions</u>	<u>Total Liability</u> <u>June 30, 2019</u>	<u>Amounts due</u> <u>within one</u> <u>year</u>
<b>Business-type activities</b>					
Compensated absences	\$ 273,509	\$ 279,777	\$ 260,938	\$ 292,348	\$ 252,347

Net other postemployment liabilities	10,531,410	682,431	2,390,499	8,823,342	-
Other liabilities	911,658	1,805,684	-	2,717,342	-
	<u>22,598,439</u>	<u>96,051,858</u>	<u>94,162,296</u>	<u>24,488,001</u>	<u>6,747,715</u>
Total business-type activities long term liabilities	\$	\$	\$	\$	\$
<b>Fiduciary</b>					
Compensated absences	\$ 7,801	\$ 15,758	\$ 13,035	\$ 10,524	\$ 10,524

The beginning balance for Other liabilities of the Business-type activities was restated for the accounting change to report the Electric Efficiency Utility Fund as an Enterprise Fund. The compensated absences for the Business-type activities are included as part of accrued salaries and benefits on the propriety funds' Statement of Net Position. The compensated absences for the fiduciary funds are included as part of accrued liabilities on the fiduciary funds Statement of Net Position.

## H. Fund Balance/Net Position

### Governmental Funds

The composition of the summarized fund balances reported on the governmental funds' Balance Sheet for the fiscal year ended June 30, 2019, are as follows:

**Note V. OTHER INFORMATION****A. Risk Management****1. Workers' Compensation and Risk Management**

The Agency of Administration's Financial Services Division oversees the Workers' Compensation and Risk Management programs, which administers all insurance programs for State government with the exception of the health and life insurance plans listed below. State policy is to minimize the purchase of commercial insurance by either self-funding or otherwise retaining the risk when it makes sense to do so. The programs set aside assets and pay claims utilizing the following three Internal Service Funds:

State Employees' Workers' Compensation Fund  
State Liability Self Insurance Fund  
Risk Management – All Other Fund (used for the purchase of commercial insurance policies)

The State Employees' Workers' Compensation Fund covers all State employees who are injured on the job, pursuant to State statute. Certain quasi-governmental entities may also request coverage through this program. The State has unlimited exposure to liability and has not purchased any excess workers' compensation insurance to limit this exposure. All claims are processed by a third-party administrator. Two types of claims audits are conducted annually. One is a claims management audit by an independent outside claims consulting company to ensure that the claims operations and claims adjusting follow leading industry practice. The second is a complete actuarial review of Workers' Compensation claims and fund to review and recommend reasonable reserve and funding levels. Reserve fund allocated charges to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The State Liability Insurance Fund covers general and employment practices liability, discrimination, bodily injury and automobile liability risk. The coverage is comparable to standard private commercial policies. This liability coverage is offered to state agencies and certain quasi-governmental agencies. The State's exposure to tort risk in Vermont is subject to the doctrine of sovereign immunity and is governed by the Vermont Tort Claims Act, 12 V.S.A. §5601. The current sovereign immunity limits are \$500,000 per person and \$2,000,000 per occurrence. Exposure outside of Vermont and to federal suit and other non-tort suit is potentially unlimited. The State holds a self-insured retention (SIR) for the first \$500,000 of exposure and purchases excess commercial liability insurance up to \$1,500,000 (\$2,000,000 total) per occurrence in Vermont and \$10,000,000 per occurrence in excess of the \$500,000 SIR for claims that are not subject to the Vermont Tort Claims Act. Claims are processed by the third-party administrator and/or the Vermont Attorney General's Office. Two types of claims audits are conducted annually. One is a claims management audit by an independent outside claims consulting company to ensure that the claims operations and claims adjusting follow leading industry practice. The second is a complete actuarial review of liability claims and fund to review and recommend reasonable reserve and funding levels. Reserve fund allocated charges to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The Risk-Management – All Other Fund provides insurance coverage through purchased commercial policies for risks not covered by the above funds. This coverage provides insurance for State-owned real property, bonds for various categories of employees, errors and omissions coverage for judges, workers' compensation coverage for non-state employees on contract with the Agency of Human Services, and various other miscellaneous coverages. The State's liability exposure is limited to the amount of the various deductibles associated with the respective policies and potentially for any claims in excess of the purchased limits. Premium charges from the various insurers are either assessed directly against the entity requiring the coverage or apportioned among those entities receiving the benefits of the coverage. Risk Management also assesses a surcharge of up to 5% of the premium to cover administrative costs. Entities eligible for coverage are state agencies and certain quasi-governmental agencies.

Insurance settlements have never exceeded the above commercial insurance limits.

**2. Health Care Insurance, Dental Assistance Plan, and Life Insurance Funds for State Employee Benefit Plans**

The Employee Benefits Division of the Department of Human Resources maintains medical/behavioral health insurance, dental assistance plan, and life insurance funds for the benefit of current State employees, retired former employees, and legislators as well as employees and certain former employees of outside "special" groups (Special Groups) which have been declared eligible to participate by statute or labor agreement. Not all of these named groups may participate in every plan. Detailed eligibility information for each group listed above can be found in the plan summaries that follow. Temporary and contractual employees are not eligible to participate in these plans.

Enrolled plan participants share in the premium cost of the medical/behavioral health plan. Prescription drug coverage is included in the medical/behavioral health plan. Premium rate development is performed by an outside actuary in conjunction with the Operations Division of the Department of Human Resources. The State's liability for incurred but not yet reported (IBNR) claims is calculated by the actuary and is based on the State's prior claims experience. Special Groups covered under the health insurance plan remit premium to the State for their members. Retirees covered under the health plan pay premium through the Retirement Division of the Treasurer's Office.

The plan options are: TotalChoice which is a "preferred provider organization" indemnity-type plan; and the SelectCare plan which is a "point of service" plan similar to an open-ended Health Maintenance Organization (members may opt out of the SelectCare network but must meet a deductible and coinsurance to do so). Benefits are administered under a managed care arrangement. Both health plan options are self-insured by the State. The State uses a third-party administrator to provide administrative services, including claims payment. To limit the State's large claims exposure, the State has purchased a stop loss insurance policy.

The self-funded State of Vermont Employee Dental Assistance Plan provides up to \$1,000 regular dental benefits annually and up to \$1,750 lifetime benefit for orthodontic expenses for each participant. These plan caps effectively limit the State's exposure to catastrophic loss, so no stop-loss insurance has been purchased. The Operations Division within the Department of Human Resources develops the premium rates, in consultation with the dental plan administrator's actuary. Participants include all groups mentioned in paragraph 1 above except for retirees. The State pays 100% of the premium for State employee participants and their covered dependents. Special Groups covered under the dental assistance plan remit premium to the State for their members.

The State of Vermont Employee Life Insurance Program consists of a Term-Life benefit and an Accidental Death and Dismemberment (AD&D) benefit, each of which provides coverage equal to two times a participant's base salary rounded down to the nearest \$100. Retirees who work for the State for at least twenty years and who have life insurance at the time of retirement receive a retiree life benefit of \$10,000 with no AD&D coverage. Both Life and AD&D are fully insured benefits. The State purchases insurance under which the carrier retains liability for all claims. The Operations Division calculates the premium rates charged to departments for both of these programs. The State pays 75% of active employees' premiums and 100% of retirees' premium costs. Only current State employees, retired State employees, and current active employees of the Special Groups are eligible to participate. Special Groups covered under the life insurance plan remit premium to the State for their members.

Three years' changes in the respective funds' claims liability amounts are displayed in the following table:

<u>Fund and Fiscal Year</u>	<u>Liability at Beginning of the Fiscal Year</u>	<u>Current FY Claims and Changes in Estimates</u>	<u>Current FY Claims Payments</u>	<u>Liability at End of the Fiscal Year</u>
<b>Workers' Compensation Fund</b>				
2017	\$ 27,477,359	\$ 3,462,704	\$ 7,415,011	\$ 23,525,052

2018	313,600	6,321,672	6,349,334	285,938
2019	285,938	6,403,546	6,324,097	365,387

## B. Budget Stabilization Reserves

The Legislature created Budget Stabilization Reserves within the General Fund per 32 V.S.A 308, the Transportation Fund per 32 V.S.A 308a, and the Education Fund Budget per 16 V.S.A 4026. These reserves were created to reduce the effects of annual variations in State revenues upon these funds by reserving certain surpluses of revenues.

The reserves balances consist of any budgetary basis surplus at the close of the fiscal year, provided the balance in each fund's Budget Stabilization Reserve shall not exceed an amount equal to five percent of its appropriations for the prior fiscal year plus any additional amounts as may be authorized by the Vermont Legislature. Use of the reserve is limited to offsetting the respective fund's deficit at the close of a fiscal year. For fiscal year 2019, the State fully funded the Budget Stabilization Reserves for the General, Transportation and Education Funds to their respective statutory maximum levels. The balances at June 30, 2019 are as follows: \$78,179,431 in the General Fund's Budget Stabilization Reserve; \$13,826,758 in the Transportation Fund's Budget Stabilization Reserve; and \$37,034,377 in the Education Fund's Budget Stabilization Reserve.

In addition to the Budget Stabilization Reserve, the General Fund Balance Reserve, also known as the "Rainy Day Reserve" was established per 32 V.S.A 308c. After satisfying the requirements of 32 V.S.A 308, and after other reserve requirements have been met, fifty percent of any remaining the end of fiscal year General Fund surplus determined on budgetary basis shall be reserved in the General Fund Balance Reserve. The General Fund Balance Reserve shall not exceed five percent of the appropriations from the General Fund for the prior fiscal year without legislative authorization. Use of General Fund Balance Reserve is limited to the use of up to fifty percent of the amounts added in the prior fiscal year from the General Fund Balance Reserve to fund unforeseen or emergency needs, and to compensate for a reduction of revenues if the official State revenue estimates are reduced by two percent or more from the original estimate used to determine general appropriations act or budget adjustment act. For fiscal year 2019, the balance in the General Fund Balance Reserve was \$31,553,273.

Under GASB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions", the reserve does not meet the criteria to be classified as restricted or committed fund balance, and is reported as unassigned fund balance. The Transportation Fund's Budget Stabilization Reserve and the Education Fund's Education Reserve are classified as committed for transportation and education, respectively.

## **C. Limited Liabilities**

### **1. Contingent Liabilities**

#### Federal Grants:

The State receives federal grants that are subject to audit and review by federal grantor agencies that could result in expenditures being disallowed under the terms of the grants. However, it is believed that required reimbursements resulting from such disallowances would not be material.

### **2. Limited Liabilities**

#### Vermont Economic Development Authority:

The State has a limited liability for the VEDA. VEDA may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 219. Annually, VEDA must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

#### Vermont Municipal Bond Bank:

The State has a limited liability for the Vermont Municipal Bond Bank (Bank). The Bank is required to maintain debt service reserve funds. 24 V.S.A. Section 4675 requires the State to provide annual appropriations to restore the reserve funds to the required minimum balance, if necessary. It has never been necessary for the State to appropriate money to the reserve fund and it is not anticipated that it will need to make an appropriation in the future.

#### Vermont Housing Finance Agency:

The State has a limited liability for the Vermont Housing Finance Agency (Agency). The Agency may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 632. Annually, the Agency must report to the State the amount necessary to bring these reserve fund balances up to the minimum required by statute. This sum so certified may be appropriated by the State. It has not been necessary for the State to appropriate money to maintain the reserve fund and it is not anticipated that any appropriation will have to be made.

#### Vermont Student Assistance Corporation:

The State has a limited liability for the VSAC. VSAC may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 2867. Annually, VSAC must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

#### University of Vermont:

The State has a limited liability for the UVM. UVM may create one or more debt service reserve funds in accordance with 16 V.S.A. Section 2363. Annually, UVM must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

#### Vermont State Colleges:

The State has a limited liability for the VSC. VSC may create one or more debt service reserve funds in accordance with 16 V.S.A. Section 286. Annually, VSC must report to the State the amount necessary to bring

the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

### **3. Contractual Liabilities**

At June 30, 2019, the State of Vermont had long-term contracts outstanding of approximately \$492,202,079 funded from federal sources, and \$613,435,958 funded from all other funding sources. Contracts such as retainer contracts and contracts for commodities have not been included since the nature of these on-going contracts are tracked statewide to insure the best prices for supplies and some professional services. Following is a summary of contractual obligations by agency, department or office at June 30, 2019.

The Agency of Transportation contracts are mainly infrastructure construction contracts of which 75% have end dates of June 30, 2020 or earlier. Of the Agency of Human Services contractual obligations, 36% is in the Department of Vermont Health Access, 25% in the Department of Children and Families, and 19% in the Department of Corrections. Of the contracts in the Agency of Administration, 56% have end dates that expire by the end of fiscal year 2020 and are primarily for human resource benefit administration services (82%), and capital construction (10%). Of the contracts for the Agency of Digital Services, 51% for data software / consulting and 26% for telecommunications / fiber optic networks. The State Treasurer's Office contracts are mostly investment management services and health insurance for the retirement plans of which 68% having end dates that expire by the end of fiscal year 2020.

Following is a summary of contractual obligations by agency, department or office at June 30, 2019:

*(Table on next page.)*

<u>Agency, Department, or Office</u>	<u>Total Contractual Obligation</u>	<u>Funded by Federal Sources</u>	<u>Funded by Other Sources</u>
Agency of Administration	\$ 208,817,750	\$ 508,871	\$ 208,308,879

#### 4. Grant Awards

The State of Vermont engages in many grant programs that benefit municipalities, non-profits, individuals and families statewide. The grant table below summarizes the grant activity by agency, department or office. The award balance represents the total grant obligation outstanding at the beginning of the fiscal year. The awards to grantees in the current fiscal year totaled \$591,754,937. The award adjustments column includes a decrease of \$49,644,068 for amendments to grants that commenced in prior fiscal years and a reduction of \$13,864,500 to the current year awards balance under Human Services for the contribution received from the University of Vermont Medical Center for the Graduate Medical Education program. The grants expended amount of \$588,311,745 includes payments issued to grantees on both current year awards and prior year grant awards. The award balances at June 30, 2019 represents the remaining unexpended award amounts.

(Table on next page.)

	Number of Grants	Total Grant Obligation				
		Award		Award		
		Awarded in 2019	Balances at June 30, 2018	Current Year Awards	Award Adjustments	Grants Expended
Agency of Administration	373	\$ -	\$ 100,465,694	\$ -	\$ 100,465,694	\$ -
Agency of Agriculture, Food & Markets	299	7,280,281	10,125,556	545,599	9,884,081	8,067,355
Agency of Commerce & Community Development	265	15,199,707	21,969,422	381,239	18,400,041	19,150,327
Agency of Education	1,534	13,542,776	138,104,551	-	132,514,530	19,132,797
Agency of Human Services	613	140,444,559	153,202,362	(63,354,227)	151,944,422	78,348,272

Department of Labor	63	5,322,574	3,168,181	(358,750)	3,644,206	4,487,799
Department of Liquor and Lottery	2	-	123,643	-	123,643	-
Department of Public Safety	175	10,115,506	18,051,242	(132,052)	12,116,188	15,918,508
Enhanced 911 Board	13	124,695	200,438	-	98,657	226,476
Judiciary	1	-	110,000	-	110,000	-
Military Department	11	-	72,900	-	72,900	-
Office of the Attorney General	14	64,153	1,764,518	(58,782)	1,739,984	29,905
Public Service Department	4	4,256,460	216,630	-	1,671,013	2,802,077
State Treasurer's Office	20	72,808	270,889	-	270,889	72,808
State's Attorneys and Sheriffs	52	-	1,881,152	-	1,881,152	-
Total	4,407	\$ 400,022,875	\$ 591,754,937	\$ (63,508,568)	\$ 588,311,745	\$ 339,957,499

The Agency of Administration includes the Department of Libraries which awarded 239 grants in the amount of \$215,733 to public libraries throughout the state. The agency also awarded over \$96 million to help fund higher education in Vermont, and \$2.3 million to promote cultural development. The Agency of Education awarded 1,534 grants totaling \$138 million or 35% of the total number of grants issued by the state. The Agency of Human Services issued 613 awards and expended \$152 million to improve the conditions and wellbeing of Vermonters. The agency awarded \$30 million to the University of Vermont Medical Center, Inc. for the Graduate Medical Education program (GME). The GME program helps ensure access to quality essential professional health services for Medicaid beneficiaries through the care provided by teaching physicians and teaching hospitals. The University of Vermont contributed \$13.9 million to the State to support the GME programs; this support is listed as other revenue in the Global Commitment Fund. The Agency of Transportation awarded 577 grants, totaling \$101.5 million, providing funding to communities around the state that focus on safety, preservation and maintenance of existing transportation system, economic development, and energy efficient transportation choices.

#### D. Litigation

The State, its agencies, officials and employees are defendants in numerous lawsuits involving funding for social welfare programs, civil rights actions, public education funding, breach of contract and negligence. The Attorney General is unable to predict the ultimate outcome of the majority of these suits, some of which seek recovery of monetary damages of unspecified amounts. However, based on information provided by the Attorney General, any ultimate liability to the State resulting from these lawsuits that is not covered by various insurance policies, would not materially affect the State's overall financial condition.

#### E. Joint Venture

The State of Vermont has entered into a Tri-State Lotto Compact with the States of New Hampshire and Maine for the purpose of operating a tri-state lottery. This lottery does not replace Vermont's individual lottery games but is run in addition to the existing games. The Compact provided for the creation of a Tri-State Lottery Commission (Commission) which is an interstate body, both corporate and politic, serving as a common agent for the party

states and representing them both collectively and individually in the exercise of its powers and duties. The Commission is composed of one member from each of the party states. Each State's lottery appoints one of its members to this position. The three-member Commission annually elects a chairperson from among its members. The Commission is empowered to promulgate rules and regulations governing the establishment and to administer the operation of the Tri-State Lotto. Tri-State Lotto tickets are sold in each of the party states and processed in a central location as determined by the Commission. A proportional share of revenue and expenses is allocated to each state based on the ticket sales made by that state. The exceptions to the proportional allocation include: (1) the facilities management fee and agent commissions, which are based on a contracted percentage of operating revenue that varies from state to state; and (2) per diem charges, advertising, and certain printing, travel and miscellaneous costs, which are allocated based on actual charges generated by each state. Comparative financial information for fiscal years ending June 30, 2019 and 2018 are as follows:

	<u>June 30, 2019</u>	<u>June 30, 2018</u>	<u>Increase (Decrease)</u>
<b>Comparative Financial Information</b>			
Assets	\$ 36,096,482	\$ 43,236,412	\$ (7,139,930)
Liabilities	29,749,054	37,207,467	(7,458,413)
Operating revenues	69,881,196	68,559,048	1,322,148
Interest income	242,063	163,839	78,224
Commissions, fees and bonus expense	5,519,151	5,354,543	164,608
Prize awards	38,531,502	37,575,845	955,657
Other operating expenses	4,261,548	3,293,365	968,183
Total transfers to member states	21,811,058	22,499,134	(688,076)
Transfer to Vermont	3,271,552	3,762,890	(491,338)

Tri-State Lotto Commission issues separately audited financial statements. Additional information regarding the Tri-State Lotto Commission may be obtained by contacting the Vermont Lottery Commission, 1311 US Route 302-Berlin, Suite 100, Barre, Vermont 05641.

#### **F. Tax Abatements**

The State of Vermont provides tax abatements through various programs subject to the requirements of GASB Statement No. 77. A tax abatement is defined as a reduction in tax revenues that results from an agreement between one or more governments and an individual or entity through which the government promises to forgo tax revenues to which they are otherwise entitled, and the individual or entity promises to take a specific action after the agreement has been entered into that contributes to economic development or otherwise benefit the government or its citizens. As of June 30, 2019, the State provided tax abatements through the following programs:

*(Table on next page.)*

Vermont Affordable Housing Tax Credit

Purpose of program	The program encourages construction or rehabilitation of affordable housing projects in the State.
Tax being abated	Personal income, corporate income, bank franchise, and insurance premium taxes
Authority to abate taxes	32 V.S.A. 5930u
Criteria to be eligible to receive abatements and commitment of the taxpayer	Any municipality, private sector developer, State agency as defined in 10 V.S.A. 6301a, the Vermont Housing Finance Agency, or a nonprofit organization qualifying under 26 U.S.C. 501(c)(3), or a cooperative housing organization, the purpose of which is to create and retain affordable housing for Vermonters with lower income and which has in its bylaws a requirement that the housing the organization creates be maintained as affordable housing for Vermonters with lower income on a perpetual basis. The taxpayer applies to and must be approved by the allocating agency to receive the credit. In return, the taxpayer agrees to construct or rehabilitate affordable housing projects as specified in the application submitted. Vermont's designated allocating agency for this tax credit is the Vermont Housing Finance Agency. The participant is required to ensure that eligible housing is maintained as affordable housing by subsidy covenant, as defined in 27 V.S.A. 610 on a perpetual basis.
How taxes are reduced	Taxpayer will claim credit on tax return. Unused credits may be carried forward for fourteen years.
How is the amount of the tax abatement determined	The amount of the credit is determined by the allocating agency based on the amount of eligible investment in the affordable housing project.
Provisions for recapturing abated taxes	N/A
Type of commitments other than taxes	N/A
Dollar amount of taxes abated during reporting period	\$3,264,119

Agricultural and Managed Forest Land Use Program

Purpose of program	The program goal is to preserve the working landscape and the rural character of Vermont.
Tax being abated	Education Property Tax
Authority to abate taxes	32 V.S.A 3756
Criteria to be eligible to receive abatements and commitment of the taxpayer	A property must be at least 25 contiguous acres in size to be eligible for enrollment in the program, with limited exceptions for actively farmed land, and conservation land owned by a qualified organization as defined in 10 V.S.A 6301a. The property owner applies to and must be approved by the Department of Taxes to receive the tax abatement. In return, the owners of agricultural land and/or farm buildings are required to certify annually that their agricultural land and farm buildings meet the requirements to be eligible for the program; and for forested and conservation land (non-agricultural) the property must be managed according to the approved forest or conservation management plan and according to state standards and be inspected at least once every 10 years.
How taxes are reduced	Reduction of assessed value
How is the amount of the tax abatement determined	Land is valued at fixed price per acre as determined by the Current Use Advisory Board
Provisions for recapturing abated taxes	Once enrolled in the program land is subject to a lien, if this land is ever developed or removed from the program, the owner at the time of development must pay a land use change tax of 10% tax on the full fair market value of the changed land determined without regard to the use value appraisal.
Type of commitments other than taxes	As part of the Land Use Program, is a municipal hold harmless payment that reimburses municipalities for property tax revenue not collected due to the reduction in assessed value from property enrolled in the Land Use Program. Fiscal year 2019 payments are \$15,504,096.
Dollar amount of taxes abated during reporting period	\$45,385,579

Vermont Downtown and Village Center Tax Credit Program

Purpose of program	The program encourages the improvement and rehabilitation of historic properties in designated downtowns and village centers. It includes three tax credits: The Historic Rehabilitation Tax Credit, the Façade Improvement Tax Credit, and the Code or Technology Improvement Tax Credit.
Tax being abated	Personal income, corporate income, bank franchise, and insurance premium taxes
Authority to abate taxes	32 V.S.A. 5930cc
Criteria to be eligible to receive abatements and commitment of the taxpayer	Commercial buildings and non-profit owned buildings constructed before 1983 located within designated downtown or village centers are eligible for the credit. The taxpayer applies to and must be approved by the Vermont Downtown Development Board to receive the credit. In return, the taxpayer agrees to improve or rehabilitate their historic property in designated downtowns and village centers as specified in the application submitted.
How taxes are reduced	Taxpayer will claim credit on tax return. Unused credits may be carried forward for nine years.
How is the amount of the tax abatement determined	<p>Historic Rehabilitation Tax Credit is 10% of qualified expenditures up to a maximum tax credit of \$75,000.</p> <p>Façade Improvement Tax Credit is 25% of qualified expenditures up to a maximum tax credit of \$25,000.</p> <p>Code or Technology Improvement Tax Credit is 50% of qualified expenditures up to a maximum tax credit of \$50,000 for sprinklers, \$50,000 for elevators, \$12,000 for platform lifts, \$50,000 for other qualified code improvements, and \$30,000 for technology improvements.</p>
Provisions for recapturing abated taxes	If, within five years after completion of the qualified project the applicant shall be liable for a recapture penalty in an amount equal to the total tax credit claimed if the Vermont Downtown Development Board finds that any work performed on the qualified project is inconsistent with the approved application; or the applicant knowingly failed to supply any information, or supplied incorrect or untrue information or failed to comply with any award condition; or in the case of the Historic Rehabilitation Tax Credit, the National Park Service revokes certification for unapproved alterations or for work not done as described in the historic preservation certification application.
Type of commitments other than taxes	N/A
Dollar amount of taxes abated during reporting period	\$2,188,991

Vermont Employment Growth Incentive (VEGI)

Purpose of program	The program is designed to encourage business recruitment, growth and expansion.
Tax being abated	Personal income taxes
Authority to abate taxes	32 V.S.A. 3330
Criteria to be eligible to receive abatements and commitment of the taxpayer	Any size business can apply, to be eligible to receive abatements. The Vermont Economic Progress Council (VEPC) must find for the project that the total estimated incremental tax revenues from all sources generated to the State by the proposed economic activity exceeds the revenue costs of the activity to the State, including the cost of the incentive. The host municipality must welcome the new business. The proposed economic activity must conform to applicable town and regional plans. If the business proposes to expand within a limited local market, an incentive must not give the business an unfair competitive advantage over other Vermont businesses in the same or similar line of business and in the same limited local market. Applicants must assert in writing and VEPC must agree that, but for the incentive, the proposed economic activity: would not occur; or would occur in a significantly different manner that is significantly less desirable to the State. The taxpayer applies to and must be approved by the VEPC to receive the tax abatement. In return, the taxpayer agrees to meet their performance requirements for new qualifying employment, new qualifying payroll, and new qualifying capital investments as specified in the application submitted.
How taxes are reduced	Refund of taxes paid
How is the amount of the tax abatement determined	The total amount of abatement is determined by a cost-benefit model analysis that calculates the estimated revenue benefits and costs to the State, based on the qualifying jobs, payroll, and capital investments projected by the applicant.
Provisions for recapturing abated taxes	For three years from the last day of the utilization period if the business experiences a 90% or greater reduction in base employment, or if the business fails to file required claim forms. In addition, if the business fails to meet its capital investment performance requirements by the end of the award period the abatements paid may be recaptured.
Type of commitments other than taxes	N/A
Dollar amount of taxes abated during reporting period	\$2,876,311

## G. Accounting Changes

In prior years, the State reported tobacco tax, cigarette tax, health care provider taxes, health care claims tax, and the employer health care premium special assessment in the Special Fund. Act 6 of 2019 amended 33 V.S.A § 1901d to remove the reporting of these revenues in the Special Fund. As a result of this legislative change, these revenue sources are reported in the General Fund for fiscal year 2019. Total revenues from these sources reported in the General Fund for fiscal year 2019 were \$270 million.

### Accounting changes related to changes in fund category reporting

In prior years, the State reported as a part of its Special Fund the operations Electric Efficiency Utility program. For the year ended June 30, 2019, the State determined that the nature of the operations had changed over time to be more properly classified as an enterprise fund as the intent is for the fund to operate as a business-type activity.

For the Special Fund, beginning fund balance was retroactively adjusted to remove the balance of the Electric Efficiency Utility program. The Electric Efficiency Utility Fund will be reported as a non-major enterprise fund, and its beginning net position was retroactively adjusted to add the balance of the Electric Efficiency Utility program. Beginning net position in the Government-wide financial statements for Governmental and Business-type Activities were similarly restated.

### Accounting changes related to prior period adjustments

A prior period restatement of net position was made for a correction of an error in one of the University of Vermont's (UVM) discretely presented components units. The University Medical Education Associates, Inc. (UMEA) discovered that it had charged to expense, the total commitment made to fund the package of a new chairperson for a department of The University of Vermont Medical Center, rather than recognizing expenses as spending actually occurred, and had reduced a liability and increased the donor-restricted net assets related to funding the new chairperson in a previous year. The effect of the restatement is shown below.

A prior period restatement of net position for the Vermont Municipal Bond Bank was made for a correction of an error to recognize restricted investment sinking funds that were available in the prior year.

### Restatement of net position

The effects of accounting changes on net position were as follows:

	<u>Governmental Activities</u>	<u>Business-type Activities</u>	<u>Special Fund</u>	<u>Non-Major Enterprise Funds</u>
As originally reported, July 1	\$ (658,597,125)	\$ 460,490,546	\$ 165,079,224	\$ 5,025,547
Restatements				
Recognition of change in accounting principle as of July 1, 2018	<u>(1,545,744)</u>	<u>1,545,744</u>	<u>(1,545,744)</u>	<u>1,545,744</u>
Restated amount	<u>\$ (660,142,869)</u>	<u>\$ 462,036,290</u>	<u>\$ 163,533,480</u>	<u>\$ 6,571,291</u>

The effects of accounting changes on net position of component units were as follows:

	<u>University of Vermont and State Agricultural College</u>	<u>Vermont Municipal Bond Bank</u>	<u>Total Non-major Component Units</u>
As originally reported	\$ 543,321,000	\$ 37,299,643	\$ 345,071,046
Restatements			
Restatement for a prior period adjustment as of July 1, 2018	(283,000)	206,238	206,238
Restated amount	<u>\$ 543,038,000</u>	<u>\$ 37,505,881</u>	<u>\$ 345,277,284</u>

## H. Subsequent Events

### Debt Issuances

#### **2019 Series A - General Obligation Bonds**

The State issued \$88,255,000 of 2019 Series A - General Obligation Bonds, dated August 15, 2019. The bonds are general obligations of the State of Vermont, and the full faith and credit of the State are pledged to the payment of principal and interest on these bonds. The interest rates on these bonds vary from 3% to 5%, and payment to bondholders is scheduled to commence on February 15, 2020, and terminate on February 15, 2039.

The issuance of these bonds is authorized by capital acts from legislative sessions: Act 26 (2015) as amended by Act 160 (2016), and Act 84 (2017) as amended by Act 190 (2018). The proceeds are to be used for various purposes including capital projects, major maintenance at the State buildings, Vermont State Colleges, University of Vermont, various projects in the areas of natural resources, public safety, agriculture, clean water initiatives, various grant purposes, and other projects.

#### **2019 Series B (Vermont Citizen Bonds) – General Obligation Refunding Bonds**

The State issued \$39,525,000 of 2019 Series B – General Obligation Refunding Bonds, dated August 15, 2019, for the purpose of advance refunding of \$36,000,000 outstanding principal of the 2010 Series A-2 - General Obligation Bonds (Federally Taxable – Build America Bonds), \$6,135,000 outstanding principal of the 2010 Series C-1 - General Obligation Refunding Bonds and \$2,240,000 outstanding principal of the 2010 Series C-2 – General Obligation Refunding Bonds. Interest rates on the bonds range from 2% to 5%, and payments to bondholders are scheduled to commence on August 15, 2020, and terminate on August 15, 2029. As a result of the bond refunding transaction, the State reduces its total debt service payments over the next 11 years by \$3,745,595, and achieves an economic gain of \$3,454,082.

**Notes to Schedule**

<sup>(1)</sup>ADC for a given fiscal year are based on results from the June 30 actuarial valuation two years prior for STRS and VTRS, and one year prior for MERS.

<sup>(2)</sup> Included in the ADC is an actuarially determined contribution rate that is applied to the total earnable compensation for teachers whose funding is provided by federal grants and is paid by the employer to the STRS.

GASB No. 67 required supplementary information is not available for fiscal years prior to 2014. Data for future years will be added prospectively.

See Independent Auditor's Report. The accompanying notes are an integral part of the required supplemental information.

## **Notes to the Required Supplementary Information—Budgetary Reporting (unaudited)**

### **Budgetary Comparison Schedules**

The budgetary schedules provide a comparison of the original and final adopted budget with actual data on a budgetary basis for the Governmental Funds. The State's legal level of budgetary control is at the activity level. The State compiles a separate legal basis budgetary report, which shows the legal compliance with the budget. Budgetary comparison schedules showing legal level detail may be obtained by contacting the State of Vermont, Department of Finance and Management, 109 State Street, 5th Floor, Pavilion Building, Montpelier, Vermont 05609-0401.

### **Budgetary Process**

Vermont statutes require the head of every State department, board, and commission and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Governor may amend appropriations or transfer appropriations within limits established by 32 V.S.A. Chapter 9. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

### **Revenue Estimates**

By July 31 each year, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues in the General, Transportation, Education, and Global Commitment Funds. The Emergency Board then has 10 days to determine the original revenue estimates for the fiscal year. For the Special and Federal Revenue Funds the original budget for revenues is based on the amount appropriated for expenditures. By January 15, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues and the Emergency Board determines any revision to the July revenue estimates.

### **Expenditure and Transfer Budgets**

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of appropriations made under any appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts including federal receipts exceed the appropriated amounts, the receipts may be allocated and expended, subject to the approval of the Secretary of Administration. If, however, the expenditure of those receipts will establish or increase the scope of the program, which

establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature. The full faith and credit of the State has been pledged to support various programs. Any payments that are required to be made by the Treasurer are paid in accordance with Vermont Statutes and do not require an appropriation by the Legislature.

**Budget and GAAP Basis Reporting**

The accompanying budgetary comparison schedules report the actual revenues, expenditures and other financing sources (uses) on a budget basis, which differs significantly from GAAP. These different accounting principles result in basis, perspective, and entity differences in the fund balance - budgetary basis. *Basis differences* arise because the basis of budgeting (cash basis) differs from the GAAP basis used to prepare the statement of revenues, expenditures, and changes in fund balances - governmental funds. *Perspective differences* result because the Appropriation Act's program-oriented structure differs from the fund structure required for GAAP. *Entity differences* arise because certain activity reported within the State's financial reporting entity for GAAP purposes is excluded from the Appropriation Act. The following presents a reconciliation of the budgetary basis and GAAP basis fund balances for the funds reported in the accompanying schedules for the fiscal year ended June 30, 2019:

	General Fund	Transportation Fund	Education Fund	Special Fund	Federal Revenue Fund	Global Commitment Fund
<b>Fund Balance - Budgetary Basis.....</b>	\$ 289,176,988	\$ 31,029,789	\$ 82,355,531	\$ 193,690,178	\$ 34,294,683	\$ 101,899

## ***COMBINING FINANCIAL STATEMENTS***

---

**Fish & Wildlife Fund** – This fund is used to account for the activities of the Fish and Wildlife Department. The Fish and Wildlife Department’s mission is to protect and conserve the State’s fish, wildlife, plants and their habitats for the people of Vermont.

**General Obligation Bond Projects Fund** – This fund accounts for general capital improvement expenditures funded by the issuance of State general obligation bonds.

**Transportation Infrastructure Bond Projects Fund** – This fund accounts for transportation capital improvement expenditures funded by the issuance of transportation infrastructure special obligation bonds.

**General Obligation Debt Service Fund**—This fund accounts for and reports financial resources that are restricted, committed, or assigned to expenditures for general obligation bond principal and interest.

**Transportation Infrastructure Debt Service Fund**—This fund accounts for and reports financial resources that are restricted, committed, or assigned to expenditures for transportation infrastructure special obligation bond principal and interest.

**Higher Education Endowment Fund** – This is a permanent fund whose revenue is used by the University of Vermont and Vermont State Colleges to provide non loan financial assistance to Vermont students attending their institutions and by the Vermont Student Assistance Corporation to provide non loan financial assistance to Vermont students attending a Vermont postsecondary institution.

**Vermont Sanitorium Fund** – This is a permanent fund whose income is to be used for the treatment and cure of respiratory diseases.

**Albert C. Lord Trust Fund** – This is a permanent fund whose income is to be used for demonstrations, lectures and instruction in the care of woodlots and restoration.

**Lumberjack Fund** – This is a permanent fund whose income is to strengthen annual workshops for educators interested in enhancing classroom skills in the area of fish and wildlife management.

**Couching Lion Farm Cemetery Fund** – This is a permanent fund whose income is to be used to provide for the care of a private cemetery in Camel’s Hump State Park.

**Carrie P. Underwood Fund** – This is a permanent fund whose income is to be used to provide aid to poor libraries and to otherwise promote the library interests of the State.

**Laura H. Morgan Fund**— This is a permanent fund whose income is to be used to benefit the Brandon Training School.

**Bennington Battle Monument Fund** – This is a permanent fund whose revenue is to be used to repair and maintain the Bennington Battle Monument.

**Zenus H. Ellis Fund** – This is a permanent fund whose income is to be used to maintain the iron fence and flagpole at the Hubbardton battlefield.

*Vermont*

**Federal Surplus Property Fund** – This fund is used to account for a program that acquires and distributes surplus property from various military and federal sources. Public entities (towns, schools, districts, volunteer fire departments, etc) and non-profit organizations conducting educational and health care programs may apply for eligibility.

**Vermont Life Magazine Fund** – This fund is used to account for the activities of the Vermont Life Magazine. *Vermont Life* was a quarterly magazine published by the State of Vermont. *Vermont Life's* final issue was the Summer 2018 issue available for newsstands on May 15, 2018.

**Municipal Equipment Loan Fund** – This fund is used to account for a program that was created for the purpose of providing loans on favorable terms to municipalities for the purchase of construction, fire, emergency or heavy equipment or vehicles.

**Unemployment Compensation Contingency Fund** – This fund is used to account for the interest, fines and penalties collected under the unemployment compensation law as well as the administrative costs not chargeable to federal grants.

**Electric Power Sales Fund**—This fund is used to account for the revenues and expenses for the purchase of wholesale electric power for resale to Vermont's utilities.

**Electric Efficiency Utility Fund**—This fund is used to account for the revenues and expenses for the operation of the Electric Efficiency Utility program.

***THIS PAGE INTENTIONALLY LEFT BLANK***

*Vermont*

**Highway Garage Fund** – This fund accounts for the maintenance and rental of equipment to the Agency of Transportation for use in construction, maintenance and operation of the State’s transportation infrastructure.

**Offender Work Programs** – This fund accounts for the activities of the print shop, sign shop and furniture shop run by the Department of Corrections.

**Single Audit Revolving Fund** – The purpose of this fund is to account for the costs attributable to the Auditor of Accounts Office’s performance of the annual Single Audit .

**Financial & HR Information Fund** – The activities of this fund account for the costs of the support of the State’s financial and human capital management ERP systems.

**Communications & Information Technology Fund** – This fund accounts for the activities of the Agency of Digital Services communications and information technology services.

**Fleet Fund** – This fund accounts for the Department of Buildings and General Services’ vehicle management activities including the daily and long-term leasing of vehicles for employees use in travel on State business.

**E-Procurement Fund** - The purpose of the Purchasing Card Program is to establish a more efficient, cost-effective method of purchasing and paying for small dollar transactions and high-volume, repetitive purchases.

**Copy Center Fund** – This fund’s activities include the Department of Buildings and General Services Print Shop and copier leasing services.

**Postage Fund** – This fund accounts for the mail services for the Montpelier and Waterbury state complexes including mail collection and delivery, sorting, and applying postage.

**Facilities Operations Fund** – This fund’s purpose is to provide operating expenses, maintenance, renovations and acquisitions of buildings, grounds and support facilities.

**Property Management Fund** – This fund’s purpose is to provide State Agencies with safe, comfortable, and efficient space through leasing; purchasing; and planning which enables them to carry out their mission.

**Equipment Revolving Fund** – This fund is used as an internal lease purchase mechanism of equipment for State agencies and departments.

**State Resource Management Fund** – This fund accounts for the costs of energy resource conservation measures implemented by departments anticipated to generate a life cycle cost benefit to the state.

**State Energy Revolving Fund** – This fund is used as an internal lease purchase mechanism for energy efficiency improvements using renewable resources.

**State Surplus Property Fund** – This fund accounts for the sale of all items that are no longer needed by the State’s agencies and departments.

**State Liability Insurance Fund** – This fund provides liability insurance coverage for the actions performed by the State’s employees in the course of performing their assigned duties.

**Risk Management-All Other Fund** – This fund is used to purchase insurance protection for state property and other miscellaneous risks that are specific to certain departments or types of employees, such as judicial liability, liability related to maintenance of railroad tracks, and required bonds for certain state officials.

**Workers’ Compensation Fund** – This fund provides workers’ compensation coverage for all state employees.

**Medical Insurance Fund** – This fund provides health coverage for current state employees, retirees, legislators and other groups eligible to participate.

**Dental Insurance Fund** – This fund provides dental coverage for current state employees, legislators and other groups eligible to participate.

**Life Insurance Fund** – This fund provides a life insurance policy for current state employees, retirees and other groups eligible to participate.

**Long-term Disability Fund** – This fund provides an income replacement benefit for state employees that are not eligible to be represented by the employees’ union should they have a long term or permanent disability.

**Employees’ Assistance Fund** – This fund provides a program that assists state employees and members of their immediate household assistance in addressing problems that impact their lives.

**Human Resource Services Fund** - This fund provides centralized human resources management services for agencies and departments of the State.

**Vermont Economic Development Authority** – This is a tax-exempt entity whose purpose is to promote economic prosperity within the State of Vermont by providing capital and direct financing to eligible borrowers.

**Vermont Housing & Conservation Board** – This is a not for profit entity whose mission is to create affordable housing for Vermonters and to conserve and protect agricultural, historic, natural and recreational sites within Vermont.

**Vermont Municipal Bond Bank** – The Bond Bank's purpose is to create large bond issues on behalf of the States' municipalities and loan the proceeds back to the participating municipalities.

**Vermont Educational and Health Buildings Financing Agency** – This purpose of this agency is to provide tax-exempt financing to libraries, educational and healthcare providers to assist in the purchase and construction of real and personal property.

**Vermont Veterans' Home** – The Vet's home provides care to those that have given to their country and the State of Vermont.

**STATISTICAL SECTION CONTENTS**  
**JUNE 30, 2019**

The Statistical Section of the Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information indicates about the State of Vermont's overall financial health. Below is a summary of the components and purpose of the tables provided in this section.

**Financial Trends** – Tables 1 through 4

These schedules contain trend information extracted from the State's financial statements, to help the reader understand how the State's financial performance and financial position have changed over time.

**Revenue Capacity** – Tables 5 through 7

These schedules contain information to help the reader assess the State's most significant revenue source – the personal income tax.

**Debt Capacity** – Tables 8 and 9

These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt, the State's ability to issue additional debt in the future, and related historical trend data.

**Demographic and Economic Information** – Tables 10 and 11

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

**Operating Indicators** – Tables 12 through 15

These schedules contain service levels and capital asset data to help the reader understand how the information in the State's financial report relates to the services the State provides to its citizens and visitors.

This information is unaudited.

In 2011 the State implemented GASB Statement No. 54. Under GASB Statement No. 54, fund balances are classified as Nonspendable, Reserved, Committed, Assigned or Unassigned. Prior to GASB 54, fund balances were classified as Reserved or Unreserved. Amounts for fiscal years 2010 and earlier have not been restated to reclassify these balances.

<sup>(1)</sup> Data for 2019 are projected annual estimates based on information through 2019 second quarter.  
The estimates for 2010 are based on the 2007 North American Industry Classification System ("NAICS").  
The estimates for 2011 - 2016 are based on the 2012 NAICS.  
The estimates for 2017 forward are based on the 2017 NAICS.

<sup>(2)</sup> Includes non-earned income, such as interest and dividends, rental income, and government transfers to individuals.

<sup>(3)</sup> Total direct tax rate is not available. Average effective tax rate equals personal income tax collections (see Statistical Section Table 6) divided by total personal income. Source of collections data: Vermont Department of Taxes.

Some data previously reported for prior years has been modified to reflect updated estimates

\* Incremental revenues are not available for the 2019 year, so the actual data reported here is for the ten years 2009-2018.

(1) 2014 represents a 6-month period to move into alignment with municipalities fiscal year; Barre reported a 12-month cycle .

Source: Agency of Commerce and Community Development - TIF Program Annual Report - 2019

See Independent Auditor's Report

A Tax Increment Financing (TIF) district is a method to provide revenues, beyond normal municipal revenue sources, for public infrastructure improvements which will encourage private development within the district, provide employment opportunities, improve and broaden the tax base, or enhance general economic vitality in a manner and location preferred by a municipality and the State. TIF Districts are established and managed under 24 V.S.A. chapter 53 subchapter 5, and 32 V.S.A. 5404a(f) subject to approval by the Vermont Economic Progress Council. There is no individual or entity tax abatement due to the approval of a TIF. An approved TIF allows the municipality to use incremental Education Fund statewide education property tax revenues for the specified public infrastructure costs.
