PURPOSE

This comprehensive plan, updated for the Grady County, Cairo and Whigham in 2015, serves as a guide for local government officials and community leaders for making decisions in support of the community's stated vision. Based on input from the public and a Steering Committee, the plan identifies needs and opportunities for the community, as well as goals for each community's future, and policies that provide guidance and direction for achieving these goals. The plan also offers insight into what types of land use and development are appropriate in the Cities of Cairo and Whigham. A community work program is included that specifies a route for working towards implementation of the plan.

This comprehensive plan should be used as a guide by the local government for assessing development proposals, rezoning applications, and redevelopment plans. Residents, business owners, and developers may access the plan as well, to learn about appropriate land use, development, and the trajectory of growth for Grady County and its municipalities. Essentially, the plan seeks to answer the questions: *Where are we?, Where do we want to be?, and, How will get there?*

PROCESS

The Comprehensive Plan process follows the Rules of the Georgia Department of Community Affairs ("DCA"), O.C.G.A. Chapter 110-12-1, Minimum Standards and Procedures for Local Comprehensive Planning, effective March 1, 2014. The DCA rules state that the Comprehensive Plan consists of the following three distinct components:

Needs and Opportunities:

An analysis of the community's needs and opportunities will help determine the existing conditions of each community. This will assist the community in identifying the issues that it needs to address and the opportunities on which it can capitalize.

Community Goals:

Through public and steering committee meetings, the communities' goals and policies are developed to determine the community's future direction. As a part of this component, policies are identified to assist in making decisions that are consistent with community goals.

Community Work Program:

The final component of the comprehensive plan, the Community Work Program, outlines steps and strategies for achieving the community's goals and implementing its plans. The Work Program will include a short term work plan, identifying priority projects, potential collaborations, and funding strategies.

Specific components required for Grady County are:

Economic Development:

The Economic Development Element identifies and needs and opportunities related to economic development and vitality of the community and Community Work Program activities are developed for addressing these specific needs and opportunities, considering such factors as diversity of the economic base, quality of the local labor force, effectiveness of local development agencies, programs and tools.

Land Use:

This section deals with developing a Future Land Use Map that addresses the various Land Use and Development goals of Cairo and Whigham. Specific development strategies were developed in keeping with the proposed Land Uses, and are described in detail in the next section

PUBLIC INVOLVEMENT

SWGRC's Role

The Southwest Georgia Regional Commission's Planning Department facilitated the 2016 Comprehensive Plan update for Grady County, Cairo and Whigham; collectively known as "**Plan! Grady 2016**". Leading community input sessions and Steering Committee meetings, the SWGRC team gathered feedback and guidance from the public, and used this information to assemble the Comprehensive Plan and make recommendations that are reflective of the community's desires. The elected officials of each local government hold ultimate responsibility and authority to approve and direct the implementation of the Comprehensive Plan documents.

Public Input and Steering Committee

The 2016 update of Grady County's Comprehensive Plan relied heavily on public involvement. The planning process began with an initial public hearing at each local government where the plan requirements were discussed and an overview of the process as well as various ways the public could participate in the plan process. Aside from public meetings, a website (www.grady-county-comprehensive-plan.com) was created to further explain the plan process, requirements, and also provide another avenue for those interested to provide feedback and input into the plan. Alongside the website, a Facebook page (Plan Grady 2016) was created for citizens to follow along with announcements of meetings and discuss various aspects of the plan. Following the initial public hearings, community input sessions were conducted where the public was invited participate in a S.W.O.T. exercise and to help develop goals and policies for Grady County, Cairo and Whigham regarding a variety of topics.

Review Process

According to the DCA's new rules for comprehensive planning, effective March 1, 2014, each community must transmit the plan to the Southwest Georgia Regional Commission (SWGRC) when all three components are complete. The transmittal must also include the community's certification that it has considered both the Regional Water Plan and the Rules for Environmental Planning Criteria. Once it completes its review, the SWGRC will forward the plan to the DCA for review. Once the plan has been found by the DCA to be in compliance with the Minimum Standards and Procedures, each community must adopt the approved plan.

PLAN ORGANIZATION

Plan! Grady 2016 is essentially a joint comprehensive plan for Grady County, Cairo and Whigham. In order to make the plan more usable and for each jurisdiction to take more ownership this plan is broken down by jurisdiction with each government involved having the required sections according to the DCA's O.C.G.A. Chapter 110-12-1, Minimum Standards and Procedures for Local Comprehensive Planning.

GRADY COUNTY

COMMUNITY PROFILE

Bordering Florida to the south, Thomas County to the east, Decatur County to the west and Mitchell County to the north, the 458 square miles of Grady County was home to 25,009 people in 2010. (Currently the total estimated population for the County is 25,359). The County Seat, Cairo, is about 30 miles north of Tallahassee, Florida and 255 miles south of the Georgia's Capital, Atlanta. The climate is temperate with long warm summers and short cool winters. It lies within an area that receives approximately 53 inches of rainfall per year with an average temperature of 67 degrees.

If current demographic trends continue the total population in Grady County could top 25,503 by 2020 and would maintain to some degree the current racial profile of roughly 62.8% Caucasian, 28.7% African American and 10% Hispanic. Although this racial profile mirrors that of the State in general, other aspects of the County's demography more closely matches those of neighboring counties, particularly in the realms of the income distribution, poverty rates and educational attainment.

S.W.O.T.

Strengths

- Cooperation with local agencies & governments
- Available workforce
- Location/proximity to Florida/Alabama
- Financially stable

Weaknesses

- Apathy
- Socioeconomic factors
- Lower Educational attainment
- Lack of volunteers
- Aging fire-fighting equipment
- Lack of sufficient funding to pave roads
- Lack of professional jobs
- Lack of entertainment
- Solid waste disposal-unsightly
- Lack of hotel/motel rooms
- Lack of quality restaurants
- Litter on highways

Opportunities

- Tired Creek Lake as economic engine and proper land use
- Work with City of Cairo for water and sanitary sewer delivery
- Tourism (Ochlocknee Water Trail & TCL)
- Lots of room to grow
- Primed for additional food processing and manufacturing plants
- Work with Georgia Forestry and Homeland Security to secure tankers and trucks, could reduce ISO rating

Threats

- State and Federal unfunded mandates
- Tax loss of \$ funding of projects
- Georgia Agricultural Tax Exemption (GATE) card sales

NEEDS AND OPPORTUNITIES

Needs

We need to improve the skills of our workforce.

- Both Cairo and Grady County suffer from low academic achievement which contributes to higher poverty rates, lack of professional jobs and general apathy in the community.

We suffer from a lack of entertainment opportunities.

- There is a lack of things to do for residents of Grady County and oftentimes people drive to surrounding communities to seek entertainment and dining experiences.

Lack of funding for road paving and fire-fighting equipment is an ongoing problem.

- The prioritized list of roads in need of resurfacing continues to grow but the funding has not kept up. At the same time, the age of Grady Counties fire-fighting equipment has increased as well.

We have litter on our highways and unsightly solid waste disposal facilities.

- It is a bad sign to visitors when the first thing they see as they come into Grady County and Cairo is trash along the roadways. A cleanup campaign or participation in the adopt-a-highway program would certainly help.

We have a lack of Hotel/Motel rooms.

- This may be a direct result to some degree of the lack of entertainment options available. As there become more things for people to do in Grady County perhaps more of a market will emerge for hotels/motels.

Opportunities

The Tired Creek Lake project

- The Tired Creek Lake project could lead to more tourism, jobs, housing and retail growth. It is imperative that once the lake is permitted to fill that Grady County plan accordingly.
- The City of Cairo and Grady County have spoken about the options for providing sewer and water to the lake area. An opportunity exists to collaborate to provide this important infrastructure.

Tourism opportunities

- The Ochlocknee Water Trail and Tired Creek provide good opportunities for Grady County to increase its tourism economy.

Opportunities exist to lower the ISO rating of Grady County

- By working with Georgia Forestry and Homeland Security to procure equipment necessary to fight fires the ISO rating can be reduced to help with home insurance costs for residents.

Primed for additional food processing and manufacturing plants

- Grady County farmers and ranchers could be a catalyst for food processing. More chicken houses are being built in Grady County in 2015. The supply of fruits, vegetables, poultry and livestock could motivate a business to locate in the county to process the locally grown/raised food.
- Plans have been developed to improve the road, sewer and water infrastructure in the industrial area to attract manufacturing plants.

Room to grow

- The abundance of open space in Grady County allows for in-fill development, new housing, farming and cattle operations, and manufacturing and food processing growth.

GOALS & POLICIES

Economic Development

Encourage development or expansion of business and industries that are suitable for Grady County.

- Policy 1: We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.*
- Policy 2: We will target reinvestment to declining, existing neighborhoods, vacant or underutilized sites or buildings in preference to new economic development projects in Greenfield (previously undeveloped) areas of our community.*
- Policy 3: We will take into account impacts on infrastructure and natural resources in our decision making on economic development projects.*
- Policy 4: We will consider the employment needs and skill levels of our existing population in making decisions on proposed economic development projects.*
- Policy 5: We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.*

Efficient Land Use

Smart Growth Development through a master plan for the entire Tired Creek Lake.

- Policy 1: Our decisions on new development will contribute to, not take away from, our community's character and sense of place.*
- Policy 2: We are committed to creating walkable, safe, and attractive neighborhoods throughout the community, where people have easy access to schools, parks, and necessary services (grocery store, drug store) without having to travel by car.*
- Policy 3: Creation of recreational facilities and set-aside of greenspace are important to our community.*
- Policy 4: We are committed to providing pleasant, accessible public gathering places and parks throughout the community.*
- Policy 5: We support increases in residential density in areas where community design standards, environmental constraints and available infrastructure capacities can satisfactorily accommodate the increased density.*

Policy 6: The community will use sequential, phased extension of utilities and services to encourage rational expansion of development to areas immediately contiguous to already developed areas of the community.

Transportation

Improve transportation infrastructure.

Policy 1: Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.

Policy 2: Our new and reconstructed roadways will be designed to accommodate multiple functions, including heavy truck traffic and local vehicular circulation.

Resource Management

Promote the efficient use of natural resources and identify and protect environmentally sensitive areas of Grady County.

Policy 1: The protection and conservation of our community's resources will play an important role in the decision-making process when making decisions about future growth and development.

Policy 2: We will encourage new development to locate in suitable locations in order to protect natural resources, environmentally sensitive areas, or valuable historic, archaeological or cultural resources from encroachment.

Policy 3: Infrastructure networks will be developed to steer new development away from sensitive natural resource areas.

Policy 4: We will promote the protection and maintenance of trees and green open space in all new development.

Policy 5: We will work to redirect development pressure away from agricultural areas in order to conserve farmland to protect and preserve this important component of our community.

Policy 6: We will ensure safe and adequate supplies of water through protection of ground and surface water sources.

Policy 7: We will promote enhanced solid waste reduction and recycling initiatives.

Sense of Place

Promote and embrace the sense of place of Cairo, Whigham and Grady County.

- Policy 1: Our community will make efficient use of existing infrastructure and public facilities in order to minimize the need for costly new/expanded facilities and services.*
- Policy 2: We will protect existing infrastructure investments (i.e., already paid for) by encouraging infill redevelopment, and compact development patterns.*
- Policy 3: We will coordinate provision of public facilities and services with land use planning to promote more compact urban development.*

Local Preparedness

Identify and put in place the prerequisites for the type of future Grady County seeks to achieve.

- Policy 1: We will ensure that capital improvements needed to accommodate future development are provided concurrent with new development.*
- Policy 2: Our community will use planned infrastructure expansion to support development in areas identified (in the comprehensive plan) as suitable for such development.*
- Policy 3: The community will seek ways for new growth to pay for itself (in terms of public investment in infrastructure and services to support the development) to the maximum extent possible.*
- Policy 4: We will work with the local school board to encourage school location decisions that support the community's overall growth and development plans.*

Educational Opportunities

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions.

- Policy 1: We will make higher education more attainable where/however possible.*

ECONOMIC DEVELOPMENT

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for Grady County.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Grady County has the lowest unemployment rate in the region, thanks to a very diverse roster of businesses. Turner Furniture opened a retail facility in the Bechtou community, creating 45 jobs in 2010 and lowered their workforce by 15 in 2012. According to owners, the Bechtou location sells more furniture than all other stores locations combined. Seminole Marine, a company that builds boats, bought out another company and added 48 jobs to Cairo. Monrovia, one of the nation's largest retailers of nursery and landscaping plants, is also one of the county's largest employers, but they are down to 200. Koyo Bearings is holding steady at about 300 employees and Performance Food Group employs about 120. Other large employers in the county are Aaron's, the Pinewood Nursing, Seminole Wind Restaurant and Robert Bearden, Inc., a local trucking company.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of Grady County:

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Support technical colleges within the region.

Objective: To increase the level of education of the region's workforce.

REPORT OF ACCOMPLISHMENTS

Grady, Housing									
Work Items/Projects	2012	2013	2014	2015	2016	Estimated Cost	Responsible Party	Possible Funding Sources	STATUS:
Continue to support technical training of code enforcement officials	X	X	X	X	X	N/A	County	Grants/General Fund	Complete
Increase the use of demolition programs to remove dilapidated and substandard housing as needed	X	X	X	X	X	N/A	County	Operating Budget	Postponed. Board of Commissioners has not adopted the required Ordinance to allow this. County staff continues to promote this policy. We will try again later.

RESOLUTIONS

A RESOLUTION TO ADOPT THE GRADY COUNTY COMPREHENSIVE PLAN

WHEREAS, Grady County, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the County Commission held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, Grady County examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the Grady County Commission that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 19th day of July 2016.

Commission Chair

Charles Norton

Witness

Carrie Kines, County Clerk

CITY OF WHIGHAM

COMMUNITY PROFILE

Located seven miles west of the City of Cairo and 15 miles east of the City of Bainbridge, the 1.18 square mile City of Whigham is home to 471 people. (Currently the total estimated population for the County is 466). The climate is temperate with long warm summers and short cool winters. It lies within an area that receives approximately 53 inches of rainfall per year with an average temperature of 67 degrees.

If current demographic trends continue the total population in Whigham could top 487 by 2020 and would maintain to some degree the current racial profile of roughly 72% Caucasian, 22% African American and 2% Hispanic.

S.W.O.T.

Strengths

- Proximity to Recreational Lakes
- Hwy 84 is a major transportation route with high traffic counts
- Great k-8 school
- Progressive, Open-minded local government
- Small town charm i.e. feeling of being safe
- Proximity to Wolf creek preserve and a concentration of the rare Trout Lily.

Weaknesses

- Lack of businesses
- Lack of parking
- Dilapidated structures
- Community Complacency
- No sewer system

Opportunities

- Offer a safe community for residents
- Major transportation route
- Trout Lily Festival
- Downtown Revitalization
- Underused community use grounds (Rattlesnake Roundup grounds)
- Plenty of development opportunities

Threats

- US Hwy 84 is managed by the GDOT so the City of Whigham has no say or control over the roadway.
- Cost to renovate buildings (cost of materials in particular) in downtown Whigham
- Community Complacency
- State/Federal government over regulation
- No zoning restrictions in Grady County could result in undesirable uses adjacent to Whigham.

NEEDS AND OPPORTUNITIES

Needs

We need to promote revitalization of our downtown

- Like many small rural towns, Whigham has experienced a significant decline in businesses located in the downtown which is its only commercial area at present.

We'd like to develop and promote tourism opportunities in our community

- By capitalizing on their proximity to the Wolf Creek Trout Lily Preserve and expanding the utilization of the underused Rattlesnake Round Grounds Whigham wants to have a more increased tourism presence to help diversify the local economy.

We need more parking to help aid in downtown economic development

- In order to attract business to the downtown, Whigham needs to address the lack of parking. Parking may be adequate at this point but it's a bit of a conundrum which comes first? Parking to attract business or businesses that necessitate the need for more parking?

A sewer system is needed for downtown revitalization

- Whigham has never had a sewer system and current health department regulations have made it very difficult to open a business with only a septic tank (oftentimes undersized) available. By putting some type of sewer system in place the City of Whigham will more likely to attract more of a variety businesses.

Opportunities

Proximity to Tired Creek Recreational Lake

- The Tired Creek Lake project is taking shape and Whigham is 5 miles away from it offering them a unique opportunity to capitalize on the eventual influx of tourists to the recreational lake

Major transportation route through Whigham

- US Hwy 84 cuts right through the City of Whigham and although it can be seen as an issue in many respects, the City of Whigham is considering it an opportunity to attract business to the downtown.

Proximity to Wolf Creek Preserve and a concentration of the rare Trout Lily

- Within two miles of the City of Whigham is Wolf Creek Preserve. The preserve is home to the rare Trout Lily and a number of other rare or endangered plants, including trilliums and various Orchids. The Trout Lily's appearance in this location in the United States is a bit of a mystery as it is usually found in the Appalachian Mountains but the conditions are in this location apparently are favorable for the rare flora.

Small town charm, good school and feeling of being "safe"

- With a low (almost non-existent) crime rate the City of Whigham gives its residents of the safe feeling of small town life but still within relatively close proximity to the amenities of life. The City also boasts a K-8 school that has achieved a very good rating in the State of Georgia. This charm puts Whigham in a good position to attract residential development.

Downtown revitalization/reinvention and other development opportunities

- With a number of empty buildings in the downtown and many of them in need of repairs, the City of Whigham has an opportunity or in a sense a "blank slate" that can be used to revitalize and reinvent downtown Whigham. There are also good opportunities for development along Hwy 84 outside the downtown area.

GOALS & POLICIES

Economic Development

Encourage development or expansion of businesses and industries that are suitable for Whigham.

Policy 1: We will consider the employment needs and skill levels of our existing population in making decisions on proposed economic development projects.

Policy 2: We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.

Local Preparedness

Identify and put in place the prerequisites for the type of future the community seeks to achieve.

Policy 1: Our community will use planned infrastructure expansion to support development in areas identified (in the comprehensive plan) as suitable for such development.

Sense of Place

Protect and enhance Whigham's unique qualities.

Policy 1: We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.

Regional Cooperation

Cooperate with neighboring jurisdictions to address shared needs.

Policy 1: We will seek opportunities to share services and facilities with neighboring jurisdictions when mutually beneficial.

Policy 2: We will consult other public entities in our area when making decisions that are likely to impact them.

Policy 3: We will provide input to other entities in our area when they are making decisions that are likely to have an impact on our community or our plans for future development.

ECONOMIC DEVELOPMENT

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for the City of Whigham.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Grady County has the lowest unemployment rate in the region, thanks to a very diverse roster of businesses. Turner Furniture opened a retail facility in the Bechtou community, creating 45 jobs in 2010 and lowered their workforce by 15 in 2012. According to owners, the Bechtou location sells more furniture than all other stores locations combined. Seminole Marine, a company that builds boats, bought out another company and added 48 jobs to Cairo. Monrovia, one of the nation's largest retailers of nursery and landscaping plants, is also one of the county's largest employers, but they are down to 200. Koyo Bearings is holding steady at about 300 employees and Performance Food Group employs about 120. Other large employers in the county are Aaron's, the Pinewood Nursing, Seminole Wind Restaurant and Robert Bearden, Inc., a local trucking company.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of City of Whigham:

Goal: Encourage and increase regional collaboration among cities and counties.

Objective: To increase the likelihood of large-scale economic development projects resulting in jobs and private investment.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

Goal: Increase tourism in the region.

Objective: Increase the region's tax base and local government's ability to provide services and recreational opportunities.

FUTURE LAND USE DESCRIPTION

The Future Land Use Map provides a detailed guide for land use change within the City of Whigham. The Future Land Use Map provides specific parcel-based guidance for zoning applications and to a lesser extent, long range vision for growth. As such, the future land use categories are closely tied to the city's zoning ordinance.

Suburban Residential

This residential category is intended to correspond to areas that are developed, or projected to be developed, for neighborhoods and individual lots exclusive or nearly exclusive low-density, detached single-family residences. The density of residential development in this category ranges from less than one unit per acre to a maximum of approximately two units per acre. This category does not include provisions for manufactured homes, though some manufactured homes may exist in scattered locations at the time of plan adoption. This category is intended to be implemented with one or more suburban residential zoning districts.

Urban Low-Density Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Urban low-density means residential development ranging from three to six (3-6) units per acre (i.e., lot sizes of from 7,500 square feet to 15,000 square feet. The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more urban low-density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Public-Institutional

This category is the same as the existing land use category by the same name. It includes state, federal, or local government uses, and institutional land uses. Government uses include city halls and government building complexes, police and fire stations, libraries, prisons, post offices, schools, military installations, etc. Examples of institutional land uses include colleges, churches, cemeteries, hospitals, etc.

Neighborhood Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of three sub-classifications of commercial land use, neighborhood business areas intended to provide suitable areas for the retailing of goods and the provision of services to adjacent and nearby residential neighborhoods. Individual establishments are typically smaller in scale, so as not to impact the residential character of the areas these neighborhood commercial districts serve. Highway-oriented and automobile-related sales and service establishments and uses that rely on passer-by traffic from highways are inappropriate. This category is intended to be implemented with a neighborhood business zoning district.

Highway Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of three sub-classifications of commercial land use, highway commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with a highway commercial zoning district.

Mixed Use

This category corresponds to the city's central business district as well as some existing commercial areas targeted for mixed use redevelopment. Downtown Whigham consists of a concentration of region-serving and "Main Street" type commercial stores. It is also intended to provide a mixture of land uses in addition to commercial, including institutional, public, office, and housing mixed in with non-residential uses. This district is unique in that the existing development pattern consists of buildings covering very large percentages of the lot, little if any building setbacks from front, side, and rear property lines, and a reliance on on-street parking or shared parking lots. This district has higher intensities of lot coverage and floor area than the other commercial land use categories. This area is intended to be implemented with a CBD zoning district.

Light Industrial

Light industrial districts are established where some industrial operations such as warehousing and low-intensity manufacturing can occur without objectionable impacts such as noise, vibration, smoke, dust, gas, fumes, odors, and radiation and that do not create fire or explosion hazards or other objectionable conditions.

Transportation, Communications and Utilities

This category is the same as the existing land use category by the same name. It includes such uses as major transportation routes, public transit stations, power generation plants, railroad facilities, radio towers, telephone switching stations, electric utility substations, airports, and other similar uses.

Parks, Recreation and Open Space

This category is the same as the existing land use category by the same name. It corresponds with land dedicated or proposed to be dedicated to active or passive recreational uses and open space, including flood plains. These areas may be either publicly or privately owned and may include playgrounds, public parks, nature preserves, wildlife management areas, national forests, golf courses, recreation centers and similar uses. In other cases they may be vacant lands which are intended to be held in the future for park or playground development or as buffers between neighborhoods and heavy industrial uses.

RESOLUTIONS

A RESOLUTION TO ADOPT THE GRADY COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Whigham, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, the City of Whigham examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Whigham, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 9th day of August 2016.

Witness

Mayor

George Trulock

Lisa Calhoun, City Clerk

CITY OF CAIRO

COMMUNITY PROFILE

Located in the center of Grady County and being the county seat, the City of Cairo and its the 9.37 square miles was home to 9,583 people in 2010. (Currently the total estimated population for the Cairo is 9,541). Cairo lies 13.5 miles west of the City of Thomasville and 30 miles north of Tallahassee, Florida. The climate is temperate with long warm summers and short cool winters. It lies within an area that receives approximately 53 inches of rainfall per year with an average temperature of 67 degrees.

If current demographic trends continue the total population in Cairo could sink to 9,529 by 2020 and would maintain to some degree the current racial profile of roughly 62.8% Caucasian, 28.7% African American and 10% Hispanic. Although this racial profile mirrors that of the State in general, other aspects of the County's demography more closely matches those of neighboring counties, particularly in the realms of the income distribution, poverty rates and educational attainment.

Data Note: Households with children include any households with people under age 18, related or not. Multigenerational households are families with 3 or more parent-child relationships. Unmarried partner households are usually classified as nonfamily households unless there is another member of the household related to the householder. Multigenerational and unmarried partner households are reported only to the tract level. Esri estimated block group data, which is used to estimate polygons or non-standard geography.

S.W.O.T.

Strengths

- Full service provider
- Active nuisance & abatement program
- Close proximity to Tallahassee
- Technical College
- Roddenbery Memorial Library
- Grady History Museum/Zebulon Theater/Grady Cultural Center
- Financially stable
- Hospital
- Safe community
- Telecommunication capability

Weaknesses

- Poverty rate
- Education attainment
- Lack of entertainment opportunities
- Need additional lodging (hotels/motels)

Opportunities

- Industrial park property availability
- Population on the edge of 10,000
- Downtown streetscape project (Transportation Enhancement)
- College & career academy
- Work with Grady County

Threats

- Regulatory compliance
- Unfunded government mandates

NEEDS AND OPPORTUNITIES

Needs

We need to improve our workforce.

- Cairo suffers from a higher than average poverty rate and lacks the adequate level of educational attainment to make it an attractive destination for many businesses and industries.

We suffer from a lack of entertainment opportunities.

- Whether its arts and culture or fine dining, Cairo suffers from essentially nothing for its citizens to do.

We need more lodging facilities to assist with capturing tourist dollars.

- There are motels/hotels in Cairo but they are limited. Newer facilities and even some bed and breakfast facilities would be a great benefit.

We have litter on our highways.

- It is a bad sign to visitors when the first thing they see as they come into Cairo is trash along the roadways. A cleanup campaign or participation in the adopt-a-highway program would certainly help.

Opportunities

Lots of amenities to offer prospective business and industry.

- The City of Cairo is a full service provider of utilities with good telecommunication capability. It also has available industrial park property. A local technical college is available as well as a college & career academy at the local school that can provide specialized job training. These have the ability to attract business and industry looking for certain skill sets in their employees.

Attractive downtown environment with parking and foot traffic.

- The Cairo downtown has a lot of possibilities with many of the buildings in great shape. The city is still in the process of completing streetscape improvements that should add to the downtown experience.

Attractive affordable destination for senior living

- Despite not have a lot of entertainment the City of Cairo is an attractive option for seniors because it has a local hospital and it is a safe community in close proximity to Tallahassee.

Small town charm, good school and feeling of being “safe”

- Cairo is pushing the 10,000 mark in population but at the same time retains that small town feel and charm. The nuisance and abatement program helps keep the town looking and a relatively low crime rate reinforces that feeling of safe.

GOALS & POLICIES

Economic Development

Encourage development or expansion of businesses and industries that are suitable for Cairo.

- Policy 1: We will support programs for retention, expansion and creation of businesses that are a good fit for our community's economy in terms of job skill requirements and linkages to existing businesses.*
- Policy 2: We will take into account impacts on infrastructure and natural resources in our decision making on economic development projects.*
- Policy 3: We will carefully consider costs as well as benefits in making decisions on proposed economic development projects.*

Transportation

Improve transportation infrastructure.

- Policy 1: Our new and reconstructed roadways will be appropriately designed, using context sensitive design considerations, to enhance community aesthetics and to minimize environmental impacts.*
- Policy 2: Our new and reconstructed roadways will be designed to accommodate multiple functions, including pedestrian facilities, parking, bicycle routes, public transit (if applicable) as well as local vehicular circulation.*
- Policy 3: We support creation of a community-wide pedestrian/bike path network.*

Housing

Promote an adequate range of safe, affordable, inclusive, and resource efficient housing in the Cairo.

- Policy 1: We will eliminate substandard or dilapidated housing in our community.*
- Policy 2: We will stimulate infill housing development in existing neighborhoods.*
- Policy 3: We will promote senior living facilities in our community to provide for housing for the elderly.*

Sense of Place

Promote and embrace the sense of place of Cairo, Whigham and Grady County.

- Policy 1: Our decisions on new development will contribute to, not take away from, our community's character and sense of place.*
- Policy 2: We encourage development that is sensitive to the historic context, sense of place, and overall setting of the community.*
- Policy 3: We want development whose design, landscaping, lighting, signage, and scale add value to our community.*
- Policy 4: Our gateways and corridors will create a "sense of place" for our community.*
- Policy 5: We will encourage the development of downtown as a vibrant center of the community in order to improve overall attractiveness and local quality of life.*
- Policy 6: We are committed to providing pleasant, accessible public gathering places and parks throughout the community.*

Educational Opportunities

Make educational and training opportunities readily available to enable all community residents to improve their job skills, adapt to technological advances, or pursue life ambitions.

- Policy 1: We will work with the local school board to encourage school location decisions that support the community's overall growth and development plans.*

ECONOMIC DEVELOPMENT

The Comprehensive Economic Development Strategy (CEDS) as developed by the Southwest Georgia Regional Commission under a grant from the US Department of Commerce Economic Development Administration is hereby incorporated by reference into this Comprehensive Plan to serve as the Economic Development Element for the City of Cairo.

The Southwest Georgia Regional Commission's (SWGRC) Comprehensive Economic Development Strategy (CEDS) was designed to bring together the public and private sectors in the creation of an economic roadmap to diversify and strengthen the regional economy. The SWGRC CEDS analyzed the regional economy and serves as a guide for establishing regional goals and objectives, a regional plan of action, and the investment priorities and funding sources.

As a performance-based plan, this CEDS plays a critical role in adapting to global economic conditions by fully utilizing the region's unique advantages to maximize economic opportunity for its residents by attracting the private investment that creates jobs. The SWGRC CEDS is a regionally owned strategy that is the result of a continuing economic development planning process developed with regional public and private sector participation. This plan sets forth the goals and objectives necessary to solve the economic development problems of the Southwest Georgia region and clearly defines the measures of success.

The Southwest Georgia CEDS gives an overview of the region briefly describing geography, population, economy, labor, and workforce development and use, education, transportation access, environment, and regional resources. It reviews the state of the Regional Economy and provides a list of achievable Goals and Objectives for the region, a Plan of Action to ensure success, and Performance Measures used to evaluate the Southwest Georgia Regional Commission's successful development and implementation of the 2012-2017 CEDS. Implementation of the goals identified in this plan is significant to the economic future of the SWGRC District.

Policies, issues and opportunities, and Short-Term Work Program implementation strategies located in the current Comprehensive Plans for each of our 14 county region were used extensively to develop the CEDS Goals and Objectives, Vital Projects and Problems and Opportunities.

Grady County has the lowest unemployment rate in the region, thanks to a very diverse roster of businesses. Turner Furniture opened a retail facility in the Bechtou community, creating 45 jobs in 2010 and lowered their workforce by 15 in 2012. According to owners, the Bechtou location sells more furniture than all other stores locations combined. Seminole Marine, a company that builds boats, bought out another company and added 48 jobs to Cairo. Monrovia, one of the nation's largest retailers of nursery and landscaping plants, is also one of the county's largest employers, but they are down to 200. Koyo Bearings is holding steady at about 300 employees and Performance Food Group employs about 120. Other large employers in the county are Aaron's, the Pinewood Nursing, Seminole Wind Restaurant and Robert Bearden, Inc., a local trucking company.

Included below are goals and objectives from the CEDS which are aligned with the current economic development goals of the City of Cairo:

Goal: Expand existing industries.

Objective: To increase the potential that existing industries will expand in the region.

Goal: Improve infrastructure of water, sewer roads and technology.

Objective: To increase the likelihood that businesses will be started or moved to the region.

FUTURE LAND USE DESCRIPTION

The Future Land Use Map provides a detailed guide for land use change within the City of Cairo. The Future Land Use Map provides specific parcel-based guidance for zoning applications and to a lesser extent, long range vision for growth. As such, the future land use categories are closely tied to the city's zoning ordinance.

Suburban Residential

This residential category is intended to correspond to areas that are developed, or projected to be developed, for neighborhoods and individual lots exclusive or nearly exclusive low-density, detached single-family residences. The density of residential development in this category ranges from less than one unit per acre to a maximum of approximately two units per acre. This category does not include provisions for manufactured homes, though some manufactured homes may exist in scattered locations at the time of plan adoption. This category is intended to be implemented with one or more suburban residential zoning districts.

Urban Low-Density Residential

This residential category is intended to correspond primarily to existing urban neighborhoods but is also proposed for undeveloped areas adjacent to existing urban neighborhoods. Urban low-density means residential development ranging from three to six (3-6) units per acre (i.e., lot sizes of from 7,500 square feet to 15,000 square feet. The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be allowed by applicable zoning regulations under certain circumstances. This future land use category is implemented with one or more urban low-density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another. Furthermore, different lot sizes may be established as may be necessary.

Urban Medium-Density Residential

This residential category is intended to correspond primarily to those existing grid-pattern urban neighborhoods that have lots as small as 5,000 to 6,000 square feet (lot frontages of 50-60 feet). To a lesser extent this category may also apply to undeveloped areas adjacent to existing urban neighborhoods where it is logical to extend the existing grid subdivision pattern. Urban medium density means residential development ranging from approximately six to as many as nine (6-9) units per acre (i.e., lot sizes as small as 5,000 to 6,000 square feet). In some cases, densities of existing development may be slightly lower or higher than this range. The primary housing type is detached, single-family residential, though other housing types such as duplexes and manufactured homes may be appropriate if allowed by applicable zoning regulations. This future land use category is implemented with one or more urban medium density residential zoning districts. Regulations may differ according to zoning district; for instance, manufactured homes may be permitted in one urban residential category but not in another.

Public-Institutional

This category is the same as the existing land use category by the same name. It includes state, federal, or local government uses, and institutional land uses. Government uses include city halls and government building complexes, police and fire stations, libraries, prisons, post offices, schools, military installations, etc. Examples of institutional land uses include colleges, churches, cemeteries, hospitals, etc.

Office-Professional

This category is for land dedicated to business and service establishments that do not have retail sales and which operate in an office environment. It is a subset of commercial land use. Planning consultants elected to account for office land uses separately from commercial land uses, because they are more compatible with residential land uses and can serve as a transitional land use between commercial and residential areas.

Neighborhood Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of three sub-classifications of commercial land use, neighborhood business areas intended to provide suitable areas for the retailing of goods and the provision of services to adjacent and nearby residential neighborhoods. Individual establishments are typically smaller in scale, so as not to impact

the residential character of the areas these neighborhood commercial districts serve. Highway-oriented and automobile-related sales and service establishments and uses that rely on passer-by traffic from highways are inappropriate. This category is intended to be implemented with a neighborhood business zoning district.

Highway Commercial

This category is for land dedicated to non-industrial business uses, including retail sales, services, and entertainment facilities. Commercial uses may be located as a single use in one building or grouped together in a shopping center.

As one of three sub-classifications of commercial land use, highway commercial areas are intended to provide suitable areas for those business and commercial uses which primarily serve the public traveling by automobile and which benefit from direct access to highways. Such districts are generally designed so that the automobile has precedence over the pedestrian. This area is intended to be implemented with a highway commercial zoning district.

Mixed Use

This category corresponds to the city's central business district as well as some existing commercial areas targeted for mixed use redevelopment. Downtown Cairo consists of a concentration of region-serving and "Main Street" type commercial stores. It is also intended to provide a mixture of land uses in addition to commercial, including institutional, public, office, and housing mixed in with non-residential uses. This district is unique in that the existing development pattern consists of buildings covering very large percentages of the lot, little if any building setbacks from front, side, and rear property lines, and a reliance on on-street parking or shared parking lots. This district has higher intensities of lot coverage and floor area than the other commercial land use categories. This area is intended to be implemented with a CBD zoning district.

Light Industrial

Light industrial districts are established where some industrial operations such as warehousing and low-intensity manufacturing can occur without objectionable impacts such as noise, vibration, smoke, dust, gas, fumes, odors, and radiation and that do not create fire or explosion hazards or other objectionable conditions.

Heavy Industrial

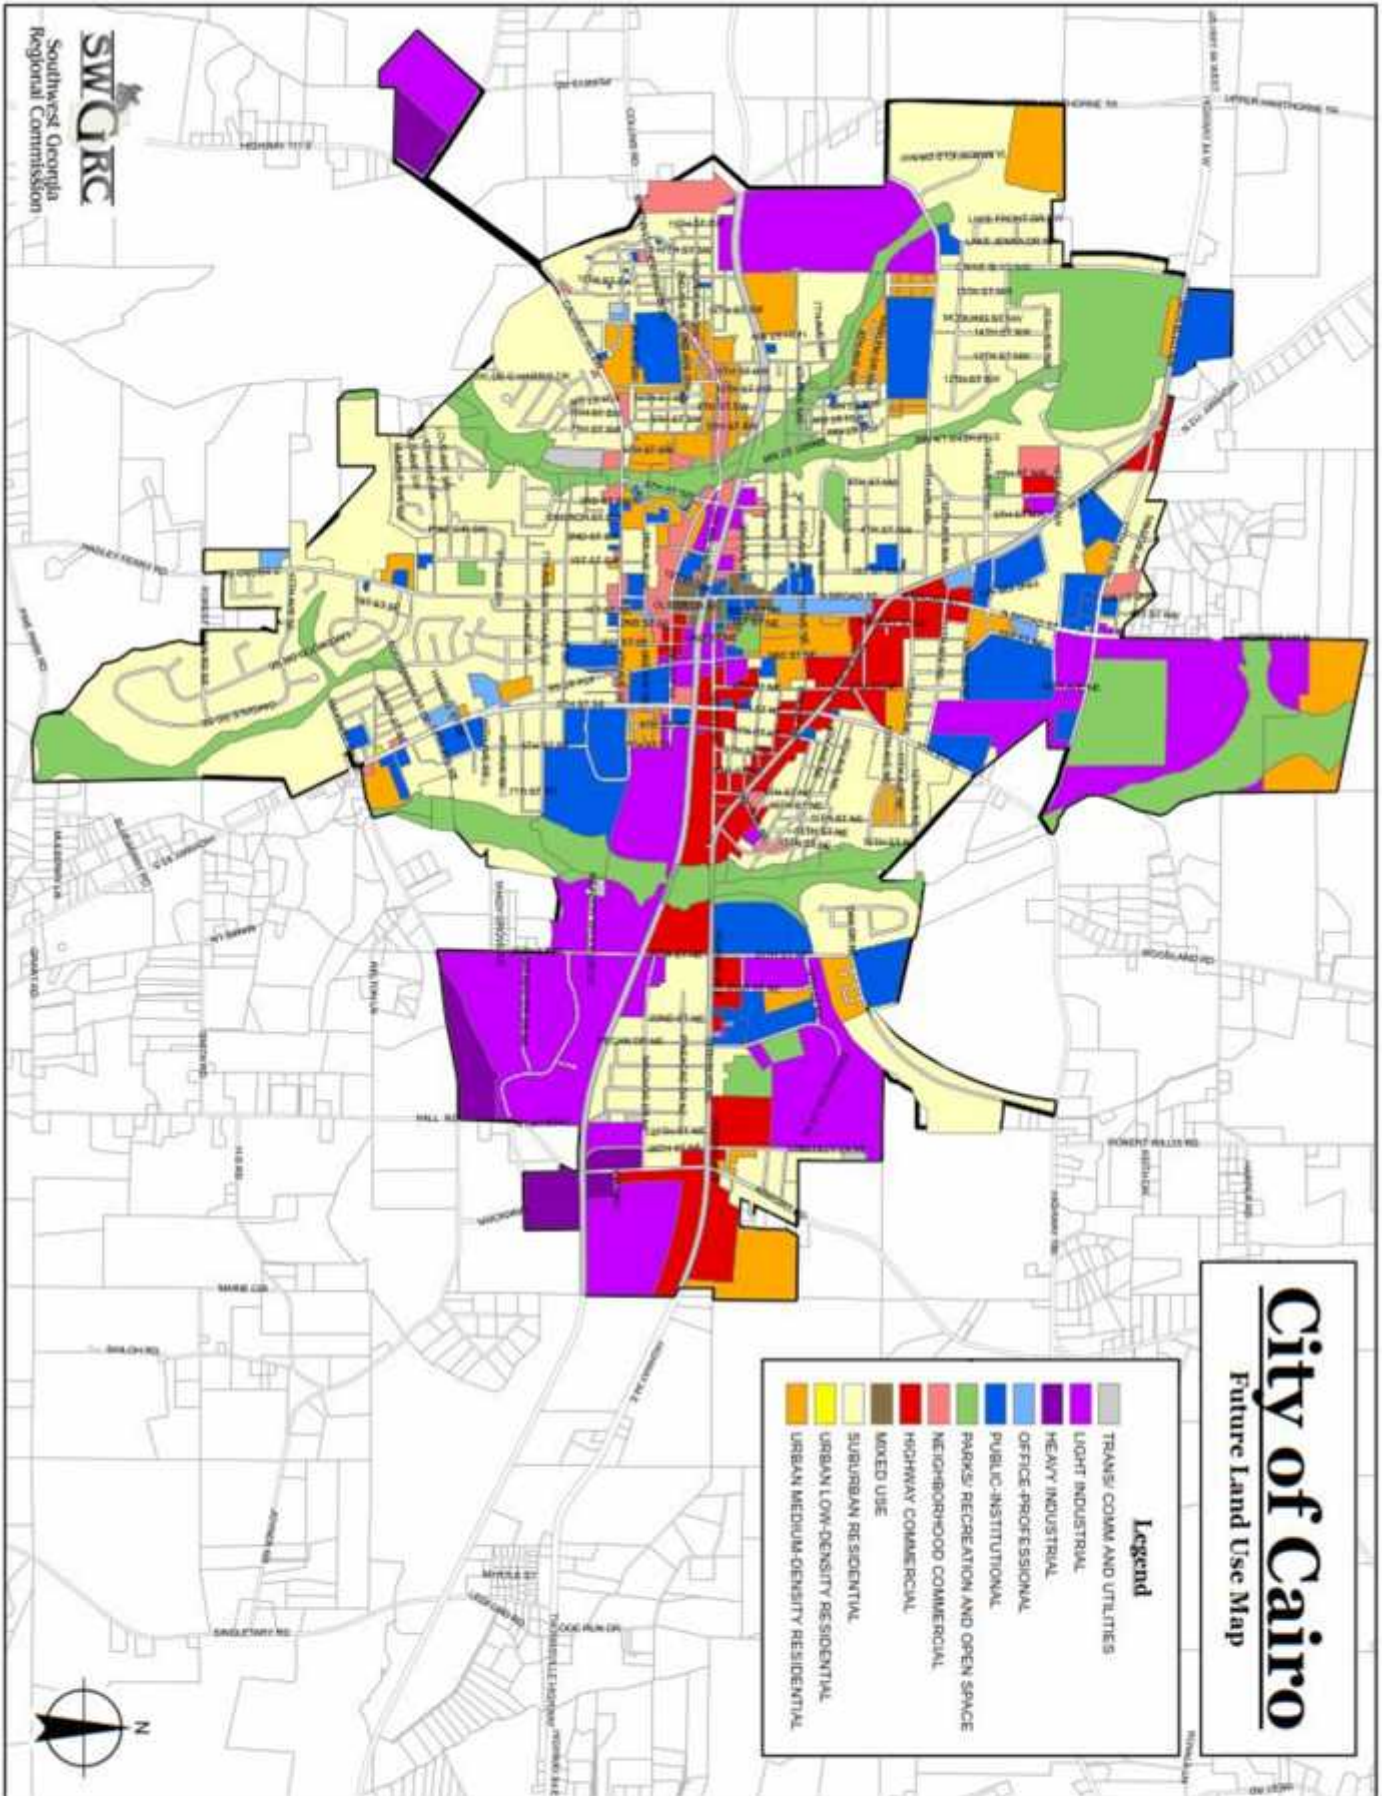

This category corresponds to industrial operations which may be objectionable due to the emission of noise, vibration, smoke, dust, gas, fumes, odors, or radiation and that may create fire or explosion hazards or other objectionable conditions. Uses within this district may require substantial quantities of water for manufacturing operations and may require rail, air, or water transportation.

Transportation, Communications and Utilities

This category is the same as the existing land use category by the same name. It includes such uses as major transportation routes, public transit stations, power generation plants, railroad facilities, radio towers, telephone switching stations, electric utility substations, airports, and other similar uses.

Parks, Recreation and Open Space

This category is the same as the existing land use category by the same name. It corresponds with land dedicated or proposed to be dedicated to active or passive recreational uses and open space, including flood plains. These areas may be either publicly or privately owned and may include playgrounds, public parks, nature preserves, wildlife management areas, national forests, golf courses, recreation centers and similar uses. In other cases they may be vacant lands which are intended to be held in the future for park or playground development or as buffers between neighborhoods and heavy industrial uses.

RESOLUTIONS

A RESOLUTION TO ADOPT THE GRADY COUNTY COMPREHENSIVE PLAN

WHEREAS, the City Council of Cairo, Georgia found it necessary to update their joint comprehensive plan as part of the requirements to maintain its Qualified Local Government Status;

WHEREAS, the City Council held public meetings and hearings to allow private citizens to review the Comprehensive Plan and gathered citizens input;

WHEREAS, in the development of the comprehensive plan, the City of Cairo examined, evaluated, and where applicable, incorporated considerations of both the Flint River Basin Regional Water Development and Conservation Plan and the Environmental Planning Criteria pursuant to O.C.G.A. 12-2-8, and;

THEREFORE, BE IT RESOLVED by the City Council of Cairo, Georgia that the Comprehensive Plan shall be adopted, hereby certifying that adequate citizen participation requirements have been met.

Adopted on the 11th day of July 2016.

Witness

Mayor

Robert Burns, Sr.

Carolyn Lee, City Clerk

Public Hearing NOTICE

Grady County is conducting a Public Hearing to begin the Grady County Comprehensive Plan on March 3 at 6 p.m. at 250 N Broad St, Cairo, GA. The current plan will expire on October 31, 2016. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process.

The purpose of this hearing is to brief the community on the process to be used to develop the plan, opportunities for public participation in development of the plan, and to obtain input on the proposed planning process. Once public comments have been addressed, the community may begin the process of developing the plan.

The current Comprehensive Plan is available by visiting www.gradycountyga.org.

Questions should be directed to Carlos Tobar at 377-1512 or by calling Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.

City of Cairo Public Hearing Notice

The City of Cairo is conducting a Public Hearing to begin the City of Cairo's Comprehensive Plan at 6:00 pm on Monday, February 23, 2015 at the Council Chambers. The current plan will expire on October 31, 2016. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process.

The purpose of this hearing is to brief the community on the process to be used to develop the plan, opportunities for public participation in development of the plan, and to obtain input on the proposed planning process. Once public comments have been addressed, the community may begin the process of developing the plan.

Copies of the current Comprehensive Plan are available for viewing at City Hall between the hours of 8:00 am and 5:00 pm.

Questions should be directed to the City Manager's office at 229-377-1722. Or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.

Public Hearing Notice

The City of Whigham is conducting a Public Hearing to begin the Whigham Comprehensive Plan on April 2, 2015 at 7PM at the Whigham Council Chambers. The current plan will expire on October 31, 2016. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing prior to the start of the planning process.

The purpose of this hearing is to brief the community on the process to be used to develop the plan, opportunities for public participation in development of the plan, and to obtain input on the proposed planning process. Once public comments have been addressed, the community may begin the process of developing the plan.

Copies of the current Comprehensive Plan are available for viewing at City Hall between the hours of 8AM – 5PM.

Questions should be directed to the City of Whigham, Tel: (229)762-4215. Or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.

CITY OF CAIRO PUBLIC HEARING NOTICE

The City of Cairo is conducting a Public Hearing to present a draft of the Grady County Comprehensive Plan (Plan! Grady 2016) on November 23, 2015 at 6:00 pm in Council Chambers located at 101-B North Broad Street. The current plan will expire on October 31, 2016. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once the plan has been drafted and made available for public review, but prior to transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions or revisions, and notify the community of when the plan will be submitted to the Regional Commission for review.

Copies of the draft Comprehensive Plan are available for viewing and downloading at HYPERLINK <http://www.grady-county-comprehensive-plan.com>/<http://www.grady-county-comprehensive-plan.com>.

A copy can be obtained from City Hall between the hours of 8:00 am to 5:00 pm. Questions should be directed to the City of Cairo office Tel: (229) 377-1722. Or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616

Grady County Board of Commissioners

Public Hearing Notice

Grady County is conducting a Public Hearing to present a draft of the Grady County Comprehensive Plan (Plan! Grady 2016) on November 17, 2015 at 6:00 p.m. in the Commissioners Board Room. The current plan will expire on October 31, 2016. In accordance with the Georgia Minimum Standards and Procedures for Local Comprehensive Planning (Chapter 110-12-1), each community must conduct a public hearing once the plan has been drafted and made available for public review, but prior to transmittal to the Regional Commission for review.

The purpose of this hearing is to brief the community on the contents of the plan, provide an opportunity for residents to make final suggestions, additions or revisions, and notify the community of when the plan will be submitted to the Regional Commission for review.

Copies of the draft Comprehensive Plan are available for viewing and downloading at www.grady-county-comprehensive-plan.com.

Questions should be directed to Carlos Tobar, County Administrator at the Commissioner's Office Tel: 229/377-1512 or, alternatively call Steve O'Neil, Southwest Georgia Regional Commission, 229-522-3552 ext.1616.

CITY OF WHIGHAM Public Hearing Notice
