Land use and climate change impacts on erosion and sediment transport

ICCE Symposium 2018 – Climate Change Impacts on Sediment Dynamics: Measurement, Modelling and Management, Moscow, Russia, 27–31 August 2018 Editor(s): S. Chalov, V. Golosov, A. Collins, and M. Stone

[Preface: Land use and climate change impacts on erosion and sediment transport](#)

Sergey Chalov, Valentin Golosov, Adrian Collins, and Mike Stone

Proc. IAHS, 381, 1-1, <https://doi.org/10.5194/piahs-381-1-2019>, 2019

[Scientometric analysis of the activities of the International Commission for Continental Erosion \(ICCE\)](#)

Valeriy P. Bondarev

Proc. IAHS, 381, 3-6, <https://doi.org/10.5194/piahs-381-3-2019>, 2019

[Integrated approach to study river fluxes, water and sediment sources apportionment in sparsely monitored catchment](#)

Sergey Chalov, Pavel Terskii, Thomas Pluntke, Ludmila Efimova, Vasiliy Efimov, Vladimir Belyaev, Anna Terskaia, Michal Habel, Daniel Karthe, and Christian Bernhofer

Proc. IAHS, 381, 7-11, <https://doi.org/10.5194/piahs-381-7-2019>, 2019

[Lake sedimentation as an agent of postglacial transformation of interfluves and fluvial landscapes of the Borisoglebsk Upland, Central European Russia](#)

Ekaterina V. Garankina, Vladimir R. Belyaev, Ilya G. Shorkunov, Yuliya V. Shishkina, Pavel V. Andreev, and Elena D. Sheremetskaya

Proc. IAHS, 381, 13-20, <https://doi.org/10.5194/piahs-381-13-2019>, 2019

[Contemporary gully erosion trend in the northern part of the forest-steppe zone of the Russian Plain: a case study from the Republic of Tatarstan, European Russia](#)

Aidar Sharifullin, Artur Gafurov, Regina Medvedeva, Valentin Golosov, Aleksandr Dvinskih, Artem Gusarov, and Benedict Essuman-Quainoo

Proc. IAHS, 381, 21-24, <https://doi.org/10.5194/piahs-381-21-2019>, 2019

[Modern patterns of spatial distribution of the main soil parameters: case study of the Republic of Tatarstan, Russia](#)

Artur Gafurov and Aidar Sharifullin

Proc. IAHS, 381, 25-29, <https://doi.org/10.5194/piahs-381-25-2019>, 2019

[Impacts of fluvial processes on medieval settlement Lukovskoe \(Tatarstan, Russia\)](#)

Artur Gafurov, Iskander Gainullin, Bulat Usmanov, Petr Khomyakov, and Alexey Kasimov

Proc. IAHS, 381, 31-35, <https://doi.org/10.5194/piahs-381-31-2019>, 2019

[Magnitude and frequency of debris and slush flows in the Khibiny mountain valleys, Kola Peninsula, NW Russia](#)

Ekaterina V. Garankina, Vladimir R. Belyaev, Fedor A. Romanenko, Maxim M. Ivanov, Natalia V. Kuzmenkova, Artem L. Gurinov, and Egor D. Tulyakov
Proc. IAHS, 381, 37-47, <https://doi.org/10.5194/piahs-381-37-2019>, 2019

[Initial results of sediment yield measurement interpretation using a regional approach: Southern Italy case study](#)

Paolo Porto and Giovanni Callegari
Proc. IAHS, 381, 49-54, <https://doi.org/10.5194/piahs-381-49-2019>, 2019

[Suspended sediment yield and climate change in Kamchatka, Far East of Russia](#)

Ludmila V. Kuksina
Proc. IAHS, 381, 55-64, <https://doi.org/10.5194/piahs-381-55-2019>, 2019

[Numerical modeling and forecast of channel changes on the river Lena near city Yakutsk](#)

Pavel Golovlyov, Ekaterina Kornilova, Inna Krylenko, Vitaly Belikov, Aleksandr Zavadskii, Eugeniya Fingert, Natalya Borisova, and Elizaveta Morozova
Proc. IAHS, 381, 65-71, <https://doi.org/10.5194/piahs-381-65-2019>, 2019

[Two-dimensional hydrodynamic modelling of channel processes and floods characteristics at the confluence of the Amur and Zeya rivers](#)

Eugeniya Fingert, Inna Krylenko, Vitaly Belikov, Pavel Golovlyov, Aleksandr Zavadskii, and Mikhail Samokhin
Proc. IAHS, 381, 73-77, <https://doi.org/10.5194/piahs-381-73-2019>, 2019

[Quantifying channel bank erosion of a small mountain river in Russian wet subtropics using erosion pins](#)

Yulia Kuznetsova, Valentin Golosov, Anatoly Tsyplenkov, and Nadezhda Ivanova
Proc. IAHS, 381, 79-86, <https://doi.org/10.5194/piahs-381-79-2019>, 2019

[Contemporary suspended sediment yield of Caucasus mountains](#)

Anatoly Tsyplenkov, Matthias Vanmaercke, and Valentin Golosov
Proc. IAHS, 381, 87-93, <https://doi.org/10.5194/piahs-381-87-2019>, 2019

[Reconstruction of long-term dynamics of Chernobyl-derived ¹³⁷Cs in the Upa River using bottom sediments in the Scheckino reservoir and semi-empirical modelling](#)

Alexei V. Konoplev, Maxim M. Ivanov, Valentin N. Golosov, and Evgenyi A. Konstantinov
Proc. IAHS, 381, 95-99, <https://doi.org/10.5194/piahs-381-95-2019>, 2019

[Temporal trends of ¹³⁷Cs activity concentration in pond waters in the vicinity of Fukushima Dai-ichi nuclear power plant](#)

Yoshifumi Wakiyama, Alexei Konoplev, Toshihiro Wada, Tsugiko Takase, Yasunori Igarashi, Kenji Nanba, and Ian Byrnes
Proc. IAHS, 381, 101-106, <https://doi.org/10.5194/piahs-381-101-2019>, 2019

[Projections of Selenga river runoff in the XXI century and uncertainty estimates](#)

Tatiana Millionshchikova
Proc. IAHS, 381, 107-112, <https://doi.org/10.5194/piahs-381-107-2019>, 2019

[Modelling future hydroclimatic effects on the *Coregonus migratorius* spawning migration in the Selenga River and Lake Baikal](#)

Vsevolod Moreydo, Tatiana Millionshchikova, and Sergey Chalov
Proc. IAHS, 381, 113-119, <https://doi.org/10.5194/piahs-381-113-2019>, 2019

[Time changes of dose equivalent rate above the soil surface as indication of natural attenuation processes](#)

Alexei V. Konoplev, Toshihiro Yoshihara, and Yoshifumi Wakiyama
Proc. IAHS, 381, 121-126, <https://doi.org/10.5194/piahs-381-121-2019>, 2019
