# System User Manual

## Introduction

This manual provides instructions for the operation and maintenance of the XYZ System. Designed to ensure ease of use, this guide will help you understand the system's features, setup procedures, and troubleshooting tips.

## Getting Started

### System Requirements

- Operating System: Windows 10 or newer, macOS X 10.14 or newer
- RAM: Minimum of 8GB
- Processor: Intel Core i5 or equivalent
- Hard Disk Space: At least 20GB of free space
- Internet Connection: Broadband with minimum 10 Mbps speed

### Installation Process

1. **Download the Installation File:** Go to the XYZ System website and download the latest version of the installation file.
2. **Run the Installer:** Double-click the downloaded file and follow the on-screen instructions. Agree to the terms and conditions to proceed.
3. **Choose Installation Directory:** Select a destination folder for the system files or use the default path recommended.
4. **Complete the Installation:** Click 'Install' to begin the installation process. Once completed, click 'Finish' to exit the installer.

## Basic Operations

### Logging In

1. Launch the XYZ System application.
2. Enter your username and password in the provided fields.
3. Click 'Login' to access the system dashboard.

## Creating a New Project

1. From the dashboard, click on 'New Project'.
2. Enter the project details including name, description, and start date.
3. Click 'Create' to initiate the new project.

## Managing Users

- **Add a New User:** Navigate to 'Settings' > 'Users' > 'Add New'. Fill in the user details and click 'Save'.
- **Edit User Information:** Click on a user's name from the list, make any changes, and select 'Update' to save.
- **Remove a User:** Select the user to remove and click 'Delete'. Confirm the action by clicking 'Yes'.

## Advanced Features

## System Customization

The XYZ System allows for extensive customization to suit your workflow. Access 'Settings' > 'Customization' to modify interface elements, notification settings, and more.

## Data Backup and Recovery

- **Backup:** Regularly back up your data by navigating to 'Settings' > 'Backup' and clicking 'Start Backup'.
- **Recovery:** To recover data, go to 'Settings' > 'Recovery', select the backup file, and click 'Restore'.

## Troubleshooting

**Common Issues**

- **Login Failure:** Ensure you're entering the correct username and password. If the issue persists, reset your password.
- **Installation Errors:** Verify that your system meets the minimum requirements and that you have enough disk space. Restart the installation process.
- **Project Saving Errors:** Check your internet connection and make sure you have sufficient permissions to save projects.
