Standard Batch Ovens

INTEK offers standard batch ovens in several popular sizes and configurations. Table top, free-standing, walk-in and pass through ovens are among the most popular.

Choose a standard batch oven to fit your specific application or consider one that is custom designed.

The INTEK list of customers includes many Fortune 500 companies who have found attractive solutions to their unique process heating applications. All INTEK ovens feature robust construction for industrial use.

ENGINEERED SOLUTIONS - STANDARD OVENS

- Robust industrial design
- Pre-wired control panel
- Fully tested
- Fully assembled
- Shipped in one piece

OVEN	INTERNAL			EXTERNAL			KW	AMPS	VOLTS

- Free Testing
- Free Quoting

Custom, triple-stacked electric infrared batch oven

The Custom Batch Oven Approach

Many customers have found INTEK's custom approach the best way to address their special requirements without breaking the budget. It begins with a no charge conversation about project goals. INTEK's professional approach and sensitivity toward protecting each customer's proprietary interest is paramount to the success of each project. Feasibility testing is an important next step, also provided at no charge. The data gathered during the testing phase, serves as the basis for each custom oven created by INTEK's design team.
