## IDEAL SETTINGS

- PATIOS
- VERANDAS
- OUTDOOR CAFES
- SIDEWALK SEATING
- CLUBHOUSES
- SUNROOMS
- GAZEBOS
- PORCHES
- DECKS

## RADIANT INFRARED WARMS LIKE THE SUN

Zonall heaters gently warm like the sun, directing safe, natural infrared energy toward people and objects just like the sun warms you and your surroundings on a summer day.

## CONSERVES ENERGY - IMPROVES COMFORT

Direct-radiant infrared heating is an efficient yet effective way to manage the comfort of any area, large or small. Zoned heating refers to the process of warming individually controlled “zones” for the comfort of the individual. This approach provides comfort for dining and gathering in specific areas where it is desired without the extra cost associated with unnecessarily heating dead space or open air.
