Warranty, Installation and Maintenance

RE: Acrylic pegboards, Backsplash and Accessories

Thank you for purchasing one of INTER DYNE SYSTEM'S acrylic products! Here at Inter Dyne, we take pride in our manufacturing process, providing customers with products of the highest quality, free from any defects. We are confident that you will be happy with your purchase.

Upon receipt of your order, please take care to inspect the products to be sure that they have been made to order, and that there has been no damage during shipping. On your invoice you will find a statement indicating that there is a 5-day window to report any damage you should find. In this unlikely event, please contact us or the dealer that you purchased from, and we will assist you promptly.

Because of the nature of the acrylic material, we do not offer an extended warranty beyond the initial 5-day window.

Acrylic is easily scratched and cracked, and will yellow in time, if not maintained properly. To ensure that your acrylic products look as beautiful as the day you received them, please use only clear water and a soft cloth for cleaning. Do not allow any chemicals to come into contact with the acrylic, as it will cause certain damage.

CAUTION: Incorrect installation will result in cracking of the acrylic.

In the event of field-drilling the acrylic, remember to CAREFULLY drill and tap the holes using machine screws only - DO NOT OVER TIGHTEN.

On behalf of everyone at Inter Dyne Systems, thank you for trusting us with your laboratory needs.
