

JOUBI.COM

A playful take on the mainline JOUBI collection JB by JOUBI has a duality of inspiration; the tangible and the abstract. Founder Joanna Bourne draws from both the experiential beauty found in nature as well as beauty in the ethereal. Whether it be the celestial phenomenon of the Aurora Lights or the mystery of the Bermuda Triangle these aerial and astral influences both compliment and contrast her work drawn from nature.

The collection is made out of solid silver with yellow, rose, white and blackened gold plating and features a wide range of semi-precious stones and enamel lacquer detailing; making each piece a statement to wear on its own or to layer.

Mix, match and stack both inspirations to create a versatile and unique look no matter what JB combinations.

Joubi was founded in London in 2010 by Joanna Bourne.

After having completed a degree in publishing, London born Joanna decided to indulge her passion for jewellery and jewellery design by embarking on a career in it and subsequently founded Joubi. She graduated from the Gemological Institute of America in London in 2011.

Taking the inspiration for her work from her years of travel, her love of animals and from her fascination with natural materials, metals and gem stones, Joanna has created a diverse and charming collection.

Unlike other jewellery brands, Joubi's pieces are designed with the individual wearer in mind rather than a particular fashion style or look. This is so that the wearer can express their own style and yet still feel that the piece is complimentary to their own look. In this way the chosen piece will take on its own form depending on who the wearer is and in what context the piece is being worn, whether that be at a glamorous formal event or simply a relaxed evening with friends.
