PROBIOTIC CLEANING SYSTEMS

Exceptional Odor Control

PRODUCT INFO

This product begins by adding 500,000,000 colony forming units (CFU) of Nature's naturally occurring bacteria and enzymes, to remediate what has been lost as a result of toxic waste.

Furthermore, these natural bacteria will continue working down-stream and only proliferate when and where it is needed.

Secondly, we have added an odor modifier that will alter mal-odor molecules in such a way that they will no longer smell. This technology has been successful in eliminating odors in Waste Water Treatment Lift-stations.

What is Remedi?

Derived from Bioremediation - this highly effective line of products containing specialized, friendly bacteria and enzymes, can truly be referred to as Probiotics for industrial, commercial and residential environments. Our integrated chemistry of ecologically focused ingredients accelerate the emulsification and dissolution of targeted soils and pollutants.

- Going beyond green & sustainability, these products support the rapid return of our environments to their natural state
- Unique blends that target specific soils & pollutants, including long-chain & short-chain hydrocarbons
- Improves air quality; reduces hydrogen sulfide, indoor air-pollution & other foul odors, while enhancing healthy BOD, COD levels
- Continued environmental benefits throughout drains, sewer system networks and water tables

DIRECTIONS FOR USE

Apply by hand, scoop or shovel. Cover the entire area to be treated, extending two to three feet beyond the back-up.

Advantages

- Greatly reduces labor time
- Contains no chemicals
- Reduces hydrogen sulfide
- Changes biomass dynamics
- No special equipment needed
- Increases system efficiency
- Breaks down fat and grease build-up
- Eliminates malodors at source
- Enhances BOD/COD & lignin removal
- Cost-effective & easy to use
- Degrades a wide range of organics
- Reduces sludge build-up

This product has been successfully tested, proven and purchased by The City of Santa Fe, NM.
