PROBIOTIC CLEANING
SYSTEMS

MAINTAINS CLEAR DRAINS

PRODUCT INFO

Eliminates sticky or tacky floors caused by previous cleaning and mopping chemicals. Leaves no soil attracting residue while eliminating slippery floors. Safe on tile & floor-finish, composite & wood flooring.

Absorbs down into grout lines, continually digesting fats, oils and greases. With regular mopping, grout lines will be free of stains and restored in 60 to 90 days while continuing to deep clean.

Continues working to unclog floor-drains, and even deodorize and condition our sewer systems. Naturally deodorizes while eliminating the growth of fruit flies.

What is Remedi?

Derived from Bioremediation - this highly effective line of products containing specialized, friendly bacteria and enzymes, can truly be referred to as Probiotics for industrial, commercial and residential environments. Our integrated chemistry of ecologically focused ingredients accelerate the emulsification and dissolution of targeted soils and pollutants.

- Going beyond green & sustainability, these products support the rapid return of our environments to their natural state
- Unique blends that target specific soils & pollutants, including long-chain & short-chain hydrocarbons
- Improves air quality; reduces hydrogen sulfide, indoor air-pollution & other foul odors, while enhancing healthy BOD, COD levels
- Continued environmental benefits throughout drains, sewer system networks and water tables

DIRECTIONS FOR USE

Shake gently before use (unless you are using the Remedi Automatic Dispensing System).

Dilutions according to soil level:

Heavy soil:

- 4 ounces per gallon of water
- 16 ounces per 4 gallon mop bucket

Medium to Light soil:

- 2 ounces per gallon of water
- 8 ounces per 4 gallon mop bucket

Dilution ratios may be adjusted once floors become restored.

Consult your Remedi Representative about our Automatic Dispensing System.

Instructions:

Add diluted product to mop bucket.

Proceed to mop floor with diluted solution.

Scrub or agitate heavily soiled areas if necessary, then mop off dissolved soil.

Always pour dirty mop bucket contents into floor-drains to allow product to condition and deodorize plumbing.
