PROBIOTIC CLEANING SYSTEMS

Exceptional Odor Removal

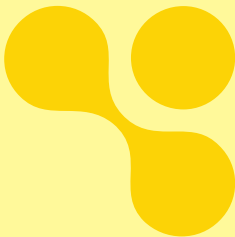

PRODUCT INFO

A specific blend of natural, friendly bacteria plus free enzymes, have all been selected for their abilities to accelerate the degradation of organic wastes, proteins, starch, sugars, FOG (Fats • Oils • Greases), toilet paper and other cellulose materials.

This powerful combination, including our addition of free-flowing cellulose enzymes, will improve the activity of the septic system; reduce the need for pump outs, costly repairs, and vastly improve drainage.

In addition to this dramatic reduction of septic related waste, noticeable results in odor reduction will become apparent and maintain an odor-static environment.

What is Remedi?

Derived from Bioremediation - this highly effective line of products containing specialized, friendly bacteria and enzymes, can truly be referred to as Probiotics for industrial, commercial and residential environments. Our integrated chemistry of ecologically focused ingredients accelerate the emulsification and dissolution of targeted soils and pollutants.

- Going beyond green & sustainability, these products support the rapid return of our environments to their natural state
- Unique blends that target specific soils & pollutants, including long-chain & short-chain hydrocarbons
- Improves air quality; reduces hydrogen sulfide, indoor air-pollution & other foul odors, while enhancing healthy BOD, COD levels
- Continued environmental benefits throughout drains, sewer system networks and water tables

DIRECTIONS FOR USE

Ready-to-use dissolvable packets

Dosage for Septic Tanks:

An initial Shock of 2 to 3 packets may be added.

- Families of 4+ should maintain with 1 packet every 2 to 4 weeks
- Families of 4- should maintain with 1 packet every month

For Use in RV's or drainage areas

- RV's; 1 packet per turn-over
- To enhance the natural biology of Drainage areas & Cesspools; an initial shock of 3 packets should be added, then maintained with 1 to 2 packets per month.

Instructions:

Simply place 1 packet into toilet.

Flush toilet

septic smart

**After using Remedi SEPTIC for one year, we had tank pumped-out and cleaned:
After the service company finished, I simply asked; *Did you notice anything different?*
Their answer was; *Yes, we didn't have to do any cleaning.*
*In fact we have never seen a septic this clean before!***

Remedi **SEPTIC** is a powerful powdered product for use in septic tanks, cesspools and RV's to accelerate the degradation of organic waste compounds such as grease, fat, protein, starch, sugar and cellulose.

This formula also contains stabilized, free-form cellulase enzymes, providing a dramatic reduction in the volume of cellulose, such as toilet paper and other paper-material.

SEPTIC immediately begins reducing odor, and within two days will produce dramatic odor elimination.

This unique synergistic blend greatly improves drainage by enhancing the natural biology within cesspools and septic tanks, reducing the need for unnecessary maintenance or costly repairs:

Septic tank operating efficiently can be adversely affected by large quantities of organic waste such as FOG (fats, oils & grease), proteins, starches and paper. If these wastes are not effectively broken down, the septic tank must be pumped out more regularly to avoid foul odors and back-ups.

While paper in particular can be very detrimental to a system's efficiency, **SEPTIC's** bacterial blend is formulated with exceptional cellulase producing bacteria to ensure a high volume reduction of paper products.

Advantages:

- Convenient dissolvable packets
- Proprietary, application-specific blend
- Dramatic volume reduction of organic waste
- Very effective odor reduction
- Reduce the need for cleaning. Improves drainage
- Enhances the natural biology of cesspools, septic tanks, and drainage areas.
- Stabilized cellulase for faster breakdown of toilet paper and cellulosic material
- Effervescent formulation for faster dissolution
- Increased system efficiency
- User & environmentally safe

Going beyond green & sustainability, Remedi bioremediation & cleaning products support the return of our environments to their natural state.
