CONSTRUCTION

- Handcrafted, our decorative glass panels stay true to their stained glass roots.
- Our selection of premium art glass and bevels, which makes our designs come to life, are hand cut and fitted. Careful consideration is given to choosing textures; complementing elements are crucial to a design's given appeal.
- Using solid metals, where all of the joints are soldered by hand, ensures the panels will be strong enough to withstand daily use.
- Once assembled, the panel undergoes a thorough cleaning and inspection process. This attention to detail is our assurance of quality to you.

GLASS VARIATION

Decorative pattern glass is handmade. Through this process, slight imperfections or discolourations are inherent characteristics of all handcrafted glass. Bubbles or seeds, slight surface flaws and subtle variations in textures vary depending on the pattern. Some glass patterns, like Swirl and Drawn, are more likely to have these inclusions. They are not considered defects.
